NOTIFICATION.

State Scholarship of £200 per annum tenable in the United Kingdom by European and Anglo-Indian Girls or Women Domiciled in India.

THE scholarship will be granted for educational or medical training and will be tenable in the United Kingdom for a period of three years in the first instance, with possibility of extension in special circumstances, and in particular in the case of medical students, to four and five years. The scholarship will carry with it no conditions as to any subsequent career or service under Government, and no expectation of such employment is held out

2. The term "educational training" will be held to include (*a*) training for teaching in secondary institutions, (*b*) training in domestic sciences, (*c*) training as teachers of modern European languages, (*d*) training as music mistresses, (*e*) training as art teachers, (*f*) training in Kindergarten methods.

3. The scholar will be selected by the Government of India from among candidates nominated by the Local Governments. Intending candidates are requested to make application to the Inspector of European Schools, Bengal, No. 285, Bow Bazar Street, Calcutta, from whom further particulars may be obtained, in time to reach the Director of Public Instruction not later than January 15th. The application should be accompanied by (1) evidence of having obtained the B.A. degree or, in the case of a medical candidate, a degree in medicine of an Indian University; (2) a medical certificate of fitness to undergo abroad the course of study proposed; (3) a certificate of age; (4) a certificate from some person of recognised position well acquainted with the candidate, to the effect that she is a native of India within the meaning of Statute 33 Vict., Chap. 3, section 6, and that her parents are not resident in India for temporary purposes only; (5) the names, addresses and other particulars of friends or relatives in the United Kingdom to whom the applicant's parents or guardians are willing to commit her guardianship during vacation.

4. The selected candidate will be provided with a second class passage to England, and with a second class return passage if she completes the full period of residence or is compelled by sickness to return within that period.

APPOINTMENT OF A COMMITTEE TO CONSIDER CERTAIN QUESTIONS RELATING TO RULES REGULATING THE USE OF MOTOR-CARS, MOTOR-CYCLES AND MOTOR-CABS IN CALCUTTA AND HOWRAH.

POLITICAL DEPARTMENT.

POLICE.

RESOLUTION—No. 8480 P.

CALCUTTA, THE 28TH NOVEMBER 1913.

READ—

Notifications No. 1180 J.—D., dated the 22nd June 1908, and No. 2425 J., dated the 20th September 1910, publishing rules regulating the use of motor-cars, motor-cycles and motor-cabs in Calcutta (including suburbs) and Howrah.

Read also—

Letters No. $\frac{\text{G. 1301-13}}{7192}$, dated the 16th July 1913, and No. $\frac{\text{G. 1331-13}}{9363}$, dated the 1st October 1913, from the Commissioner of Police, Calcutta.

THE Commissioner of Police, Calcutta, has submitted a proposal to amend the rules cited in the preamble and has suggested the appointment of a

Committee to consider the following matters :—

I.—With regard to all classes of motor vehicles—

(*a*) whether licensed drivers who are reported to be incompetent should be re-examined ;

(*b*) whether the use of horns should be regulated ;

(*c*) whether any changes are required in the rules relating to traffic ; and

(*d*) whether any other changes in the rules are required.

II.—With regard to heavy motor-cars—

(*a*) what kind of tyres should be allowed, especially in the case of steam and petrol motor tractors ;

(*b*) whether heavy motor-cars should be restricted to certain streets ;

(*c*) whether the speed limit of heavy motor-cars should be raised ;

(*d*) whether the rules in respect of the use of trailers should be amended ; and

(*e*) whether rules should be framed for motor-omnibuses.

III.—With regard to motor-cabs—

(*a*) whether the types of motor-cars to be used as motor-cabs should be prescribed ;

(*b*) whether the use of "engaged" labels should be prescribed to warn the public that the cab is not available for hire ; and

(*c*) whether a schedule of fares should be drawn up and rules framed making penal the non-payment of fares.

2. The Governor in Council accepts the proposal of the Commissioner of Police and desires that a Committee consisting of the following members should consider the question :—

(1) Commissioner of Police, Calcutta, *President.*
(2) Chief Engineer and Shipwright Surveyor.
(3) Mr. E. J. Oakley, of Messrs. Kilburn & Company.
(4) Mr. R. A. A. Jenkins, of the P. & O. Steam Navigation Company.
(5) Mr. J. P. Wyness, a representative of the Calcutta Corporation.

If any further rules on the subject or any modifications of existing rules are deemed to be necessary, they should be drafted by the Committee and submitted for the approval of Government.

ORDER.—Ordered that copies of the resolution be forwarded to the Chairman of the Calcutta Corporation ; Mr. J. P. Wyness ; the Chief Engineer and Shipwright Surveyor ; Mr. E. J. Oakley ; Mr. R. A. A. Jenkins, for information, and to the Commissioner of Police, Calcutta, with the request that he will be so good as to take the necessary steps to convene the Committee.

By order of the Governor in Council,

J. G. CUMMING,

Offg. Chief Secy. to the Govt. of Bengal.

H. L. STEPHENSON,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 5279.—The 4th December 1913.—Whereas certain land was required by the Bengal Government, under the provisions of Act I of 1894 and Act XVIII of 1885, for a public purpose, viz., for Charanpur No. 3 Assisted siding of the East Indian Railway, which takes off the Sitarampore-Baraboni Loop at mile 132 feet 2,800 and extends to mile 132 feet 5,000, such land being edged with pink on the plan L. A. M. A. No. 229, and whereas coal mines are situate under the said land, and whereas Messrs. Apcar & Company have given notice to the Government of Bengal, in accordance with the provisions of Act XVIII of 1885, that the said Company intend to work the seam, known as the Poninta seam, and whereas the mines have been inspected by the officer appointed by the Bengal Government for the purpose under section 5 (1) of Act XVIII of 1885, and whereas it appears to the Bengal Government that the working out of the coal of the mines underlying the said land is likely to cause damage to the surface of the said land and to the

Burdwan.

works constructed thereon, and whereas the said Messrs. Apcar & Company have agreed not to work and get minerals underlying the land acquired for their siding, or underlying the land acquired for the branch or other lines with which the siding is connected or underlying the land of the branch or branches connecting the said siding with the main line, in such a manner as to injure or to endanger the safety of the undertaking or any part thereof, nor to claim any compensation for any restricted working:

Now, therefore, the Governor in Council is pleased to declare, under section 5, sub-section (2), clause (*b*) of the abovementioned Act XVIII of 1885, that the working shall be carried on by the said Messrs. Apcar & Company in the manner and subject to the restrictions below specified, viz.:—

Galleries not exceeding 12 feet in height by 12 feet in width may be driven at distances apart not less than 50 feet centre to centre, leaving pillars not less than 38 feet square, to be left unworked for the support of the acquired land:

Provided that under the land lying between No. 2 pit and No. 3 pit, such galleries shall be driven as shown by the red centre lines on the plan.

Manholes not exceeding six feet in height by three feet in width by four feet in depth may be made where required by any rules made under the Indian Mines Act, 1901.

Any inrush of water, quicksand or soft material shall be reported to the Chief Inspector of Mines without delay.

These restrictions apply to the Poniata seam only and to the area edged with pink on the plan, and Messrs. Apcar & Company shall give notice, under section IV of the Land Acquisition (Mines) Act, 1885, of their intention to work any other seam under such area or to work coal under any other area of acquired line, and that in all the above cases, except to comply with the above conditions, no further excavation shall be made in any of the galleries which already have been driven, the actual heights and widths of which have been carefully recorded on the plan marked L. A. M. A. No. 229 signed by the Chief Inspector of Mines.

The plan referred to may be seen in the office of the Chief Inspector of Mines in India by the parties concerned.

No. 2142M.—The 3rd December 1913.—The following draft rules, which, in exercise of the power conferred by section 290 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), His Excellency the Governor in Council proposes to make in supersession of rules (1) to (9) published under Eastern Bengal and Assam Government Notification No. 310M., dated the 19th January 1909, and subject to which the Commissioners of the Narayanganj Municipality may allow communication-pipes to be laid down from the service-pipes of the Commissioners for the purpose of leading water to premises for domestic purposes only, are published for the information of persons likely to be affected thereby.

II. The draft rules will be taken into consideration on the 16th January 1914 and any objection or suggestion which may be received by the undersigned through the District Magistrate and the Divisional Commissioner before that date will be duly considered.

Draft Rules.

1. So long as the Commissioners deem it practicable and consistent with the maintenance of an efficient water-supply, they may allow any owner or occupier of a holding paying a water-rate imposed under the provisions of Part VII of the Bengal Municipal Act, 1884, on the annual value of such holding when such annual value is not less than Rs. 100 to lay down communication-pipes from the service-pipes of the Commissioners for the purpose of leading water to such holding for domestic purposes only, subject to the following rules and conditions.

2. The owner or occupier of any holding requiring water to be laid on to such holding for domestic purposes, or requiring any addition or alteration to an existing water-supply must apply for the same on a printed form to be supplied free of cost at the Municipal Office.

3. A fee of Rs. 2 must be paid to the Commissioners by such owner or occupier for each connection before any work is commenced. This fee must be paid at the time when the application for the connection is deposited, and will be in addition to all other costs and charges imposed under these rules.

4. (*i*) Each holding shall have a separate connection from a service main, and extensions from the communication-pipe of one holding to another shall not be allowed.

(*ii*) A branch main may be allowed to rate-payers applying for the same at their own expense and from the branch main connections to holdings may be extended. Such branch main when laid down shall be the property of the Municipal Commissioners.

5. The owner or occupier of the holding in respect of which the connection is required, must pay the entire cost of the connection, including the supply and fixing of the fittings referred to in rule 7, and must also pay the cost of such alterations in or repairs to, roads, drains, sewers, gas or water mains or pipes and the cost of such other works as may be necessitated by, or result from, the work of making such connection.

6. (*i*) The work required may, at the option of the Commissioners, either be carried out by the Commissioners themselves at the expense of the owner or occupier of the holding in respect of which the work is required, or may be carried out by a person or firm employed by such owner or occupier and approved by the Commissioners.

(*ii*) No laying down, repair, alteration, removal or extension of any communication-pipes and fittings shall be undertaken except under the direct supervision of the Water-works Engineer of the Municipality.

7. A holding connection shall comprise the following parts or fittings:—

(*a*) a brass or gun-metal ferrule inserted in the main supply pipe,

(*b*) a galvanized iron communication-pipe from the ferrule to the meter,

(*c*) a stop-cock and its surface-box,

(*d*) a meter,

(*e*) service-pipes from the stop-cock to the taps, and

(*f*) taps.

8. (*i*) All the fittings referred to in rule 7 shall be exact duplicates of standard samples kept in the office of the Commissioners, and approved by them in a meeting.

(*ii*) All fittings shall be inspected and tested and stamped by an officer of the Municipality before being fixed.

(*iii*) If any owner or occupier shall desire to adopt any fitting of a pattern different from the standard patterns he must present such fitting for the approval of the Chairman, and any fittings so presented may, if considered satisfactory by the Chairman, be stamped and samples thereof may be purchased and placed among the standard fittings.

9. Every communication-pipe must be capable of withstanding a pressure of a column of water 100 feet in height and must be of a quality approved by the Water-works Engineer of the Municipality.

10. (*i*) Whenever any communication-pipe has to be laid across a sewer or open drain or in any place where in the opinion of the Commissioners it is liable to injury or contamination, such pipe must pass through a cast-iron pipe of sufficient length to afford due protection to the communication-pipe.

(*ii*) No more bends or elbows than are absolutely necessary shall be allowed in any communication-pipe. No bend by heating and no gradual bend or long sweep such as is likely to cause the pipe to split shall be allowed.

11. The stop-cock and its surface-box shall be placed as near as practicable to the points where the supply-pipes enter the holding to be supplied, but must not be within any private premises. The surface-box shall be so designed that it can be locked and the key of it shall remain under the control of the Water-works Engineer. The stop-cock shall be capable of adjustment so that the supply to the holding may be regulated thereby.

12. (*i*) The meter shall be placed as near to the stop-cock as possible and in a position where it can be conveniently examined.

(*ii*) The meter must be fixed in a brick chamber covered over with a cast-iron surface-box of approved pattern.

(*iii*) Subject to the provisions of rule 13, no meter must be touched or interfered with in any way except with the permission of the Chairman.

13. The Commissioners shall depute an authorized person to read every meter not less than once a quarter, and shall give notice to the occupier at least twenty-four hours before the reading is recorded.

14. Not more than one cistern connection shall ordinarily be allowed to any holding. All cistern connections shall be provided with a ball-cock. The size of all cisterns permitted shall be regulated by the Commissioners.

15. (*i*) No connection shall in any case be sanctioned unless and until the applicant makes provision to the satisfaction of the Commissioners for draining away waste water.

(*ii*) When the holding is within 50 feet of any public drain, a connection from the service-pipes shall not be sanctioned, unless and until the applicant constructs a drain of masonry work for carrying off the waste water to the said public drain.

16. When the Commissioners are satisfied that any owner or occupier of a holding having a connection from the service-pipe has wilfully contravened or has failed to observe any of the above rules and conditions or continues to wilfully waste water after having been warned against doing so, they may turn off the water from such holding for such time as they may think fit.

17. (*i*) Every owner or occupier of any holding in respect of which a connection has been made under these rules shall be entitled to a supply of 3,000 gallons of water per quarter for each rupee paid by him quarterly as water-rate in respect of such holding.

(*ii*) For all water in excess of the amount allowed under sub-rule (1) such owner or occupier shall be charged quarterly as follows:—

	Per 1,000 gallons. Rs. A.
(*a*) For any excess quantity of water not exceeding one-half of the amount of the free allowance.	0 6
(*b*) For any excess quantity of water exceeding one-half of the amount of the free allowance, but not exceeding the amount of free allowance.	0 8
(*c*) For any excess quantity of water exceeding the amount of the free allowance, but not exceeding twice the amount.	0 12
(*d*) For any excess quantity of water exceeding twice the amount of the free allowance.	1 4

18. If the owner or occupier of any holding which is supplied with water under these rules shall refuse or neglect to pay any of the fees or charges imposed in accordance with these rules for a space of fourteen days after he has been served with a notice of demand for the same, the Commissioners may, at any time after the expiration of that period, and without further notice, disconnect any pipe forming part of the connection made in respect of such holding, and may recover the cost of disconnecting such pipe from such owner or occupier:

Provided that the disconnection of such pipe shall not relieve any person from any liabilities which may have been incurred under these rules.

19. The sizes of the ferrules and the diameter of the communication-pipe referred to in clauses (*a*) and (*b*) of rule 7, and the number of taps shall be fixed in accordance with the annual valuation of the holding as follows:—

Annual valuation of holding.	Sizes of ferrule.	Diameter of communication-pipe.	Number of taps.
Under Rs. 200 ...	$\frac{3}{16}$ inch.	$\frac{1}{2}$ inch.	1
From „ 200 to Rs. 399 ...	$\frac{1}{4}$ „	$\frac{1}{2}$ „	2
„ „ 400 „ „ 599 ...	$\frac{3}{8}$ „	$\frac{5}{8}$ „	3
„ „ 600 „ „ 899 ...	$\frac{7}{16}$ „	$\frac{5}{8}$ „	4
„ „ 900 „ „ 1,199 ...	$\frac{1}{2}$ „	$\frac{3}{4}$ „	5
Rs. 1,200 and above ...	$\frac{5}{8}$ „	$\frac{7}{8}$ „	6

Every tap shall be of the same size as the pipe to which it is attached, and shall be of brass and of the pattern known as screw-down. Every tap shall be at least three feet above the surface of the earth in the holding.

No. 2156M.—The 4th December 1913.—In exercise of the power conferred by section 27 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to appoint Mr. W. F. Davie to be a Commissioner of the Garden Reach Municipality, in the district of 24-Parganas, *vice* Mr. H. M. Peat, resigned.

24-Parganas.

No. 2158L.S.-G.—The 3rd December 1913.—In exercise of the power conferred by section 138, clauses (*i*), (*l*) and (*t*) of the Bengal Local Self-Government Act of 1885 (Bengal Act III of 1885), read with section 3 of the Bengal, Bihar and Orissa and Assam Laws Act, 1912 (VII of 1912), the Governor in Council is pleased to make the following amendments in the District Engineer's Account Rules published with notification, dated the 1st July 1888, at page 263 of Part IB of the *Calcutta Gazette* of the 4th *idem*, as amended for Eastern Bengal by Eastern Bengal and Assam Notification No. 459M., dated the 18th January 1910, and for Western Bengal by Bengal Government Notification No. 473L.S.-G., dated the 6th March 1908, namely:—

(*1*) *For* rule 2 in Part IXA of the said District Engineer's Account Rules for Western Bengal, *substitute* the following:—

2. (*1*) An imprest may be granted by the District Board to the District Engineer of such amount as the Board may from time to time fix, provided that it shall in no case exceed Rs. 1,000.

(*2*) No portion of the District Engineer's cash imprest shall, on any account, be kept outside the safe.

(*2*) *For* rule 4 in Part IXA of the said District Engineer's Account Rules for Eastern Bengal, *substitute* the following:—

4. Disbursements by the District Engineer and his subordinates shall, as a rule, be confined to payments not exceeding Rs. 50 and Rs. 20, respectively. All cash payments by the District Engineer and his subordinates shall be met from the imprest.

(*3*) *Cancel* rules 3A and 4A in Part IXA of the said District Engineer's Account Rules for Eastern Bengal.

(*4*) *After* rule 4 in Part IXA of the said District Engineer's Account Rules both for Eastern Bengal and Western Bengal, *insert* the following:—

4A. (*1*) Each officer or subordinate with whom an imprest account is to be kept will, when the account is first opened, receive from the District Board or the District Engineer a round sum as standing advance or imprest which must at once be entered in an account in District Engineer's Form No. 1.

The disbursements from this advance shall be entered daily as they are made, clearly and in full detail; and from time to time as the imprest-holder finds it necessary, the account shall be closed and balanced.

(*2*) The right hand half page of the said form shall be cut off and sent to the authority from whom the imprest is held, and the counterfoil retained by the disburser. The said account must be supported by the necessary vouchers numbered and attached to it, so as to correspond with the order of the entries in column 2 "Voucher number of District Engineer's Form No. 1."

(*3*) The authority to whom the account is submitted, after carefully scrutinizing the account with the vouchers as regards the propriety of the payments, the clearness and accuracy of the entries and the sufficiency of the vouchers, shall reimburse the imprest-holder the exact sum expended, so as again to bring the imprest cash in hand up to the original amount.

(*4*) The District Engineer shall, when reimbursing his subordinates, incorporate their accounts, item by item, in his own account. He shall also note the amount remitted to his subordinate in red ink in the counterfoil of his own account.

4B. (*1*) The District Engineer and his subordinates who have to pay money out of the imprest shall write the amount of each sub-voucher in words and figures over their initials, and shall stamp each of them immediately "Paid in cash."

(*2*) Each entry in the imprest cash-book shall be checked with the sub-vouchers and initialled by the District Engineer or his subordinate, as the case may be, and he shall also sign a certificate in the imprest cash-book whenever the imprest is recouped, to the effect that the balance shown in the cash-book is correct and has been personally verified by him.

(*3*) The District Engineer or his subordinate shall also check the book balance of his own imprest with the actual balance in his possession, and shall see that the sub-vouchers are duly receipted by the payees.

4C. (*1*) The totals and balances of all imprest and sub-imprest accounts submitted for recoupment shall be written in words and figures, and all corrections in sub-vouchers and imprest accounts shall be attested by the drawing officer, without which the bill must not be passed.

(*2*) When signing his accounts for recoupment, the District Engineer shall compare each entry in the account with the sub-vouchers by stamping them "Cancelled," so that they cannot be used again, and shall total and initial the column "Amount of each payment" in the imprest cash-book and the column "Total" in the abstract of charges, the cross total of which should agree with the former.

(*3*) The following further certificate shall be added by the District Engineer in the imprest cash-book :—

"Received contents and certified that I have compared the entries in the imprest account with the sub-vouchers and have attached them in original to the recoupment bill."

(*4*) Every cheque in favour of the District Engineer shall be made payable to "order," and shall be compared by him with the imprest bill in payment of which it is issued at the time of endorsing the cheque for encashment.

The amount of each recoupment shall be separately remitted to the subordinate, and not with other dues, and shall be checked by the District Engineer once a month with money-order acknowledgment or separate receipt, which must be obtained at once, the entry in the imprest cash-book being initialled in token of check.

(*5*) The District Engineer's imprest cash account shall be closed on the 27th of every month, to admit of the transactions up to that date being included in the month's account of the District Board, provided the expenditure does not fall below Rs. 10, which is the minimum amount for which cheques are issued on the treasury.

4D. The imprest cash must not be kept in the hand of the Accountant or clerk who writes the imprest cash-book. When any employee acts as cashier in respect of the District Engineer's imprest, he shall deposit a security of not less than Rs. 100, which, in the case of a clerk who is already employed by the Board, will be recovered in ten monthly instalments from his pay. In the case of a new appointment, the security shall be deposited immediately on the clerk joining the appointment.

(5) *For* rule 5 in Part IXA of the said District Engineer's Account Rules both for Eastern Bengal and Western Bengal, *substitute* the following:—

5. (*1*) No miscellaneous receipts, such as the sale-proceeds of materials or produce, fines or refund, etc., must be realized by the District Engineer or his subordinate without granting a receipt in the following form. The form shall be printed and bound in books with counterfoils, each book containing 100 forms, and the forms in each book having printed serial numbers. The total amount received shall be written in words both on the receipt itself and on the counterfoil. The latter need only be initialled by the officer who signs the receipt:—

(*2*) As soon as the amount is realized, it shall be entered in the Register in Form 1-A (reproduced below) and remitted to the treasury. Every such remittance shall be accompanied by a challan (Form No. 2) in triplicate, bearing the initials of the remitter. The original challan shall be returned by the Treasury Officer and the others shall be returned duly receipted to the District Engineer, who shall forward the duplicate to the District Board's office, retaining the triplicate in his office. If cheques are tendered in payment of miscellaneous receipts, they shall be endorsed "Pay by transfer to the credit of the District Fund."

(*6*) *For* rule 12 in Part IXA of the said District Engineer's Account Rules for Eastern Bengal, *substitute* the following:—

12. Road metal shall be accounted for in Form No. 9, which shall be kept up for each road separately, and shall be finally recorded in the District Engineer's office.

(7) *Cancel* Form No. 10 appended to the said District Engineer's Account Rules for Eastern Bengal; and *for* Form No. 9 appended to the said rules both for Eastern Bengal and Western Bengal, *substitute* the following Form:—

NOTES.

1. This return of the disposal, mile by mile, of metal collected for consolidation should be prepared monthly by the Subdivisional Officer, and forwarded by him to the District Engineer's office, where it will be recorded.
2. For permanent record in the Subdivisional Office, these forms will be bound in a book, loose sheets being submitted to the District Engineer monthly.
3. The balance of metal in each mile should be shown monthly, whether there are any transactions on it during the month or not.
4. No yearly register or return of road metal will be required, and the only other record necessary will be the rate-book (Form No. 11).
5. Examiners will test-audit these returns during the course of their periodical inspections.
6. This form may, at the discretion of the District Board, be separately printed or lithographed for each road.

THE SCHEDULE.—PERSONS WHO ARE ENTITLED TO HAVE THEIR NAMES ENTERED IN THE REGISTER OF MEDICAL PRACTITIONERS.

A BILL

to provide for the registration of Medical Practitioners in Bengal.

Preamble

WHEREAS it is expedient to provide for the registration of medical practitioners in Bengal:

And whereas the sanction of the Governor General has been obtained, under section 5 of the Indian Councils Act, 1892, to the passing of this Act; 55 & 56 Vict., c. 14.

It is hereby enacted as follows:—

Preliminary.

Short title, local extent and commencement.

1. (*1*) This Act may be called the Bengal Medical Act, 1913; [*Cf.* Bombay Act VI of 1912, s. 1 (*1*), (*3*).]

(*2*) It extends to the whole of Bengal; and

(*3*) It shall come into force on the day on which it is published in the *Calcutta Gazette* after having received the assent of the Governor General:

Provided that sections 26 and 27 shall not come into force until a date to be appointed in this behalf by the Local Government by notification in the *Calcutta Gazette*.

Definitions.

2. In this Act,— [*Cf.* 59 & 60 Vict., c. 14, Sch. II Bombay Act VI of 1912, ss. 1 (*3*), 2 (*1*).]

(*a*) the expression "the Medical Acts" means the Medical Act and the Acts amending the same; and 21 & 22 Vict., c. 90.

(*b*) the expression "the Council" means the Council established under section 3.

The Bengal Council of Medical Registration.

Establishment of the Bengal Council of Medical Registration.

3. A Council shall be established and called "the Bengal Council of Medical Registration"; and such Council shall be a body corporate and have perpetual succession and a common seal, and shall by the said name sue and be sued. [*Cf.* 21 & 2 Vict., c. 90, s. 3; Bombay Act VI of 1912, s. 2 (*1*); Ben. Act V of 1911, s. 3.]

Constitution of Council.

4. (*1*) The said Council shall consist of nine members, namely:— [*Cf.* 49 & 50 Vict., c. 48, s. 7; Bombay Act VI of 1912, s. 2 (*3*).]

(*a*) the Inspector General of Civil Hospitals, Bengal;
(*b*) the Principal of the Medical College, Calcutta;
(*c*) the Superintendent of the Campbell Medical School and Hospital, Calcutta;
(*d*) the Superintendent of the Dacca Medical School;

ex officio.

(*e*) a member to be elected by the Syndicate of the University of Calcutta;

(*f*) a member to be elected by the Council of the Medical College, Calcutta;

(*g*) a member to be elected by the governing body of any Association which is approved by the Local Government as representing Medical Colleges and Schools in Bengal recognized but not maintained by the Government;

(*h*) a member to be elected by medical practitioners registered under this Act and resident in Calcutta; and

(*i*) a member to be elected by medical practitioners registered under this Act and resident in any part of Bengal outside Calcutta.

The Bengal Medical Bill, 1913.

(*The Bengal Council of Medical Registration.—Clauses 5—9.*)

Provided as follows—

(i) until the Local Government approves an Association as representing Medical Colleges and Schools referred to in clause (*g*), the said Council shall consist of eight members; and

(ii) pending the registration of medical practitioners under this Act, the two members referred to in clauses (*h*) and (*i*) shall be appointed by the Local Government.

(*2*) The Inspector General of Civil Hospitals, Bengal, shall be the President of the Council:

Provided that, in the event of his being unable to attend any meeting, the Principal of the Medical College, Calcutta, shall act as President of the Council in his place.

Appointment of members in default of election.

5. If any of the electoral bodies referred to in clauses (*e*) to (*i*) of sub-section (*1*) of section 4 does not, by such date as may be prescribed by rule made in that behalf under section 29, elect a person to be a member of the Council, the Local Government shall appoint a member in his place; and any person so appointed shall be deemed to be a member as if he had been duly elected by such body. [*Cf.* Bengal Act V of 1911, s. 8.]

Disqualifications for being elected or appointed a member.

6. A person shall be disqualified for being elected or appointed a member of the Council if he— [*Cf.* Bengal Act V of 1911, s. 9.]

(*a*) is not entitled to be registered under this Act; or

(*b*) has been sentenced by any Court for any non-bailable offence, such sentence not having been subsequently reversed or quashed, and such person's disqualification on account of such sentence not having been removed by an order which the Local Government is hereby empowered to make, if it thinks fit, in this behalf; or

(*c*) is an undischarged insolvent.

Publication of names of members.

7. The name of every member elected or appointed under section 4 or section 5 shall be published by the Local Government in the *Calcutta Gazette*. [*Cf.* Bengal Act V of 1911, ss. 5, 7(*4*), 8.]

Leave of absence to members.

8. The Council may permit any member, other than an *ex officio* member, to absent himself from meetings of the Council for any period not exceeding six months. [*Cf.* Bengal Act V of 1911, s. 14; Bombay Act VI of 1912 s. 3 (*4*) (*a*).]

Removal of members.

9. (*1*) The Local Government may, by notification in the *Calcutta Gazette*, declare that any member of the Council, other than an *ex officio* member, shall cease to be a member— [*Cf.* Bengal Act V of 1911, s. 15; Bombay Act VI of 1912, s. 3 (*4*) (*b*), (*c*).]

(*a*) if he has been absent from, or is unable to attend, the meetings of the Council for any period exceeding six consecutive months, or

(*b*) if he has, without the permission of the Council, been absent from the meetings of the Council for any period exceeding three consecutive months, or

(*c*) if he is a salaried servant of the Government, and if his continuance in office as a member of the Council is, in the opinion of the Local Government, undesirable.

(*2*) The Local Government shall, by notification in the *Calcutta Gazette*, declare that a member of the Council, other than an *ex officio* member, shall cease to be a member—

(*i*) if he has become disqualified for election or appointment as a member for any of the reasons mentioned in section 6; or

(*ii*) if he was elected or appointed as being a member of any electoral body referred to in clauses (*e*) to (*i*) of sub-section (*1* of section 4, and if he is, at the date of such notification, no longer a member of that body.

The Bengal Medical Bill, 1913.

(*The Bengal Council of Medical Registration.—Clauses 10—14.*)

Filling of casual vacancies in certain cases.

10. If any member be permitted by the Council to absent himself from meetings of the Council for any period exceeding three months, [*Cf.* Bengal Act V of 1911, s. 16; 21 & 22 Vict., c. 90, s. 8; Bombay Act VI of 1912, s. 3 (*3*).]

or if any member dies, or resigns his membership, or ceases to be a member in pursuance of a notification published under section 9,

the vacancy shall be filled, within one month, by a fresh election or appointment under section 4 or section 5, as the case may be.

Term of office of members.

11. (*1*) The term of office of the first members elected or appointed under section 4 or section 5 shall commence on such day as may be appointed by the Local Government. [*Cf.* Bengal Act V of 1911, s. 17; 21 & 22 Vict., c. 90, s. 8; Bombay Act VI of 1912, s. 3 (*1*), (*3*).]

(*2*) Subject to the provisions of section 9, the term of office of members (other than *ex officio* members) shall be as follows:—

(*a*) members appointed under proviso (ii) to sub-section (*1*) of section 4—the period intervening until the election of members under clause (*b*) or clause (*c*) of that sub-section, or the appointment of members under section 5 in default of such election;

(*b*) a member elected or appointed in pursuance of section 10 in the place of a member who has been permitted to absent himself from meetings of the Council—the period of the absence of the latter member;

(*c*) other members—three years.

(*3*) Any member shall, if not disqualified for any of the reasons mentioned in section 6, be eligible for re-election or re-appointment at the end of his term of office.

Meetings.

12. The Council shall make regulations to regulate—

(*a*) the times and places at which their meetings shall be held,

(*b*) the issue of notices convening such meetings, and

(*c*) the conduct of business thereat: [*Cf.* Bengal Act V of 1911, s. 18; 21 & 22 Vict., c. 90, s. 9; Bombay Act VI of 1912, s. 4.]

Provided that—

(*i*) no business shall be transacted at any meeting unless a quorum of five members be present; and

(*ii*) all questions arising at any meeting shall be decided by the votes of the majority of the members present and voting, or, in case of an equality of votes, by the casting vote of the President.

Payment of fees and travelling expenses to members.

13. There shall be paid to the members of the Council such fees for attendance at meetings of the Council, and such reasonable travelling expenses, as may from time to time be allowed by the Council and approved by the Local Government. [*Cf.* Bombay Act VI of 1912, s. 15.]

Establishment for the Council.

14. (*1*) With the previous sanction of the Local Government, the Council— [*Cf.* 21 & 22 Vict., c. 90, s. 10; Bombay Act VI of 1912, s. 5.]

(*a*) shall appoint a Registrar,

(*b*) may appoint such other officers and such clerks as they may consider necessary for the purposes of this Act, and

(*c*) may grant leave to the Registrar and appoint a person to act in his place.

(*2*) The Council shall pay to the persons appointed under sub-section (*1*) such salary and such allowances (if any) as the Council may determine.

(*3*) The Registrar shall act as Secretary to the Council.

(*4*) Every person appointed under sub-section (*1*) shall be deemed to be a public servant within the meaning of section 21 of the Indian Penal Code. XLV of 1860.

The Bengal Medical Bill, 1913.

(*The Register of Medical Practitioners.—Clauses 15—18.*)

The Register of Medical Practitioners.

Orders by Council for maintenance of register of medical practitioners.

15. (*1*) The Council shall, as soon as conveniently may be after the commencement of this Act, and from time to time as occasion may require, make orders for regulating the maintenance of a register of medical practitioners. [*Cf.* 21 & 22 Viet., c. 90, s. 16; Bombay Act VI of 1912, s. 6.]

(*2*) The said register shall be kept in such form as may be prescribed by rule made under section 29.

Maintenance of register by Registrar.

16. (*1*) The Registrar shall keep the register of medical practitioners in accordance with the provisions of this Act and of any orders made by the Council, and shall from time to time make all necessary alterations in the registered addresses or appointments and the registered qualifications or titles of practitioners, and erase the names of practitioners who have died. [*Cf.* 21 & 22 Viet., c. 90, s. 14; Bombay Act VI of 1912, s. 6.]

(*2*) To enable the Registrar to fulfil the duties imposed upon him by sub-section (*1*), he may send through the post a letter to any registered person, addressed to him according to his registered address or appointment, to inquire whether he has ceased to practise or whether his residence or appointment has been changed; and, if no answer to any such letter is received within a period of six months from its despatch, the Registrar may erase the name of such person from the register:

Provided that any name erased under this sub-section may be re-entered in the register under the direction of the Council.

Persons referred to in Schedule entitled to be registered.

17. Every person referred to in the Schedule shall, subject to the provisions hereinafter contained, and on payment of such fee as may be prescribed in this behalf by regulation made under section 29, be entitled to have his name entered in the register of medical practitioners: [*Cf.* 21 & 22 Viet., c. 90, s. 15; Bombay Act VI of 1912, s. 7.]

Provided that the Council may refuse to permit the registration of the name of any person—

(*a*) who has been convicted of a cognizable offence, as defined in the Code of Criminal Procedure, 1898, or V of 1898.

(*b*) whom they have, after due inquiry, found guilty of infamous conduct in any professional respect.

Amendment of Schedule.

18. If the Council are satisfied— [*Cf.* 49 & 50 Viet., c. 48, s. 3; Bombay Act VI of 1912, s. 20.]

(*a*) that any title granted or qualification certified by any University, Medical Corporation, examining body or other Institution is a sufficient guarantee that persons possessing such title or qualification possess the knowledge and skill requisite for the efficient practice of medicine, surgery and midwifery, or

(*b*) that any title or qualification referred to in clause 2 or clause 3 of the Schedule is not a sufficient guarantee as aforesaid,

they may make a report to that effect to the Local Government, who may thereupon direct, by notification in the *Calcutta Gazette*,—

(*i*) in case (*a*)—that the possession of such title or qualification shall, subject to the provisions hereinafter contained, and on payment of such fee as may be prescribed in this behalf by regulation made under section 29, entitle any person to have his name entered in the register of medical practitioners, or

The Bengal Medical Bill, 1913.

(*The Register of Medical Practitioners.—Clauses 19—25.*)

(*ii*) in case (*b*)—that the possession of such title or qualification shall not entitle any person to have his name entered in the said register;

and the Schedule shall thereupon be deemed to be altered accordingly.

Information to be furnished to Registrar with application for registration.

19. Every person who applies to have his name entered in the register of medical practitioners— [*Cf.* Bombay Act VI of 1912, s. 7.]

(*I*) must satisfy the Registrar that he is registered under the Medical Acts, or is possessed of some title or qualification referred to in the Schedule, as altered by notifications (if any) issued under section 18; and

(*2*) if he is registered under the Medical Acts,—

(*i*) must correctly inform the Registrar of the date of such registration, and

(*ii*) must furnish the Registrar with a correct statement of the titles or qualifications in respect of which he is so registered, and of the dates on which he obtained them, or

(*3*) if he is not registered under the Medical Acts—must correctly inform the Registrar of the dates on which he obtained the titles or qualifications which entitle him to claim registration under this Act.

Entry of new titles and qualifications in register.

20 If any person whose name is entered in the register of medical practitioners obtains any title or qualification other than the title or qualification in respect of which he has been registered, he shall, on payment of such fee as may be prescribed in this behalf by regulation made under section 29, be entitled to have an entry stating such other title or qualification made against his name in the register, either in substitution for or in addition to any entry previously made. [*Cf.* 21 & 22 Vict., c. 90, s. 30; Bombay Act VI of 1912, s. 6.]

Disposal of fees

21. All fees received by the Council under this Act shall be applied for the purposes of this Act, in accordance with such rules as may be made by the Local Government under section 29. [*Cf.* Bombay Act VI of 1912, s. 16.]

Appeal to Council from decision of Registrar.

22. If any person is dissatisfied with any decision of the Registrar, refusing to enter the name or any title or qualification of such person in the register of medical practitioners, he may appeal to the Council, whose decision shall be final. [*Cf.* 21 & 22 Vict., c. 90, s. 26; Bombay Act VI of 1912, s. 8(*1*).]

Erasure of fraudulent and incorrect entries.

23. Any entry in the register of medical practitioners, which is proved to the satisfaction of the Council to have been fraudulently or incorrectly made, may be erased under an order in writing of the Council. [*Cf.* 21 & 22 Vict., c. 90, s. 26; Bombay Act VI of 1912, s. 8(*3*).]

Removal of names from register, and re-entry of names therein.

24. The Council may direct— [*Cf.* 21 & 22 Vict., c. 90, s. 29; Bombay Act VI of 1912, s. 9.]

(*a*) that the name of any medical practitioner who has been convicted of a cognizable offence, as defined in the Code of Criminal Procedure, 1898, or whom they have, after due inquiry, found guilty of infamous conduct in any professional respect, be removed from the register of medical practitioners, and V of 1898.

(*b*) that any name so removed be afterwards re-entered in the register.

Notice of deaths, and erasure of names from register.

25. (*1*) Every Registrar of Deaths who receives notice of the death of any person whose name he knows to be entered in the register of medical practitioners shall forthwith transmit by post to the Registrar of the Council a certificate of such death, signed by him and stating particulars of the time and place of death. [*Cf.* 21 & 22 Vict., c. 90, s. 45; Bombay Act VI of 1912, s. 12.]

The Bengal Medical Bill, 1913.

(The Register of Medical Practitioners.—Annual Medical List.—Rules and Regulations.—Clauses 26—29.)

(*2*) On receipt of any such certificate, the Registrar of the Council shall erase the name of the deceased person from the register.

Penalty on unregistered person representing that he is registered.

26. If any person whose name is not entered in the register of medical practitioners falsely pretends that it is so entered, or uses in connection with his name or title any words or letters representing that his name is so entered, he shall, whether any person is actually deceived by such representation or not, be punishable, on conviction by a Presidency Magistrate or a Magistrate of the first class, with fine which may extend to three hundred rupees. [*Cf.* 21 & 22 Vict., c. 90, s. 40; Bombay Act VI of 1912, s. 18.]

Construction of references in Acts to medical practitioners.

27. The expression "legally qualified medical practitioner," or "duly qualified medical practitioner," and all other expressions importing a person recognized by law as a medical practitioner or a member of the medical profession, as used in any Bengal Act or any Act of the Governor General of India in Council in force in Bengal, shall be deemed to mean a medical practitioner registered under the Medical Acts or this Act; and [*Cf.* Bombay Act VI of 1912, s. 10.]

no certificate given by any medical practitioner or medical officer under any Bengal Act or any Act of the Governor General of India in Council in force in Bengal shall be valid unless such practitioner or officer is registered under the Medical Acts or this Act.

Annual Medical List.

Publication and use of annual Medical List.

28. (*1*) The Registrar shall, in every year, on or before a date to be fixed in this behalf by the Council, cause to be printed and published a correct list of the names for the time being entered in the register of medical practitioners, and setting forth— [*Cf.* 21 & 22 Vict. c. 90, s. 27; Bombay Act VI of 1912, s. 17.]

(*a*) all names entered in the register, arranged in alphabetical order according to the surnames,

(*b*) the registered address or appointment of each person whose name is entered in the register, and

(*c*) the registered titles and qualifications of each such person, and the date on which each such title was granted or each such qualification was certified.

(*2*) Every Court shall presume that any person whose name is entered in the latest of such lists is duly registered under this Act, and that any person whose name is not so entered is not registered under this Act:

Provided that, in the case of any person whose name does not appear in such list, a certified copy, signed by the Registrar, of the entry of the name of such person in the register of medical practitioners shall be evidence that such person is registered under this Act.

Rules and Regulations.

Rules and regulations.

29. (*1*) The Local Government may make rules—

(*a*) to regulate elections under clauses (*e*) to (*i*) of sub-section (*1*) of section 4; [*Cf.* Bengal Act V of 1911, s. 187 (*1*).]

(*b*) to prescribe the form of the register of medical practitioners to be maintained under this Act; and [*Cf.* Bombay Act VI of 1912, s. 6.]

(*c*) to regulate the application of fees under section 21. [*Cf.* Bombay Act VI of 1912, s. 16.]

(*2*) In addition to the power conferred by section 12, the Council may, with the previous sanction of the Local Government, from time to time make regulations to carry out the purposes of this Act. [*Cf.* Bombay Act VI of 1912, s. 19 (*1*).]

The Bengal Medical Bill, 1913.

(*The Schedule.*)

(*3*) In particular, and without prejudice to the generality of the foregoing power, the Council may make regulations—

(*i*) to prescribe the fees chargeable in respect of any registration under this Act;

(*ii*) to regulate the keeping of accounts of such fees.

(*4*) All such rules and regulations shall be published in the *Calcutta Gazette*. [*Cf.* Bombay Act VI of 1912, s. 19(*2*).]

(*5*) The Local Government may at any time, by notification in the *Calcutta Gazette*, cancel any regulation made by the Council under this section. [*Cf.* Bengal Act V of 1911, s. 144; Bombay Act VI of 1912, s. 19(*3*).]

THE SCHEDULE.

[*Cf.* 21 & 22 Vict., c. 90, Sch. A.; 39 & 40 Vict., c. 40, s. 3 49 & 50 Vict., c. 48, ss. 3 (*1*) 20; Bombay Act VI of 1912, s. 7, Sch.]

Persons who are entitled to have their names entered in the Register of Medical Practitioners.

(*See sections 17, 18 and 19.*)

1. Every person who is for the time being registered under the Medical Acts.

2. Every Doctor, Bachelor or Licentiate of Medicine, or Master, Bachelor or Licentiate of Surgery, of the University of Calcutta, Bombay, Madras, Allahabad or Lahore.

3. Every person who has been trained in a Government Medical College or School in India, or in a Medical School in India not maintained by the Government but recognized by the Local Government, for the purposes of this Schedule, by notification in the *Calcutta Gazette*, and holds a diploma or certificate, granted by the Government, or granted by a Medical School not maintained by the Government but recognized as aforesaid, declaring him to be qualified—

(*a*) to practice medicine, surgery and midwifery, or

(*b*) to perform the duties of a Military Assistant Surgeon, Hospital Assistant or Sub-Assistant Surgeon.

STATEMENT OF OBJECTS AND REASONS.

THE objects of this Bill are (1) to provide a means of protecting the public and the medical profession from irregularly qualified practitioners, whose training in medical science has been obtained at unrecognised institutions, and (2) to afford facilities for ascertaining whether any particular medical practitioner possesses recognized qualifications. These objects are met by directing the maintenance of a register of medical practitioners and their qualifications, and by conferring certain privileges upon practitioners who are registered.

II. The Bill is based on the Medical Acts in force in England (21 & 22 Vict., c. 90, and amending Acts), and on the Bombay Medical Act, 1912 (Bombay Act VI of 1912), passed by the Bombay Legislative Council on the 14th March, 1912. It does not prohibit in any way the recovery of charges by unregistered persons, and does not affect the practice of Indian *Kavirajes*, *Vaids* or *Hakims*. Its principal provisions are mentioned in the subjoined notes.

NOTES ON CLAUSES.

1. *Clause 4*—The only duty of the proposed Council of Medical Registration will be to supervise the registration of medical practitioners, and nine members will be sufficient. Four of the members will be principal medical officers of Bengal, three will be elected by public bodies, and two will be elected by medical practitioners themselves. One of the public bodies empowered to elect a member is an Association to be approved by the Local Government as representing Medical Colleges and Schools in Bengal recognized but not maintained by the Government. Pending the approval of such an Association, it is provided that the Council shall consist of eight members only.

2. *Clauses 5 to 12* contain provisions as to the appointment, election, leave, removal and term of office of members of the proposed Council, and as to meetings of the Council. They are based on provisions of the Calcutta Improvement Act, 1911 (Bengal Act V of 1911.)

3. *Clause 13* provides for the payment to members of the proposed Council of fees for attendance at meetings and of travelling expenses.

4. *Clause 14* provides for the appointment and payment of a Registrar and clerks for the maintenance of the register of medical practitioners.

5. *Clauses 15 and 16* provide for the maintenance of a register of medical practitioners, in a form to be prescribed by rule. It is intended that the register should show the name of each practitioner, his address or any appointment he holds, the date of his registration, and the titles or qualifications which entitle him to registration.

6. *Clause 17* declares that every person who is registered under the Medical Acts in force in England, and certain persons who hold diplomas or certificates granted in India, shall be entitled to registration, the proposed Council being however given power to exclude persons of either of these classes who have shown grave defects of character.

7. *Clause 18* empowers the Local Government, on the report of the proposed Council, to admit to registration persons other than those referred to in clause 17 (for example, holders of diplomas granted on the Continent of Europe or in the United States of America), and to withdraw from any class of persons holding diplomas or certificates granted in India the right to be registered.

8. *Clause 19* introduces a detailed procedure for obtaining information required for the compilation of the register.

9. *Clause 20* provides for the entry in the register of titles and qualifications acquired after registration.

10. *Clause 21* directs that the registration fees shall be applied in meeting the expenses of working the Act.

11. *Clause 22* allows an appeal to the proposed Council against orders of the Registrar refusing to enter names, titles or qualifications in the register.

12. *Clauses 23 to 25* provide for the erasure of incorrect entries and the removal of names from the register.

13. *Clause 26* provides a penalty upon an unregistered person representing that he is registered, and clause *27* contains provisions for encouraging registration by imposing certain disabilities upon medical practitioners who are unregistered. It is provided in clause 1 (*3*) that neither of these provisions shall come into force until specially notified by the Local Government, and they will not be brought into force until sufficient time has elapsed to admit of all practitioners being registered.

14. *Clause 28* provides for the publication of an annual medical list, from materials contained in the register of medical practitioners, and gives the list evidential value. A proviso is added to meet the case of a practitioner being registered between the publication of two annual lists. This list will supersede the list of medical practitioners which is now published annually by the Inspector-General of Civil Hospitals.

15. *Clause 29* gives the Local Government power to make rules, and the proposed Council power to make regulations, for the working of the Act.

QUESTIONS AND ANSWERS.

STARRED QUESTIONS.

The following questions which had been starred, were put and answered—

by the Hon'ble RAI RADHA CHARAN PAL BAHADUR :—

Criminal disputes over "Char" lands.

*1. (*a*) Will the Government be pleased to state whether it is a fact that a large number of crimes (including murders) are yearly perpetrated over the possession of "char" lands in the districts of Dacca, Faridpur, Pabna, Mymensingh and Bakarganj?

(*b*) Will the Government be pleased to furnish a statement showing the number of criminal cases relating to disputes over "char" lands instituted in those districts within the last fifteen years?

(*c*) Will the Government also be pleased to show in this statement the number of cases of rioting leading to grievous hurt and murder?

(*d*) Will the Government be pleased to state whether it is a fact that, in consequence of riots over "char" land, a large number of small landholders are being gradually dispossessed of property, which is being seized by more powerful people?

(*e*) Will the Government be pleased to state what steps (if any) they have taken as preventive measures?

The Hon'ble MR. CUMMING replied :—

(*a*) "Disputes over 'char' lands are common; but it does not appear, after an examination of the figures, that the number of crimes committed is disproportionately large.

(*b*) Figures are not available for all the districts; but in the districts of Dacca, Bakarganj and Pabna the number of offences committed as a result of disputes over 'char' lands is reported to be 142, 211 and 110, respectively. (In the first-named district the figures are for cognisable offences only.)

(*c*) The cases of rioting, leading to grievous hurt and murder, in the districts of Dacca, Bakarganj and Pabna are reported to be 16, 14 and 10, respectively. The figures for Mymensingh and Faridpur are not available.

(*d*) Definite information is not available for all the districts in question. In Bakarganj no cases of dispossession of small landholders from 'char' lands by powerful landholders have been reported for the last 15 years.

(*e*) In cases of disputes over 'char' lands preventive action is taken by the local officers under sections 144, 145 and 146 of the Criminal Procedure Code; and in the district of Bakarganj disputes have been settled by the timely action of the Revenue officers. The number of cases is not in any district so abnormally high as to call for any special preventive measures."

by the Hon'ble RAI RADHA CHARAN PAL BAHADUR :—

Condition of the Old Benares Road.

*2. (*a*) Are the Government aware of the deplorable condition of the Old Benares Road along the line of the Howrah-Seakhala Railway?

(*b*) Are the Government aware that the portion of this most ancient and historic Trunk Road commencing from Baigachi to Seakhala is in such a condition that it is practically impossible for either vehicular or pedestrian traffic to use it?

(*c*) Is it a fact that a portion of this road near Kristorampore which was originally metalled has again lapsed into a *kutcha* road, and that the portion between Chanditala and Seakhala and beyond is absolutely *kutcha* and is now knee-deep in mud, slush and water in most places?

(*d*) Is it a fact that the District Board gets a considerable share of the earning of the Howrah-Seakhala line?

(*e*) What is the amount earned by the District Board from the establishment of the railway till now and what amount has been spent during that period for the repair, reconstruction and maintenance of the Old Benares Road over which the Howrah-Seakhala Railway passes?

(*f*) Will the Government be pleased to state what steps (if any) they intend to take to ensure proper repair and metalling of the unmetalled portion of the Old Benares Road?

The Hon'ble MR. KERR replied :—

(*a*) (*b*) (*c*) "The Howrah-Seakhala Railway passes over the Old Benares Road for a distance of 10¾ miles between Baigachi and Seakhala, of which 2½ miles from Baigachi to Chanditala are metalled and the rest unmetalled. Government are not aware that the condition of the road, which is under the control of the Howrah District Board, is deplorable or impossible for vehicular or pedestrian traffic. The metalling of 1⅝th miles of road near Kristorampore was abandoned in 1897 by the District Board owing to the presence of the Railway and to want of funds. It is not a fact that the *kutcha* portion between Chanditala and Seakhala is knee-deep up in mud, slush and water in most places.

(*d*) The arrangement between the District Board and the Railway is that the former undertakes to pay to the latter any deficit of net profits below a 4 *per cent.* dividend while receiving in return ⅓rd of any excess over a 4-*per-cent.* dividend.

(*e*) The net receipts from the establishment of the Howrah-Seakhala Railway earned by the District Board between 1897 and 1913 amount to Rs. 22,977-14-3. It is impossible to say how much has been spent on that portion of the Old Benares Road over which the Railway passes. The total length of the Old Benares Road which runs through Hooghly district is 50 miles, 48½ being under the District Board and 1½ under the Arambagh Municipality.

(*f*) Government are not prepared to interfere with the discretion of the District Board with reference to the management of this road."

by the Hon'ble BABU SURENDRA NATH RAY :—

"Insanit Howrah."

* 3. (*a*) Has the attention of the Government been drawn to the article "Insanitary Howrah" which appeared in the "Amrita Bazar Patrika" dated the 30th August, 1913, regarding the "Bharpara Swamp"?

(*b*) Will the Government be pleased to state whether the question of improving the sanitary condition of the town is under consideration?

The Hon'ble MR. SAMMAN replied :—

(*a*) "The answer is in the affirmative.

(*b*) No reference has been made to Government on the subject. The matter is primarily one for the consideration of the Municipality, and Government are not prepared to interfere with the discretion of the Commissioners."

by the Hon'ble BABU SURENDRA NATH RAY :—

Trial by jury in non-jury dist

* 4. (*a*) In view of the advance in education during the last twenty years, have the Government of Bengal considered the desirability of introducing the trial by Jury in the non-jury districts?

(*b*) Have the Government consulted the High Court on the subject?

The Hon'ble MR. CUMMING replied :—

(*a*) "Within the last twenty years the Government of Bengal have considered the desirability of introducing trial by Jury into the non-jury districts. In 1897, the system of trial by Jury was extended to the districts of Chittagong, Mymensingh, Rajshahi and Jessore; and in 1905 to the district of Khulna.

(*b*) Both in 1897 and in 1905, the Government of Bengal consulted the High Court."

by the Hon'ble BABU SURENDRA NATH RAY :—

New bridge over the Hooghly river

* 5. (*a*) Will the Government be pleased to state whether the Port Commissioners of Calcutta have definitely decided on the construction of a new bridge at Howrah over the Hooghly river in place of the existing floating bridge?

(*b*) If so, will the Government be pleased to state the kind of bridge that it has been decided to erect, and the site that the Port Commissioners have decided upon for the purpose?

(*c*) Will the Government be pleased to state whether the decision of the Port Commissioners in the matter has been submitted to the Government for approval, and whether the Howrah Municipality has been consulted in the matter?

(*d*) Will the Government be pleased to state what the total estimated cost of the said proposed bridge would be, and when the work is likely to be commenced?

The Hon'ble MR. GREEN replied :—

(*a*) "The decision as regards the construction of a new bridge over the Hooghly at Howrah does not rest with the Port Commissioners but with Government. The Port Commissioners have submitted certain proposals for consideration and these are now being dealt with by Government.

(*b*) The type of bridge to be adopted has not been finally decided upon.

The site which has been suggested is that of the existing bridge.

(*c*) The proposals of the Commissioners have, as stated in reply to question (*a*), been submitted to Government for approval. The Howrah Municipality has not yet been addressed, but it will be consulted in due course.

(*d*) The cost of the bridge cannot be estimated until the design has been finally determined. It is believed, however, that the new bridge will cost between 90 and 100 lakhs.

It cannot be stated at present when the work is likely to be commenced."

by the Hon'ble BABU SURENDRA NATH RAY :—

Objects and scope of the inquiry of the Committee appointed to examine the conditions prevailing in Bengal.

* 6. (*a*) Will the Government be pleased to state definitely the exact scope of the inquiry to be held by the Committee recently appointed to examine the conditions prevailing in the districts of Bengal, and to specify the particular "conditions" which will come within the purview of the said inquiry?

(*b*) Will the Government be pleased to state whether the Commission has been called upon to report whether the permanent settlement of Bengal can be modified in any way?

The Hon'ble MR. CUMMING replied :—

(*a*) "The scope of the inquiry to be held by the Committee is indicated in the Press *communiqué* issued on the 17th of October, and the Resolution published in the Calcutta Gazette of the 29th October last.

(*b*) The answer is in the negative."

by the Hon'ble BABU SURENDRA NATH RAY :—

Relief of District Officers routine work.

*7. (*a*) Will the Government be pleased to state what action (if any) has been taken on the various suggestions made in the report of the Royal Commission on Decentralisation for relieving the District Officers of a great part of their routine work, so as to leave them more time to mix with the people ?

(*b*) If effect has been given to these suggestions, will the Government be pleased to state what results have ensued from their adoption ?

The Hon'ble MR. KERR replied :—

(*a*) "The Royal Commission made the following recommendations on the subject :—

(1) Devolution to Subdivisional Officers of a large amount of revenue work done by Collectors.
(2) Provision of separate Subdivisional Officers for the headquarters subdivisions of districts.
(3) Division of large and heavy districts.
(4) Lightening the work of the Collector by giving him a Personal Assistant.
(5) Increase of the existing district staff.

The action taken was as follows :—

(1) No action has yet been taken to delegate revenue functions to Subdivisional Officers. Certain proposals on the subject are under consideration, but it is unlikely that any final decision will be reached until after receipt of the report of the Committee which is now inquiring into the system of district administration in Bengal.
(2) The Sadar Subdivisional system has been introduced in all the districts of the Presidency and Burdwan Divisions and in the Rangpur, Bogra, Tippera and Noakhali districts in Eastern Bengal. Proposals for appointing Sadar Subdivisional Officers at Dacca, Mymensingh and Bakarganj are now under consideration.
(3) The question of the division of the districts of Mymensingh and Midnapore is now under the consideration of Government.
(4) The late Government of Bengal deprecated the appointment of Personal Assistants for Collectors in view of the legal and administrative difficulties as to the position of the Personal Assistant in the district administration, and advocated the system prevailing in the province of appointing Joint Magistrates and Additional District Magistrates to afford relief to the district officer in times of exceptional pressure or in heavy districts. The late Government of Eastern Bengal and Assam favoured the appointment of additional Magistrates in the larger districts.

Additional Magistrates have been appointed in the districts of Dacca, Mymensingh, Bakarganj, Tippera and Midnapore.

(5) It has been decided that no general action is necessary, but that the case of each district should be considered when proposals for the increase of staff come up.

(*b*) The arrangements described above have not been in force long enough to enable any definite pronouncement to be made as to their effects."

by the Hon'ble BABU SURENDRA NATH RAY :—

Result of deputation of Messrs Bompas and Maddox to Madras Presidency.

*8. (*a*) Will the Government be pleased to state the result of the deputation of Messrs C. H. Bompas and S. L. Maddox to study the system of administration in the Madras Presidency a few years ago ?

(*b*) Did their reports suggest schemes for bringing the District Officers in contact with the people ?

(*c*) Will the Government be pleased to state what action (if any) was taken on the reports of these officers?

The Hon'ble MR. CUMMING replied :—

(*a*) "In March, 1910, MR. Oldham, and not Messrs. Bompas and Maddox, as stated by the Hon'ble Member, was placed on special duty for a period of six weeks for the purpose of studying the system of district administration in the Madras Presidency, with special reference to the recommendation of the Royal Commission upon Decentralization. Mr. Oldham embodied the result of his inquiries in a report.

(*b*) The report contained certain information and suggestions with regard to the accessibility of the District Magistrate to visitors, the knowledge of the vernaculars and the tours of officers.

(*c*) The subjects specially referred to in question (*b*), as having been dealt with by Mr. Oldham, have since been under the consideration of Government, and detailed orders have been passed in which certain of his proposals have been adopted. Many of his other proposals regarding district administration were on the same lines as those of the Decentralization Commission. Some of them have been adopted in the course of dealing with the report of that Commission, and others separately."

by the Hon'ble NAWAB SAIYID HOSSAM HAIDER CHAUDHURI, KHAN BAHADUR :—

Want of shelter from the rain and sun to litigants attending courts of law, Sub-Registry offices, etc.

* 9. (*a*) Are the Government aware of the great inconvenience and difficulty which the public, especially women, are subjected to when they are required to attend courts of law, Sub-Registry offices and similar places, as parties or witnesses, for want of shelter from the rain and the sun?

(*b*) If so, will the Government be pleased to say whether they intend to take any steps to remove this want?

The Hon'ble MR. CUMMING replied :—

"Government are aware of the inconvenience to which the question refers. It has been the policy of Government for some years past to set aside a sum of money every year for the construction of witness sheds. A statement is laid on the table showing the expenditure on this object in each Division during the last six years. The amount provided in the current year's budget is Rs. 6,000."

Statement referred to in the answer by the Hon'ble MR. CUMMING to Question No. 9.

by the Ho'nble MAULVI MAZHARUL ANWAR CHAUDHURI :—

Alleged disregard of the *Id-ul-Fitr* festival by the Subdivisional Officer, Nator.

*10(*a*). Has the attention of the Government been drawn to a paragraph which appeared in the "Mussulman" of the 19th September last to the effect that Mr. L. S. Bingemann, Subdivisional Officer, Nator, did not close his court nor stop work in his treasury on the day of the last *Id-ul-Fitr* festival?

(*b*) Will the Government be pleased to state whether they have made any inquiry into the matter and whether the statements made in the "Mussulman" are correct?

The Hon'ble MR. CUMMING replied :—

(*a*) "The answer is in the affirmative."

(*b*) Government have made an inquiry in the matter. The suggestions that the Court was held and the Treasury opened in the usual way on the 3rd September are misleading. The facts are as follow :—

Cases were fixed both for the 2nd and 3rd September, as it was not known which of these dates would be a holiday. On the 2nd the Subdivisional Officer took up the hearing of a police case in which the witnesses were present and the accused in *hajat*. Being unable to complete the examination-in-chief of all the witnesses on that date, and as he would be absent from Nator on the 4th and 5th September, the Subdivisional Officer arranged to take the examination-in-chief of the three remaining prosecution witnesses on the 3rd. This was done in order to avoid the unnecessary detention of the witnesses and the prolonged confinement of the accused in *hajat*. In no other case were witnesses examined that day, though some cases were ready for hearing, but orders of adjournment or disposal were passed.

As regards the Treasury, the only transaction was the encashment of the Subdivisional Officer's pay bill, which had been presented on the previous day, but too late for encashment."

by the Hon'ble BABU SURENDRA NATH BANERJI :—

Petition for suspension of Settlement operations in certain subdivisions in the Midnapore district.

*11. (*a*) Have the Government received a memorial from the Subdivisions of Tamluk, Contai and Ghatal in the Midnapore district signed by about seven thousand inhabitants, including many persons of position and distinction, praying for the suspension of the Settlement operations for two years in view of the devastation caused by the floods, the effacement of land-marks, the absence of the tenants from the localities and other causes?

(*b*) Will the Government be pleased to state what action (if any) they propose to take in the matter?

The Hon'ble MR. KERR replied :—

(*a*) & (*b*) "Government have received various representations on this subject and have decided that no survey and settlement operations should be undertaken this season in those areas in the Midnapore district which have been affected by floods and which have been divided into circles for the purposes of relief."

by the Hon'ble MAHARAJA RANAJIT SINHA OF NASHIPUR :—

Revival of the public examination at the end of the middle school course.

*12. With reference to the answer given by the Hon'ble Mr. Kerr to the question asked by me at the Council meeting of the 5th March, 1913, will the Government be pleased to state whether they have come to any decision as regards reviving the public examination at the end of the middle school course?

The Hon'ble MR. SAMMAN replied :—

"No conclusion has yet been arrived at, but Government expect shortly to have before them full materials for a decision."

by the Hon'ble RAI RADHA CHARAN PAL BAHADUR :—

Floods in the Contai Subdivision

*13. (*a*) Will the Government be pleased to state the amount of damage done to property by the recent floods at Contai, thana by thana, under the following heads :—

(*i*) to Standing crops,

(*ii*) to Huts of the inhabitants,

(*iii*) to Cattle? .

(*b*) Will the Government be pleased to state what steps have been taken by them to alleviate the present distress of the people affected in that area?

(*c*) Will the Government be pleased to furnish a statement showing—

(*i*) the amount of money sanctioned for agricultural purposes this year for the Contai subdivision and the amount already advanced ;

(*ii*) how many applications for agricultural loans have been received up to date from each of the flood-affected thanas ;

(*iii*) how many such applications have been granted and how many refused ; and

(*iv*) what is the average amount of loan granted ?

(*d*) Will the Government be pleased to state whether it is a fact that some special officers on relief duty are demanding joint-application and joint-security from the inhabitants of a village before granting agricultural loans ?

(*e*) Will the Government be pleased to state the amount of loan that is usually advanced per bigha and the maximum amount that can be advanced to a raiyat ?

(*f*) Will the Government be pleased to state whether they are considering the desirability of relaxing the terms of repayment of loans by instalment, by deferring the payment of the first instalment for one year or by granting such other concession as the circumstances of the case may require ?

(*g*) Will the Government be pleased to state —

(*i*) the number of persons affected by the floods in Contai ;

(*ii*) what measures have been taken to relieve the distress of the people who do not own or possess any land ;

(*iii*) the amount of money (if any) distributed in gratuitous relief ; and

(*iv*) how much of this amount was paid from the public treasury and how much from the funds placed at the disposal of Government by private parties ?

(*h*) Will the Government be pleased to state whether it is a fact that people are selling off their cattle at a nominal price for want of fodder ?

(*i*) Will the Government be pleased to state the amount of money spent in purchasing fodder for distribution ?

(*j*) Is it a fact that fodder was sold by Government to the distressed people ?

(*k*) Is it a fact that the Bhagabanpur and Heria thanas and a part of Pataspur and Contai remained under water for over four months and that, in other years, the Bhagabanpur and Pataspur thanas remained under water till January at least ?

(*l*) Was this due to defective drainage?

(*m*) Will the Government be pleased to state whether they have any scheme in hand for the proper drainage of the Bhagabanpur and Pataspur thanas? If any, will the Government be pleased to lay the papers on the table?

(*n*) Is it a fact that the Rasulpur river has silted up? If so, is this due to the canalisation of the Sarfai river?

(*o*) Will the Government be pleased to state whether they have any scheme in view for canalising the Rasulpur river, or throwing open the Sarfai river with a view to the proper scouring of the Rasulpur river?

(*p*) Have the Government any scheme in view for providing work to able-bodied labourers, and for the relief of the persons unable to work from physical disability or social reasons, till the advent of the next crops in the distressed areas?

(*q*) Do the Government propose to remit the Chaukidari taxes and to remit and suspend the rates and the land-revenue in the case of the people affected by the floods in question?

(*r*) Will the Government be pleased to state whether it is a fact that there is a scarcity of pure drinking water in the flooded areas, and if so, what steps are being taken to remedy this defect?

(*s*) Is it a fact, as reported in the papers, that the distress of the people in Argoal and Bhagabanpur thanas became very acute during the floods, and that cholera is now raging in Argoal? If so, will the Government be pleased to state what measures have been taken to afford medical relief?

(*t*) Will the Government be pleased to state what measures have been taken to purify the drinking water of the flood-affected areas?

(*u*) Will the Government be pleased to state whether any inquiries have been made into the causes of the floods in Contai? If so, will the Government be pleased to lay the papers relating to the subject on the table?

(*v*) Is it a fact that the floods did not subside quickly on account of the defective drainage system existing in the subdivision of Contai?

The Hon'ble MR. KERR replied :—

(*a*) (i) "The approximate area in which damage more or less severe was caused to standing crops by the floods was 57,000 acres in Contai thana including Basudebpur, 24,000 acres in Ramnagar, 30,000 acres in Pataspur, 30,000 acres in Egra and 104,000 acres in Bhagbanpur, including Heria. Total 245,000 acres."

(ii) The number of huts destroyed is estimated at about 2,800 in Contai thana including Basudebpur, 250 in Ramnagar, 2,500 in Pataspur, 100 in Egra and 2,500 in Bhagbanpur including Heria. Total 8,150.

(iii) The number of cattle lost by drowning was estimated at 50 in Contai thana including Basudebpur, 20 in Ramnagar, 200 in Pataspur, 20 in Egra and 100 in Bhagbanpur including Heria. (Total 390.) It is impossible to estimate the number which has since been lost owing to scarcity of fodder, but the Collector reports that it may be confidently said that there has been no very great or widespread loss on this account.

(*b*) Loans under the Agriculturists Loans Act have been freely issued. Government has made a special grant of Rs. 1,24,000, of which about, Rs, 70,000 has been already distributed. The affected area has been divided into circles and an officer has been appointed to take charge of each circle for the purpose of granting these loans and distributing gratuitous relief where necessary. The Loans Act has been interpreted on generous lines, and loans have been granted for the rebuilding of houses, the provision of fodder for cattle and also for subsistence, as well as for actual cultivation. Where no.

security could be given for loans, gratuitous relief has been distributed to assist in the rebuilding of houses and in the maintenance of cattle as well as in doles for actual subsistence.

(*c*) (i) The amount sanctioned for agricultural loans is Rs. 1,24,000, of which about Rs. 70,000 has been distributed up to date.

(ii) The number of applications cannot be stated without further inquiry, but the approximate amount of loans granted up to 23rd November, 1913, is Rs. 8,265 in Contai thana, Rs. 6,515 in Basudebpur, Rs. 1,100 in Ramnagar, Rs. 12,504 in Pataspur, Rs. 8,175 in Egra, Rs. 13,169 in Bhagbanpur, Rs. 19,405 in Heria. Total Rs. 69,133.

(iii) Detailed figures are not available, but every application has been carefully inquired into and the Collector reports that it may safely be said that in no case have loans been refused, where the security was sufficient and the need real.

(iv) On the information at present available, the average amount granted to each person is estimated to be as follows :—

	Rs.	A.
Contai	13	12
Heria	13	14
Bhagbanpur	12	15
Pataspur	17	0
Egra	9	12
Basudebpur	22	13
Ramnagar	11	12

(*d*) Most of the loans have been issued on the joint security of several raiyats. This system, which is usually followed in times of scarcity, has been devised to meet the case of applicants who have not sufficient individual security to offer.

(*e*) The maximum has been fixed by the Commissioner at Rs. 5 per bigha and Rs. 50 to a single individual.

(*f*) It is proposed to collect the loans in three equal annual instalments, the first of which will be due one year after the issue of the loan. The rules empower the Collector to suspend the realization of any instalment, if he considers this course necessary, and no interest is charged in such cases for the period of suspension.

(*g*) (i) The population of the area affected by the floods in the Contai subdivision is about 350,000. The greater part of these people no doubt suffered severely in different ways from the floods, but it is estimated that only a small proportion will require relief of any kind from Government.

(ii) Steps have been taken to provide work in the effected areas for all able-bodied persons, who require it, and further action will be taken in this direction as soon as the subsidence of the flood allows earthwork to be pushed on. The Public Works Department and the District Board have been asked to concentrate their resources as far as necessary in this area on the repair of roads and embankments, the digging of tanks and the clearance of khals. The rates paid will be those for ordinary labour. Gratuitous relief has been and will be provided, so long as necessary, for those who are unable to work.

(iii) Rupees 19,920 have been spent on gratuitous relief.

(iv) No funds have been placed at the disposal of Government by private parties, but of the above sum of Rs. 19,920, Rs. 9,367 was disbursed from Government funds and Rs. 10,553 from various relief funds which have been raised. These relief funds are now becoming exhausted, and a further grant will be made by Government to enable gratuitous relief to be continued where necessary.

(*h*) No reports to this effect have been received by Government, and the Hon'ble Mr. Lyon, who made special inquiries into this matter during his recent visit to the affected area, found that, while cattle were in many places in poor condition, there was no foundation for the rumours that the people were disposing of their cattle to any appreciable extent owing to want of fodder. The Collector reports that there is no ground for believing that the scarcity has led to the sale of cattle on any considerable scale.

(*i*) The amount of money spent on purchasing fodder for distribution was Rs. 185-3-3. It was found impossible to import fodder into so large an area on a scale that would be effective.

(*j*) It is reported that one Charge Officer sold fodder to the value of Rs. 7-6-6 to people who were willing and able to purchase it.

(*k*) It is a fact that portions of the Bhagabanpur and Heria thanas and parts of the Pataspur and Contai thanas remained under water for over 4 months during the current year, and that portions of the Bhagabanpur and Pataspur thanas have remained under water in some previous years up to January.

(*l*) The answer is in the affirmative.

(*m*) An officer has been placed on special duty to investigate four separate schemes for the improvement of the drainage of the whole tract which suffered from the recent floods in the southern portion of the Midnapore district.

The schemes are—

(i) the excavation and sluicing of the Dhunia Khal ;

(ii) the canalization of the Rasulpur river and the excavation of efficient drainage channels in connection with this canalization ;

(iii) the improvement of the Panipia khal near Contai ;

(iv) the improvement of the Pichaboni khal ;

As the schemes have not been fully investigated, it would be premature to place any papers on the table at present.

(*n*) The Rasulpur river has partially silted up. The canalization of the Sarpai river has to some extent hastened the process of silting, but the silting is mainly due to natural causes. Among the more serious of these are the silting up of other rivers, such as the Bagda and Sadar khals, and the general reclamation of lands for the purposes of cultivation.

(*o*) A scheme for canalizing the Rasulpur river is under consideration and is one of the four schemes mentioned above. It is not considered that the opening of the Sarpai river again to tidal action would have any permanent effect on the Rasulpur river, and it is not proposed to carry out this suggestion.

(*p*) As stated above, arrangements have been made to provide work for all who require it. Ample work is at present available along the Hijili Tidal Canal and the Orissa Coast Canal on full wages, but the Public Works Department have difficulty in procuring labourers, as many have gone to the Sundarbans for employment in harvesting the crops there. Later on, there will be ample work for the able-bodied all over the distressed area. For those suffering from acute distress, who are unable to work, arrangements have been made to provide gratuitous relief.

(*q*) It has been decided to remit for the present quarter, and possibly for the next quarter also, all amounts due for chaukidari tax below a certain limit to be determined by the Commissioner, the pay of the chaukidars being met by Government. The details are at present being worked out by the local officers. Suspensions and remissions of land revenue and cesses will be given where necessary in the Government and temporarily-settled estates

under the ordinary rules, which lay down a definite scale for suspensions and remissions according to the degree of crop failure. The question whether the owners of permanently-settled estates should be allowed a suspension or remission of revenue, if they agree to give their tenants a suspension or remission of rent, is under consideration.

(*r*) There has been, and is, no scarcity of good drinking water in the flooded area.

(*s*) The floods have undoubtedly caused considerable distress, particularly to the poorer classes of the population in Argoal and in the Bhagabanpur thanas, but the distress has fortunately so far not deepened into famine. There have been some sporadic cases of cholera, but nothing in the nature of an epidemic outbreak. Five special Sub-Assistant Surgeons have been deputed to the flooded area, where they have been working since August. They have been supplied with injection apparatus for treating cholera patients, as well as with ordinary medicines, and are constantly touring over the affected area and administering medical relief free of cost.

(*t*) As there has never been any scarcity of good drinking water in the affected areas, no special measures have been required.

(*u*) A careful inquiry has been made into the causes of the floods in Contai and a detailed report has just been received from the Superintending Engineer, South-Western Circle, which is now under consideration.

(*v*) Attention is invited to the answer to Question (1) above.

by the Hon'ble RAI NALINAKSHA BASU BAHADUR :—

Amount of money granted for redress of flood stricken persons in the Burdwan Division.

* 14. Will the Government be pleased to state what is the total amount of money granted by them for the redress of the flood-stricken persons of the Burdwan Division ?

The Hon'ble MR. KERR replied :—

"Government have sanctioned a special grant of Rs. 2,54,900 for agricultural loans and of Rs. 1,00,000 for gratuitous relief in the districts affected by the floods in the Burdwan Division."

by the Hon'ble MAULVI A. K. FAZ-UL-HAQ :—

Allegations against the District Magistrate of the 24 Parganas.

* 15. (*a*) Has the attention of the Government been drawn to an article under the heading "Civilian Vagary" in the issue of the "Mussulman" newspaper, dated the 31st October, 1913, commenting on the conduct of Mr. Dunlop, the District Magistrate of the 24-Parganas ?

(*b*) Will the Government be pleased to state whether the facts stated in that article are true ? If not, what is the correct version of the matter ?

(*c*) Will the Government be pleased to state whether any inquiry has been made into the allegations and what is the result of that inquiry ?

The Hon'ble MR. CUMMING replied :—

(*a*) "The attention of Government has been drawn to the article in question.

(*b*) The facts ascertained after inquiry are as follow : Every quarter Magistrates are selected to preside at the distribution of pay to chaukidars at the various police-stations of the district. Maulvi Muhammad Ibrahim was selected to preside at the payment of chaukidars at Jaynagar on the 19th July and Maulvi Bazlur Rahman was selected for Maheshtola for the same date. The orders were communicated to these officers on the 7th and 5th July, respectively. On the 10th July Maulvi Bazlur Rahman asked that a Hindu officer might, if possible, be deputed in his stead, as the 19th was the date of a Muhammadan festival, the *Shab-i-barat*. It was found possible to comply with his request, but a similar request made by Maulvi Muhammad Ibrahim on the same day could not be granted as no other officer was available. The District Officer did not accept the suggestion

that the Sub-Registrar should preside and ordered the Deputy Magistrate to perform the duty.

(*c*) No further inquiry has been made."

by the Hon'ble MAULVI A. K. FAZ-UL-HAQ :—

Allegations against the Additional District Magistrate of Bakarganj.

* 16. (*a*) Has the attention of the Government been drawn to an article in the "Muhammadi" newspaper, in its issue of the 14th November, commenting on the conduct of Mr. Lindsay, the Additional District Magistrate of Bakarganj, in compelling a Muhammadan Deputy Magistrate to come from Jamalpur to Barisal which resulted in his being on board a steamer the whole of the *Bakr-Id* day ?

(*b*) Is it true that the Deputy Magistrate had pointed out that he would be deprived of his *Id* prayers if compelled to attend court at Barisal on the 11th instant because he would be on board the steamer on the previous day, viz., the *Id* day ?

(*c*) Is it a fact that the Additional District Magistrate refused to accommodate the Deputy Magistrate even when these objections were pointed out ?

(*d*) Will the Government be pleased to state whether any inquiry has been made into the allegations and what is the result of that inquiry ?

The Hon'ble MR. CUMMING replied :—

(*a*) "The attention of Government has been drawn to the article in question.

(*b*), (*c*) & (*d*) Government have made an inquiry into the facts. The Deputy Magistrate wrote to the Additional Magistrate of Bakarganj requesting him to fix a date other than the 11th November for his appearance, as the *Iduz-zuha* fell on the 10th November. As the case had already been the subject of protracted inquiry, and eight witnesses were to appear on the 11th for cross-examination, before whose cross-examination it was desirable to examine the Deputy Magistrate, the Additional District Magistrate did not feel justified in postponing the case and informed the Deputy Magistrate that the date could not be changed. The Deputy Magistrate could have avoided travelling on the *Id* day, as the 7th and 8th November were also holidays, and the 9th a Sunday.

Government are of opinion that no intentional or unavoidable inconvenience was caused to the Deputy Magistrate."

The Hon'ble Maulvi A. K. Faz-ul-Haq asked the following supplementary question :—

"With regard to the answer just given to question No. 16, have the Government any information as to whether the case was really finished on that day ?"

The Hon'ble Mr. Cumming said :—"I am not in a position to answer that."

by the Hon'ble BABU SURENDRA NATH BANERJI :—

Fatal assault on an Indian workman by an engineer at the Alexandra Jute Mill.

* 17. (*a*) Has the attention of the Government been drawn to the decision of the Subdivisional Magistrate of Barrackpore in the case in which an Indian workman was assaulted by one Robert O'Brien, an engineer employed in the Alexandra Jute Mill, resulting in his death ?

(*b*) Will the Government be pleased to state what action (if any) they have taken in the matter ?

(*c*) Will the Government be pleased to state whether the Public Prosecutor was engaged to conduct the case on behalf of the Crown ?

(*d*) Will the Government be pleased to state whether they have considered the advisability of passing a standing order that in all trials for assault, in cases where the assaulted person has died, the Public Prosecutor should conduct the prosecution on behalf of the Crown ?

(*e*) Has the attention of the Government been drawn to an article which appeared in the "Bengalee" of the 19th November commenting upon the case and also upon the case of Karoo Musafir ?

(*f*) Will the Government be pleased to state what action (if any) they have taken in the case of Karoo Musafir ?

The Hon'ble MR. CUMMING replied :—

(*a*) "The attention of Government has been drawn to the case.

(*b*) Government have decided to move the High Court for the issue of a rule calling on the accused to show cause why the sentence passed on him should not be enhanced.

(*c*) The prosecution on behalf of the Crown was conducted by the Court Sub-Inspector of Barrackpore who, by virtue of Bengal Government Notification No. 2507 P., dated the 6th July, 1907, published in the *Calcutta Gazette* of the 10th July, 1907, was a Public Prosecutor for the purposes of this case. Attention is invited to section 5 of Chapter II of the Bengal Practice and Procedure Manual, which lays down that where the charge is of a cognizable offence the prosecution will ordinarily be conducted by the police. If, in the opinion of the District Magistrate, the case is of a complicated and difficult nature rendering the employment of the Government Pleader or of some legal practitioner necessary for a proper prosecution, he may direct the Government Pleader to prosecute. The Government Pleader cannot, however, be deputed to the mufassal without the previous sanction of the Legal Remembrancer.

In this case it was not considered necessary to apply for the services of the Public Prosecutor.

(*d*) In view of the existing orders referred to above, Government do not consider it necessary to issue any such standing order.

(*e*) The attention of Government has been drawn to the article in question.

(*f*) Government have received a report of the case of Karoo Musafir and read the judgment of the Magistrate and are satisfied that, in the circumstances, no action is called for on the part of Government."

by the Hon'ble MAULVI A. K. FAZ-UL-HAQ :—

Punishment of a Sub-Inspector of Police for neglect of duty.

* 18. (*a*) Is it a fact that, on the occasion of the last visit of His Excellency the Governor to Barisal, one Maulvi Abdul Aziz, a Sub-Inspector of Police on duty to maintain order, was punished because a person, who considered he had a grievance, had personally handed in a petition to His Excellency ?

(*b*) Has the attention of the Government been drawn to the statement relating to this incident which appeared in the issue of the "Barisal Hitaishi" ? Is the account as there set out correct ? If not, what are the facts ?

The Hon'ble MR. CUMMING replied :—

(*a*) "It is a fact that the Sub-Inspector was punished for disregard of orders in connection with the parking of carriages and also for his failure to prevent an unauthorised person from handing a memorial to His Excellency.

(*b*) The attention of Government has been drawn to the statement in question, which is substantially correct. The Sub-Inspector was awarded one black mark, which was cancelled, in the ordinary course, after six months' good conduct."

by the Hon'ble BABU PRASANNA KUMAR RAY asked :—

Improvement of the pay and prospects of the clerks, draftsmen, etc., in the Public Works Department offices in Bengal.

*19. With reference to the answer given by the Hon'ble Mr. Finnimore at a meeting of the Council, held on the 2nd April, 1913, to my question regarding the improvement of the pay and prospects of the clerks, draftsmen, etc., in the Public Works Department offices in Bengal, will the Government be pleased to state what progress, if any, has since been made in that direction ?

The Hon'ble MR. GREEN replied :—

"The matter has not been lost sight of. The new scheme based on actual experience of the working of Public Works Department offices since the reconstitution of Bengal is now complete, and the orders of Government are about to issue."

by the Hon'ble BABU PRASANNA KUMAR RAY :—

Transfer of certain headquarters offices from Calcutta to Dacca

*20. (*a*) Will the Government be pleased to state whether it is in contemplation to transfer permanently some of the headquarters offices from Calcutta to Dacca ?

(*b*) If so. will the Government be pleased to state which offices will be transferred and when the transfer is likely to take place ?

The Hon'ble MR. CUMMING replied :—

(*a*) & (*b*) "The question is still under consideration and Government are not in a position to make any statement."

by the Hon'ble BABU PRASANNA KUMAR RAY :—

Grant of Presidency allowance to ministerial officers in Bengal.

* 21. Will the Government be pleased to state whether there is any proposal to grant Presidency allowances to the ministerial staff of the Bengal Government offices located in Calcutta ?

The Hon'ble MR. STEPHENSON replied :—

"The answer is in the negative."

by the Hon'ble BABU PRASANNA KUMAR RAY :—

Promotion of ministerial officers serving in the offices subordinate to the Board of Revenue to the grades of Sub-Deputy Collectors

* 22.(*a*) Will the Government be pleased to state whether, under the rules now in force, the ministerial officers serving in the offices subordinate to the Board of Revenue are eligible for promotions to the grades of Sub-Deputy Collectors ?

(*b*) If so, will the Government be pleased to state how many of such appointments have been filled up from the time of enforcement of the rules referred to ?

(*c*) Will the Government also be pleased to state whether similar privileges are enjoyed by the same kind of officers serving under the various other departments ?

The Hon'ble MR. CUMMING replied :—

(*a*) "The rules now in force are contained in the Notification No. 1650 A.—D., dated the 31st July, 1913, published in the Calcutta Gazette of the 6th August, 1913. Under rule 4 of the Rules for the recruitment of the Subordinate Civil Service, the Board of Revenue makes nominations from among officers serving under it. The Board of Revenue is at liberty to nominate ministerial officers, if it thinks fit.

(*b*) Since July last no ministerial officer has been appointed to the Subordinate Civil Service on the nomination of the Board of Revenue.

(*c*) Under rule 4 of the rules to which reference has been made, nominations are also made by the Financial and Revenue Departments."

by the Hon'ble RAJA SHOSHI KANTA ACHARYYA CHAUDHURI BAHADUR :—

Supply of quinine in the Manikganj and Tangail Subdivisions.

* 23. Will the Government be pleased to state what steps they have taken for the adequate supply of quinine in the Manikganj and Tangail Subdivisions where it is believed that malaria is raging ?

The Hon'ble MR. SAMMAN replied :—

"All postmasters and dispensaries in Manikganj subdivision have an adequate supply of quinine. The District Board is also distributing treatments through the panchayats.

In the Tangail subdivision the Municipality are distributing quinine free. All the dispensaries have been supplied with treatments for free distribution and, in addition to this, supply is provided for free distribution in the mufassal post offices."

Alleged overcrowding of patients in the Dacca Lunatic Asylum.

*24.(*a*) Are the Government aware of the general overcrowding of patients, for the last three years, in the Lunatic Asylum in Dacca?

(*b*) If so, will the Government be pleased to state what steps are being taken in the matter?

The Hon'ble MR. STEPHENSON replied :—

"Government are aware that the Dacca Lunatic Asylum has been overcrowded during the last three years.

Additional accommodation has been provided for 40 patients this year, and the admission of patients from Assam has been stopped. The Central Indian Lunatic Asylum at Ranchi, when it is built, will relieve the pressure on Dacca, and the measures already taken will probably suffice till then."

by the Hon'ble RAI NALINAKSHA BASU BAHADUR :—

Silted-up condition of the Eden Canal.

*25. Will the Government be pleased to state what steps (if any), they have taken, or intend to take, on the representation of the villagers living on both sides of the Eden Canal, as to the silted-up condition of the canal, and praying for the removal of weeds therefrom and the keeping-up of a perennial flow of drinking water therein?

The Hon'ble MR. GREEN replied :—

"The Hon'ble Member is referred to the answers given to Question XI (*a*), (*b*) and (*c*) put by the Hon'ble Babu Surendra Nath Banerji at the Council Meeting of the 30th June last.

It is believed that the Hon'ble Member, in making reference to the Eden Canal, includes also such rivers as the Kana Nadi, the Kana Damodar, the Saraswati, etc., which form part of the Eden Canal system. During the last two or three years great difficulty has been experienced in obtaining a sufficient supply of water for the Eden Canal through the Jujuti sluice, owing to the formation of a big 'char' in the river in front of this sluice. A proposal is now under consideration for the construction of a second supply sluice, about 2 miles lower down the river. The Superintending Engineer, South-Western Circle, has been asked to furnish certain information regarding the site of the proposed sluice. By the construction of this new sluice, a great improvement in the supply of water to the Eden Canal is expected, and it will then be possible to send a larger discharge down to flush the Kana Nadi, the Saraswati and the other rivers included in this system. There is also a project for a new canal from the Damodar with permanent head-works at Fakirbaria which is now being revised according to the instructions of the Inspector-General of Irrigation, who inspected the site selected for the proposed head-works last cold weather. The completion of the revised project will take some time, as in view of the recent high floods in the river, some further reconsideration of the project is required.

During the extraordinary flood of August last, a large quantity of the Damodar water which escaped through the several breaches on the left embankment in the neighbourhood of Jamalpur and Tarkeshwar entered into and passed through the Kana Damodar and cleared out the weeds in that channel to a great extent. The Kana Nadi and Saraswati were also flushed by the flood water from the Selimabad breach; but the discharge

was not sufficient to remove the weeds in these channels. Last year weed-clearing was done by hand on 3 miles of the Kana Nadi above the Gopalnagar weir, and on the Saraswati from Sankrail to Kalipur. It is also proposed to take up weed-clearing work on these two channels during next dry season."

by the Hon'ble RAI NALINAKSHA BASU BAHADUR :—

Abatement of rent for the current year to raiyats in the flood-affected areas

*26. Will the Government be pleased to state whether they have taken, or intend to take, any steps with a view to suggesting to the zamindars, as well as to the taluqdars, of the flood-affected areas the desirability of either granting an abatement of rent for the current year to their raiyats, or taking it from them by convenient instalments, and whether Government intend to grant any concession to the zamindars and taluqdars in case they and the taluqdars express their willingness to act in accordance with the above suggestion?

The Hon'ble MR. KERR replied :—

"Suspensions or remissions of land-revenue will be given where necessary in the Government and temporarily-settled estates, under the ordinary rules, which provide for suspensions and remissions being given on a definite scale proportionate to the degree of crop failure. The question whether the owners of permanently-settled estates should be granted suspensions or remissions of revenue, on undertaking to give their tenants suspensions or remissions of rent, is under consideration."

by the Hon'ble RAI NALINAKSHA BASU BAHADUR :—

Disorganized condition of the record-room of the Judge's Court, Burdwan.

* 27. (*a*) Are the Government aware that the record-room of the Judge's Court, Burdwan, has been disorganised as a result of the inundation of the Court during the recent floods, and that the public are experiencing great difficulty in procuring information and copies of documents in proper time?

(*b*) Will the Government be pleased to state what steps (if any) they are taking to remedy this state of affairs?

The Hon'ble MR. CUMMING replied :—

(*a*) "Government are aware of the disorganization of the record-room.

(*b*) Government have sanctioned a grant of Rs. 1,500 for the repair of books, registers, etc., and the entertainment of an extra staff to assist in the reorganization of the record-room."

by the Hon'ble MAULVI MAZHARUL ANWAR CHAUDHURI :—

Tuition fees of Muhammadan students in the Hooghly College, the Hooghly Collegiate School and the Hooghly Branch School.

*28 (*a*). Are the Government aware that, ever since the establishment of the Hooghly College and the Hooghly Collegiate School, Hooghly has been a centre of Muhammadan education and that it attracts every year a large number of Muhammadan students, especially of the poorer class, from all parts of Bengal?

(*b*) Are the Government aware that, owing to the insufficiency of the yearly allotments from the Mohsin Fund towards the payment of the tuition fees of Muhammadan students in the Hooghly College, Hooghly Collegiate School and the Hooghly Branch School, the Muhammadan students in these institutions have, for the last three or four years, had to pay full fees for three or four months in the year, *i.e.*, from December or January to March; and, further, that this year the Muhammadan students of the Hooghly College and the Hooghly Collegiate School are being charged full fees from the month of September, as the whole grant from the Mohsin Fund for the year was exhausted by the month of August, *i.e.*, in five months only?

(*c*) Is it a fact that the Principal of the Hooghly College made more than one representation for an increased grant from the Mohsin Fund to the Hooghly College and Collegiate School but without success?

(*d*) Will the Government be pleased to state whether anything can be done adequately to increase the annual grants from the Mohsin Fund to the educational institutions in Hooghly, the native town of Hajee Muhammad Mohsin, from the next financial year?

(*e*) If there are no other means of suitably increasing the grants from the Mohsin Fund to the Hooghly College, Hooghly Collegiate School and Hooghly Branch School, will the Government be pleased to state whether it is not possible to withdraw the grant from the Mohsin Fund, at present given to Bihar and Orissa, and which was granted to those provinces at a time when they were under the same administration as Bengal, and when the demand for English education among the Muhammadans of Bengal was not so great as it is now, and apply the money thus set free for the benefit of the Schools and College at Hooghly, and, after them, for the benefit of educational institutions in other parts of Bengal?

The Hon'ble MR. SAMMAN replied :—

(*a*) "The answer is in the affirmative.

(*b*) Government are aware of the facts, which are correctly stated in the question.

(*c*) The answer is in the affirmative.

(*d*) The distribution of the grants from the Mohsin Fund among the various educational institutions in the Province is made after careful consideration of the claims of each and the funds available. But, in view of the fact brought to notice by the Hon'ble Member, Government will consider the possibility of increasing the grant by retrenchment in other directions.

(*e*) The subsidy given to Bihar and Orissa from the Mohsin Fund for 'short fee' payments of Muhammadan students is only Rs. 3,200. The Patna College appears to have enjoyed a share of this fund from the year 1874 and certain other institutions in Bihar and Orissa from 1888. The benefit which the withdrawal of this grant would confer on the Bengal Presidency is so slight that Government are unwilling to raise the question at present."

by the Hon'ble MAULVI MAZHARUL ANWAR CHAUDHURI :—

Middle English schools in the Burdwan Division.

* 29. (*a*) Will the Government be pleased to state whether it is a fact that out of about 400 Middle English schools in the Burdwan Division only 4 are under Muhammadan management, *i.e.*, one at Kolora in Howrah, one at Uchahar, one at Mahar in Midnapore, and one at Lodna in Burdwan?

(*b*) Will the Government be pleased to state whether it is true that the Middle English School at Kolora has not succeeded in getting any grant from the Howrah District Board because of want of funds, and that the Middle English Schools at Uchahar and Mahar receive only Rs. 12 and Rs. 10, respectively, a month, and that all attempts to have the grants to these schools increased have failed because of the Midnapore District Board's lack of funds, with the result that the authorities of these three schools are thinking of closing them?

(*c*) Will the Government be pleased to state whether anything can be done to give a suitable grant to the Middle English School at Kolora and adequately to increase the grants to those at Uchahar and Mahar?

The Hon'ble MR. SAMMAN replied :—

(*a*) "The number of Middle English schools in the Burdwan Division on the 31st March, 1913, was only 324, of which 3 were girls' schools. In addition to the four schools mentioned in the Hon'ble Member's question

the following Middle English schools in the Burdwan Division are mainly under Muhammadan management :—

Name of school.	District.
Kusumgram Middle English School ...	Burdwan.
Korajgram Middle English School ...	Birbhum.
Margram Middle English School ...	
Sekeddar Middle English School ...	
Joraghat Middle English School ...	Hooghly.
Darila Kundu Middle English School	
Talpukur Middle English School	Howrah.

(*b*) The District Board, Howrah, was unable to sanction a grant to the Kolora Middle English School for want of funds.

The District Board grants to Uchahar and Mahar have been raised to Rs. 16 a month.

Government are not aware that the authorities of the schools contemplate closing them.

(*c*) Orders are about to be issued sanctioning a monthly grant of Rs. 50 to the Kolora School. It is proposed to give an additional grant of Rs. 24 to the Uchahar School. The case of the Mahar School will be inquired into."

by the Hon'ble MAULVI MAZHARUL ANWAR CHAUDHURI :—

Special Inspecting Officers for Muhammad Education.

* 30. (*a*) Are the Government aware that the notification in the "Calcutta Gazette" of the 1st October abolishing the posts of special Inspecting Officers for Muhammadan Education in the Presidency and Burdwan Divisions has created a sense of alarm among the Muhammadans as to the future prospects of the education of their community ?

(*b*) Will the Government be pleased to state whether it is not possible to appoint a special Inspecting Officer for Muhammadan Education in each of the five divisions of Bengal, to report direct to the Assistant Director for Muhammadan Education on the special educational needs and requirements of the Muhammadans in each of these divisions ?

(*c*) If the Government do not propose to appoint special Inspecting Officers for Muhammadan Education in each division, will they please state what special agency or agencies it is intended to employ to keep the Assistant Director of Public Instruction for Muhammadan Education fully informed of the special educational needs and requirements of the Muhammadan community ?

The Hon'ble MR. SAMMAN replied :—

(*a*) "Government are not aware that the notification referred to has created a sense of alarm among the Muhammadans.

(*b*) & (*c*) These questions are engaging the attention of Government."

by the Hon'ble MAHARAJA RANAJIT SINHA of Nashipur :—

Allegations against the Assistant Surgeon of the Murshidabad Charitable Hospital.

* 31. (*a*) Will the Government be pleased to state whether it is a fact, that the Commissioners of the Murshidabad Municipality, at a special meeting, in pursuance of their resolution, dated the 15th September, 1913, appointed a sub-committee to inquire into the allegations against the Assistant Surgeon Maulvi Dabaruddin Ahmed, of the Murshidabad Charitable Hospital, for not attending a cholera patient who was lying in front of the cholera ward of the said Hospital ?

(*b*) Is it a fact that the said sub-committee, after examining some respectable persons of the locality, submitted a report to the Chairman of the Murshidabad Municipality, who is also the President of the Dispensary Committee, against the conduct of the said Assistant Surgeon ?

(*c*) Is it a fact that, in pursuance of the said report, the Commissioners of the Murshidabad Municipality, at a special meeting held on the 30th September, 1913, asked the Local Government for the transfer of the said Assistant Surgeon ?

(*d*) If so, will the Government be pleased to lay on the table all the papers relating to the case and state what steps (if any) they propose to take in the matter ?

The Hon'ble Mr. SAMMAN replied :—

(*a*), (*b*) & (*c*) "The answer is in the affirmative.

(*d*) Government are not prepared to lay the papers on the table. Full inquiry has been made into the allegations, which have been found by the Inspector-General of Civil Hospitals to be groundless and merely the outcome of private jealousy. Government do not intend to take any further action in the matter."

Improvement the Sanskrit T in the Presidency

* 32. (*a*) Will the Government be pleased to state the number of Sanskrit Tols existing in each district in the Presidency and what grant (if any) each of them receives from the Government or District Boards?

(*b*) Have the Government under consideration any scheme for the improvement of the Sanskrit Tols?

(*c*) If not, will the Government be pleased to state whether they contemplate taking up this matter?

The Hon'ble Mr. SAMMAN replied :—

(*a*) "A statement giving the information required so far as 1912-13 is concerned is laid on the table. The amount of the grants varies each year as it depends on the examination results, the number of stipends and other considerations.

(*b*) & (*c*) The answer is in the affirmative."

Co-ordination of the curricula of the primary and secondary schools in East and West Bengal.

*33. (*a*) Is it a fact that the course and standard of education in the primary and secondary schools of West Bengal differ from those of East Bengal?

(*b*) If so, will the Government be pleased to state whether there is any intention to take up the question of co-ordinating the curricula of East Bengal and West Bengal?

The Hon'ble MR. SAMMAN replied :—

(*a*) "The answer is in the affirmative.

(*b*) The question of co-ordinating the curricula of primary and secondary schools in East and West Bengal has been carefully considered, and it has been decided to maintain the two curricula side by side until sufficient experience of their relative merits has been acquired."

Uniform rules for primary and secondary schools

*34. (*a*) Are the Government aware that the rules for admission, transfer, etc., relating to primary and secondary schools in East Bengal differ from those in West Bengal?

(*b*) If so, is it proposed to adopt a uniform set of rules for the whole Presidency?

(*c*) If not, will the Government be pleased to state the reason for maintaining the difference?

The Hon'ble MR. SAMMAN replied :—

(*a*) "The answer is in the affirmative.

(*b*) & (*c*) The matter is still under consideration, but the nature of the case is such that progress is necessarily slow, and it is not possible at this stage to say when final orders will be passed."

Erection of additional laboratories and buildings in the Calcutta Medical College.

36. With regard to the answer given to my Question 18 (*b*) at the meeting of Council held on the 1st September last, will the Government be pleased to state what would be the probable cost of the erection of additional laboratories and buildings in the Calcutta Medical College to enable the student who are refused admission at present to get themselves admitted into the said College ?

Answer by the Hon'ble MR. STEPHENSON :—

"No proposal has been made to increase the laboratory accommodation at the Medical College, and Government are not in a position to give any estimate of the cost. An increase of accommodation by nearly 400 *per cent.* would involve entire remodelling of the present buildings and the cost would be enormous."

(*iv*) the result of references to the High Court under section 307 of the Code of Criminal Procedure,

in the districts which now form part of the Presidency of Bengal ?

Answer by the Hon'ble MR. CUMMING :—

"A statement giving the desired information is laid on the table. The figures in columns 2 to 5 of the statement relate to persons, as statistics of the number of cases are not available."

Inundation of the subway leading to Bandel junction station.

38. (*a*) Are the Government aware that the subway leading from the town of Hooghly to Bandel junction station, on the East Indian Railway, remains under water, every year, to a depth of three to four feet, right through the rainy season, with the result that railway passengers to and from Hooghly are put to great hardship and inconvenience, and that even the passage of vehicles through the subway is a difficult and risky matter, as at most times they have to go through with their foot-boards under water ?

(*b*) Is it a fact that complaints as to the inconvenience caused by the inundation of the subway during the rains were made by the people of Hooghly to the Railway authorities as far back as the year 1908 ?

(*c*) Is it a fact that in June and August of the present year, numerously-signed petitions were submitted by the residents of Hooghly to the Commissioner of the Burdwan Division, requesting him to ask the Railway authorities to take effective steps to remedy the inconvenience, and that the Commissioner wrote to the Railway authorities in that behalf ?

(*d*) Is it a fact that the people of Hooghly again submitted a petition in September last to the Agent of the East Indian Railway reiterating their complaints and grievances ?

(*e*) Has any scheme been prepared by the Railway authorities permanently and effectively to remove the inconveniences and hardships of the travelling public caused by the present state of the subway leading to the Bandel junction station?

(*f*) If not, will the Government be pleased to state what action (if any) they intend to take in the matter?

Answer by the Hon'ble MR. GREEN :—

(*a*) "The answer is in the negative.

(*b*) Government are informed by the Agent, East Indian Railway, that complaints as to the inconvenience caused by the inundation of the subway during the rains were made to him from time to time.

(*c*) The answer is in the affirmative.

(*d*) The Hon'ble Member's attention is drawn to the reply to Question 38 (*b*).

(*e*) & (*f*) Correspondence is proceeding between this Government and the Railway Company on the subject, and it is hoped that the Railway Company will be able to devise some effective means of removing the inconvenience referred to."

by the Hon'ble MAULVI MUSHARRAF HUSAIN :—

39. Will the Government be pleased to state—

(*i*) the number of villages comprised in the Presidency of Bengal, and in how many of them cholera broke out during the year 1912-13; — Cholera in the villages in the Presidency.

(*ii*) the number of seizures in that year, and how many of them proved fatal; and

(*iii*) what amount of expenditure was incurred for the relief of the sufferers during that period?

Answer by the Hon'ble MR. SAMMAN :—

(*i*) "The number of villages comprised in the Presidency of Bengal, exclusive of Municipalities, is 123,258. No information is available as to the number of villages in which there were outbreaks of cholera in the year 1912-13.

(*ii*) No record is kept of the number of seizures from cholera, and the figures for deaths are compiled by the calendar year. Ninety-five thousand four hundred and sixty-seven deaths from cholera occurred in 15,124 villages during the calendar year 1912.

(*iii*) It is impossible to say what amount of expenditure was incurred for the relief of the sufferers. A sum of money is set aside in the medical budget each year for expenditure in epidemics, but the main business of the relief of cholera patients is carried out by the ordinary staff at hospitals and dispensaries, and by special medical officers whose services are paid for by the District Boards."

by the Hon'ble RAI RADHA CHARAN PAL BAHADUR asked :—

40. (*a*) Will the Government to pleased to state whether the engineer in charge of the survey for the proposed railway from Nabharan to Satkhira has submitted his report covering the question of alignment of the line? — Survey of the railway line from Nabharan to Satkhira.

(*b*) If so, will the Government be pleased to lay the same on the table?

(*c*) Will the Government be pleased to state whether the engineer has proposed, in his report, any alignment other than that actually surveyed?

(*d*) If so, through what villages would the alternative alignment pass?

(*e*) Have the Government considered the question of alignments?

(*f*) If so, will the Government be pleased to state whether any particular alignment has been approved of?

(*g*) If the answer to question (*f*) is in the affirmative, will the Government be pleased to state through what villages the alignment would pass?

(*h*) If the question of alignment is still under the consideration of the Government, will the Government be pleased to state whether the local authorities (Collector, Local Boards, District Boards and other local representative and influential bodies) will be consulted before any final decision is arrived at?

Answer by the Hon'ble MR. GREEN :—

(*a*) to (*d*) "The answer is in the negative.

(*e*), (*f*) & (*g*) The question of the alignment has not yet been settled. The matter will be duly considered on receipt of the survey report and the estimates for the construction of the line from the Agent, Eastern Bengal State Railway.

(*h*) The question of consulting local public opinion further on the subject of the alignment will be considered when the report is received. The investigation made by the Railway authorities is being carried out in consultation with the local civil authorities, and the representations on the subject of alignment which have been made to those authorities by persons interested in the scheme are receiving full consideration."

HIS EXCELLENCY'S ADDRESS.

"GENTLEMEN,—I welcome you here once more. I hope that, during this cold-weather season now beginning, we shall get a good deal of legislative business done. Last January I told you of eight Bills which my colleagues in Executive Council and I hoped, with your assistance, to pass into law. I don't complain of the slowness of our progress; but we have not got on quite so fast as I then hoped we would. We still have to deal with half of these Bills. Two of them—the Bengal Laws Bill and the Bengal Municipal (Sanitary Officers) Bill—have engaged the attention of Council a good deal, and I trust we may very shortly pass them. I merely remind you of the Chittagong Port Bill which still remains to be dealt with. The Calcutta Municipal Loans Bill has not been taken up in Council since last April, because, as you will remember, certain important proposals were made for its modification, which my colleagues and I felt ought to be discussed fully, both with the Corporation and with the Government of India, before dealing with them in this House. The discussions have nearly come to an end and next month we hope to proceed with the Bill.

Two other measures not referred to in January—The Doveton Trust Bill explained at our meeting of the 1st September, and the Bengal Medical Bill to be introduced to-day—may also I hope become law before long.

And there are two others which we should wish, if possible, to deal with during this session—though I don't wish to speak too sanguinely—a Bill to amend the Cess Act of 1880 in view of the recent decision of the Secretary of State to transfer to Rural Boards the proceeds of the Public Works cess hitherto credited to Government, and a Bill to amend the Excise Act.

Several other measures are engaging the attention of the Legislative Department, but it would be vain to pretend that we have any immediate chance of passing them; so I do not refer to any of them beyond saying that every effort will be made to push to completion an amending and consolidating Bill to take the place of the existing Calcutta Municipal Act of 1899. I know that much interest is taken in this matter both inside this House and out of it; but it is one of great complexity involving a good deal of work, and one on which other bodies besides the Bengal Government must have their say. So far as I can judge I see small chance of the Bill

being introduced into Council before the rains session of 1915. Some men of longer and wider experience tell me there will be little chance even then.

Gentlemen, I feel sure you will agree with me that it is the interest of all concerned that the Council should not be burdened with other than budget work while the Financial Statement is under discussion, and I therefore confidently look to you all to help in securing that our present legislative work may be completed by the early part of next March.

It may be interesting to you to know that our Secretary, Mr. Watson—of whose accident we were sorry to hear, and who we all hope will soon be better—is working hard at getting together a library which will be of more use than the library hitherto available to you. Government gave a grant and will continue to give further grants for this purpose and in the course of the next two or three years I hope we shall have a library really worthy of the Council. Want of room here forces us for a time at least to house most of the books in Writers' Buildings, but Government will do its best for you ; our Vice-President, Sir William Duke, and Mr. Watson are taking a great deal of trouble in this matter and Hon'ble Members doubtless will give them their assistance.

You may recollect that last January I told you that I would consider how the accommodation at our disposal could be improved. Many of you take interest in this. I know that among the non-official Members—and they are of course the majority of this House—opinion is practically unanimous that the Bengal Legislative Council ought to be housed in an entirely new building designed specially for the purpose of the Council—as, for instance, is the case in Madras. The objections to this Council room and to our accommodation as a whole, especially in the hot weather, are patent to all. I don't suppose it can be very long before either we must erect a completely new building on some other site or entirely rebuild on a larger scale this wing of Government House. Either alternative will be very costly. Cost must not deter us from anything which is for the good of Bengal, but there are many reasons for not undertaking large expenditure on building at present and, moreover, I dare say many of you look forward to possible changes in the constitution of the Council itself before very many years are over—when Councils have proved themselves to be all or almost all that their admirers in India claim for them, and to possess none or very few of the evil qualities which those more enamoured of another system of Government feared they might develop ; it seems to me therefore that we should probably be wise not to commit ourselves just yet to any definite scheme involving new buildings or large changes in existing buildings.

I have, however, done as I promised—I have gone fully into the consideration of this wing of Government House and have had plans prepared showing how, as I believe, it can be made—at considerable but not unreasonable expense—to give more practical comfort than we have at present with better conditions in which to transact our business. I had hoped to have shown you the plans ere now ; I have not managed that, but you will see them before many days are over. When you do, I hope you will give me the advantage of your advice.

And now I would like to say a few words which I feel prompted to say when I look back on what has happened since last January. You have helped considerably, that is, what as a Council you exist to do. Not only have you helped by criticism and advice to make legislation better than it would have been without your criticism but by your questions and by your resolutions you have called the attention of my colleagues and myself to questions or aspects of questions which we might perhaps have missed. For that I am grateful to you. This Council is not like those assemblies in other countries with which till I came to India I was familiar, which secure good government to their country by keeping in power or removing the individuals who form the executive. The members of such bodies often best perform their functions by purely partisan criticism—but here it is different. Here you have an executive whose duty it is to do all it can for

your country, but which is not dependent for its existence on you. I know speaking for myself at any rate, how often and in how many ways I am ignorant of facts which have a bearing on the problems which an executive Government must face, and how hard one who belongs to another race and has different traditions, often finds it to understand the point of view from which you look at things ; sometimes, often it may well be, I fail even to see things which must appear to you obvious, and equally it cannot always be easy for you to grasp my point of view. Without accurate knowledge there cannot be efficiency either in legislation or in administration, for without accurate knowledge there cannot be the sympathy which is the best guarantee of efficiency. I and my colleagues therefore in the Executive Government cannot be too grateful to you when you enable us to appreciate the ideas of the people for whose good government we are responsible, and when you point out to us any deficiencies which we might overlook ; but we want you to give us even more help. I don't know that you, non-official Members, always quite realize how much help you can give us : perhaps you do not quite realize how much you Indian non-official members can do for Bengal and for your own fellow countrymen by help of this sort ; I believe if you do fully realize it, you will be even more anxious than you are to give us help. I will try to explain to you what I mean. Sometimes questions come to us, or ideas are put before us, which take a good deal of time on the part of our officers to investigate and which turn out to be based on mere rumours or incomplete statements of facts, questions of a sort which would not be admitted knowingly in, for instance, the House of Commons, where every member is expected to hold himself responsible for the accuracy of facts on which he relies ; and here in India it seems to me to be even more important than it is in England to make certain of any facts. Our officers here are not too numerous in proportion to the population : they do a great deal if they keep abreast of such part of their work as is helpful to the people for whom they are paid to work ; they have quite enough at any rate to do with routine work, which has to be done whether it be useful or not, and the use of which is often not apparent on the surface. I fear that when such men have, as they sometimes have, to investigate a matter, which would be serious if true, only to find it of no importance because it is not true, they naturally become sceptical and disinclined to look into other things into which it would be well if they did look thoroughly. I think you may be able to help a great deal in that matter. And I hope you will be thinking of this, for I am inclined to expect that, in the interest of good administration, we may have somewhat to modify our rules about questions perhaps in the directions indicated by the House of Commons Rules. and if so I shall want your help. Then, again, I feel sure that nothing will do more to secure good Government for Bengal than if the members of this Council show themselves to be thoroughly practical, as well as full of independence ; you cannot be too full of independence in your views, provided only those views are firmly based on knowledge and your aims have been well thought out. My Government will always, I hope, listen to the views expressed here and will try to find a commom point where our aims and your aims can unite ; but this will only be brought about in proportion as we show each other what our real aims are. I don't say we don't do this, but I think there must be a risk—slight perhaps but still a risk—of your sometimes not doing it, and of our sometimes not doing it, if officials and non-officials get too much into the habit of treating each other as necessarily opposed. Government and opposition cannot exist in our assembly in the same sense as they exist in Englaud, at any rate if those who are not members of Government are to work effectively for their country. You non-official members beat us—the Executive Government—once, not long ago. I was not sorry when you did it, for it showed you what you could do. You may beat us again : and it may be well that this happens sometimes ; but power carries with it responsibility, and I trust you will resist all temptation to beat us merely for the sake of beating us. I hope this not because I wish to avoid trouble for myself or for Government, but because I am anxious for the reputation of Council Government in India and especially in Bengal. When the non-official members beat the Government nothing particular need necessarily

happen. Government can go on just the same as if it had not been beaten ; Government will always, I hope, examine carefully any question on which it has been beaten, and if it honourably can, will meet the views of the non-official majority ; but it seems to me that, if once the beating of Government were to become common at the hands of men voting with a light heart against Government without any clear and well-thought-out idea of what the result would be if what they support is or is not carried out, a blow will be struck not to the prestige of Government but to the prestige of the Council, and that will be a great set-back to Indian progress. For the honour of Bengal it behoves the politicians of Bengal to recognise their responsibilities, to shape their political conduct deliberately, and to think out results. It specially behoves us all to be circumspect just now. Things have happened in Bengal which we all deplore : such things may happen again. I don't believe things such as I refer to will be common ; I feel sure they are not generally approved ; but they have happened. I quite sympathise with your reluctance to believe in such things, and with your hope that officials may perhaps at times have been unduly suspicious. Nothing hurts one more than to find that any one whom one loves or whom one admires has done things which one must hate or despise. You love and admire your country and I sympathise with you in your jealousy for the honour and reputation of Bengal. But Government, too, is jealous for the honour of Bengal, for it is by the state of Bengal that our Government must be judged. We must, if Bengal is to hold its proper place, all work together ; there is much wanted, much in the way of education, much in the way of development of the capacities of the Bengalee, which wants careful working out, and which can only come to a successful issue if both officials and non-officials unite in giving each other a fair chance. I am not going to elaborate this idea. I think you understand me well enough. I would merely say once more that as Governor I thank all of you, officials and non-officials, in this Council for the help you have given to my colleagues and myself in our work and I look confidently to you to continue giving us that help."

LEGISLATIVE BUSINESS.

THE BENGAL LAWS BILL, 1913.

" The Hon'ble Sir William Duke moved that the Bengal Laws Bill, 1913, as further amended by the Select Committee, be passed.

He said :—" It will be observed that the report of the Select Committee, which, with the exception of myself, consisted entirely of legal members of the Council, is unanimous. I need therefore say very little to recommend the Bill to the Council.

Its object is to assimilate the law in the two portions of the Province which were united into this Presidency on the 1st of April, 1912. The procedure followed has been, when the law in the two parts of the Presidency was different, to select that which was most up to date or otherwise most desirable, and to repeal the other.

The only exception to this course is that the Select Committee have approved of two small substantive amendments of Bengal Act III of 1885. This Act had been amended in Western Bengal by the Bengal Local Self-Government Amendment Act of 1908 which the Bill extends to Eastern Bengal ; but it was felt that it was desirable that these two new amendments—the one subjecting the action of Divisional Commissioners in making appointments to District and Local Boards to the administrative control of the Local Government and the other empowering District Boards to establish scholarships for the furtherance of technical education, should also be passed into law. It is not likely that there will be a general amendment of the Local Self-Government Act for some time to come, and it did not seem worth while to make these petty amendments into a separate legislative measure. Accordingly, the opportunity was taken to embody them in the

Laws Bill, although it may be admitted that they hardly come within the legitimate scope of such a measure. Had they been matters of much intrinsic importance, or of a controversial character, it would not have been proper. But it is merely a case of the extension of minor desirable improvements regarding which there seems to be no difference of opinion, and I do not think it will form a precedent for turning a laws Bill into an omnibus measure. I therefore move that the Bill be now passed into law."

The motion was put and agreed to.

THE BENGAL LEGISLATIVE RULES, 1912.

The Hon'ble MR. CHAKRAVARTI said :—

"May I, before the Hon'ble Sir William Duke moves the amendments to the Bengal Legislative Rules, make a suggestion? In this part of the House we have felt that there is a necessity for the extension of time in order to enable your Lordship's Council to consider matters of amendment and other matters, and therefore more time ought to be given. But with regard to some of the matters we feel that a sufficient amount of time has not been accorded to us, and I am only making a suggestion, and I hope it will find favour with your Lordship as well as with the Hon'ble Sir William Duke, that this matter ought first to be considered by a small Committee, and then it will come before your Lordship's Council in a shipshape form. The ordinary method, as has been pointed out, was not followed because it was thought that it would be for administrative convenience and expedition that this matter should be considered by the Council, as a whole, at once, but we find that, especially with reference to one matter, the time for consideration of the amendments to the report has been cut down from one week to less, and our desire is to have a little more time. As the object of the amendments is for the purpose of considering the convenience of both sides, I sincerely hope that the Hon'ble Sir William Duke will see his way to accept my suggestion."

The Hon'ble SIR WILLIAM DUKE said :—

"I am somewhat surprised that this suggestion is made; because I believe I am correct in saying that the papers were circulated on the 14th November, and no amendments or suggestions have been received since then. I believe that, previous to that, Mr. Watson consulted the non-official members of Council, or at any rate warned them of what was coming. The proposals in their present form were, I think, circulated on the 14th November,—that is the date the circular bears—and we have heard nothing of it since."

The Hon'ble MR. CHAKRAVARTI said :—

"I am afraid there is some misapprehension; it was not circulated as early as the date the Bill bears, at least so far as I am concerned I did not get it then. Further, there was a considerable amount of misapprehension as to the method in this particular instance, being an informal one, whether the amendments should be sent in beforehand. It was not in the nature of a report of the Select Committee, for which amendments, according to rule, have to be sent in within a particular time."

The Hon'ble SIR WILLIAM DUKE said :—

"There may have been misapprehension, but the Bill itself contained an explanatory note as to the procedure to be followed, from which, I think, it might have been inferred that whatever was to be done was to be done in Council. The Hon'ble Member is also under a misapprehension that the time has been curtailed. The time has not been curtailed by any means. In every case the time allowed for considering reports and making amendments has been increased, and it is desirable, I think, that we should have the benefit of these rules before we proceed to any heavier legislation, and it would be regrettable, and a misfortune, I think, if they were not passed

before any Bill of any considerable magnitude comes into force. It has also not been the practice in this Presidency, at any rate for two years, to employ the procedure of Select Committee with regard to the amendment of our Business Rules, and I do not know whether it would be convenient to employ it on this occasion. At the same time I have no wish to rush the Council. If it is understood that it is the desire among non-official members that they should have more time, I have no particular objection to postponing the matter to the next meeting of the Council. Perhaps your Excellency will obtain the opinion of the other side of the House. There is nothing in the Rules that I cannot explain now."

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"I just want to say this : There does not seem to me to be any special case for urgency, because there are no heavy Bills which are likely to come before us within any measureable distance of time. Judging from the statement which your Excellency has just read out to us, and it seems to me that there is no special case for hurry in this matter. That being so, I think it would meet the wishes of both sides of the House, if there was a little time allowed and a small Committee appointed to go into the matter and submit their recommendations to the Council. I think that would be a procedure which would commend itself to the views of both sides of the House, and I therefore gladly recommend it."

The Hon'ble MR. APCAR said :—

"May I intervene and say that there is no necessity for any protracted delay? The matter may be considered within a week and everything settled. I am sure that our aims are the same, and the only thing is whether we have arrived at a common point of view. I think, if we are allowed to meet and discuss this measure, we could easily come to an understanding at a simple meeting. The only objection taken now is that there may be delay; that can easily be got over by your Lordship's Government by convening a small Committee, selected on your own initiative, and putting a limit as to the time. I do not know why the whole matter should not be settled within a week or ten days, and that would be well within time before any big measure could be brought forward. I earnestly ask that there should be this reference, because there are matters which require consideration from our point of view."

The Hon'ble RAI RADHA CHARAN PAL BAHADUR said :—

"I do not know whether the Hon'ble Babu Surendra Nath Banerji has moved for reference to a Committee, and I don't know whether under the rules he can move that, but I think he has expressed the sense of this part of the House if he made the suggestion; because there are certain important points on which we should like to submit our views to Government, and if there was a mixed Committee made up of official and non-official members, our suggestions would be given due consideration by that Committee instead of a protracted debate in this Council."

His Excellency the PRESIDENT said :—

"I do not think we should waste any more time, but postpone the matter. There is no motion."

The consideration of the following motions was accordingly postponed to the next meeting of the Council.

1. The Hon'ble Sir William Duke to move that in rule 21 of the Bengal Legislative Rules, 1912, for the word "five", the word "ten" be substituted.

2. Also to move that in rule 22 (*1*) of the same rules, for the word "five", the word "fifteen" be substituted.

3. Also to move that in rule 22 (*2*) of the same rules, for the word "six", the word "sixteen" be substituted, and for the word "five", the word "fifteen" be substituted.

4. Also to move that in rule 22 (*3*) of the same rules, for the word "fifteen", the word "thirty" be substituted.

5. Also to move that in line 1 of rule 22 (*5*) of the same rules, after the word "shall", the brackets and words "(if possible)" be inserted.

6. Also to move that in rule 41 (*2*) of the same rules, for the words "when he has not been furnished for a week with a copy of the Report", the following be substituted, namely,—

> "unless such Report was forwarded to him at least five days before the final date fixed for the receipt of notice of amendments";

7. Also to move that for the first three lines of rule 51 of the same rules, the following be substituted, namely,—

> "A list of the business to be brought forward at a meeting of Council shall, if time permits, be despatched by the Secretary to each Member at least four days before such meeting."

8. Also to move that in the proviso to rule 51 of the same rules, for the words "sent to each Member at least one day before the meeting," the following be substituted, namely.—

> "sent so as to reach each Member at least two days before the meeting."

9. Also to move that for rule 54 (*1*) of the same rules, the following be substituted, namely,—

> "(*1*) to draft all Bills originated by the Government of Bengal and the Reports of Select Committees to which such Bills are referred; to settle the Statement of Objects and Reasons appended to such Bills and to prepare the Notes on Clauses (if any).

THE BENGAL MUNICIPAL (SANITARY OFFICERS) BILL, 1913.

The Hon'ble Nawab Syed Shams-ul-Huda presented the report of the Select Committee on the Bengal Municipal (Sanitary Officers) Bill, 1913, and moved that the said report be taken into consideration.

The motion was put and agreed to.

His Excellency then called upon the Hon'ble Rai Nalinaksha Basu Bahadur to move amendment No. I standing in his name in the Appendix to the List of Business.

The Hon'ble RAI NALINAKSHA BASU BAHADUR said :—

"My Lord, in view of the agreement that we have now come to with the Hon'ble Member in charge of the Bill, with regard to the provisions of the Bill, we do not press the amendments."

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"I think it would be satisfactory to all parties, and help the discussion, if the extent of the acceptance of these amendments was announced to us by the Hon'ble Member in charge of the Bill. Then we shall know in what position we stand, and what amendments are approved and what are rejected by the Government."

The Hon'ble NAWAB SYED SHAMS-UL-HUDA said :—

"I am quite glad at the outset to indicate the amendments which we are prepared to accept as that may have the effect of cutting short the discussion. There have been three amendments of considerable importance. One was that the provisions of the Bill should not be put into force in Municipalities with an income of less than ten thousand rupees. Another amendment was that the promise of Government to contribute half the pay of the Health Officers should be incorporated in the Act itself, instead of being confined to the Resolution. The third important amendment proposed was that Government should only prescribe for the appointment of one Sanitary Officer, and, as to the rest, the matter should be left to the Municipalities themselves. There are two other minor amendments, which it is not necessary to deal with just now.

With reference to the first amendment, namely, that Municipalities with an income of less than rupees ten thousand should be excepted, we have considered the matter and, in order to meet the wishes of Hon'ble Members, we have decided to accept that amendment. The acceptance of this amedment will have the following result :—Out of 111 Municipalities in the whole of Bengal, about 36 Municipalities will not be affected by the Bill at all. This is a most substantial concession that we have made, and I think it goes a long way to meet the wishes of Hon'ble Members.

As regards the second, we had no objection to put the obligation of Government on a statutory basis, but we have been informed that there is not one single instance where an obligation to make a contribution by Government has been put on a statutory basis. I may assure my Hon'ble friends that we have made a promise and we mean to keep it; as a matter of fact, I do not think Government have ever broken a promise. We have stated in our Resolution that we mean to pay half the salary of the Health Officers. The Government of India in their resolution also stated the same thing, and we have also stated that, even in the case of Sanitary Inspectors, where there is a question of real hardship, Government would be willing to help. I hope that my Hon'ble friends will accept this assurance as sufficient and will not press us to adopt a course that is unprecedented.

As regards the third amendment, we have been advised that it would not be right for us to accept it. The result is that we are going to accept only one amendment. As regards the second, above referred to, although it

is not formally accepted, we can give Hon'ble Members the assurance that our Resolution will be as binding as a statute, and I would ask my Hon'ble friends to consider their amendments in view of the statement I have made, and withdraw such of them as they think fit."

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"I think, my Lord, that as a consequence of the announcement that all amendments which tend to limit the application of the Act to certain Municipalities will be, in substance, accepted, and of the further announcement that Government is precluded by precedent from making any financial compact in a statute, all amendments will be abandoned by us, but, of course, the other amendments relating to the other matters, on which my friend is not making a statement, they will be, I take it, the subject of discussion in this Council. That will simplify matters considerably."

The PRESIDENT :—

"I cannot pretend to judge which amendments should be withdrawn and which should not : so that we had better take them in order."

The following motions were then, by leave of the President, withdrawn :—

Clause 1.

I.—The Hon'ble Rai Nalinaksha Basu Bahadur to move that at the end of clause 1, the following words be added, namely,—

"and shall be deemed to be part of the Bengal Municipal Act, 1884." Ben. Act III of 1884.

Clause 2.

Proposed new Section 349C.

II.—The Hon'ble Rai Nalinaksha Basu Bahadur to move that for sub-section (*1*) of the proposed new section 349C the following be substituted. namely,—

Power to declare this Part to be in force in any municipality.

(1) If the Magistrate of the District is of opinion that the provisions of this Part should be extended to any municipality within his jurisdiction, he may call upon the Commissioners of that municipality to apply to the Local Government, through him, for the extension of the said provisions to that municipality ; and if, within four months of the receipt of such requisition. the said Commissioners fail to comply therewith, the Magistrate of the district may himself apply to the Local Government to extend the said provisions to such municipality.

(*1a*) On receipt of any application under sub-section (*1*), the Local Government may, by notification published in the *Calcutta Gazette*, announce its intention to declare this Part to be in force in the municipality referred to therein :

Provided that the provisions of this Part shall not be extended to any municipality the income of which falls below Rs. 10,000 a year.

III.—The Hon'ble Babu Surendra Nath Ray to move that in the last line of the proposed new section 349 C (*2*), after the words "so sent", the following be added, namely,—

"together with any report submitted by the District Magistrate along with such objections."

IV.—If motion No. III be carried, the Hon'ble Babu Surendra Nath Ray to move that in line 2 of the proposed new section 349C(*3*), after the words "or if it considers", the following be added, namely,—

"after giving due weight to the report of the District Magistrate."

Proposed new Section 349D.

V.—The Hon'ble Rai Nalinaksha Basu Bahadur to move that the proposed new section 349D be re-numbered as sub-section (*1*) and that for its last four lines the following be substituted, namely,—

"as may be deemed necessary by them: such Health Officer to be of such class, and such Sanitary Inspectors to possess such qualifications as the Local Government may, by notification in the *Calcutta Gazette*, direct."

(*2*) Notwithstanding anything contained in sub-section (*1*), the Local Government may, for reasons to be recorded in writing, direct the appointment of a Health Officer and of such number of Sanitary Inspectors as it may deem necessary in any particular municipality.

VI.—The Hon'ble Babu Mahendra Nath Ray to move that in lines 12 and 13 of the proposed new section 349D the words "and such Sanitary Inspectors to possess such qualifications" be omitted.

VII.—The Hon'ble Babu Mahendra Nath Ray to move that the following proviso be added to the proposed new section 349D, namely,—

"Provided that the number of Sanitary Inspectors to be appointed for any municipality shall be fixed by the Commissioners of the municipality concerned at a meeting."

VIII.—The Hon'ble Babu Surendra Nath Ray to move that the words "such Health Officer to be of such class, and such Sanitary Inspectors to possess such qualifications, as may be so directed", in the second and subsequent lines of clause (*b*) of the proposed new section 349D, be omitted, and that the following provisoes be added after the words "as the Local Government may, by notification in the *Calcutta Gazette*, direct", namely,— [*Cf.* Nos. II and VI.]

Provided that—

(*i*) the Local Government shall not have the power to compel any municipality to appoint more than one such officer and

(*ii*) the provisions of this section shall not be put into operation in any municipality, the income of which is less than Rs. 10,000, unless two-thirds of the Commissioners agree to the proposal."

IX.—The Hon'ble Raja Hrishikesh Laha to move that the following proviso be added at the end of the proposed new section, 349D, namely,—

"Provided that, with the approval of the Local Government, two or more municipalities may jointly retain the services of a Health Officer or a Sanitary Inspector appointed under this section, and make such proportionate contribution towards the pay of such officer as the Local Government may determine."

Proposed new Section 349E.

X.—The Hon'ble Rai Nalinaksha Basu Bahadur to move that for the proposed new section 349 E the following be substituted, namely,—

"349E. The Local Government shall, from time to time, fix the salaries to be paid to Health Officers and Sanitary Inspectors and the allowances to be granted to them during absence on leave, one half of such salaries and allowances being paid out of the Municipal Fund and the other half by the Local Government."

XI.—The Hon'ble BABU MAHENDRA NATH RAY moved that, in line 3 of the proposed new section 349E. the words "and Sanitary Inspectors" be omitted.

He said :—

"My Lord,—The object of the amendment is to leave it to the Municipal authorities concerned to fix the salaries to be paid to their Sanitary Inspectors. The wording of the clause, as it stands, is that 'the Local Government shall from time to time fix the salaries to be paid to Health Officers and Sanitary Inspectors out of the Municipal Funds, and the allowances to be granted to them during absences on leave.' So far, my Lord, as the Local Government desire to have the power of imposing upon the Municipalities the duty of appointing Sanitary Inspectors, we do not object, but when the question is as to the salary to be paid to these people, I humbly submit that to take away from the Municipal Commissioners the power of fixing their salaries is really to go too far, and to interfere with the well-understood policy of Local Self-Government. I would have been, therefore, very glad, my Lord, if the proposal which is embodied in this amendment had been accepted by Government ; but as it has not been accepted, I am compelled to press it to a division. Under the Local Self-Government Act, which controls the action of District Boards, the latter enjoy the power of not only appointing their own Sanitary Inspectors but of fixing their pay. It is difficult to see why Municipal Corporations in Bengal, which are more advanced in many places than the rural authorities, should not have this power of fixing the pay of their own Sanitary Inspectors. It is suggested that the practical difficulty in the way is that Government propose to train two classes of Sanitary Inspectors, and that, as we read in the Resolutions, the Sanitary Inspectors should be of two classes, classes 1 and 2 ; Sanitary Inspectors belonging to the second class to get a pay of Rs. 50 rising to Rs. 100, and Sanitary Inspectors of the first class to get a pay of Rs. 100 rising to Rs. 150, and that, if the question of pay and allowances of Sanitary Inspectors were left to the Municipalities concerned, they might not choose to pay Sanitary Inspectors enough, and the Sanitary Inspectors trained by Government under the system which has been in operation might not find it possible to accept service under some municipalities which might

grudge them even the small pay the Government has practically settled. But I have no doubt, my Lord, that Municipalities will never think of employing Sanitary Inspectors on a pay less than Rs. 50, but that they will be engaged on a proper pay. Whether a Sanitary Inspector to be entertained under a Municipality should be of second class or first class is a matter of detail which, I submit, should be left to the Municipalities concerned, and I do not see any sufficient reason for withdrawing that power from them. It is a very small matter, but a matter in which there will perhaps be a good deal of hardship, as the Municipalities will consider that even in these small matters of detail their hands are being unnecessarily fettered. I therefore am compelled to press this motion to a division."

The Hon'ble BABU SURENDRA NATH BANARJI said :—

"May I be permitted to make a suggestion, for the consideration of the Hon'ble Member in charge of the Bill, whether we can arrive at a sort of compromise in this matter—namely, that the pay be fixed by the Municipalities subject to the approval of the Local Government? There are two partners to the transaction—one is the Municipality and the other is the Local Government. Both make a contribution towards the pay, and I think both ought to have a substantial voice in the matter; and, therefore, I think we ought to put it in that form, namely, that the pay should be fixed by the Municipality subject to the approval of the Local Government, so that both partners to the transaction may have a voice in regard to it. This is a compromise which I trust my Hon'ble friend will see his way to accept."

The Hon'ble BABU SURENDRA NATH RAY said :—

"I have only one word to say. In the opinions that were circulated on the Bengal Municipal (Sanitary Officers) Bill, I find that Mr. Patterson, the District Officer of Howrah, a member of the Indian Civil Service, says on page 6 to this effect :—

'As the proposed section 349 F will empower Government to make rules prescribing the qualifications, etc., of sanitary officers, and as the proposed section 349 D will make the appointment of such officers obligatory, their salaries should be left to be determined by the Commissioners in accordance with the ordinary laws of supply and demand.'

After this opinion from one who is a trusted servant of Government and who has got experience of Municipalities, I think Government ought to accept the suggestion which is made by the Hon'ble Babu Mahendra Nath Ray."

The Hon'ble NAWAB SYED SHAMS-UL-HUDA said :—

"This question has been carefully considered. It was discussed at some length in Select Committee and it was rejected, and the reasons are these, my Lord : we have taken a number of men to give them a training. They want certain prospects, in order to be induced to go through this course of training, and it would be desirable that Sanitary Officers serving in different Municipalities should have about the same pay. If we left it to individual Municipalities, there may be in some Municipalities a great spirit of parsimony and they may refuse to pay the Sanitary Inspectors an adequate sum : and, unless a man is well paid, his work is never well done. There will be a large number of Municipalities that will employ Sanitary Inspectors. It has been considered desirable that the qualifications and pay should be fixed by Government to ensure uniformity. I am not convinced that the Hon'ble Babu Mahendra Nath Ray's argument completely answers this objection.

Reference has been made to the practice in the District Boards, but my Hon'ble friend will remember that the number of Municipalities is much larger than the number of District Boards, and, so far as the few District Boards are concerned, they may make their own terms. I think it will raise discontent and will interfere with the efficiency of the work to be done by sanitary officers if it is left to the Municipalities to fix their salaries. For these reasons, my Lord, Government are not prepared to accept the amendment."

A division was then taken with the following result :—

The Hon'ble Maulvi A. K. Faz-ul-Haq.

The Hon'ble Nawab Saiyid Hossam Haider Chaudhuri, Khan Bahadur.

The result of the division being ayes 17, noes 28, the motion was lost.

The following motions were, by leave of the President, withdrawn:—

XII.—The Hon'ble Babu Surendra Nath Ray to move that in lines 3 and 4 of the proposed new section 349 E the words "and Sanitary Inspectors out of the Municipal Fund" be omitted.

XIII.—The Hon'ble Babu Mahendra Nath Ray to move that the following proviso be added to the proposed new section 349 E, namely,—

"Provided that one half of such salaries and allowances shall be paid by the Local Government and not out of the Municipal Fund."

XIV. -The Hon'ble Maharaja Ranajit Sinha of Nashipur to move that the following proviso be added to the proposed new section 349 E, namely, -

"Provided that the Government shall ordinarily contribute half the amount required to meet the salaries of such Health Officers."

Proposed new Section 349 F.

XV.—The Hon'ble Rai Nalinaksha Basu Bahadur moved that for the first two lines of the proposed new section 349 F the following be sustituted, namely,—

"The Municipal Commissioners may from time to time make rules subject to the approval of the Local Government prescribing . . ."

He, said: "My Lord, the Bill as it stands says that the Local Government may from time to time make rules regarding the qualifications of Health Officers and Sanitary Inspectors, as well as their classes and grades. My amendment is that the Municipal Commissioners be allowed the privilege of framing the rules. It is alleged that if power be conferred upon the municipalities, the rules are not likely to be uniform, and the rules for one municipality may clash with those framed by others. But with a view to avoid this sort of apprehended anomaly, I have proposed that the rules framed by the Municipal Commissioners shall be subject to the approval of Government or in other words, the rules made by them shall not have any effect unless sanctioned by Government. As the Government are the final authority with regard to the sanctioning of the rules, there cannot be any reasonable objection to the amendment proposed by me. The rules, no doubt, under the amendment proposed by me, will emanate from the Municipal Commissioners, but they cannot be final unless approved of by the Government and, consequently, my amendment is one which ought in my humble opinion to be accepted by the Hon'ble Member in charge of the Bill."

The Hon'ble Nawab Syed Sham-sul-Huda said: "My Lord, for the reasons which I gave in answer to the Hon'ble Babu Mahendra Nath Ray's amendment, I am sorry I cannot accept this amendment. We want uniformity in the rules, and that cannot be ensured if every municipality is allowed to make its own rules."

The motion was then, by leave of the President, withdrawn.—

The following motions were also, by leave of the President, withdrawn :—

XVI. The Hon'ble Babu Mahendra Nath Ray to move that in line 2 of clause (*a*) of the proposed new section 349 F the words "and Sanitary Inspectors respectively" be omitted.

XVII. The Hon'ble Babu Surendra Nath Ray to move that in line 2 of clause (*a*) of the proposed new section 349 F the words "and Sanitary Inspectors respectively" be omitted.

XVIII. The Hon'ble Babu Mahendra Nath Ray to move that in line 1 of clause (*b*) of the proposed new section 349 F the words "and Sanitary Inspectors" be omitted.

XIX. The Hon'ble Babu Surendra Nath Ray to move that in line 1 of clause (*b*) of the proposed new section 349 F the words "and Sanitary Inspectors" be omitted.

XX. The Hon'ble Babu Surendra Nath Ray to move that the following proviso be added at the end of the proposed new section 349 F, namely,—

"Provided that the Local Government shall be bound to contribute at least half the salary of every Health Officer or Sanitary Inspector appointed under this Chapter."

Proposed new Section 349 G.

XXI. The Hon'ble Rai Nalinaksha Basu Bahadur moved that at the end of the proposed new section 349 G the following words be added, namely,—

"to whom the Health Officer shall be subordinate."

He said :—"This amendment is very simple. There are two Health Officers, and my proposal is that one should be made subordinate to the other, so that there may be no conflicting orde s passed by them. That is what I have to submit for the consideration of the Hon'ble Member in charge of the Bill."

The Hon'ble NAWAB SYED SHAMS-UL-HUDA said :—

"My lord, I have not been able to accept this amendment. As a rule there will be one Health Officer, and there is no question of subordinating one Health Officer to another. I do not understand what the Hon'ble Member means. We propose to have more that one Sanitary Inspector, but we do not propose to have more than one Health Officer, and from that point of view, I think my Hon'ble friend's amendment is unnecessary."

The motion was then, by leave of the President, withdrawn.

The Hon'ble NAWAB SYED SHAMS-UL-HUDA said :—

"In order to give effect to the concession which Government has announced in this matter, I beg to move—

that section 349 D be numbered as sub-section (*1*) of that section, and that the following be added as sub-section (*2*), viz.,—

the provisions of sub-section (*1*) shall not apply to any Municipality the income of which falls below Rs. 10,000 a year."

The motion was put and agreed to.

The Hon'ble Nawab Syed Shams-ul-Huda moved that the Secretary be directed to renumber the clauses and sub-clauses of the Bill in consecutive order, and to make corresponding alterations in all cross-references thereto.

The motion was put and agreed to.

The Hon'ble Nawab Syed Shams-ul-Huda also moved that the Bill, as settled in Council, be passed.

He said :—My Lord, I am glad that although we have had a somewhat stormy discussion some time ago about this Bill, that it has now been given a smooth passage through the Council. I appreciate the assistance which has been given by the Hon'ble the non-official members, and I have already referred to the three important amendments of which we had notice from the Hon'ble Rai Nalinaksha Basu Bahadur, the Hon'ble Babu Mahendra Nath Ray, and the Hon'ble Babu Surendra Nath Ray. We have found it difficult to accept them all, but I think we have met them half way, and I am glad that the concessions made by Government have been accepted in the spirit in which they have been given, and a large number of amendments have in consequence been withdrawn. We were all anxious that a Bill of this nature should go out of this Council with the approval of the representatives of the local bodies, and although some of the amendments moved by them have been lost, I take it that on the whole they are satisfied. I move that the Bill, as amended, be passed.

The motion was put and agreed to.

THE DOVETON TRUST BILL, 1913.

The Hon'ble Mr. Hornell moved that the Doveton Trust Bill, 1913, be referred to a Select Committee consisting of the Hon'ble Mr. Samman, the Hon'ble Mr. Newbould, the Hon'ble Mr. Shorrock, the Hon'ble Mr. Grice, the Hon'ble Babu Mahendra Nath Ray and the mover, with instructions to circulate their report in time for its consideration in Council at the meeting to be held on the 13th January, 1914.

THE Hon'ble BABU SURENDRA NATH BANERJI said :—

"My Lord, now that the Bill is to be referred to a Select Committee I think I may take this opportunity of calling attention to a statement which has appeared in the newspapers and which I believe has been circulated among the members of this Council, bearing upon this Bill. The statement is signed by the responsible members of the Committee of Management of the Doveton Institution, and it traverses some of the statements which were made in this Council by the Hon'ble Member in charge of the Bill. One of the statements is this. I think it was stated in this Council, that the Committee of Management which now exists was a Committee which had been appointed by the High Court. These gentlemen say as a matter of fact that that Committee had long ceased to exist, and that the present Committee is a Committee which has been appointed by the shareholders or by the guardians of the pupils attending the Institution. Then charges of mismanagement had been brought against the Committee of the Institution. They deny these charges, and they bring forward some facts and figures which to my mind seem to lend colour to their assertion. The financial test is the crucial test in all institutions and organizations. In this statement which has been circulated I find facts given as to the revenue of the Institution in 1910. and the revenue of the Institution in 1912. In 1910 the revenue of the institution was Rs. 19,000, in 1912, it was Rs. 26,000, almost double, and the number of pupils has increased. Therefore, it seems to me, if these allegations as circulated in the statement have any basis, truth or substance, it is necessary to reconsider the proposals which have been laid before this Government. I do not pin my faith to this statement. I absolutely know nothing at all about it, but here are these allegations spread broadcast, for they have been printed in the newspapers, circulated among the members of this Council, and they are the talk of everybody connected with this Institution, and who wish the welfare of this Institution. Having regard of these facts, I appeal to my Hon'ble friend, the member in charge of the Bill, to throw some light upon the statement and to justify the measure which he has placed for the consideration of the Council."

The Hon'ble MR. HORNELL said :—

"Your Excellency, the letter to which the Hon'ble Mr. Banerji refers has been placed in my hands by Mr. Houghton and Mr. Claridge. The signatories to the letter, who claim to be the members of the Committee of Management of the Parental Academic Institution and Doveton College, complain that the notification has caused them considerable surprise, and that they feel seriously aggrieved that such a momentous step should have been initiated without the slightest reference to the Governing Body of the Institution. They complain that they received no prepatory official notice of the intentions of Government in this matter, and they claim to be completely ignorant of the grounds on which this tyrannical measure of spoliation is sought to be justified."

The Hon'ble SURENDRA NATH BANERJI—I did not use such strong language.

The Hon'ble MR. HORNELL, continuing, said :—

"In the speech in which I moved for leave to introduce the Bill, I attempted to set forth in outline the connection between the Government of Bengal and the Society. I need not repeat this melancholy story. I will merely point out that this connection began in 1896 and that in 1906 a Committee which had been appointed by the High Court to manage the institution appealed to Government to have an inquiry, made into the affairs of the institution and that as the result of this appeal Government appointed a Committee, which recommended legislation for the purpose of effecting the same purpose as that which the Bill, now before the Council, is designed to accomplish. A Bill was actually drafted, but as the result of the High Court order of the 8th April, 1907, it was dropped to give the Society a chance of working out its own destiny under the scheme settled by the decree. No further action was taken by Government until 1909, when, as explained at the last meeting of the Council, Mr. W. C. Madge, himself a member of the Committee of Management, wrote and asked Government to intervene. In the name of the Anglo-Indian community to which he belongs, Mr. Madge adjured Government to preserve the endowment 'from obviously incompetent control and to divert it to other means which might afford the best prospect of giving the domiciled community the relief and help of which they stand in great and pressing need.' Thus in a period of some 4 years Government was twice called upon by those intimately connected with, or interested in the society, to take the step which it is now contemplating.

In the speech with which I introduced the Bill, I referred to a report from the Director of Public Instruction, which was called for and received in September 1909. It must be remembered that this report was written when the new scheme of management had been in operation for over two years. I said that the report showed that the Committee had proved itself totally incompetent to manage the affairs of the College. This statement has in effect been challenged. I have referred above to Mr. Madge as a member of the Committee. He certainly had been such, and he claimed still to be at the time of writing, though the Committee contended that he had resigned, a contention which Mr. Madge declared to be false. At any rate Mr. Madge's indictment was couched in no uncertain terms. 'The institution' he wrote, 'is now in the hands of a Committee whose competence for their charge may be estimated from the fact of their having recently illegally removed their Chairman from their number, on the false pretext of his having resigned, because he had objected to improper proceedings on their part, which may possibly be held to be illegal if tested in a Court ; and from the fact of their also having lately expelled, with violence from the room in which they met, the Assistant Director of Public Instruction who had attended by invitation. These are not the only circumstances which call for prompt and searching investigation on the part of the Government. The endowment, or remaining portion of it, on which the institution subsists, was for the benefit of the community variously styled 'East Indian' and 'Eurasian,' whereas it is stated that a very few of this class are boarders in it, while the majority are Asiatics, the diversion of specially endowed funds to whose benefit may amount to a serious breach of trust.' It is also perhaps interesting to note

that when this letter of Mr. Madge was received by the Director of Public Instruction from Government, the then Honorary Secretary of the Committee of Management was given an opportunity of reporting on the facts. He refused to do so, and questioned the Director's authority to call for such a report at all. He was informed on the 6th July that failing a reply by the 21st July the report would have to go to Government with such information as could be obtained from other sources. The report of the Director of Public Instruction did not actually go to Government till the 9th September. If the Committee let this opportunity slip of stating their version of these transactions, they can scarcely blame my predecessor or Government.

To the report submitted by the Director of Public Instruction there was attached a statement from the gentleman, who was so effectively prevented from taking part in the deliberations of the Committee of Management, together with a statement from another member of the Committee who accompanied the former gentleman and was a witness to the rough and tumble which by the way took place in the public street. It is not necessary to dwell upon this incident. The account of it which runs into many pages suggests comic-opera, an admirable thing in its place,—but perhaps a little inappropriate in the management of the affairs of a society constituted to establish and control schools 'in order to procure the means of affording the youths the best education of which the circumstances admit.'

The term of the schedule attached to the decree of the High Court of the 8th April 1907, provided that in the event of the Society failing to hold its annual meetings in terms of the said rules or otherwise failing to appoint a Committee in any year, the members of the Committee other than those who in terms of the scheme should retire—the scheme provided that a certain proportion of members should retire at each annual election—should be at liberty with the approval of the Director of Public Instruction for the time being to appoint such members of the domiciled community for the purposes of completing the necessary number of the Committee. The signatories of the letter of protest declare that they are not a Committee appointed under the terms of the decree of the High Court above referred to, but that since October 1910, the affairs and management of the Society have been conducted by a series of Committees elected annually under the rules of the Society. In the Director's report to Government it is stated that the Committee had placed it on record that they believed that there were no members of the Society, and that there was not in any case a quorum sufficient to hold a general meeting. It appears that in 1909 there were only 4 members. Under rule 36 of the Rules of the Society no business can be transacted at any meeting of the Society, unless a quorum of 20 members be present. The Director's report of the 9th September gave the history of the Committee since the date of the High Court decree. Of the 8 members named by the High Court, 3 declined to act. Four new members were appointed before the close of 1907, and, on 2 of these members retiring by rotation in the terms of the scheme, a Committee of 10 members was reconstituted by the Director of Public Instruction. By July 1908, this Committee had dwindled down to 6, this number having been further reduced by 2 before the end of 1908. On the 31st March 1909 there were 4 members of whom 2 were to retire by rotation, while under Rule 13 of the Society 5 members are necessary to form a quorum. This remnant proceeded to elect a full Committee of Management, and in April 1909, the Honorary Secretary submitted the list of names to the Director of Public Instruction for his formal approval. This the Director of Public Instruction refused to give, but called for some explanation. The Honorary Secretary declined to give this information declaring that the powers of the Director of Public Instruction were confined to the bare approval or disapproval of the nominations of the Committee. A correspondence ensued between the Society's Solicitors and the Director of Public Instruction. The result of which was that the latter, not considering the information which was made available either sufficient or satisfactory refused to exercise the powers of approval conferred on him by the High Court. In reporting this to Government, the Director of Public Instruction stated that he inclined to the view that in the absence of a quorum of duly

appointed members of the Committee, the then existing management was unauthorised and could only be regularised by an order of the Court. So far as I can make out, there are no further records either in my office or in the Secretariat with regard to any subsequent relations with the Committee.

The order of the High Court required that the Committee should have its accounts audited by Chartered Accountants every year, and that a copy of the balance sheet should be submitted to the Director of Public Instruction. No such balance sheets were submitted and consequently on the 25th May 1909, the Director of Public Instruction wrote and asked the Committee to let him have the audited balance sheets for the financial years 1908-09 and 1907-08. In response to this the Committee submitted a copy not of a balance sheet but of a cash abstract giving outstandings and liabilities on the 31st December 1908 by a firm not of Chartered but of Incorporated Accountants. This document the Director of Public Instruction found to be quite useless as a guide to the financial administration and the Committee refused to supply a copy of a similar document for the preceding year which might have enabled the Director of Public Instruction to have checked the abstract submitted. The Committee now state that their accounts are audited annually by Messrs. Lovelock and Lewes, whom they quote as stating in 1910 that the account books were '*as usual*' well kept and free from errors. It is a little difficult to fix the precise significance of 'as usual.' If Messrs. Lovelock and Lewes had knowledge of the Doveton College Account Books before 1910, why did the Committee in 1909 decline to provide the Director of Public Instruction with any statement other than a statement of outstandings and liabilities vouched for by a firm of Incorporated Accountants ?

In the speech with which I introduced the Bill, I was bold enough to state that the conduct of the affairs of the Society had involved the misdirection of funds left in trust to purposes for which they were never intended. The Committee of which I was a member represented in 1906 that it was not obligatory on the Doveton College Committee to educate non-Christians. We further reported that of the 103 boys then on the rolls of the College only 8 were reported to be Christians, and that they all belonged to the DeSouza foundation. When in 1909 the Director of Public Instruction attempted to find out the denominations and nationality of the pupils then in the school, he was refused the information. I have recently ascertained that the 113 pupils now on the rolls of the college are drawn from the following communities :—

Europeans	Nil
Anglo-Indians	40
Hindus	29
Muhammadans	11
Burmese	21
Chinese	7
Parsees	2
Native Christians	3
	113

The school was undoubtedly founded and endowed for that section of the community which is now known as Anglo-Indian. The school was once one of the most famous institutions for the education of the domiciled European and Anglo-Indian community. Now it is entirely cut off from the European school system. It has only been recognized by the University since 1910, and the report attached to the letter of protest is merely the usual report called for by the University as a result of the application for recognition. The University is not of course concerned with anything other than the fitness of the school to prepare pupils for its Matriculation Examination."

The motion was then put and agreed to.

THE CHITTAGONG PORT BILL, 1913.

The Hon'ble MR. LYON moved for leave to introduce a Bill to consolidate and amend the law relating to the port of Chittagong.

He said—"My Lord, I have the honour to move for leave to introduce a Bill to consolidate and amend the law relating to the port of Chittagong.

As noted in the Statement of Objects and Reasons attached to this Bill, it is required by the considerable developments which have taken place since the original Act for the regulation of the port of Chittagong was passed in the year 1887. At that time there was no railway connection with Chittagong, nor were there any jetties in existence for ocean-going ships. In view also of the limited extent of the port, and the inexperience of the Commissioners who were called upon to conduct its affairs, the provisions of the Act were extremely restrictive. The Commissioners are unable to undertake works of any importance without the previous sanction of the Governor-General in Council, and the same approval is required from time to time to all changes in the electorate of bodies or firms engaged in commerce in the port. The by-laws passed by the Commissioners also require confirmation in certain cases, and the Local Government are given powers which restrict the employment of servants by the Commissioners, and their purchase, sale or leasing of movable as well as immovable property.

These restrictions have naturally been found very inconvenient in practice, especially since the large extension of the operations of the port due to the advent of the Assam Bengal Railway and the institution of regular steamer services of ocean-going vessels. I may add that the restrictive nature of the present Chittagong Port Act attracted the attention of the Royal Commission on Decentralisation during their sitting at Dacca.

The present Bill follows the lines of the Calcutta Port Act and the Act for the Port of Rangoon of 1905, which is the most recent of the various Port Acts in India. It was originally drafted by the late Mr. Luson as Chairman of the Port Commissioners, in communication with the Agent of the Assam Bengal Railway and the Chairman of the Chittagong Chamber of Commerce. and I may take this opportunity of acknowledging the noticeable services which have been rendered to the port and to Government in the preparation of this Bill by the late Mr. Luson and his successor, Mr. Fischer, as Chairman of the Commissioners. It is proposed by means of the present Bill to amplify the powers of the Commissioners of the port and to relieve them from unnecessary restrictions in the exercise of their functions, and it is hoped that the new provisions will greatly facilitate the conduct of business in connection with the port. The Bill was originally prepared in the year 1908, and has since then been exhaustively examined by the commercial community of Chittagong, the Port Commissioners, the Government of India and Railway authorities of all grades. Its provisions were practically settled shortly before the recent territorial changes, when its consideration was postponed until the present Government should be constituted. In the course of its examination by our Government it appeared that various minor amendments were necessary, and opportunity was taken to include in the Bill some additional provisions suggested by the Port Commissioners.

While the general principles of the Bill and its main provisions will, I believe, meet with general acceptance, as providing the machinery necessary for the conduct of the affairs of the port, there are certain sections dealing with the compulsory use of the jetties provided by the railway company which have met with opposition from some of the local branches of firms engaged in shipping and agency business. These provisions of the Bill follow in the main the similar provisions which have been incorporated in the Acts applying to other ports in India, but the position in Chittagong differs somewhat from that which exists in other ports, in that the Assam Bengal Railway Company is the owner of the jetties instead of the Port Commissioners. The disadvantages of this position are somewhat mitigated, however, by the fact that the Assam Bengal Railway Company is not in all respects a private company, and that the jetties were built by public funds provided through the Secretary of State, who has what may be termed

a reversionary interest in them. And apart from the interest thus possessed by the Government in the working of the railway company, a definite safeguard has been provided in the Act in the provision that the tolls and charges to be imposed at the jetties shall not be modified without the express approval of the Railway Board, who will consult the Local Government before making any changes in the rates at which such charges are to be levied. The compulsory clauses have been accepted by the Port Commissioners, among whom the commercial interests of Chittagong are strongly represented, and they will be later on subjected to careful consideration in Select Committee. And I may note here that the chief reason why I am only asking leave on the present occasion for the introduction of this Bill, and do not propose to move that it shall also be referred to a Select Committee, is that we wish to give ample time for the consideration by members of the whole Bill, and that we wish to secure also the services of a member of the European commercial community of Chittagong as an expert member of the Select Committee to assist us in the detailed consideration of its provisions

I believe that the Bill will command the approval of this Council, and I now beg to move for leave to introduce it."

The motion was put and agreed to.

THE BENGAL MEDICAL BILL, 1913.

The Hon'ble MR. STEPHENSON moved for leave to introduce a Bill to provide for the registration of medical practitioners in Bengal.

He said—"My Lord, I ask for leave to introduce a Bill to provide for the registration of medical practitioners in Bengal The question of a Medical Regisration Act in India was first raised by the Government of Bombay in 1882, but the Bengal Government at that time considered that the question raised was really one of prevention of the unauthorised practice of medicine, and as this was not within the range of practical politics, they were not prepared to proceed with the legislation then proposed. Since then the situation has been completely changed by the growth of unrecognized medical schools and colleges which have conferred degrees purporting to guarantee the possession of an efficient knowledge and training in the practice of the western schools of medicine. The demand for a Medical Registration Act grew stronger and stronger and culminated in 1908, when the Faculty of Medicine of the Calcutta University, the Council of the Medical College, the Medical Section of the Asiatic Society and the Medical Graduates of the University all approached Government insisting on the urgent need of legislation. The grounds for this demand were threefold: *firstly*, the system of western medicine is only starting to spread in India, and it is essential at the outset that it shall not fall into disrepute owing to the want of training or qualifications on the part of those who purport to be its exponents; *secondly*, as the authorised degrees and licenses connote a definite training and knowledge of a fixed standard, the public have a right to a reasonable opportunity of readily distinguishing those medical men who have received this training and teaching; and *thirdly*, the holders of authorised degrees have a right to be protected from a competition which is unfair in so far as it relies upon the inability of the public to distinguish between authorised and unauthorised degrees. Since 1908 the question has been under discussion, and the delay has been so far advantageous that we are able to make use of the experience of Bombay where a Medical Registration Act, on which the present Bill is largely based, has been passed and has been working for some time. If we may judge from the speeches at the farewell of the late Surgeon-General of Bombay, we need have no doubt about the utility of the Bill or apprehensions as to its working.

The main object of the Bill then is to distinguish those practitioners who have received the teaching and training that are accepted as being adequate. The central feature is the register of such practitioners, and a Medical Council with a Registrar is set up to compile this register and to keep it efficiently up to date. The Council consists of 9 members, 4 of whom are *ex-officio* and 5 elected; though, as one of the electing bodies is the Medical College Council, there will probably always be an official majority. The

powers of the Council are confined to matters affecting the compiling of the register, but it is hoped that if the Bill is successful, the Council will in time form a most powerful instrument for the advancement of the medical profession. In order to encourage those who are entitled to it to claim registration, it is provided that where an Act in force in Bengal requires a certificate by a medical practitioner, the privilege of giving such certificate shall be confined to registered practitioners. There is only one penalty clause in the Bill, and that is the necessary provision for punishment for falsely pretending to be a registered practitioner.

In view of the misconceptions as to the scope of the Act disclosed in the proceedings when the Bombay Act was discussed in Council, I wish to make it quite clear that this Act does not interfere with the practice of medicine by any person whatever. Its only effect is to create a register of the names of medical practitioners who are in possession of degrees which in the opinion of Government are a sufficient guarantee of training and qualifications. It does not prevent the public from utilising the services of any practitioner they please, but it does give them an opportunity of knowing which practitioners hold authorised degrees."

The motion was put and agreed to.

RESOLUTIONS

(*under the rules for the discussion of matters* of general public interest).

The Hon'ble BABU SURENDRA NATH BANERJI to move the following resolution :—

This Council recommends to the Governor in Council that—

(*i*) the collection of Government revenue in the areas affected by the recent flood be suspended until the end of March 1914, and that the said revenue be subsequently realized in five yearly instalments, on the understanding that the same concession is extended by all zamindars to intermediate land-holders and actual cultivators ; and

(*ii*) the same principle be applied to the collection of rents in the Government *khas mahals.*

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"My Lord, with reference to the resolution which stands against my name, I desire to congratulate the Government on the action which has already been taken. The Hon'ble Mr. Lyon was recently on a visit to Contai and the flooded area, and from the official *communiqué*, which has appeared in to-day's morning papers, I understand that the orders which he has passed are such as will commend themselves to the strong approbation of public opinion. In the first place, he has directed the suspension and remission, where necessary, of rents in the *khas mahals* and temporarily-settled estates according to the rules of Government. Practically, therefore, he has gone beyond the resolution which I had ventured to suggest to this Council, and, as regards the first part of the resolution, I understand from the same official *communiqué* that the matter is under consideration. That being so, I desire to congratulate Your Excellency's Government and beg leave to withdraw my resolution."

The motion was then, by leave of the President, withdrawn.

The Hon'ble Babu Surendra Nath Banerji moved the following resolution :—

This Council recommends to the Governor in Council the appointment of a mixed commission of official and non-official members of the Council to

inquire into, and report upon, the prevalence of dacoity in the Presidency, and to recommend such preventive and remedial measures as may be thought necessary.

He said—"My Lord, this question, of the prevalence of dacoity in this Presidency has been the subject of keen and animated discussion both in the newspapers in this country as well as in England. Hon'ble Members are aware that Government have recently appointed a Commission to enquire into the existing machinery of district administration. The Commission is exclusively official in its composition, and what is more, of the five of the members of this Committee, three are gentlemen who belong to the Indian Civil Service outside this province. The resolution definitely states the object of this Committee, and suggests what the Committee has to do. The Committee has to concert measures so as to bring the executive officers of Government into closer contact with the people. The belief prevailing in some quarters is that by reason of the permanent settlement the Bengal officials are not so familiar with the people as are the officials in other parts of India. The Committee is not left without guidance as to some of the measures which they might consider for the attainment of the object which they have in view. Amongst them are the partition of districts and the multiplication of subordinate official agencies. The discretion of the Committee, however, is not fettered; the Committee is at liberty to consider any other proposals which may be laid before it. I hope and trust that among the proposals which the Committee will take into consideration is one which has been pressed upon public attention in this province with some little emphasis, namely, the creation of Advisory Boards, consisting of representative men, to advise and counsel the District Magistrate in regard to the discharge of his executive duties. My Lord, this is a proposal which, I believe, was for the first time broached by Sir Herbert Roberts from his place in the House of Commons in 1906 in the amendment to the address to the Throne which he moved. This was pressed before the Supreme Legislative Council by the Hon'ble Mr. Gokhale, and this principle has been accepted by the Decentralization Commission which has recommended the wider acceptance by District officers of the practice (which has been followed by some) of consulting District Boards as their Advisory Councils.

My Lord, my Committee is much less comprehensive in its scope; it refers in a special degree to a matter which will only incidentally engage the attention of the larger Committee, and it consists of officials and non-officials. My Lord, I am anxious, through the medium of my resolution, to concentrate attention upon an evil which has attracted a large measure of public interest, and which, I am sorry to have to say, has cast a slur upon the fair fame of our province. The Hon'ble Sir William Duke, than whom there is no greater authority in a matter of this kind, in the course of the speech that he delivered in April last in this Council, gave us some facts with reference to the prevalence of dacoities which are useful and interesting. He said that in 1910 the number of dacoities in the eastern districts of Bengal was 179, in 1911 the number rose to 181, and in 1912 there was a drop and the number fell to 130. My Lord, in the light of these facts we are driven to the conclusion that there is a considerable element of exaggeration in the ideas prevalent on the subject in England and in this country. The Hon'ble Sir William Duke's authority is indisputable, but the exaggerations continue, and they have been accentuated by the recent anarchial crimes. My Lord, we deeply deplore them. We hold them in horror and detestation, as involving a stigma on the law-abiding character of our people and also as doing grave injury to our public interests. My Lord, it is said that we do not aid the police and authorities to the extent that we ought to. I think that the Hon'ble Sir William Duke has given us the answer, and I quote his words. In the speech, to which I have already adverted, he said: 'I am very willing to believe that in the large majority of cases the dacoits, not being known to the people, they can give very little help.' That, My Lord, states it a nut-shell the whole situation. These men, these dacoits, these anarchists, do not take the people into their confidence; they do not take even those near and dear to them into their confidence. In one case, the

father was entirely ignorant of his son's doings ; in several others, the relatives were profoundly in the dark as to the proceedings of the conspirators. Point out to us—this is my appeal to our critics—what we have to do to suppress or prevent these dacoities, these anarchical crimes, and we shall do it with alacrity and enthusiasm. Show us the way and let it only be practical and reasonable, and we shall follow it. How can you expect us, helpless, defenceless and unarmed people, to assist the police in combating mauraders armed with deadly weapons? I am reminded of a statement which appeared the other day in a newspaper and which was suggestive and instructive alike. There were some cases of dacoity in the Midnapore district where some of our young men were at work in connection with the relief operations. The Magistrate asked them to help the police and the authorities. What was the reply given by the young men? 'Give us arms and we will fight the dacoits ; unarmed we cannot fight men provided with deadly weapons.' The difficulty of the situation is this, and it has to be realized by those who find fault with us, namely, that the people are unarmed and defenceless, but that the dacoits can get any amount of arms they like. The Government are prepared, very properly as I think, to give out arms to suitable persons ; but as the Hon'ble Sir William Duke has pointed out in the speech, from which, I am afraid, I am making very large quotations, these arms are a dangerous possession and an incentive to the dacoits to attack those who possess them and deprive them of their weapons at any time. Is it not possible—and this is the suggestion which I venture to make to the Government—to train, say, half a dozen men in every considerable village or every group of villages in the use of fire-arms? They will afford protection to their co-villagers, and what is more important the fact will be known to all the country people, and when it is known the dacoits will be more careful. Add to the police if you will, but let me ask you, are the police likely to be efficient without popular co-operation. My Lord, I may, for a moment, be permitted to advert to an instance of popular co-operation, which, judging by the results, was admirably successful. Hon'ble Members will remember that in the height of the excitement in the years 1907 and 1908 the passenger trains running from Sealdah were exposed to serious danger ; bombs used to be thrown at them. There were several cases. I am a resident of Barrackpore, and I am proud to be one. What did we do? We formed ourselves into a vigilance committee. The mill industries and several Europeans joined it. We formed ourselves into sub-committees, and we kept watch and ward on every movement that took place in every village ; we kept watch and ward over every stranger who went to a village and every stranger who left a village. We raised subscriptions and we went further and offered the Government of the late Sir Edward Baker to police the line from Barrackpore to Naihati with our men, but the offer was declined. But what happened? Our activities were followed by the immediate cessation of these outrages. My Lord, I do not know whether I am entitled to link them as cause and effect ; but the fact is indisputable that, as soon as our organizations were placed upon a satisfactory working order, these outrages ceased. My Lord, our critics tell us, the *Times* being one of them—that we are wanting in civic spirit. We have only to quote an instance like the above. We have only to cast our eyes across the waters and see what is taking place in South Africa in evidence of the fact that we possess, in an abundant degree, the civic spirit which we are told we do not possess. If, by civic spirit, we mean the dignity, the self-respecting spirit of the citizen, the conciousness of his obligations to to his fellow-citizens and to the state to which he belongs, then I say this, that my countrymen possess it in an abundant degree. Has the history of the world presented a nobler spectable of the civic spirit, of courage, of endurance, of absolute submission to the law and its penalties, in order to amend the law, than we are witnessing in South Africa? The display of the civic spirit, has extorted the admiration of the highest personages in the realm, including His Excellency the Viceroy, to whom we are all very grateful for his outspoken praise of the Indians in South Africa, and, I venture to add, that His Excellency has done a service to India and the Empire, the magnitude of which it would be difficult to exaggerate.

My Lord, we hear a great deal about political dacoities ; but dacoities are dacoities, whether they be political or otherwise. The conscience and the judgment of mankind make no difference between them. I venture to think that political dacoities occupy a lower moral plane, because they are committed by men who ought to know better, who add to their criminality by seeking to sanctify their guilt by an appeal to higher considerations. I believe that is only an insignificant fraction of the dacoities that are political in their character. I am sure my Hon'ble friend in charge of the department will be able to enlighten us on the point, and dissipate the mischievous delusion that political dacoits are abroad in the eastern districts scouring the country in their countless gangs and spreading desolation and horror all around.

We are anxious to co-operate with your Excellency's Government in solving the great question which awaits you. It is in this spirit that I have ventured to submit this resolution for the acceptance of this Council and your Excellency's Government. We are anxious to help Government in the arduous task that lies before them. We want to proclaim to the world that we do not wish to stand aloof, but that we are eager to share with the Government their anxieties for the protection of the public peace which is menaced by these dacoities, and therefore the recommendation which I have made is a recommendation for the appointment of a mixed commission of officials and non-officials to report on the situation and to suggest remedial measures. Such a commission would command public confidence, and its recommendations would carry great weight ; it would be a striking example of co-operation between the people and the Government, and above all it would be the sign and symbol of the new regimé and the new policy, and it is for these reasons that I have ventured to recommend this resolution for the acceptance of this Council."

The Hob'ble Sir William Duke said :—

" My Lord, the Hon'ble Mover of the resolution spoke on some subjects of considerable public importance but perhaps of not very strict relevance to the actual subject of his resolution. I do not propose to follow him afield, and I shall confine myself strictly to the main point, the question of the prevalence of dacoity in Bengal and the measures which he proposes with regard to it.

No one can have a keener interest in the subject of this resolution than the Government, for not only are they interested in preventing loss and damage of every kind to the people and in the maintenance of law and order, but every Government must feel that its reputation and that of all its members and its officers charged with the administration of justice and police depends upon the degree of success which it attains in this respect. I have already stated in this Council, and I repeat it, that it would be a blot on the civilization of any country that organized gang robbery should occur in it with impunity and so far as this is the case the Government of Bengal has cause for dissatisfaction and indeed for shame.

The Council may therefore take it that we are not likely to reject lightly any suggestion which might help to its extirpation. We are indeed open to consider every reasonable proposal to that end, whatever its source, and if we do not accept the Hon'ble Member's resolution, he must take it that it is because we are sincerely convinced that his proposals do not afford the promise of any effective progress towards the diminution of such offences.

I looked forward, with considerable interest, to the Hon'ble Member's speech in order to ascertain whether his views as to the prevalence of dacoity in Bengal were in any way affected by the constant discussions which have occurred in the press on the subject of political dacoity.

I should like to point out, at the outset, that political dacoity, important subject as it is can hardly be said to have anything to do with the prevalence of dacoity in Bengal. In the five years from 1908

to 1912, 1,511 cases were reported in Bengal. Of these 54 were political. Reporting is believed to be now much better than it was a few years ago, but even so, it is possible that some dacoities went unreported. There is, however, I think, little chance that any political dacoity was unreported or was not identified as such. These cases are so peculiar in their character, and have so many incidents never found in ordinary professional crime that there is very little chance of their being mistaken. We may take it therefore that the proportion of political to ordinary cases is certainly no higher than I have stated, *i.e.*, not more than 3½ per cent. What are known as political dacoities, that is to say, dacoities committed by young men of the *bhadralok* class working apparently under a very widespread organization are important for very different reasons than their numbers. They are important, because of the spirit of violent opposition to all settled Government which they display, of the widespread and carefully prepared organization of which they give evidence and of the enterprise and success with which they are carried out. Ordinary dacoits frequently make bad shots and risk long terms of imprisonment for the sake of a handful of rupees, but the political variety have been wonderfully successful in spotting likely subjects and have frequently netted very large sums indeed. Still, important as the subject is, it has little to do with the prevalence of dacoity to which the Hon'ble Member's resolution is directed. So far as the subject is concerned with the relations between the Government and the people, it will no doubt come under the notice of the District Administration Committee. although, that Committee is no more concerned with dacoity than with any other important question of administration in the Presidency, and we cannot well trench at present on the ground which will be covered by that Committee, but in any case, I think I have shown that the subject is hardly relevant to the resolution in the form in which it has been proposed.

Turning now to ordinary or professional dacoity, the matter is sufficiently serious. In Bengal, during the last five years, the average annual number of cases has been about 00. In 1912, it was very much less; in the current year, there will apparently be more than in 1912 but fewer than in the previous years. It is a curious circumstance that, bad as this condition may seem, intrinsically it is nothing like so bad as the state of things in other great provinces of India such as Madras and the United Provinces. In 1911, 417 dacoities were reported in Madras and 554 in the United Provinces; in 1912, 464 dacoities in Madras and 511 in the United Provinces. As the population of these provinces is smaller than that of Bengal, dacoities were more frequent in them in proportion to population to the extent of 2½ or 3 times. Yet we hear very little about this serious state of things, probably because these provinces, fortunately for them, are free from the political variety, so that public opinion is not aroused. The fact that the condition in other provinces is much worse, would, however, be no excuse for neglecting the matter in Bengal. But I am in a position to assure the Council that it has not been neglected and is not being neglected.

In past years, our police has undoubtedly been weak in certain parts of the province, notably in East Bengal. Under the Eastern Bengal Reorganization scheme which has been sanctioned by the Secretary of State, we are establishing more than 50 new investigating centres in that part of the Province.

The completion of the new river police and of the arrangements for station and patrol boats in the river districts proceeds steadily and appears already to have had a great effect in checking river dacoity. A number of river posts has also been established as part of the jute protection scheme. Similarly, with police patrols on land these have been established in portions of the Dacca, Faridpur, 24-Parganas, Midnapur, Howrah, Hooghly, Bankura and Birbhum districts, and are being further extended. In certain parts of the country, defence parties have been organized. The intention of these arrangements is that on an alarm being given, villagers should rally to a fixed point and then oppose a united front to the dacoits. The Council are aware that in East Bengal some hundreds of Government guns had been

distributed to selected villagers. The result, however, has been disappointing, for instance, when a dacoity occurred at Kidarpur in the Tangail subdivision of Mymensingh, there were three Government guns in the village, but no attempt was made to use them, and it is to be feared that however freely weapons were licensed, there would be little disposition on the part of the ordinary villagers to use them against dacoits. Government has therefore especially encouraged wealthy persons likely to be the object of attack to keep durwans of a class trained and habituated to the use of arms and has promised that licenses would be freely granted for these.

I may mention, in this connection, a further encouragement to show a bold front to dacoits. Considerable rewards have been offered for the capture of dacoits in the act and much larger rewards when they are armed. Although it is a difficult crime to detect, because the dacoits are seldom identified at the time and because even when property is recovered it does not follow that any one else except the person who is found in possession of it will be convicted, yet the measure of success attained is by no means negligible, and in some cases clever and courageous captures have been effected, as for instance when a gang of North-West Frontier men who had committed a dacoity in Satkhira were captured *en masse* in Basirhat, a result which was only attained by prompt, concerted and courageous action on the part of all concerned from the Subdivisional Officer and the police to the panchayats and chaukidars.

The Criminal Investigation Department contains a number of men who are experts on dacoity, and the standing orders are that each case with its salient features should be reported by telegraph to that department in order that from their expert knowledge they may advise as to the most probable direction to look for the criminals. Dacoity is emphatically a matter for experts. The criminals of different districts and of different gangs vary in their methods of procedure, their disguises, their cries and the expressions they use, and the expert is not infrequently able from such indications to suggest the actual gang to which the criminals belong.

As I said a little while ago, dacoity is an extremely difficult offence for which to obtain convictions, because persons can so seldom be identified on the spot, but a gang can hardly pursue the trade for any length of time without becoming known to an expert police engaged in hunting it, and the most successful means of keeping the crime in check has been found to be by proceeding against such gangs as they become known. At present, the bad livelihood sections of the Criminal Procedure Code are being worked with great energy and considerable success. No less than 19 gangs have been attacked under them during the current year.

Another resource for the discomfiture of professional dacoits is the Criminal Tribes' Act. Under it one notorious tribe and another gang of hereditary professional dacoits have been notified during the current year, and 12 other tribes or gangs are at present under inquiry.

I think I have shown that the activity of Government and the police for the prevention of this form of crime is being pushed not in one but in many directions. I have enumerated only some of the principal. I confess that I have some degree of doubt as to the amount of assistance which in matters so technical is likely to be obtained from persons who have not a first-hand acquaintance with the facts. The subject is often enough ventilated in the public press, including the powerful organ which the Hon'ble Mover of the resolution controls; but the only suggestion which is generally pressed is that licenses under the Arms Act should be granted more freely. As the weapons which already exist in thousands in the different districts are practically never used against dacoits, and as the latter, who are probably a good deal more courageous than the general run of the population, have been successful in many cases in stealing arms and so improving their equipment, it is probable that if the number of weapons in the country were increased, they would still be rarely used for defence, while the dacoits would have still greater opportunities and become still better armed than before. For the rest

the Hon'ble gentleman's main suggestion is that the public have no assistance to give, and that they look to Government for a lead. When suggestions of value are made, and there are ample opportunities for making them, Government will be only too ready to consider them, and, if in doubt as to their applicability, to consult the opinion of qualified members of the public or of the Council upon them. In the meantime, I think the Hon'ble Mover and the Council would be well advised to leave Government to pursue the various lines which it has in hand, which have already had no small measure of success and which promise, if pursued steadily, to impose a very real and effective check upon an extremely exasperating and scandalous form of crime."

The Hon'ble MR. CHAKRAVARTI said :—

"I had no intention of taking part in this debate, but I feel that, after the explanation given by the Hon'ble Sir William Duke, my friend, the Hon'ble Babu Surendra Nath Banerji, will see his way to withdraw this resolution. We were, I frankly confess, under a certain amount of misapprehension with regard to what we noticed by way of criticism in the papers as to what our conduct ought to be in connection with crime, and specially political crimes—and when I use the expression 'political crimes,' I refer to political decoities. But it appears from the information that has been given that the percentage of political dacoities is only 3 to 3½. On the other hand, about 96½ per cent. are ordinary dacoities, which have existed in the country as long as I have lived, and probably longer. In these circumstances I think it would be of no use at all to have a commission of official and non-official Members of this Council to inquire into and report upon the dacoities which have existed, and with which the Government in previous years have coped, and with which the Government are now coping and for the prevention of which the Government are taking various measures; and if there is no breach of confidence, I might say that with regard to the amount of expenditure which is being provided for the equipment of the police, whether it is river police or land police, and the amount of money which is being spent for their residences and so on, probably the action which is being taken by the Government will be successful in future; and at all events I do not fancy, however clever we may be, that we shall be anywhere near the expert police officers who have been advising, and who will be able to advise the Government, with regard to the detection of dacoity. Therefore in those circumstances, I sincerely hope that my friend will see his way not to press this resolution upon the attention of the Council, but will perceive that, in point of fact, it is really a resolution which he has moved under a misapprehension, because I frankly confess that it was thought in this part of the house that we were being blamed for not taking any action for the purpose of co-operating with Government in connection with political dacoity."

The Hon'ble BABU SURENDRA NATH BANERJI said :—

"My Lord, I cannot, say that I have been quite convinced by the facts and figures, and the arguments, which have been brought forward by the Hon'ble Member in charge of the Department. In the course of his observations he said that the Government would be pleased to receive any suggestions that might be made by individuals with regard to the prevalence of dacoities, and that those suggestions would be very carefully considered. I have not the slightest doubt that they would be, but it seems to me that if we had a committee inquiring specially into this matter there would be more numerous suggestions, and more responsible suggestions, coming from authoritative quarters, and the Government would be in a better position to consider them and form their decision upon better and ampler materials. I think that that argument seems to me to point to a conclusion very reverse of what the Hon'ble Member would like to suggest, but having regard to the fact that you do not want this committee, the object of which was to help the Government, there is no reason why we should press it upon you. We were anxious to help the Government in a matter in which we thought Government might require help. Government

have said :—'We don't want your help.' We have no desire to thrust ourselves upon the Government if the Government do not want any aid or co-operation from us, and that is our situation ; and in these circumstances, we have no desire to press the resolution upon you. But let it go forth to the world, let it be reiterated, that we were, from this side of the house at any rate, anxious to help the Government, that we made a suggestion which we thought a good suggestion in the circumstances, and if that suggestion is not accepted the responsibility is no longer ours. Let it not be said that we stood aloof from the Government, that we did not want to share with the Government their anxieties for the maintenance of the public tranquillity. We offered help, and if the Government will not accept that offer the fault is no longer ours. With those observations, My Lord, I beg to withdraw this resolution."

The resolution was accordingly, by leave of the President, withdrawn.

The Hon'ble BABU MAHENDRA RAY said :—

"My Lord, the Resolution which stands in my name runs thus :—

This Council recommends to the Governor in Council that every Rural Board in the Presidency be directed to set apart a minimum percentage, to be fixed by Government of the Public Works Cess surrendered to them, with effect from April 1913, for expenditure on sanitation and water-supply."

Some time ago, Your Excellency's Government impressed upon the Rural Boards the necessity of improving sanitation and water-supply. The complaint was made, and, I believe, rightly made, that the funds placed at their disposal were not adequate. Since that time Your Excellency's Government have, with the sanction of the Imperial Government, placed several lakhs of rupees at the disposal of these Rural Boards. The time, I therefore venture to think, has come when Government should take the power of reserving a portion of this large sum of money for expenditure on improved sanitation and water-supply. I must admit—or I must confess—and people with experience of District Boards will perhaps agree with me,—that a majority of District Boards represented by their Chairmen are not yet fully alive to the necessity of improved sanitation and water-supply in the areas under their jurisdiction. This apathy no doubt arises from the fact that there is a want—a conspicuous want—of district schemes for the improvement of sanitation and water-supply—schemes which have been found in practice very difficult to devise and frame. They find it easier to spend money upon communications and other purposes, very useful in themselves, than to devise comprehensive schemes for the improvement of water-supply and sanitation. I venture, therefore, to suggest in these circumstances, that Your Excellency's Government will approve of the principle involved in this Resoluation. There is, however, one matter which has not escaped my notice. Before Government can take the power of reserving a portion of the Public Works Cess surrendered to the rural authorities, the Cess Act may have to be amended. Your Excellency has just informed us that it is in contemplation to introduce a bill to amend the present Cess Act, and, that being so, perhaps at this stage, I should not press this Resolution, and I would accordingly with Your Excellency' leave, beg to withdraw it."

The Resolution was then by leave of the President withdrawn.

The Hon'ble NAWAB SYED SHAMS-UL-HUDA, said :—

"My Lord, I would beg,with Your Excellency's permission, to make a statement which will probably cut short the discussion on the next item of business—that is, the resolution to be moved by the Hon'ble Rai Hari Mohan Chandra Bahadur. It is likely to be within the recollection of this Council that on the 1st September, which is rather a memorable day, when the Hon'ble Babu Surendra Nath Ray had the credit of defeating the Government over a resolution which he had on that day moved, while opposing that resolution in the form in which it was made, I stated on behalf of Government that the best way of obtaining the object which my Hon'ble friend had in view would be to reconstitute the Sanitary

Board in such a way as to include in it a certain number of non-official members. This offer was not at that time accepted, and the resolution for the constitution of an Advisory Board consisting of official and non-official members was carried. After this resolution was carried we considered the matter, and we thought that a case had been made out for some opportunity being given to non-official members to advise Government, and the question received a certain amount of impetus from a resolution of which we got notice from the Hon'ble Rai Hari Mohan Chandra Bahadur.

We have, my Lord, reconstituted the Sanitary Board. We have added three non-official members to that Board, two of whom are Indians, and one a mill representative, and we have also revised the rules relating to conduct of business by the Sanitary Board, and, I believe, having regard to what we have already done, that my Hon'ble friend Rai Hari Mohan Chandra Bahadur will not think it necessary to press his motion."

The Hon'ble RAI HARI MOHAN CHANDRA BAHADUR, said :—

"My Lord, as the Government orders have already been published enlarging the constitution of the Sanitary Board practically on the lines suggested by me in my resolution, with Your Lordship's permission, I beg to withdraw the resolution."

The Resolution, below, was accordingly by leave of the President withdrawn.

The Hon'ble Rai Hari Mohan Chandra Bahadur to move the following resolution :—

This Council recommends to the Governor in Council that the existing Sanitary Board of this Presidency be enlarged by the addition of non-official Indians, to whom should be specially assigned the duty of—

(*i*) advising the District Boards and Municipalities as to the drawing up of schemes for the sanitary improvement and medical relief of, and for the provision of an improved water-supply for, the areas comprised within their jurisdiction, and

(*ii*) subsequently assisting the said bodies to give effect to any of the schemes aforesaid to which Government sanction may be accorded.

HIS EXCELLENCY—

Under rule 10 of the Resolution Rules, I postpone the moving of the resolution below to the next meeting of Council.

The Hon'ble Maulvi A. K. Faz-ul-Haq to move the following resolution :—

The Council recommends to the Governor in Council that—

(*i*) steps be taken to place specially selected Muhammadan Inspectors in charge of Muhammadan education in all the Divisions of the Presidency, and

(*ii*) the orders recalling the special Inspectors in charge of Muhammadan education to general duty be withdrawn.

ADJOURNMENT.

The Council was then adjourned to Tuesday, the 13th January, 1914, at 11 A.M.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the *Bhadoi* Crops of Bengal, 1913-14.

(NOTE.—On the average of the five years ending 1911-12 the area under autumn rice in Bengal represents some 5·6 per cent. of the total area under rice in British India.)

Character of the season.—In February and March the rainfall was above the average, but deficiency in April interfered with the sowings to some extent. In May the weather conditions were favourable for the growth of the various *bhadoi* crops; but in June considerable damage was done to them by excessive rainfall and weeding operations were also impeded. In July conditions improved a little, but in August the unusually heavy floods in the Burdwan and Presidency Divisions, and in some Eastern Bengal districts, had a disastrous effect on the crops, especially on low lands. Fair weather generally prevailed in September and the crops recovered somewhat from the injury done by the floods. Damage by insect-pests was reported from parts of Dacca and Khulna.

Acreage.—The total area under the various *bhadoi* crops this year is 5,987,300 acres against 6,226,300 acres of last year, the normal area being 6,647,400 acres. Of these 4,882,100 acres are reported to be under *aus* rice against 5,008,000 acres of last year. The decrease is chiefly due to want of rain at sowing time, to excessive rain afterwards and to the extension of jute cultivation.

Outturn.—From appendix I attached to the report it will be seen that only Birbhum reports an average outturn. Rangpur, Pabna and Chittagong report a crop between 91 to 97 per cent.; Bankura, Hooghly, Malda and Dacca between 80 to 90 per cent.; the 24-Parganas, Murshidabad, Jessore, Khulna, Burdwan, Dinajpur, Bogra, Mymensingh, Faridpur, Tippera, Noakhali and Chittagong Hill Tracts report between 60 to 79 per cent. The outturns of the remaining districts are between 59 to 50 per cent. The low outturns are chiefly attributed to excessive rain and floods.

According to the final estimates of the district officers the outturn of the different *bhadoi* crops for the province as a whole works out to 74 per cent. of the normal against an outturn of 87 per cent. of last year.

Taking 75 per cent. as the outturn of *aus* paddy, the gross yield for the province, on the basis of a normal yield of 10 maunds of clean grain per acre, is estimated at 26,901,400 cwts. against 32,010,300 cwts. of last year.

CALCUTTA,

Final Forecast of the Bhadoi *Crops of Bengal, 1913-14.*

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.

Nadia ...	*Bhadoi* paddy (autumn rice).	491,100	506,000	448,600	100	58	Middle of August. Normal.	The slight increase in area as compared with the preliminary forecast figure is due to the revision of estimates. The weather was not generally favourable. Some damage was caused by excessive rainfall: hence the estimated outturn was much below the normal.

		Acres.	Acres.	Acres.				
Jessore	*Bhadoi* paddy (autumn rice).	407,300	340,700	289,000	92	67	First week of August. Normal.	The decrease in area under *bhadoi* paddy is due to cultivation of jute in tracts where *aus* rice was previously grown. The weather was favourable at the beginning, but heavy rain in June damaged the different crops, causing the outturn to fall below the normal.

Burdwan	*Bhadoi* paddy (autumn rice).	140,000	125,500	120,100	108	75	End of August ...	Considerable damage was done to the crops at Sadar and Kalna. At Katwa the damage was slight.
	Indian-corn (maize) ...	3,000	3,000	3,000	100	100	Middle of September.

Birbhum	*Bhadoi* paddy (autumn rice).	144,100	102,400	144,100	75	100	Beginning of October. Normal.	The weather conditions were favourable throughout and a normal outturn of different crops is expected.
	Indian-corn (maize) ...	1,900	1,200	1,900	75	100		
	Other *bhadoi* cereals ...	1,400	1,100	1,400	75	100

Normal.	*Bhadoi* paddy crop was very badly damaged by heavy rain previous to the submission of the preliminary forecast. The damage was particularly heavy in Gopalganj *bheel* tracts, where the crop was almost entirely destroyed. Damage by insects to a slight extent is reported from Bhedarganj in the Madaripur subdivision. In higher lands the crop was fairly good but even here heavy rain in June caused damage and retarded the growth. Hence the low outturn.

Bakarganj	*Bhadoi* paddy (autumn rice).	136,000	146,000	280,000	95	60	1st of August. Normal.	Last year's area under *bhadoi* paddy was under-estimated; hence the increase. The weather was unfavourable for want of rain at the time of sowing and excessive rain afterwards. The heavy rains retarded the growth of the crop and caused the outturn to fall below the normal.

Chittagong	*Bhadoi* paddy (autumn rice).	202,000	189,700	208,700	94	97	Middle of August. Normal.	The increase in area under *bhadoi* paddy is due to early rainfall and to revision of areas made in the recent settlement. The growth of the crop was good owing to favourable weather condition at the beginning, but in August and September some damage was done by continuous rain; hence the outturn is slightly below the normal.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 8th December 1913.

Summary.—During the week under review no rain fell throughout the province. The sowing of *rabi* crops is nearing completion and the reaping of winter rice is going on briskly; the outturn is fairly good. The condition and prospects of standing winter crops are good. Cattle-disease is reported from seven districts. Gratuitous relief and agricultural loans were given in Midnapore only. The average price of common rice remained almost stationary as compared with that of the previous week.

Letter No. 105 T.—Marine, dated the 29th May 1913, from the Secretary to the Government of Bengal, Marine Department, to the Vice-Chairman, Port Commissioners, Calcutta.

Letter No. 136 T.—Marine, dated the 12th June 1913, from the Secretary to the Government of Bengal, to the Secretary, Bengal Chamber of Commerce.

Letter No. 1547, dated the 22nd August 1913, and enclosures, from the Bengal Chamber of Commerce.

THE question of the congestion at the Calcutta jetties, owing to insufficient accommodation and the absence of adequate transport facilities for the present volume of trade, has been engaging the attention of Government for some considerable time past. There has been a very great expansion of the trade of the port and a large increase in the number and tonnage of vessels entering it, and representations have been received from the Liners' Conference, the Calcutta Import Trade Association, and others complaining of serious delays to vessels and consequent loss due to the inadequacy of the

facilities for the discharge of cargo at the jetties, and urging the appointment of a commission to consider the question of providing increased accommodation at these jetties.

2. To alleviate the congestion, the Bengal Government, at the instance of the Port Commissioners, Calcutta, have, from time to time, sanctioned remedial measures, such as the reduction of the free time allowed to importers for clearing goods, the rearrangement of existing jetties and sheds, the construction of additional jetties, etc. These, however, have proved but partial remedies and are insufficient to meet the ever-increasing requirements of the trade of Calcutta.

3. The Government of Bengal agree with the Bengal Chamber of Commerce and other bodies who were consulted, that the subject for consideration is one of wider range than an enquiry into the facilities afforded to the Import Trade at the jetties, and that it concerns rather the question whether proper facilities of all kinds are being provided to enable the port and railway authorities to deal promptly and adequately with the rapidly-expanding trade of Calcutta, in accordance with a well-defined and carefully-thought-out policy. There are several projects for improving transport facilities and the railway and other approaches to the port, which have been prepared at various times and which are now under consideration, such as the provision of a railway bridge over the Hooghly at Panihati, the expansion of the docks, the provision of new coaling-berths on the Howrah side of the Hooghly, the Grand Trunk Canal Project, the removal of the Hatkhola jute mart and additions to the jetties. These projects are of the first importance and involve enormous expenditure and they should, it is rightly held, be examined and co-ordinated by a committee whose duty it would be to make an exhaustive enquiry into the requirements of the trade of the port and the means by which these requirements could be met.

4. The Bengal Chamber of Commerce were accordingly asked, in June 1913, to call together a conference of representative non-official gentlemen and railway expert authorities to consider whether a small committee of experts should not be appointed to investigate and advise on the whole question of the development of railway and port facilities in Calcutta. At the conference, which was held, on the 8th August 1913, and was attended by representatives of all the leading associations and public bodies of Calcutta, as well as by the representatives of the railways, the following resolution was passed unanimously :—

"Whereas it is in the opinion of this conference urgently necessary that a full and complete investigation should be made into the question of the general policy of the development of the Port of Calcutta and of the transport and all other facilities connected therewith, be it hereby—

RESOLVED that this conference strongly recommend that the Government of Bengal should appoint forthwith a small investigating authority, or commission, to consist of six or seven members empowered to deal comprehensively with the whole question : and that such commission shall include an officer of Government to act as president, the president of the Bengal Chamber of Commerce, another commercial member to be selected by that Chamber, a railway expert and an officer experienced in port affairs"

5. The Governor in Council accepts the recommendation thus made and is pleased to appoint the following investigating committee :—

1.	THE HON'BLE SIR WILLIAM DUKE, K.C.I.E., C.S.I., I.C.S.	*Chairman.*
2.	SIR HENRY BURT, K.C.I.E.	*Members.*
3.	THE HON'BLE MR. A. M. MONTEATH	
4.	THE HON'BLE MR. J. C. SHORROCK	
5.	THE HON'BLE RAJA HRISHIKESH LAHA, C.I.E. ...	
6.	MR. A. G. LYSTER	
7.	MR. H. F. HOWARD, C.I.E., I.C.S.	

MR. R. N. REID, I.C.S., is appointed to be Secretary to the committee.

The committee is empowered to—

(1) examine the existing traffic and port facilities in Calcutta and its immediate neighbourhood ;

(2) investigate the present and future requirements of the trade of Calcutta, and

(3) determine the extent to which the various transport agencies shall provide new works and other facilities in order that these requirements may be fully met for as long a period as it is reasonable to prepare a forecast.

The committee is also empowered to call witnesses and experts, if necessary, to enable it to come to a decision on the questions placed before it.

The Chairman will fix the place, date and hours of meeting in communication with the members.

ORDER—Ordered that a copy of the resolution be forwarded to the Chairman and members of the committtee, the Government of India and the Financial Department of this Government for information.

Ordered also that the resolution be published in the *Calcutta Gazette* and copies forwarded to the editors of the daily newspapers.

3. Government reserves to itself the right to alter the quantity and class of opium to be offered for sale in each month. No reduction in the quantities to be sold, however, will be made without three months' previous notice.

4. The following are the conditions of sale. Government reserves to itself the right of altering all or any of these conditions after giving three months' previous notice, and power is reserved to vary the upset price referred to in condition (ii) at any time without such previous notice:—

(i) The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

(ii) The opium will be ordinarily offered for sale at an upset price of Rs. 1,200 per chest of uncertified opium and will be sold to the highest bidder above that price, except under the circumstances for which provision is made by clause (xiii) of these conditions of sale. The bids must advance by Rs. 5 at a time.

(iii) The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of Government, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Government may dispose of the lots which remain on hand at a future sale.

(iv) Each lot shall contain five chests, excepting one lot at the December sale, which will consist of four chests of Patna opium and one chest of Benares opium.

(v) A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such promissory notes shall be redeemed on the part of the purchasers at this office by Bank of Bengal receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as Government shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

DEPOSIT.
When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.
On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 800 per chest
On bids of Rs 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.
And so on-Rs. 100 being added to the deposit for every bid additional to the extent of Rs. 400.

(vi) The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

(vii) The promissory notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

(viii) No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause (v) on the fifth day following the day of sale, will be afterwards accepted: Provided always that money so subsequently tendered may be taken in payment of the said promissory note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. (v) and No. (vi).

(ix) The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall

on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and, in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as Government shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

(x) Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

(xi) No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

(xii) The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a promissory note would otherwise be taken under the fifth of these conditions.

(xiii) With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bonâ fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 1,200 specified in the second of these conditions.

(xiv) The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether fifteen lots, provided always that there remain a sufficient number of lots of the opium to complete the said fifteen.

(xv) In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

(5) The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Government of Bengal:—

No. 1—Certificate of the opium advertised for sale.
No. 2—Report of the examination of such opium.

(6) The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at

the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the office of the Government of Bengal.

(7) Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Government of Bengal. But, in accordance with established usage, under no circumstances will the Government entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

By order of the Governor in Council,

Secretary.

Kaliprasanna Bandyopadhyay.		Bharatbarser Itihas (History of India in Bengali).
Nrisinhachandra Mukhopadhyay		Matriculation History of India in Bengali.

Administration and Progress of India under British Rule.

N. N. Ghose	...	England's Work in India.

GEOGRAPHY.

The following books are recommended as indicating the methods of study as well as the standard of knowledge required :—

A. J. Herbertson	...	The Oxford Geographies, Vol. II.

The World with fuller treatment of India (Longman's Geographical Series for India, Book II).

J. F. Unstead	...	The Practical Geography, Parts I and II.

The following books are recommended for the use of teachers :—

Blanford ...	...	The Rudiments of Physical Geography for the use of Indian Schools.
Patterson ...	...	Geography of India, Parts I and II.

The following book is recommended for the use of teachers in connection with the teaching of "Sand Modelling" in the lower classes of schools :—

A. E. Frye ...	...	The Child and Nature.

Every school that intends to undertake instruction in Geography for the Matriculation Examination is required to possess the apparatus mentioned in the following list :—

I.—The total cost need not exceed Rs. 65—

1. A measuring tape.
2. A magnetic compass.
3. Squared paper and tracing paper.
4. Clay, dry sand, paper pulp for modelling.
5. A globe, not less than 14 inches in diameter, with writing surface, and with lines of latitude and longitude, and outlines only of the landmasses, marked upon it.
6. A map of the school locality on a scale of 4" or 6"=1 mile.
7. A map of the district in which the school is situated on the scale 1"=1 mile.

8. A coloured map of the Province.
9. A coloured political map of India.
10. A physical map of India.
11. A relief map of India.
12. A map of the world on Mollweide's equal area projection and a map of Asia.

It is essential that the students should be provided with atlases, or with the necessary hand-maps. Maps for school work should not contain too much detail, or be crowded with names.

II.—The following additional equipment is recommended when it can be provided, but that lack of it is not to be considered as a bar to the recognition of the school in Geography :—

1. A thermometer.
2. A mercury barometer.
3. A rain-gauge.
4. A small collection of typical rocks, in particular those of the Province and of India.
5. A small museum of typical products.
6. A good standard atlas.
7. Geographical pictures.

The attention of teachers is requested to the raised maps of Bengal and Eastern Bengal and Assam made of paper pulp prepared by Babu Kailas Chandra Datta, Head Pandit, Habiganj Government Girls' School, Sylhet, and sold for Rs. 7 and Rs. 5, respectively.

(2) Globes of all kinds are made by George Philip and Son, London, W. and A. K. Johnston, London, and Messrs. Ruddiman Johnston, London.

Small hand Globes of German make can be obtained through the Calcutta School Book Society for about a rupee each.

(3) The "Comparative" series of large wall maps of the continents published by George Philip and Son is good and up to date; so also are the Orographical wall maps published by Edward Stanford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which includes maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District Maps; also ordinary and relief maps of the Province.

Babu L. M. Basu, the drawing master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong card board, named on one side, and the same map without names on the reverse, published by Armand Colin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

(4) The hand maps, coloured to indicate relief, published by the Diagram Company, West Barnes Lane, New Malden Surrey, at one penny each, are the best of their kind.

The uncoloured half-penny maps, showing river systems and a few towns, published by the same Company, are excellent for class use.

The Autograph hand maps, with hill shading in brown, published by Edward Stanford, London, at one penny each, are very good, and are larger than the Diagram Company's hand maps. The 15 inches map of the world on Mollweide's equal area projection is specially to be commended.

(5) Wall pictures of considerable artistic merit are published by Messrs. Edward Arnold of Leeds, Messrs. Hachette of Paris, and Messrs. Hölzel of Vienna and Messrs. Longmans, Green & Co. They cost, delivered in India, from two to three rupees each.

Map lantern slides, and view slides especially prepared for geography teaching, are sold by the Diagram Company for two or three shillings each. Mr. Bartington Smith of Darjeeling also sell good picture slides of the Himalayas at Rs. 15 per dozen.

ELEMENTARY MECHANICS.

The following book is recommended :—

Sir Philip Magnus	...	Elementary Mechanics (Longmans, 1903).

The following list of apparatus is prescribed as indicating the approximate requirements of a recognised High School seeking to teach Elementary Mechanics for the Matriculation Examination :—

Plumb-line and level.
Simple Lever (including brass slotted weights).
Roman Steelyard.
Lecture apparatus for experiments on moments.
George's New Atwood's Machine.
Stop-watch.
Glazebrooke's apparatus (to demonstrate movement of a body).
Hick's Ballistic Balance.
Compound Wheel and Axle.
4 Single brass Pulleys.
2 „ „ „
2 Triple „ „
Weston Differential Pulley Blocks (¼ ton).
16 feet of chain at 6*d.* per foot.
Inclined Plane.
Parallelogram of Forces apparatus.
Wall Crane.
Becker's New Physical Balance.
Set of Gramme Weights (200 grams to 1 mgr.).
2 Composition-Ivory Balls.

NOTE.—The above list is not exhaustive, and much of it might be replaced by simpler forms that could probably be made far more cheaply by any clever *mistry* under proper supervision. In most cases, however, it will probably be found advantageous to buy such a set as indicated in the list specially for demonstration purposes, and subsequently to develop simplified duplicates, illustrating the same principles, which the boys should be given opportunity actually to experiment with on their own individual accounts or working in pairs.

Honours Course.

(In addition to the books recommended for the Pass Course.)

H. C. Jones ...	...	Elements of Physical Chemistry.
Ostwald ...	...	Foundations of Analytical Chemistry.
J. Wade ...	...	Introduction to the Study of Organic Chemistry.
Valentine and Hodgkinson ...	...	Practical Chemistry.
Cohen ...	...	Practical Organic Chemistry.
Caven and Landor	...	Systematic Inorganic Chemistry.
Ostwald ...	...	Outlines of General Chemistry.
J. Walker ...	...	Introduction to Physical Chemistry.
F. Mollwo Perkin	...	Practical Methods of Inorganic Chemistry.

N.B.—Candidates who take up Chemistry at the B.A. or B.Sc. Examination are recommended to refer to Saxelby's Practical Mathematics.

BOTANY.

Pass Course.

Vines, S. H.	...	An Elementary Text-book of Botany (London, 1905).
Scott, D. H.	...	Structural Botany, 2 Vols. (London, 1904-06.)
Darwin, F., and Acton, G. H. ...	...	Practical Physiology of Plants (Cambridge, latest edition).
Prain, D.	...	Bengal Plants (Calcutta, 1903),
or		
Roxburgh	...	Flora Indica, edited by C. B. Clarke (Calcutta, 1874).
Strasburger and Hillhouse ...	...	Practical Botany (latest edition).

Honours Course.

(In addition to the text-books for the Pass Course.)

Strasburger, E.	...	Text-book of Botany, translated by Porter, revised by Lang (Third Edition, London).
Reynolds Green, J.	...	Vegetable Physiology (London, 1900).
Schimper, A. F. W.	...	Geography of Plants (Oxford, 1903).
Stape ...	...	Fossil Botany.
Bower ...	...	Practical Botany, 1902.

ZOOLOGY.

Pass Course.

Boas	Text-book of Zoology.
Shipley and MacBride ...	Zoology.
Oskar Hertwig ... and H. J. Campbell ...	The Cell.
R. E. Lloyd ...	An Introduction to Biology for Students in India.
P. J. Parker and W. N Parker	An Elementary Course of Practical Zoology.
Foster and Balfour ...	The Elements of Embryology (edited by Sedgwick and W. Heape).
Wallace	Darwinism.
A. D. Imms	A Laboratory Sketch-book of Zoology for Indian Students.

Honours Course.

(In addition to the books prescribed for the Pass Course.)

Miall and Hammond ...	The Structure and Life-History of the Harlequin Fly.
Miall and Denny ...	The Cockroach.

PHYSIOLOGY.

Pass Course.

Halliburton ...	Hand-book of Physiology.

Practical.

Schafer	Essentials of Histology
	and either
Milroy	Practical Physiological Chemistry
	or
Halliburton... ...	Essentials of Chemical Physiology
	and
Brodie	Essentials of Experimental Physiology
	or
Beddard, Edkins, Hill, Pembrey and Macleod	Practical Physiology.

Honours Course.

Starling	Principles of Human Physiology.

Practical.

The same as for the pass course.

SYLLABUS IN EXPERIMENTAL PHYSIOLOGY.

Pass Course.

The induction coil ; single shocks ; short circuiting key ; effect of single shocks on the tongue ; break-shock is stronger than the make-shock. Helmholtz's Modification ; Neef's Hammer.

Pithing a frog; nerve-muscle preparation. Mechanical, chemical, thermal and electrical stimulation of muscle and nerve.

The Graphic method : Simple lever; crank lever (myograph); moist chamber, minimal and maximal excitation with single induction shocks (make and break). Stimulation by constant current: contraction of muscle only at make and break.

The muscle curve:—Single contraction of a frog's muscle: the latent period, the period of contraction and the period of relaxation. Time-tracing by tuning-fork. Method of after-loading. The influence of temperature and of load on muscular contraction. The work performed by a muscle during a twitch.
Elasticity and extensibility of muscle.
Summation of muscular contraction: tetanus.
Fatigue of muscle.
Thickening of a muscle on contraction.
Bernard's curare experiment.
Stimulation of a motor nerve; unequal excitability (greater nearer the centre of a motor nerve); excitability of flexor and extensor nerves.
Velocity of nerve-impulse (myographic method).
Electro-Physiology:—Galvani's experiment of contraction with metals; Galvani's experiment of contraction without metals.
The Frog's heart:—Beating of the heart; effect of heat and cold (heart *in situ*); section of the heart; effect of heat and cold on excised heart.
Stannius' experiment.
Graphic record of the beat of the heart (suspension method and also direct registration with heart-lever).
Pulse—Sphygmographic tracing.
Blood-pressure in man: Sphygmometer and Sphygmomanometer.
Reflex action (simple experiments on a pithed frog).
Vision:—Accommodation; Scheiner's experiment; near and far point.
Purkinge-Sanson's images: Phakoscope; Blind spot; yellow spot; Colour vision; Complementary colours.

HONOURS COURSE.

Additional Experiments—

The Induction Coil—Break extra-current of Faraday.
The Rheonome: Effect of sudden variation of current.
Isotonic and Isometric contraction.
Influence of veratrine on muscular contraction.
Indefatigability of nerve.
Excitation of muscle by constant current: Polar excitation of a muscle.
Electrotonus. Electrotonic changes in excitability and conductivity of a nerve.
Kuhne's experiment of contraction without metals.
Examination of currents in muscle, nerve and heart by means of the reflecting galvanometer.
Frog's heart—Minimal stimulus causes maximal contraction. "Staircase effect." Single contraction of the ventricle. Tetanisation. Refractory period. Stimulation of the vagus. Action of drugs (Muscarin and Atropin) on the heart.
Voice and Speech: Laryngoscope.
Vision: Ophthalmoscope; Perimeter.

GEOLOGY.

No text-books are prescribed or recommended. The subject is to be studied with the help of the Syllabus prescribed in the Regulations.

EXPERIMENTAL PSYCHOLOGY.

The subject is to be studied as defined by the Syllabus. Students are recommended to use one or more of the following books or select portions thereof, with special reference to the course laid down in the Syllabus:—

Pass Course.

I.—General Psychology—

Hoffding	...	Outlines of Psychology.
Wundt	...	Human and Animal Psychology.
William James	...	Text-book of Psychology.
J. Dunlop Leckley	...	The Nervous System (Longman & Co.).

Preparatory Reading—Students are advised to read Croom Robertson's Elements of Psychology before joining the regular class.

II.—Experimental Psychology—

Titchener ...	...	Text-book of Psychology.
Külpe ...	...	Outlines of Psychology.
Scripture ...	...	New Psychology.

Laboratory Course—Titchener's Experimental Psychology, Vol. I, Part I. and Vol. II, Part I.

Honours Course.

I.—General Psychology—Same as in the Pass Course.
II.—Physiological and Comparative Psychology.

Wundt ...	...	Outlines of Physiological Psychology (Vol. I).
Ladd ...	...	Elements of Physiological Psychology.
Romanes ...	...	Mental Evolution in Man.
Romanes ...	...	Mental Evolution in Animals.
Lloyd Morgan	...	Comparative Psychology.
Herbert Spencer	...	Principles of Psychology.
M. Greenwood (Jr.)	...	Physiology of the Sense Organs.

III.—Experimental Psychology—

In addition to the books recommended for the Pass Course, the following:—

Ziehen	...	Introduction to Physiological Psychology.
Ladd	...	Outlines of Physiological Psychology. (Latest edition.)

N.B.—No text-books are recommended for the guidance of teachers.

P. BRÜHL,
Offg. Registrar.

SENATE HOUSE, *the 13th December 1913.*

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

M.A. AND M.Sc. EXAMINATIONS, 1916.

MATHEMATICS.

NOTE.—It is to be understood that, in the following list of text-books, wherever a book is recommended for a subject, students are expected to read those parts of the book only which deal with that particular subject :—

Pure Mathematics.

1. Higher Algebra—
   - Chrystal ... ... Algebra, Part II, Chapters 23—28, 32—34.
   - C. Smith ... ... A Treatise on Algebra.
2. Higher Plane Trigonometry—
   - Hobson ... ... Plane Trigonometry.
3. Spherical Trigonometry—
   - Casey ... ... Spherical Trigonometry.
   - Todhunter ... ... Spherical Trigonometry (Ed. Leathem)
4. Theory of Equations and Algebra of Quantics—
   - Burnside and Panton ... Theory of Equations.
   - Grace and Young ... Algebra of Invariants.
   - Elliott ... ... Introduction to the Algebra of Quantics.
5. Plane Analytical Geometry, including Higher Plane Curves—
   - Salmon ... ... Conic Sections.
   - Salmon ... ... Higher Plane Curves.
   - Basset ... ... Treatise on Cubics and Quartics.
6. Geometry of Surfaces—
   - Salmon ... ... Geometry of Three Dimensions.
   - Frost ... ... Solid Geometry.
7. Differential Calculus—
   - Edwards ... ... Differential Calculus.
   - Osgood ... ... Differential and Integral Calculus.
8. Integral Calculus—
   - Williamson ... Integral Calculus.
   - Osgood ... ... Differential and Integral Calculus.
9. Differential Equations—
   - Forsyth ... ... Differential Equations.
10. Calculus of Variations—
    - Bolza ... ... Lectures on the Calculus of Variations.
    - Hancock ... ... Calculus of Variations.
11. (*a*) Theory of Functions—
    - Harkness and Morley — Introduction to the Theory of Analytic Functions, *or* the corresponding portions of—
    - Forsyth ... ... Theory of Functions, 2nd edition.

    (*b*) Theory of Groups—
    - Hilton ... ... Finite Groups.
    - Campbell ... ... Theory of Continuous Groups.

    (*c*) Finite Differences and Calculus of Functions.
    - Boole ... ... Finite Differences.
    - Carmichael ... Calculus of Operations.
    - Herschel ... Examples of Calculus of Finite Differences.
    - Babbage ... ... Examples of Functional Equations.

(*d*) Vector Analysis and Quaternions—

Joly	...	Quaternions.
Tait	...	Quaternions.
Gibbs and Wilson	...	Vector Analysis.
Gibbs	...	Scientific Papers, Vol. II, pp. 17—90.

(*e*) Projective Geometry—

Cremona	...	Projective Geometry.
Scott	...	Modern Analytical Geometry.
Reye	...	Geometry of Position. T. R. Holgate.
Whitehead	...	Axioms of Projective Geometry (Cambridge Tracts No. 4).
Whitehead	...	Axioms of Descriptive Geometry (Cambridge Tracts No. 5).
Veblen and Young	...	Projective Geometry.
Bonola	...	Non-Euclidean Geometry.

(*f*) Theory of Numbers—

Reid	...	Theory of Numbers.
Matthews	...	Theory of Numbers.
Smith	...	Reports on the Theory of Numbers. (Collected papers, Vol. I, pp. 38—364.)

Mixed Mathematics.

1. Advanced Statics, including Theory of Potential—

Minchin	...	Statics.
Routh	...	Statics.

2. Dynamics of a Particle—

Routh	...	Dynamics of a Particle.

3. Rigid Dynamics—

Routh	...	Elementary Rigid Dynamics.

4. Hydrostatics, including Capillarity—

Besant and Ramsay	...	Hydrodynamics, Part I (Hydrostatics).

5. Hydrodynamics—

Ramsay	...	Hydrodynamics.
Lamp	...	Hydrodynamics.

6. Spherical Astronomy—

Ball	...	Spherical Astronomy.

7. (*a*) Theory of Elasticity—

Love	...	Theory of Elasticity, 2nd edition.

Candidates are also recommended to refer to—

Todhunter and Pearson. History of Theory of Elasticity.

(*b*) Advanced Dynamics—

Whittaker	...	Analytical Dynamics.
A. C. Webster	...	Dynamics.
Routh	...	Advanced Rigid Dynamics.
Hertz	...	Principles of Mechanics.

(*c*) Higher Parts of Spherical Astronomy—

Chauvenet	...	Spherical Astronomy.
Newcomb	...	Spherical Astronomy.

(*d*) Lunar and Planetary Theories—

Adams	...	Lectures on Lunar Theory.
Airy	...	Mathematical Tracts.
Brown	...	Lunar Theory.
Cheyne	...	Planetary Theory.
Moulton	...	Celestial Mechanics.

(*e*) Figure of the Planets—

Todhunter	...	History of the Theory of Attraction and the figure of the Earth.
Thomson and Tait	...	Natural Philosophy.
Airy	...	Mathematical Tracts.
Airy	...	Figure of the Earth. (Enc. Metr.)
Clark and Radau	...	Figure of the Earth. (Enc. Britt.)
Pratt	...	Figure of the Earth.

(*f*) Theory of Tides—

Basset	...	Hydrodynamics.
Darwin	...	Tides and Kindred Phenomena. (Murray.)
Darwin	...	Tides. (Enc. Britt.)
Darwin	...	Scientific Papers.
Airy	...	Tides and Waves. (Enc. Metr.)

PHYSICS.

No text-books are prescribed or recommended.

The students are required to consult their Professors as to a suitable course of reading, which should include the study of original papers.

CHEMISTRY.

(In addition to the books recommended for the B.A. and B.Sc. Pass and Honours Courses.)

(*a*) PHYSICAL CHEMISTRY.

Ostwald Walker	...	Physico-Chemical Measurements.
Nernst (trans. by Lehfeldt).		Theoretical Chemistry, 4th edition.
Mellor	...	Chemical Dynamics and Reactions.
Findlay	...	The Phase Rule.
Lehfeldt	...	Electro-Chemistry.
Van t'Hoff	...	Lectures on Theoretical and Physical Chemistry.
Jeans	...	Dynamical Theory of Gases.
Travers	...	Study of Gases.
Rutherford	...	Radio-Activity.
Thomsen	...	Thermo-Chemistry.
Ostwald	...	Principles of Chemistry.
E. C. Baly	...	Spectroscopy.
S. Young	...	Stoichiometry.

(*b*) INORGANIC CHEMISTRY.

Biltz	...	Inorganic Preparations.
Myer	...	History of Chemistry.
Fresenius	...	Qualitative Analysis and Quantitative Analysis.
Sutton	...	Volumetric Analysis.
Hempel	...	Gas Analysis.
Treadwell and Hall	...	Analytical Chemistry, Vols. I and II.
Roscoe and Schorlemmer		Treatise on Chemistry, Vols. I and II.
F. M. Perkin	...	Practical Methods in Inorganic Chemistry.
Werner	...	New Ideas in Inorganic Chemistry.

(*c*) ORGANIC CHEMISTRY.

Emil Fischer	...	Organic Preparations.
Richter	...	Organische Chemie (9th edition).
Gattermann	...	Practical Organic Chemistry.
J. B. Cohen	...	Advanced Organic Chemistry.
Sudborough	...	Practical Organic Chemistry.

Candidates for the M.A. or M.Sc. Examination are required to consult original papers in the Chemical Society's Journals and other Scientific periodicals, and also to consult the Annual Reports issued by the Chemical Society on the "Progress of Chemistry," in connection with the especial subject taken up by them.

GEOLOGY.

No text-books are prescribed or recommended. The subject is to be studied in accordance with the syllabus prescribed in the Regulations.

PHYSIOLOGY.

(No text-books are prescribed.)

In section 7, Chapter XXXVII of the Regulations, in first paragraph of the syllabus in Physiology, for the M.Sc. Examination the expression "a particular branch" be interpreted to mean one of the following branches :—

1. Circulation and Respiration.
2. Alimentation and Metabolism.
3. Physiology of the Central Nervous System and the Organs of Sense.
4. Physiology of the Nervous System and the Muscular System.
5. Histology and Reproduction.

The four theoretical papers in Physiology be distributed so as to cover the following subjects :—

Paper I.—Circulation, Respiration, Alimentation, Metabolism and Reproduction (compulsory to all candidates).

Paper II.—Nervous System and Muscular System. (Candidates offering a piece of research work falling under the head of "Organs of Sense" will be exempted from this paper.)

Paper III.—Organs of Sense. (Candidates offering a piece of research work falling under any of the following heads—Circulation, Respiration, Alimentation, Metabolism, Reproduction, Nervous System, Muscular System and Histology—will be exempted from this paper.

Paper IV.—The branch of Physiology professed by the candidate for special study.

The Practical Examination will include—

Paper I.—Experimental Physiology. (Candidates offering research work falling under the head of Histology or Chemical Physiology will be exempted from this paper.)

Paper II.—Histology. (Candidates offering research work falling under the head of Chemical Physiology will be exempted from this paper.)

Paper III.—Chemical Physiology.

Paper IV.—Candidates' special subject.

BOTANY.

No text-books are prescribed. The subject is to be read in accordance with the prescribed Syllabus.

ZOOLOGY AND COMPARATIVE ANATOMY.

(No text-books are prescribed.)

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta, or

GOVERNMENT OF BENGAL.

BENGAL LEGISLATIVE COUNCIL.

NOTIFICATION.

No. 2417L., dated the 15th December, 1913.—His Excellency the President having been pleased to order, under rule 39 (*b*) of the Bengal Legislative Rules, 1912, the publication of the Report of the Select Committee to which the Bill "to abolish the Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies, and to provide for the application of the property and funds thereof as nearly as possible in accordance with the intentions of the founders" was referred, the Report of the said Committee, with the Bill, as amended by them, annexed, is hereby published for general information.

REPORT OF THE SELECT COMMITTEE ON THE DOVETON TRUST BILL, 1913.

WE, the undersigned Members of the Select Committee, to which the Bill "to abolish the Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies, and to provide for the application of the property and funds thereof as nearly as possible in accordance with the intentions of the founders," was referred, have the honour to submit this our Report, together with the Bill, as amended by us, annexed thereto.

2. We have carefully examined the Bill and consider that it is suitably framed to give effect to the objects which it has in view, but we would recommend that two slight changes be made therein :—

(*a*) In clause 4, we would follow more closely the precedent of the Charitable Endowments Act (VI of 1890, sec. 3), and substitute for the words "an officer" the words "an officer of the Government by the name of his office", and so give greater precision to the intentions of Government. Without some such amplification as this, the clause might give rise to some uncertainty.

(*b*) The proviso to clause 6 (*2*) strikes us as unnecessary in the circumstances of the present Bill, and we would omit it.

3. We recommend that the Bill, as thus amended, be passed.

THE DOVETON TRUST BILL, 1913;

(as amended by the Select Committee.)

A

BILL

to abolish the Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies, and to provide for the application of the property and funds thereof as nearly as possible in accordance with the intentions of the founders.

Preamble.

WHEREAS, on the first day of March, 1823, an Educational Society was established in Calcutta, under the designation of "The Parental Academic Institution," with the object of establishing one or more schools under its own control in order to procure the means of affording to youth the best education of which existing circumstances would admit, and, as far as the state of funds would allow, to provide education for the orphans of members dying not possessed of property sufficient to educate their children;

And whereas the designation of the said Society was changed in the year 1855 to that of "The Parental Academic Institution and Doveton College";

And whereas the said Society was registered as a Society under the Societies Registration Act, 1860, on the twenty-ninth day of August, 1881; XXI of 1860

And whereas the designation of the said Society was again changed in the year 1886, on the incorporation therewith of "The Young Ladies' Institution," to that of "The Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies";

And whereas various properties and funds have from time to time been vested in the Governing Body of the said Society, and in other persons, for the benefit of, or in trust for, the said Institution or pupils to be educated therein;

And whereas the said Institution is now governed by certain persons claiming to be a Committee duly elected or appointed under an order made by the High Court, Calcutta, on the eighth day of April, 1907;

And whereas it appears to the Governor in Council that the said Committee are unable satisfactorily to manage the said Institution according to the intentions of its founders, and that portions of the property and funds of the Institution have been wasted away in litigation and by mismanagement, and that it is expedient that the Legislature should intervene in order to prevent further waste and mismanagement;

And whereas it appears to the Governor in Council that the objects of the founders of the said Institution would best be met by providing for the application of its property and funds, under the direction of the Government, to the education of Christian children of what is known as the Domiciled Community of Bengal;

And whereas the sanction of the Governor General has been obtained, under section 5 of the Indian Councils Act, 1892, to the passing of this Act; 55 & 56 Vict., c. 14.

It is hereby enacted as follows:—

Short title.

1. This Act may be called the Doveton Trust Act, 1913.

Abolition of the Doveton Institution.

2. The "Parental Academic Institution and Doveton College and Doveton Institution for Young Ladies" is hereby abolished.

The Doveton Trust Bill.

(*Clauses 3-6.*)

Vesting and application of trust property and funds.

3. All property, movable and immovable, which is vested in the Managing Committee of the said Institution, or in any other person, for the benefit of the said Institution or anywise in trust therefor, and all sums standing to the credit of the said Institution, shall vest in the Accountant-General, Bengal, as bare trustee, and shall be applied —

(*a*) to the discharge of all debts and liabilities properly payable out of, or chargeable upon, the property or funds of the said Institution, and

(*b*) to making provision for the education of Christian children of what is known as the Domiciled Community of Bengal, by the granting of scholarships, by grants-in-aid to Institutions intended for the education of such children, or in such other similar manner as to the Local Government may seem reasonable and proper.

Appointment of administrator, and transfer of powers to him.

4. The Local Government shall, by notification in the *Calcutta Gazette*, appoint an officer of the Government (not being the Accountant-General, Bengal) by the name of his office to administer the property and sums referred to in section 3; and all powers in respect of such property and sums, which have hitherto been exercisable by the said Managing Committee or by any other person, may henceforth be exercised by such officer, subject to the control of the Local Government. [*Cf.* Act VI of 1890, ss. 3, 5 (*1*, last part.]

Power to make rules.

5. (*1*) The Local Government may make rules to carry out the purposes of this Act. [*Cf.* Act VI of 1890, s. 15 (*a*); Act V of 1912, s. 24 (*1*).]

(*2*) In particular, and without prejudice to the generality of the foregoing power, such rules may prescribe— [*Cf.* Act V of 1912, s. 24 (*2*).]

(*a*) the method of applying property and funds held under this Act to the purpose specified in clause (*b*) of section 3; [*Cf.* Act VI of 1890, s. 8 (*2*), last part.]

(*b*) the securities in which funds held under this Act and not required for immediate disbursement shall be invested; [*Cf.* Act VI of 1890, s. 4 (*3*).]

(*c*) the accounts to be kept by the Accountant-General, Bengal, and by the officer appointed under section 4, and the mode in which such accounts are to be audited; [*Cf.* Act VI of 1890, s. 8 (*2*), first part, and s. 13 (*d*).]

(*d*) the periodical publication of a list of all property and funds held under this Act, and of an abstract of all accounts kept hereunder; [*Cf.* Act VI of 1890, s. 9.]

(*e*) the fees (if any) to be paid to the Government in respect of property held and administered under this Act. [*Cf.* Act VI of 1890, s. 13 (*b*).]

(*3*) The power conferred by this section to make rules is subject to the condition of the rules being made after previous publication. [*Cf.* Act VI of 1890, s. 13 (*c*); Act V of 1912, s. 24 (*3*).]

(*4*) All rules made under this section shall be published in the *Calcutta Gazette*, and on such publication shall have effect as if enacted in this Act. [*Cf* Act V of 1912, s. 24 (*4*).]

Indemnity

6. (*1*) No suit shall be instituted against the Government in respect of anything done or purporting to be done under this Act, or in respect of any alleged neglect or omission to perform any duty devolving on the Government under this Act, or in respect of the exercise of, or the failure to exercise, any power conferred by this Act on the Government. [*Cf* Act VI of 1890, s. 14.]

(*2*) No suit shall be instituted against the Accountant-General, Bengal, or any officer appointed under section 4, except—

(*a*) for divesting him of property on the ground of its not being subject to this Act, or

The Doveton Trust Bill.

(*Clause 6.*)

(*v*) for making him chargeable with or accountable for the loss or misapplication of any property vested in or managed by him under this Act, or the income thereof, where the loss or misapplication has been occasioned by or through his wilful act, neglect or default.

AUSTRALIA, EAST COAST—TORRES STRAIT.

Flinders passage—Obstruction reported.

No. 581 (third publication).—The Portmaster, Brisbane, has given Notice (No. 16 of 1913) that an obstruction, on which the S.S. *Maranoa* is stated to have struck in 1903, is reported to lie 7 cables S. 73° W. from Scott Rock, with the north-east extreme of King Point bearing S. 54° E. one mile distant and the south-east extreme of Wednesday Island N. 43° E. The depth of water on the obstruction is not stated. As the S.S. *Suva*, with a draught of 15′ 10″, is reported to have recently struck what is considered

the same obstruction, and in view of the existence of two dangers south-west of Scott Rock, it is advisable that ships using Flinders Passage should not pass to the southward of Scott Rock, but the following directions should be followed :—

Approaching from the south-eastward a course should be steered N. 56° W. for the west extreme of Wednesday Island, until No. IV Tuesday Islet is in line with Strait Rock bearing N. 86° E. This mark should be kept on astern until Double Hill bears S. 14° W., then proceed as before directed.

Letter No. 136 T.—Marine, dated the 12th June 1913, from the Secretary to the Government of Bengal, to the Secretary, Bengal Chamber of Commerce.

Letter No. 1547, dated the 22nd August 1913, and enclosures, from the Bengal Chamber of Commerce.

THE question of the congestion at the Calcutta jetties, owing to insufficient accommodation and the absence of adequate transport facilities for the present volume of trade, has been engaging the attention of Government for some considerable time past. There has been a very great expansion of the trade of the port and a large increase in the number and tonnage of vessels entering it, and representations have been received from the Liners' Conference, the Calcutta Import Trade Association, and others complaining of serious delays to vessels and consequent loss due to the inadequacy of the facilities for the discharge of cargo at the jetties, and urging the appointment of a commission to consider the question of providing increased accommodation at these jetties.

2. To alleviate the congestion, the Bengal Government, at the instance of the Port Commissioners, Calcutta, have, from time to time, sanctioned remedial measures, such as the reduction of the free time allowed to importers for clearing goods, the rearrangement of existing jetties and sheds, the construction of additional jetties, etc. These, however, have proved but partial remedies and are insufficient to meet the ever-increasing requirements of the trade of Calcutta.

3. The Government of Bengal agree with the Bengal Chamber of Commerce and other bodies who were consulted, that the subject for consideration is one of wider range than an enquiry into the facilities afforded to the Import Trade at the jetties, and that it concerns rather the question whether proper facilities of all kinds are being provided to enable the port and railway authorities to deal promptly and adequately with the rapidly-expanding trade of Calcutta, in accordance with a well-defined and carefully-thought-out policy. There are several projects for improving transport facilities and the railway and other approaches to the port, which have been prepared at various times and which are now under consideration, such as the provision of a railway bridge over the Hooghly at Panihati, the expansion of the docks, the provision of new coaling-berths on the Howrah side of the Hooghly, the Grand Trunk Canal Project, the removal of the Hatkhola jute mart and additions to the jetties. These projects are of the first importance and involve enormous expenditure and they should, it is rightly held, be examined and co-ordinated by a committee whose duty it would be to make an exhaustive enquiry into the requirements of the trade of the port and the means by which these requirements could be met.

4. The Bengal Chamber of Commerce were accordingly asked, in June 1913, to call together a conference of representative non-official gentlemen and railway expert authorities to consider whether a small committee of experts should not be appointed to investigate and advise on the whole question of the development of railway and port facilities in Calcutta. At the conference, which was held, on the 8th August 1913, and was attended by representatives of all the leading associations and public bodies of Calcutta, as well as by the representatives of the railways, the following resolution was passed unanimously :—

"Whereas it is in the opinion of this conference urgently necessary that a full and complete investigation should be made into the question of the general policy of the development of the Port of Calcutta and of the transport and all other facilities connected therewith, be it hereby—

RESOLVED that this conference strongly recommend that the Government of Bengal should appoint forthwith a small investigating authority, or commission, to consist of six or seven members empowered to deal comprehensively with the whole question : and that such commission shall include an officer of Government to act as president, the president of the Bengal Chamber of Commerce, another commercial member to be selected by that Chamber, a railway expert and an officer experienced in port affairs."

5. The Governor in Council accepts the recommendation thus made and is pleased to appoint the following investigating committee :—

1.	The Hon'ble Sir William Duke, K.C.I.E., C.S.I., I.C.S.	*Chairman.*
2.	Sir Henry Burt, K.C.I.E.	*Members.*
3.	The Hon'ble Mr. A. M. Monteath	
4.	The Hon'ble Mr. J. C. Shorrock	
5.	The Hon'ble Raja Hrishikesh Laha, C.I.E. ...	
6.	Mr. A. G. Lyster	
7.	Mr. H. F. Howard, C.I.E., I.C.S.	

Mr. R. N. Reid, I.C.S., is appointed to be Secretary to the committee.

The committee is empowered to—

(1) examine the existing traffic and port facilities in Calcutta and its immediate neighbourhood ;

(2) investigate the present and future requirements of the trade of Calcutta, and

(3) determine the extent to which the various transport agencies shall provide new works and other facilities in order that these requirements may be fully met for as long a period as it is reasonable to prepare a forecast.

The committee is also empowered to call witnesses and experts, if necessary, to enable it to come to a decision on the questions placed before it.

The Chairman will fix the place, date and hours of meeting in communication with the members.

Order—Ordered that a copy of the resolution be forwarded to the Chairman and members of the committtee, the Government of India and the Financial Department of this Government for information.

Ordered also that the resolution be published in the *Calcutta Gazette* and copies forwarded to the editors of the daily newspapers.

By order of the Governor in Council,

H. H. GREEN,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORTS OF THE PORT OFFICERS, CALCUTTA AND CHITTAGONG, FOR 1912-13.

No. 3567 Marine.

(1) Letter from the Port Officer, Calcutta, No. 6742, dated the 12th August 1913, submitting the Annual Report of his Department for the year 1912-13.

(2) Letter from the Port Officer, Chittagong, No. 442 P., dated the 17th September 1913, submitting the Annual Report of his Department for the year 1912-13.

PORT OF CALCUTTA.

There were four casualties in the Pilot Service during the year. Two Branch Pilots retired from the service, one Leadsman Apprentice resigned and another was dismissed for misconduct. Two Leadsmen Apprentices were recruited from England. The total strength of the service stood at 56 pilots and 14 Leadsmen.

2. There was an increase in the number of vessels visiting the port, 1,730 with a gross tonnage of 7,074,530 having entered the port during the year under review against 1,708 with a gross tonnage of 6,765,071 in the previous year. One thousand seven hundred and eighteen vessels with a gross tonnage of 7,019,679 left the port against 1,704 vessels with a gross tonnage of 6,750,128 in 1911-12. Pilotage receipts amounted to Rs. 15,33,673 against Rs. 14,76,000 in 1911-12 and Rs. 14,37,370 in 1910-11.

3. Three hundred and two of the incoming steamships drew over 21 feet, while 1,104 of the vessels which left the port drew over 21 feet of water. One sailing ship, drawing over 21 feet, entered, and one left, the port.

4. Seven inward-bound vessels were neaped during the year for want of sufficient depth of water over the bars of the river at Saugor, and one outward-bound vessel was neaped at Calcutta. No vessels were neaped during the previous year. Four vessels were detained at the Sandheads for want of pilots against five in the previous year. Three officers were carried off to sea in August owing to bad weather at the Sandheads against twelve in 1911-12.

5. Twenty-one groundings occurred against twenty-three in the previous year, and two collisions against two in 1911-12. Six of the groundings were accidental and four were due to alteration in the channel of the river. In eight cases, the pilot was held to be free from blame, in two cases the groundings were attributed to his imprudence or error of judgment, and in one case to unskilfulness. The pilots in fault were suitably dealt with by Government. As regards the two collisions, the enquiries held showed that one case was due to error of judgment, and the other, to negligence.

6. No court under Act XII, 1859 (The Calcutta Pilots Act) was held during the year under report

7. Ninety-seven candidates appeared at the examinations for the grant of Colonial and Home Trade Certificates of Competency, of whom 51 passed. There were 642 candidates for examinations for the grant of Certificates of Competency as Master, Serang, Engineer and Engine-driver under the Inland Steam-Vessels Act, 1884, of whom 184 passed. There was no candidate for Steam-Tug Pilot's license.

8. Mr. G. Robertson, the First Engineer and Shipwright Surveyor, was on six months' combined leave from 14th May 1912, when Chief Engineer C. F. Laslett, R.I.M., Engineer and Shipwright Surveyor, Chittagong, acted for him. Engineer A. A. Macdonald, R.I.M., Second Engineer and Shipwright Surveyor, Calcutta, was transferred to Chittagong during the above period. Engineer W. G. Horley, R.I.M., Third Engineer and Shipwright Surveyor, acted as Second Engineer and Shipwright Surveyor, and an Engineer of the British India Steam Navigation Company, Mr. Neil McLeod, was appointed to act for Engineer Horley.

Commander C. J. C. Kendall, D.S.O., R.I.M., was Port Officer throughout the year; Commander C. B. Henley, R.I.M., was Deputy Port Officer and Deputy Shipping Master up to 30th April, 1912, when he reverted to the Royal Indian Marine, and Commander G. N. Forteath, R.I.M., was appointed Deputy Port Officer and Deputy Shipping Master in his place. Lieutenant O. Goldsmith, R.I.M., was Assistant Port Officer and Deputy Shipping Master throughout the year. The acknowledgments of Government are due to Commander Kendall for his efficient supervision of the work of the Department during the year under review.

Port of Chittagong.

9. Seven hundred and eighty vessels (including sailing vessels) entered and 791 left the port representing a gross tonnage of 675,630 and 689,056, respectively. It is impossible to compare these figures with those of the previous year, as inland steamers have been included in the statistics for the first time.

10. One grounding, one collision and two cases of fire on board vessels occurred in port during the year. One vessel was damaged by a cyclone.

11. One hundred and thirty-six candidates appeared at the examinations for the grant of Certificates of Competency as Master, Serang and Engine-driver under the Inland Steam-Vessels Act, 1884, of whom 67 passed.

12. Commander E. Gray Mills, R.I.M., was Port Officer throughout the year. Chief Engineer C. F. Laslett, R.I.M., was Engineer and Shipwright Surveyor up to 13th May 1912, when he was appointed to officiate as First Engineer and Shipwright Surveyor, Calcutta. Engineer A. A. Macdonald, R.I.M., Second Engineer and Shipwright Surveyor, Calcutta, acted for him during this period. Chief Engineer Laslett resumed his appointment at Chittagong on 21st November 1912, which he held till the end of the year 1912-13. The acknowledgments of Government are due to Commander Mills for his efficient supervision of the work of the Port of Chittagong during the year under review.

By order of the Governor in Council,

RESOLUTION ON THE ANNUAL IRRIGATION REVENUE REPORT FOR THE YEAR 1912-13.

No. 5153*I*.

GOVERNMENT OF BENGAL.

IRRIGATION DEPARTMENT.

Dated Calcutta, the 16th December 1913.

RESOLUTION.

READ—

The Annual Irrigation Revenue Report for the year 1912-13.

THE **Major Irrigation Works** in Bengal are the Midnapore and Hijili Tidal Canals. These works are in operation. The **Minor Works** for *navigation* are the Calcutta and Eastern Canals, the Madaripur Bhil Channel, a portion of the Orissa Coast Canal, the Nadia Rivers and the Gaighatta and Baxi khal, while the work of this class for irrigation is the Eden Canal. The Utterbhag Lock under construction in connection with the Magra Hât Drainage Scheme is treated as a minor work for navigation. Training works on the rivers Ganges, Bhagirathi, Gorai, Dhaleswari and Buriganga are also classed under this head.

2. The capital outlay on the Major Works up to the end of March 1913 amounted to Rs. 1,11,08,431. The works constructed for this outlay comprise two weirs, the Midnapore and Panchkura weirs, and 98·75 miles of main and branch canals, of which 69·75 miles provide for both irrigation and navigation and 29 miles for navigation only. There are in addition 254½ miles of distributaries. During the year under review no addition was made to the length of either the canals or the distributaries.

3. The total receipts from the major works amounted to Rs. 2,73,212 and the working expenses to Rs. 2,46,387, the net result being a profit of Rs. 26,825 against a deficit of Rs. 17,393 in the preceding year. This profit is made up of a net revenue of Rs. 3,538 on the Midnapore Canal and of Rs. 23,287 on the Hijili Tidal Canal. The better results shown are, however, due in the main to the fact that the system of distribution of the establishment charges adopted by the Accountant-General during the year 1911-12 was discontinued. The general revenues of these canals, which depend considerably upon receipts from navigation, have suffered of late years from railway competition.

4. The area irrigated during the year was 80,958 acres as compared with 80,975 acres in 1911-12, and an average of 75,118 acres for the triennium ending March 1912. The demand for water was moderate and the irrigation effected was satisfactory.

5. The capital outlay on canals classed as **Minor Works and Navigation** was Rs. 93,200 during the year and Rs. 1,15,83,617 to the end of the year. The receipts for the year amounted to Rs. 5,93,584 and the

working expenses to Rs. 7,34,549. The financial results of the year and the capital expenditure to date are exhibited in the following statement :—

6. **The Calcutta and Eastern Canals** are a series of navigable channels, mostly natural and partly artificial, by which communication is maintained between Calcutta and Eastern Bengal. The receipts from navigation tolls amounted to Rs. 4,00,833 as compared with Rs. 4,14,406 in the preceding year. The decrease is chiefly due to fluctuation of traffic.

7. **The Madaripur Bhil Channel** connecting the Madhumati and Kumar rivers, formerly a portion of the Calcutta and Eastern Canals, now forms a separate project. The capital expenditure during the year was incurred on (1) deepening by dredging the channel through the bhil, which work was completed during the year ; (2) dredging the Lower Kumar river, which was taken up during the year ; and (3) constructing a toll office and other works in connection with the scheme. The total capital outlay to the end of the year amounted to Rs. 30,32,551 against the sanctioned estimate of Rs. 34,32,491 for the project. The receipts and working expenses (direct and indirect) during the year were respectively Rs. 1,03,093 and Rs. 93,969 as against Rs. 1,23,706 and Rs. 7,483 in the year 1911-12. The decrease in receipts is chiefly on account of the abnormal shoaling up of the western entrance of the route and to some extent to the reduction of toll charges on passenger boats. The increase in working expenses is on account of heavy expenditure incurred in dredging the Manikdah entrance channel.

8. **The work in the Nadia Rivers** consists in the training of the shallow channels by bandals with the object of scouring shoals and maintaining a sufficient depth of water for boat and steamer traffic. This object is only partially attained. The work done is of use, however, as it guards against the danger of these offshoots of the Ganges, which combine and afterwards form the Hooghly, closing up altogether in the dry season, and also provides a supply of fresh water for the towns and villages on their banks. The receipts and working expenses were Rs. 28,984 and Rs. 1,47,758, respectively, as against Rs. 33,506 and Rs. 84,821, respectively, in the preceding year. The decrease in receipts is due to a falling off in the number of steamers and flats on account of the poor outturn of the crops and extensions of railways on both sides of the Bhagirathi. With the growth of railway lines on either bank of the Bhagirathi it is not likely that the revenue from these rivers will improve to any material extent.

9. **The Gaighatta and Baxi Khal,** a short channel connecting the rivers Damodar and Rupnarayan, was maintained at an annual cost of Rs. 8,956 against Rs. 4,579 in the previous year. The increased expenditure of the year was due to the silt clearance of the khal, which alone cost Rs. 6,035. The collection of tolls and fishing rights were leased out during the year at Rs. 4,900.

10. **The Eden Canal** was originally constructed for sanitary reasons, but it is now used to some extent for irrigation. It was worked

during the year at a profit of Rs. 15,847 against Rs. 3,637 during the previous year. The improvement was due to an increase in the area irrigated from the canal, which for the year under review came to 27,013 acres against 24,351 acres in the year 1911-12. There is an increasing demand for irrigation from this canal. The area under irrigation cannot, however, be materially increased unless either a weir is constructed across the Damodar river or steps taken to provide a supplementary head sluice below Jujuti and improve the distributary channels of the Eden Canal. A scheme for a weir and canal is under consideration, and observations are being taken for the location of a new sluice.

11. **The Utterbhag Lock** is being constructed on the Peali river to give access to the channels constructed under the Magra Hât Drainage Scheme to boats coming from the Sundarbans and Eastern rivers. It is expected that the lock will be completed in the year 1913-14.

12. Training works were, as usual, carried out in the Buriganga and Dhaleswari rivers to facilitate navigation and to improve the water-supply of the town of Dacca. The results were satisfactory, and the least depth of water on any shoal during the year was 2 feet 6 inches. Training works were also carried out on the river Ganges between Digha and Damukdia to maintain a minimum depth of 5 feet of water over the worst shoals. The number of shoals trained were 14, of which only 1 was situated within this Presidency, the remaining 13 being in the province of Bihar and Orissa. It has been decided that the entire cost of these training works will be borne by this Government for the three years 1912-15. To improve navigation as well as the sanitary conditions and water-supply of the town of Rampur Boalia training works were carried out on the river Ganges there by the India General Navigation and Railway Company and the Rivers Steam Navigation Company, Limited, with the help of a subsidy of Rs. 5,000 from this Government. At the mouth of the Bhagirathi river, at its offtake from the Ganges, dredging and bandalling operations were carried out during the year to improve sanitary conditions by an increased flow in the river. The combined effect of dredging and bandalling induced a current throughout the year ; this not only helped navigation but afforded a supply of good drinking water to important towns and villages along the river. Dredging operations were also conducted during the year at the entrance of the Gorai river, with the result that a navigable channel was maintained with a minimum depth of 6 feet.

13. The Waterways Standing Committee held three meetings during the year. The most important subject dealt with was the proposed canalization of Tolly's Nala and construction of a steamer canal for inland steamers and boats between Calcutta and Eastern Bengal. At the recommendation of the Committee Mr. O. C. Lees, retired Chief Engineer, Public Works Department, was deputed to deal with the whole question and to report upon the projects from the engineering, commercial and financial points of view. The report has since been received and is now under the careful consideration of Government.

14. The Irrigation Department during the year was in charge of Mr. F. A. A. Cowley, Superintending Engineer, as Deputy Secretary to this Government. With the creation of a second Chief Engineer for Irrigation this post has since been abolished. The thanks of Government are due to Mr. Cowley for his efficient conduct of the affairs of the Department during the year.

ORDER.—Ordered that a copy of this Resolution be published in the *Calcutta Gazette*, and that a copy thereof and of its accompaniments be submitted to the Government of India in the Public Works Department and circulated to other Governments and to all Departments and officers of this Government as useful.

By order of the Governor in Council,

A. P. SARKAR,

Offg. Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Winter Rice Crop of Bengal, 1913-14.

(NOTE.—On the average of the five years ending 1911-12 the area under winter rice in Bengal represents some 19·9 per cent. of the total area under rice in British India.)

Character of the Season.—In April the rainfall was generally defective throughout the province, but in May the fall was above the normal which hindered to some extent ploughing operation and the preparation of seed-beds. In June also the rainfall was much in excess of the normal, and transplanting was delayed in consequence. The rainfall in July and August was approximately normal, but the heavy floods in the Burdwan Division and also in some of the Eastern Bengal districts considerably damaged the crop especially in low lands. The damage, however, was made good to a large extent by replanting parts of the flood-affected areas. The prospects and condition of the crop were greatly improved by the rainfall in September and October. Injury by insect-pests has been reported from parts of Khulna, Bakarganj, Faridpur, Tippera, Noakhali and Chittagong Hill Tracts. On the whole the weather conditions were not very unfavourable for the growth of the crop.

Acreage.—According to the figures furnished by the District Officers the area sown this year is 14,521,700 acres against 15,313,900 acres last year or a decrease of 789,200 acres.

Outturn.—From Appendix I it will be seen that four districts only report more than a normal crop, viz., Birbhum 117, Rangpur 115, Rajshahi 105 and Malda 125 per cent. Khulna, Burdwan, Pabna, Chittagong and Noakhali report a normal crop. Seven districts report a crop between 90 to 95 per cent. Eight districts report a crop between 70 to 87 per cent. Jessore and Howrah each reports 67 per cent.; while Midnapore reports as low as 60 per cent. only, due chiefly to damage done by excessive rain and floods. According to the District Officers' estimates the provincial outturn works out to 88 per cent. of the normal against 98 per cent. of last year. On the basis of the normal yield of 12 maunds of clean grain per acre the provincial outturn, as worked out from District Officers' estimates, is 112,688,000 cwts. against 132,312,100 cwts. of last year.

APPENDIX I.

Second Forecast of the Winter Rice Crop of Bengal, 1913-14.

DISTRICT.	Estimated normal area under winter rice.	Estimated area under winter rice—		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.				
24-Parganas ...	899,700	827,400	777,700	88	75	November. Normal.	The decrease in area this year is due to heavy rainfall during the time of sowing. The outturn was estimated in the first forecast to be 8 annas, but the rains in October having done much good to the crop the outturn is now estimated 9 annas.
Nadia ...	136,800	135,300	129,600	88	75	Not yet begun ...	The decrease in the area sown as compared with last year's figure is due to unfavourable weather conditions. The increase in area as compared with first forecast is due to revision of estimate of the area in the Navashipara thana. Much damage was done to the crop by excessive rain in Sadar, Chuadanga and Ranaghat subdivisions. Hence the outturn is below the normal.
Murshidabad ...	345,600	337,900	288,600	83	92	Ditto ...	The decrease in area as compared with last year is due to floods in Kandi subdivision and to excessive rain at the time of sowing in other subdivisions. The excessive rainfall retarded the growth of the crop. About 3 to 4 annas of the crop has been damaged by floods. Hence the outturn is expected to be below the normal.
Jessore ...	568,100	466,300	406,100	117	67	Ditto ...	The decrease in area as compared with last year is due to heavy rainfall. A low outturn is expected on account of the damage done by rain and flood.
Khulna ...	655,700	759,500	732,500	133	100	Beginning of November. Normal.	The increase in area as compared with the first forecast is due to transplantation of the crop in certain tracts of Bagerhat and Satkhira after the submission of the first forecast. The decrease as compared with last year is due to want of rain at the beginning and excessive rain afterwards. The weather was favourable since the submission of the first forecast, and the outturn so far is normal.
Burdwan ...	874,800	706,000	746,000	92	100	Harvesting not yet commenced.	The increase in area is due to favourable rainfall at the time of sowing. The damage done to the crop by flood and excessive rain was made good to a large extent by re-plantation of the damaged area in September, and the extent of damage is now estimated at 2 annas over the flooded area. The outturn is expected to be normal since the condition of the crop has greatly improved on account of recent favourable weather.
Birbhum ...	604,600	498,800	586,100	75	117	Second week of November. Early.	The increase in area this year is due to good rainfall. The weather was favourable to the growth of the crop. The outturn so far is good.
Bankura ...	510,600	476,400	480,000	83	83	Not yet begun ...	The increase in area this year is due to favourable weather conditions at the time of sowing. The weather was favourable for the growth of the crop, but the floods of Damodar and Bhepo damaged the crop to some extent, causing the outturn to fall below the normal.
Midnapore ...	1,406,000	1,618,400	1,262,500	100	60	Harvesting not yet commenced.	Cause of increase over the area shown in the first forecast is due to the fact that in the Contai subdivision a large area has been cultivated after the subsidence of the flood-water. The weather condition was favourable since the submission of the first forecast. Damage done by excessive rain and flood at the early stage is the cause of the falling off of the outturn below the normal.
Hooghly ...	276,700	251,400	240,600	96	87	First week of December. Normal.	The decrease in area this year is due to heavy rainfall and flood at the time of sowing. The increase as compared with the first forecast is due to revision of estimates made on further inquiry. The outturn is below the normal on account of damage caused by the flood.
Howrah ...	135,200	106,600	99,500	83	67	Harvesting not yet commenced.	The decrease in area this year is due to excessive rain. On further inquiry it has been ascertained that the area actually under the crop exceeds the estimates made at the time of the first forecast. Hence the figure shown in the first forecast has been revised. The favourable weather conditions in September and October have benefited the crop, but the outturn is expected to fall below the normal owing to damage done by the floods.

DISTRICT.	Estimated normal area under winter rice.	Estimated area under winter rice—		Estimated outturn as a percentage of the normal yield per unit of area—		Date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
		Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.				
Rajshahi ...	697,000	502,400	479,700	75	105	First week of December. Normal.	The decrease in area as compared with that of last year is due to heavy rain which submerged and destroyed the plants in thana Baraigram. Good rainfall throughout the district has been favourable to the crop, and the outturn is expected to be above the normal.
Dinajpur ...	1,120,300	966,000	1,016,400	70	94	Harvesting not yet commenced.	Increase in area this year is due partly to timely rainfall and partly to placing some jute fields under winter-rice cultivation. The weather conditions have been favourable, and no damage has hitherto been done to the crop.
Jalpaiguri ...	551,300	527,400	492,400	90	90	Ditto ...	The cause of decrease in area as compared with last year is the want of sufficient rain at the time of sowing. Since the submission of the first forecast there has been an increase in area by 12,000 acres owing to favourable weather conditions. The weather was unfavourable at the time of transplantation, hence the outturn is expected to be below the normal.
Darjeeling ...	65,300	37,100	36,800	93	92	In the Hills harvesting begun by the second week of November, which is early. Harvesting not yet begun in the Terai.	The character of the weather at the time of sowing being unfavourable, the outturn is a little below the normal.
Rangpur ...	822,300	746,500	699,000	110	115	First week of December.	There has been a decrease in area in Sadar subdivision only, for which no reason has been stated. The weather conditions have been favourable. The rainfall in October has greatly improved the prospects of the crop.
Bogra ...	303,000	303,000	303,000	75	95	Harvesting not yet commenced.	The rainfall in September and in the beginning of October has done immense good to the crop. The growth of the crop was retarded to some extent by early subsidence of the flood. The outturn is expected to be better than that of last year.
Pabna	566,000	470,000	470,000	110	100	Third week of November. Normal.	The rainfall in September and October has improved the prospects of the crop, and a normal outturn is expected.
Malda ...	300,000	309,000	309,000	100	125	End of November.	A bumper crop is expected, owing to early cultivation and favourable weather throughout the season.
Dacca ...	633,100	695,600	587,300	93	80	November. Normal.	The decrease is due to extension of jute cultivation. The weather was unfavourable on account of insufficient rainfall. An unusually low flood has also proved injurious to the crop. The outturn will therefore fall below the normal.
Mymensingh ...	1,126,700	993,800	955,200	103	90	Not yet commenced.	The increase in area as compared with the preliminary forecast is due to the fact that about 8,000 acres of jute field, which had been submerged under water on account of excessive rain, was put under the cultivation of winter rice. The decrease as compared with last year is due to want of rain at the sowing. Damage by insect pests and flood is estimated at 10 per cent. in the district.
Faridpur ...	561,000	427,600	420,500	83	70	Ditto ...	The crop suffered to some extent on account of the deficiency of rain in September, but was much benefited by the good rainfall in October. The flood level was very low this year and has adversely affected the crop in the Madaripur subdivision. Large area under paddy in Gopalganj subdivision was destroyed by early rise of water in June. Hence the outturn is not expected to be above 70 per cent.
Bakarganj ...	1,200,000	1,329,200	1,202,000	100	80	Ditto ...	Last year's estimate of area was a little too high. A reduction of area was also caused by floods. The rainfall was excessive at the time of sowing. A certain amount of damage has been done by floods and insect pests. Hence the outturn is likely to fall below the normal.
Chittagong ...	418,400	419,800	421,800	110	100	Beginning of November. Normal.	The increase in area this year is due to timely and sufficient rainfall, and also to rise in the price of rice. The weather has been on the whole favourable, and the outturn is estimated at 100 per cent., although some damage was caused by flood, especially in the Halda Valley.

DISTRICT.	Estimated normal area under winter rice.	Estimated area under winter rice—		Estimated outturn as a percentage of the normal yield per unit. of area—		Date of which the harvesting generally commenced this year, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.

	Acres.	Acres.	Acres.				
Tippera ...	734,800	725,000	720,000	100	70	Middle of November.	The decrease in area is due to floods. The broadcasted paddy was extensively damaged by the flood, but the transplanted crop fared well. About 30 per cent. of damage was caused by flood and insect-pests.
Noakhali ...	566,900	664,500	632,400	125	100	First week of November. Normal.	The decrease in area this year is due to floods. The crop has been damaged by the flood in the Parasuram and Chhagalnaia thanas, in Feni subdivision. Slight damage was done by ufra in one thana. The weather was good since the submission of preliminary forecast, and the outturn on the whole is expected to be normal.
Chittagong Hill Tracts.	15,500	23,000	23,000	90	90	Not yet harvested	The weather has been good since the submission of preliminary forecast. The seedbeds were in the beginning destroyed by heavy flood, and new seed-beds had to be prepared. Consequently the transplantation began late. A kind of pest called "Leda" also did some damage to the seed-beds, but the insects died out before they could do any serious damage.

Third Forecast of the Cotton Crops of Bengal, 1913-14.

(NOTE.—On the average of the five years ending 1911-12, the area under cotton crops in Bengal represents some 0·2 per cent. of the total area under cotton in India.)

Character of the season.—The early crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera, and also to a small extent in the districts of Bankura and Midnapore. The late crop is grown only in the last two districts. The early crop is generally sown before the rains and the late crop partly before and partly after the rains. Weather conditions have not been generally favourable for the growth of the early crop. The condition of the late cotton so far is reported to be fairly good. Some damage has been done to the early crop by untimely and excessive rain in the Chittagong Hill Tracts and Hill Tippera, thus affecting the outturn to some extent.

Area sown.—The total area sown with the early crop is reported to be 49,098 acres against 49,250 acres last year, the decrease being due to untimely and excessive rain in Hill Tippera and the Chittagong Hill Tracts.

The area sown with late cotton is reported to be 1,900 acres against the same area last year.

Outturn.—The estimated outturn of early cotton amounts to 19,065 bales, against 19,406 bales last year. The outturn of late cotton is estimated at 1,158 bales against 1,151 bales last year.

First Forecast of the Wheat Crop of Bengal, 1913-14.

[*Note.—On the average of the five years ending 1911-12 the area under wheat in Bengal represents some 0·5 per cent. of the total area under wheat in India.*

The ratio of the irrigated wheat acreage to total acreage in (a) British India and (b) in the territory now reported on has in the five years ending 1911-12 averaged (a) 38·8 per cent. and (b) 16·9 per cent. respectively.]

Explanatory.—Three forecasts of the wheat crop are published. The first forecast deals only with the area sown and the general character of the crop.

Area sown.—The total area sown with the crop up to date this year according to district officers' estimates amounts to 138,700 acres against 146,300 acres last year.

Character of the season.—The rainfall in September, though defective, was general throughout the province. In October it was generally above the average, and was helpful to the sowings of the crop which began in normal time. Sowings were, however, late in Jalpaiguri, Malda and in parts of Murshidabad and Rangpur. The rainfall in November generally favoured the growth of the crop. The season has been favourable so far, and the present condition and prospects of the crop are reported to be fairly good in most districts.

	Acres.	Acres.	Acres.		
NADIA	23,100	17,700	12,400	Middle of October ...	Sowings were normal. The weather conditions have been favourable for the growth of the crop, and the condition of the crop is fair.
MURSHIDABAD ...	69,300	37,300	37,200	Latter part of October and November.	Sowings were normal, but late in Lalbagh where they have not yet been finished. The weather conditions have been favourable for the growth of the crop, and the condition of the crop is fair.
JESSORE	1,700	1,000	1,100	October	Sowings were normal. The weather conditions have been favourable for the growth of the crop, and the condition of the crop is good.
BURDWAN	1,800	2,000	2,000	Middle of October to middle of November.	Sowings were normal, except at Kalna where it was a little earlier than usual. The weather conditions have been favourable for the growth of the crop, except in Asansol and Kalna, but the recent rainfall has been beneficial in Asansol. The condition of the crop is good at Sadar and Katwa, fair in Asansol and poor in Kalna.
BIRBHUM	5,000	5,000	5,000	Middle of November ...	Sowings were normal. The weather conditions have been favourable for the growth of the crop, and the condition of the crop is fair.
BANKURA	3,500	3,800	3,900	End of October ...	Sowings were normal. The weather conditions have been favourable, and the condition of the crop is good.
MIDNAPORE	2,600	1,400	1,000	Middle of October ...	Sowings were normal. The weather conditions have been favourable for the growth of the crop, and the condition of the crop is good.
HOOGHLY	2,400	1,700	1,400	Middle of October ...	Sowings were normal. The weather conditions have been favourable for the growth of the crop, and the condition of the crop is fair.
RAJSHAHI	8,500	7,600	7,300	First week of November.	Sowings were normal. The weather conditions have been on the whole favourable, and the condition of the crop is fair.
DINAJPUR	1 000	1,300	700	Latter part of October	Sowings were normal. The weather conditions have been favourable, and the condition of the crop is fair.
JALPAIGURI	1,000	1,100	1,000	Middle of November ...	Sowings were late this year. The weather conditions have been favourable, for the growth of the crop, and the condition of the crop is fair.
DARJEELING	4,500	4,500	4,500	Last week of September	Sowings were normal. The weather conditions have been favourable for the growth of the crop, and the condition of the crop is fair.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR NOVEMBER 1913.

I. *Character of the season.*—Light to moderate rain fell throughout the province during the third week of the month. The rest of the month was almost without any rain. The fall for the whole month was slightly in excess of the normal in all the districts, excepting the 24-Parganas, Burdwan, Bankura, Dinajpur, Rangpur, Bogra, Pabna, Mymensingh, Tippera and Noakhali. The usual rainfall statement is appended.

II. *Progress of agricultural operations.*—Preparation and sowing of lands for *rabi* crops were progressing briskly throughout the month. Harvesting of winter rice commenced in places by the second week of the month.

III. *State of standing crops.*—Condition of winter rice and other standing crops was good except in some parts of flood-affected areas.

IV. *Prospects and probable outturn of harvests.*—The prospects of the winter and spring crops were generally hopeful and a fairly good outturn was expected.

V. *Damage to crops.*—Slight damage was done by rain in places to ripe paddy. Some damage by insect-pests was also reported from parts of Tippera and Noakhali.

VI. *Condition of agricultural stock.*—The condition of agricultural stock was reported to be fair. Cattle-disease was found to be prevalent in parts of the districts of Nadia, Khulna, Burdwan, Birbhum, Bankura, Mymensingh, Chittagong, Noakhali and Chittagong Hill Tracts.

VII. *Failure of pasturage and fodder.*—Want of fodder was felt in parts of Midnapore only.

VIII. *Prices of food-grains.*—During the second fortnight of the month under review the price of common rice rose in two districts only, fell in fifteen districts and remained stationary in the rest. It varied from 6 seers per rupee at Rangpur to 10 seers at Bankura.

IX. *Condition of agricultural people.*—The condition of agricultural population was reported to be fairly good. Gratuitous relief and agricultural loans were paid to those people of the Burdwan Division who suffered from the flood.

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF THE YEAR 1913-14.

FINANCIAL DEPARTMENT.

SEPARATE REVENUE BRANCH (SALT).

Dated Calcutta, the 16th December 1913.

THE following report on the state of the salt market for the second quarter of the year 1913-14, comprising the months of July, August and September 1913, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 2,932,048 maunds (including 1.941,357 maunds issued under the credit system), as compared with 3,768,949 maunds (including 2,582,217 maunds issued under the credit system) in the previous quarter and 3,096,293 maunds (including 1,494,035 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 30,84,217 (including Rs. 23,04,111 adjusted under the credit system), as against Rs. 30,60,361 (including Rs. 21,16,475 adjusted under the credit system) in the previous quarter, and Rs. 27,65,935 (including Rs. 13,65,395 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined table I shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years :—

(a) Inclusive of 1,941,357 maunds of salt issued under the credit system. Besides this quantity, 18,002 maunds of salt were issued under the credit system to inland bonded warehouses.

Compared with the corresponding quarter of the previous year and the same quarter of 1911-12, importations were less by 7·2 per cent. and 37 per cent., respectively, and clearances were less by 3·8 and 13·2 per cent. As compared with the corresponding period of the previous year, the

increased imports from Massowah, Salif and Port Said and the decreased imports from Aden, Hamburg and Bremen and the United Kingdom are especially noticeable.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters :—

The stocks remaining in the *golas* at the close of the quarter were less than those of the previous quarter and the corresponding quarter of the previous year, but greater than those of the quarters December 1912 to March 1913.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director-General of Commercial Intelligence when they are available.

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar amounted to 547 maunds, as against 273 maunds in the previous quarter and *nil* in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter amounted to 100 maunds, as compared with 40 maunds in the previous quarter and 80 maunds in the corresponding quarter of the previous year.

8. The shipments of Liverpool salt during the quarter for the port of Calcutta according to the published market reports amounted to 25,810 tons. No vessel is at present on the sea bound for Calcutta with salt from Hamburg and Bremen.

9. Table III shows the average wholesale prices* per 100 maunds of Liverpool and other descriptions of salt at the port of Calcutta during each fortnight of the quarter:—

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 15th December 1913.

Summary.—During the week under report general rain fell all over the Province facilitating the growth of the *rabi* crops. Harvesting of winter rice is going on briskly, but its progress has been retarded in places owing to recent rainfall. Sowing of *rabi* crops is approaching completion. The outturn of winter rice is reported to be fairly good. The condition and prospects of *rabi* crops are good. Cattle-disease is reported from seven districts. The average price of common rice has slightly fallen as compared with that of the previous week. Agricultural loans were issued in Midnapore, Hooghly and Howrah.

NOTIFICATION.

No. 9277P.—The 17th December 1913.—In exercise of the powers conferred by section 12, sub-section (1) of the Indian Press Act, 1910 (1 of 1910), the Governor in Council hereby declares all copies, wherever found, of the leaflet cyclostyled in English, headed "Yogantra," "Yogantra," "Yogantra," and ending with the words "Members of the Managing Committee, Yogantra Paper," to be forfeited to His Majesty on the grounds that it contains exhortations to murder and suggestions that the British Government are tyrannous, and it appears to the Governor in Council that the said leaflet contains words which are likely to incite to acts of violence and to excite disaffection towards the Government established by law in British India.

3. Government reserves to itself the right to alter the quantity and class of opium to be offered for sale in each month. No reduction in the quantities to be sold, however, will be made without three months' previous notice.

4. The following are the conditions of sale. Government reserves to itself the right of altering all or any of these conditions after giving three months' previous notice, and power is reserved to vary the upset price referred to in condition (ii) at any time without such previous notice :—

(i) The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

(ii) The opium will be ordinarily offered for sale at an upset price of Rs. 1,200 per chest of uncertified opium and will be sold to the highest bidder above that price, except under the circumstances for which provision is made by clause (xiii) of these conditions of sale. The bids must advance by Rs. 5 at a time.

(iii) The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of Government, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Government may dispose of the lots which remain on hand at a future sale.

(iv) Each lot shall contain five chests, excepting one lot at the December sale, which will consist of four chests of Patna opium and one chest of Benares opium.

(v) A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such promissory notes shall be redeemed on the part of the purchasers at this office by Bank of Bengal receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as Government shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

DEPOSIT.

When the amount bid is less than Rs 1,200 per chest, Rs. 200 per chest.
On bids of Rs 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest
On bids of Rs 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.
And so on, Rs. 100 being added to the deposit for every bid additional to the extent of Rs. 400.

(vi) The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

(vii) The promissory notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

(viii) No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause (v) on the fifth day following the day of sale, will be afterwards accepted: Provided always that money so subsequently tendered may be taken in payment of the said promissory note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. (v) and No. (vi).

(ix) The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and, in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as Government shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages

that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

(x) Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

(xi) No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

(xii) The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a promissory note would otherwise be taken under the fifth of these conditions.

(xiii) With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bonâ fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 1,200 specified in the second of these conditions.

(xiv) The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether fifteen lots, provided always that there remain a sufficient number of lots of the opium to complete the said fifteen.

(xv) In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

(5) The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Government of Bengal:—

No. 1—Certificate of the opium advertised for sale.
No. 2—Report of the examination of such opium.

(6) The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the office of the Government of Bengal.

(7) Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Government of Bengal. But, in accordance with established usage, under no circumstances will the Government entertain or recognize

any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

Secretary.

PART I B.

Orders by the Governor of Bengal in Council.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 2271M.—The 19th December 1913.—In exercise of the power conferred by section 27 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to appoint Babu Radhika Lal Satiar to be a Commissioner of the Old Malda Municipality, in the district of Malda, *vice* Babu Rukmini Kanta Set, deceased.

Malda.

No. 2273M.—The 19th December 1913.—The following draft of rules which has been framed by the Commissioners of the Bankura Municipality under section 241 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and which the Governor in Council proposes to sanction under clause (2) of that section, is published for the information of persons likely to be affected thereby.

Bankura.

2. The draft rules will be taken into consideration on the 17th January 1914 and any objection or suggestion received by the undersigned through the Magistrate before that date will be duly considered.

Draft Rules framed by the Commissioners of the Bankura Municipality under section 241 of Bengal Act III of 1884.

The following rules apply to houses, not being huts:—

Drains.

1. Any house erected or re-erected after these rules come into force shall be provided with drains sufficient for its effective drainage, to the satisfaction of the Chairman.

2. The owner or occupier of any premises shall, provided that he first obtains the written permission of the Chairman and that he complies with the conditions prescribed by these rules, be entitled to connect his house-drain with the nearest Municipal drain.

3. No house-drain shall be so constructed as to pass beneath any floor or part of a building or in the case of a drain carrying foul water within 10 feet of any well or tank the water of which is used for bathing or drinking purposes.

4. Every house-drain must be open and at least 8 inches in breadth and must be laid upon a bed of good concrete and constructed with cut stone or brick masonry well plastered and protected with cement and must have a proper fall.

5. Every house-drain must be laid in a straight line as far as possible. The bends, if any, should not be at right angles but in easy curves.

6. The level of the ground-floor of every house shall be at least 2 feet higher than the top of the nearest Municipal drain:

Provided that, where the Municipal drain is more than 100 feet from the house, the ground-floor level shall be at least 2 feet higher than the level of the surrounding land.

Privies.

7. No privy situated in, or adjacent to, a house shall be placed at a distance of less than—

(*a*) 6 feet from any other building which is a public building, or

(*b*) 4 feet from any other building which is, or is likely to be, used as a dwelling place or as a place in which any person is, or is intended to be, employed in any manufacture, trade or business.

8. No privy shall be erected at a distance of less than 25 feet from any tank, or 12 feet from any well, the water of which is used for bathing or drinking purposes.

9. (1) A drain shall be provided for every privy.

(2) Such drain shall be constructed of some impervious material, and must connect the floor of the privy—

(*a*) with a drain communicating with a Municipal drain or sewer, or

(*b*) if permitted by the Chairman, with an impervious cesspool, the contents of which can be removed either by hand or by flow after filtration.

10. (1) The floor of every privy—

(*a*) shall be made of one of the following materials, to be selected by the owner of the privy, that is to say, of glazed tiles, artificial stone or cement, and

(*b*) must be in every part at a height of at least 6 inches above the level of the ground adjoining the privy.

(2) The floor of every privy shall have a fall or inclination of at least half an inch to the foot towards the drain prescribed by rule 9 and the platform of the privy shall have a similar fall towards the aperture.

11. The walls and the roof (if any) of every privy shall be made of such materials as may be approved by the Chairman:

Provided that the entire surface of the walls below the platform shall either be covered with cement or be made in the manner prescribed for the making of the floor in clause (*a*) of rule 10.

12. The platform of every privy shall either be plastered with cement or made in the manner prescribed for the making of the floor in clause (*a*) of rule 10.

13. Every privy situated in, or adjacent to, a house shall have an opening, at least 3 square feet in area, in one of the walls of the privy, as near the top of the wall as may be practicable and communicating directly with the open air.

14. Every privy shall be constructed in accordance with the following provisions:—

(*a*) The space beneath the platform of the privy must be of such dimensions as to admit of at least one moveable receptacle for sewage, of a capacity not exceeding 1 cubic foot, being placed and fitted beneath the platform in such manner and position as will effectually prevent the deposit, otherwise than in such receptacle of any sewage falling or thrown through the aperture of the platform.

(*b*) The privy shall be so constructed as to afford adequate access to the said space for the purposes of cleansing such space and of placing therein and removing therefrom a proper receptacle for sewage.

(*c*) The said receptacle must be water-tight.

(*d*) The door of the opening for the insertion and removal of such receptacle must be so as to completely cover the opening.

15. All powers of the Chairman under these rules can be delegated by him to the Vice-Chairman.

Howrah.

No. 2295M.—The 20th December 1913.—The following draft order which the Governor in Council proposes to make in exercise of the powers conferred by section 221 of the Bengal Municipal Act 1884 (Bengal Act III of 1884), is published for the information of persons likely to be affected thereby.

2. The draft will be taken into consideration on the 1st February 1914, and any objection or suggestion which may be received by the undersigned through the District Magistrate, and the Divisional Commissioner before that date will be duly considered :—

Draft order.

In exercise of the power conferred by section 221 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and upon the application of the Commissioners of the Bally Municipality, in the district of Howrah, made in pursuance of a resolution passed at a meeting specially convened to consider the question, the Governor in Council is pleased to extend all provisions of Part X of that Act to the said Municipality.

Malda.

No. 2312M.—The 22nd December 1913.—In exercise of the power conferred by section 351 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governer in Council is pleased to confirm the following by-law framed by the Commissioners of the Nawabganj Municipality in the district of Malda.

No person shall affix or cause to be affixed to any building, owned or occupied by him, any gutter, spout or other thing intended for the conveyance and discharge of water, or shall leave in any such building any opening for the discharge of water, in such a way that the water discharged therefrom is thrown or falls upon a road or into any drain in or near a road, except through a downpipe or other suitable contrivance reaching to the level of the road or drain.

The penalty for the infringement of this by-law shall be a fine not exceeding Rs. 10, and a further fine not exceeding Rs. 2 for each day after written notice of the offence from the Commissioners.

No. 2265L.S.-G.—The 19th December 1913.—In exercise of the power conferred on him by section 60 of the Bengal Local Self-Government Act, 1885 (Bengal Act III of 1885), the Governor in Council is pleased to extend the provisions of section 99 of the said Act, as amended by Bengal Act V of 1908, to the District Boards of the following districts :—

Burdwan.	Howrah.	Khulna.
Bankura.	Midnapore.	Nadia.
Birbhum.	24-Parganas.	Murshidabad.
Hooghly.	Jessore.	

2. This cancels notification dated 18th February 1890 so far as the above mentioned District Boards are concerned.

24-Parganas.

No. 2300L.S.G.—The 23rd December 1913.—In exercise of the power conferred by section 29A (2) of the Bengal Local Self-Government Act, III of 1885, the Governor in Council is pleased to re-appoint the District Magistrate of 24-Parganas to be the Chairman of the District Board of 24-Parganas.

No. 2301L.S.G.—The 23rd December 1913.—In exercise of the power conferred by section 29A (2) of the Bengal Local Self-Government Act, III of 1885, the Governor in Council is pleased to re-appoint the District Magistrate of Khulna to be the Chairman of the District Board of Khulna.

SIBPUR, *the 26th April 1912.*

NOTICE.

HER EXCELLENCY LADY HARDINGE of Penshurst has decided to give, out of the funds which have been collected for a Medical College for Women at Delhi, a certain number of scholarships for lady students who may wish to join that institution, when it is opened.

2. It is proposed to allot 18 scholarships of Rs. 30 a month each, tenable for two years. Four scholarships are allotted for students who are residents of the Presidency of Bengal.

3. The object of the scholarships being to enable ladies to enter the College at Delhi and take up a professional course there, the award will be made on the result of the Matriculation, School Final or School-leaving Certificate examination, the object of this procedure being to enable such students as have already enrolled themselves in colleges or have just completed their school course to pass the Intermediate examination of a University or an examination recognized as equivalent thereto in 1915, and thus to render themselves eligible so far as the examination qualifications are concerned, and to enter the college at Delhi at its opening.

4. Candidates for these scholarships must be statutory natives of India. They must also guarantee that they will study, for two years in a college affiliated to the local University, the course leading up to the Intermediate examination, or an examination recognized for this purpose as equivalent thereto, such special subjects as may be prescribed by that University as qualifying for entrance upon a professional course of medical study being included in the course. They must also undertake that on the completion of these two years they will seek admission to the Medical College to be established at Delhi, and continue their studies up to the examinations for the Medical degree for which that College will prepare students. Should the College be not completed by the close of 1915, suitable arrangements will be made for the instruction of the students elsewhere, until the College is ready to receive them.

5. The question of providing scholarships tenable during the period of study in Delhi is under consideration by the Governing Body of the College. It is hoped to make an announcement on this subject within the next six months. The continuance of the scholarships and the award of any further scholarships will be contingent on the progress of the scholars and the receipt by the Local Government of good reports upon them.

6. Scholarships will be awarded to such lady students as the Local Government may, on the results of the examination which closes the secondary school course, regard as most likely to profit by the facilities which the proposed College at Delhi will offer. Applications in the enclosed form, which must be submitted through the head of the College or head of a high school of which the applicant is a student, will be received in the office of the Director of Public Instruction, Bengal, up to the 15th January 1914. The scholarships will run for two years from the date on which each particular scholarship-holder enters on her preliminary course of study. In the case of a lady student who has already entered upon a course of study, the successful completion of which would qualify her for admission to the College, a scholarship may be awarded with retrospective effect from the date on which she entered upon the course or any date subsequent thereto.

W. W. HORNELL,
Director of Public Instruction, Bengal.

1. Name of candidate ... ...

2. Date of birth (the year, and the actual date of the month, if possible, must be stated).

3. Nationality—

   In the case of a pure European candidate the application must be accompanied by a duly authenticated statement to the effect that the applicant is a native of India within the meaning of the Statute, viz., that she was born of parents habitually resident in India and not established there for temporary purposes only.

4. Caste ... ...

5. Name of father or guardian ...
   In the case of European or Anglo-Indian candidates the names of both parents should be given and it should be stated whether they are living or not. In the event of both parents being dead, the name of the guardian must be given and his or her relationship to the applicant must be stated.

6. Place of residence ... ...

7. Education ... ...
   The names of the various schools or colleges at which the applicant has studied should be stated with dates in each case. The public examinations passed should be stated, as also any special distinctions gained.

8. Whether the applicant made any special study of any branch of science.

9. Whether the candidate, or her parent or guardian, in case she is still a minor, is prepared to execute a bond to refund the scholarship money, if she fails to abide by the conditions of award of these scholarships as detailed in paragraph 4 of the rules.

10. Names of relatives of position, and the precise relationship each bears to the candidate.

11. Names of two persons of position to whom reference regarding the candidate can be made.

12. Remarks of the Principal of the College at which the candidate is studying at present. / Head of the school at which she last studied.

ORDERS BY THE HON'BLE THE VICE-CHANCELLOR AND SYNDICATE OF THE CALCUTTA UNIVERSITY.

(In all cases where reference is made to Chapters, Sections, Pages or Lines, thus Chapters I—IX, the reference is to be understood as inclusive.)

Administration and Progress of India under British Rule.

N. N. Ghose	...	England's Work in India.

GEOGRAPHY.

The following books are recommended as indicating the methods of study as well as the standard of knowledge required :—

A. J. Herbertson	...	The Oxford Geographies, Vol. II.

The World with fuller treatment of India (Longman's Geographical Series for India, Book II).

J. F. Unstead	...	The Practical Geography, Parts I and II.

The following books are recommended for the use of teachers :—

Blanford ...	...	The Rudiments of Physical Geography for the use of Indian Schools.
Patterson ...	...	Geography of India, Parts I and II.

The following book is recommended for the use of teachers in connection with the teaching of "Sand Modelling" in the lower classes of schools :—

A. E. Frye ...	...	The Child and Nature.

Every school that intends to undertake instruction in Geography for the Matriculation Examination is required to possess the apparatus mentioned in the following list :—

I.—The total cost need not exceed Rs. 65—

1. A measuring tape.
2. A magnetic compass.
3. Squared paper and tracing paper.
4. Clay, dry sand, paper pulp for modelling.
5. A globe, not less than 14 inches in diameter, with writing surface, and with lines of latitude and longitude, and outlines only of the landmasses, marked upon it.
6. A map of the school locality on a scale of 4" or 6"=1 mile.
7. A map of the district in which the school is situated on the scale 1"=1 mile.

8. A coloured map of the Province.
9. A coloured political map of India.
10. A physical map of India.
11. A relief map of India.
12. A map of the world on Mollweide's equal area projection and a map of Asia.

It is essential that the students should be provided with atlases, or with the necessary hand-maps. Maps for school work should not contain too much detail, or be crowded with names.

II.—The following additional equipment is recommended when it can be provided, but that lack of it is not to be considered as a bar to the recognition of the school in Geography :—

1. A thermometer.
2. A mercury barometer.
3. A rain-gauge.
4. A small collection of typical rocks, in particular those of the Province and of India.
5. A small museum of typical products.
6. A good standard atlas.
7. Geographical pictures.

The attention of teachers is requested to the raised maps of Bengal and Eastern Bengal and Assam made of paper pulp prepared by Babu Kailas Chandra Datta, Head Pandit, Habiganj Government Girls' School, Sylhet, and sold for Rs. 7 and Rs. 5, respectively.

(2) Globes of all kinds are made by George Philip and Son, London, W. and A. K. Johnston, London, and Messrs. Ruddiman Johnston, London.

Small hand Globes of German make can be obtained through the Calcutta School Book Society for about a rupee each.

(3) The "Comparative" series of large wall maps of the continents published by George Philip and Son is good and up to date; so also are the Orographical wall maps published by Edward Stanford. Messrs. Ruddiman Johnston publish a series of smaller wall maps which includes maps of India illustrating various distributions.

Messrs. Nelson's wall atlases are good. Mr. S. B. Chatterjee publishes District Maps; also ordinary and relief maps of the Province.

Babu L. M. Basu, the drawing master of the Dacca Collegiate School, has published good relief maps of Eastern Bengal and Assam and of India.

The Vidal-Lablache French wall maps on strong card board, named on one side, and the same map without names on the reverse, published by Armand Colin, Paris, are good and cheap. They measure 46 inches by 39 inches and can be delivered in Calcutta for Rs. 4-14 each.

(4) The hand maps, coloured to indicate relief, published by the Diagram Company, West Barnes Lane, New Malden Surrey, at one penny each, are the best of their kind.

The uncoloured half-penny maps, showing river systems and a few towns, published by the same Company, are excellent for class use.

The Autograph hand maps, with hill shading in brown, published by Edward Stanford, London, at one penny each, are very good, and are larger than the Diagram Company's hand maps. The 15 inches map of the world on Mollweide's equal area projection is specially to be commended.

(5) Wall pictures of considerable artistic merit are published by Messrs Edward Arnold of Leeds, Messrs. Hachette of Paris, and Messrs. Hölzel of Vienna and Messrs. Longmans, Green & Co. They cost, delivered in India, from two to three rupees each.

Map lantern slides, and view slides especially prepared for geography teaching, are sold by the Diagram Company for two or three shillings each. Mr. Bartington Smith of Darjeeling also sell good picture slides of the Himalayas at Rs 15 per dozen.

ELEMENTARY MECHANICS.

The following book is recommended :—

Sir Philip Magnus ... Elementary Mechanics (Longmans, 1903).

The following list of apparatus is prescribed as indicating the approximate requirements of a recognised High School seeking to teach Elementary Mechanics for the Matriculation Examination :—

Plumb-line and level.
Simple Lever (including brass slotted weights).

Parallelogram of Forces apparatus.
Wall Crane.
Becker's New Physical Balance.
Set of Gramme Weights (200 grams to 1 mgr.).
2 Composition-Ivory Balls.

NOTE.—The above list is not exhaustive, and much of it might be replaced by simpler forms that could probably be made far more cheaply by any clever *mistry* under proper supervision. In most cases, however, it will probably be found advantageous to buy such a set as indicated in the list especially for demonstration purposes, and subsequently to develop simplified duplicates, illustrating the same principles, which the boys should be given opportunity actually to experiment with on their own individual accounts or working in pairs.

Loney ...	...	Elements of Hydrostatics.
Greaves ...	...	Elementary Hydrostatics.

12. Astronomy—

Parker ...	...	Elements of Astronomy.
Young ...	...	Manual of Astronomy.

Candidates are recommended to use "Stars in the Northern Tropics" by T. Bhattacharyya.

N.B.—Candidates who take up Mathematics at the B.A. or B.Sc. Examination are recommended to refer to Saxelby's Practical Mathematics. Candidates who take up Honours in Mathematics at the B.A. or B.Sc. Examination are recommended to refer to Cox's Mechanics.

PHYSICS.

Pass Course.

Deschanel and Evoutt	...	Treatise on Natural Philosophy, Parts I, II and IV.
Hadley ...	...	Magnetism and Electricity for Students.
Watson ...	...	Text-book of Physics.

Pass Practical.

Schüster and Lees	...	Advanced Exercises in Practical Physics.
Harrison ...	...	A Course of Practical Physics.
Glazebrook and Shaw	...	Practical Physics.

Honours Course.

(In addition to the books prescribed for the Pass Course.)

Poynting and Thomson		Sound.
Edser ...	...	Heat for Advanced Students.
Maxwell ...	...	Theory of Heat.
Edser ...	...	Light for Students.
Foster and Porter	...	Elementary Treatise on Electricity and Magnetism.
Wagstaff ...	...	Properties of Matter.

Honours Practical.

Watson ...	...	Text-book on Practical Physics.
Henderson ...	...	Practical Physics.

N.B.—Candidates who take up the Honours Course in Physics at the B.A. or B.Sc. Examination are recommended to refer to Saxelby's Practical Mathematics.

CHEMISTRY.

Pass Course.

Newth	...	Inorganic Chemistry.
Holleman	...	Organic Chemistry.
Francis Jones	...	Practical Chemistry.
Alexander Smith	...	General Inorganic Chemistry.
F. Mollwo Perkin	...	Qualitative Chemical Analysis—Organic and Inorganic.
Clowes and Coleman	...	Quantitative Analysis.
J. B. Cohen	...	Theoretical Organic Chemistry.

Honours Course.

(In addition to the books recommended for the Pass Course.)

H. C. Jones	...	Elements of Physical Chemistry.
Ostwald	...	Foundations of Analytical Chemistry.
J. Wade	...	Introduction to the Study of Organic Chemistry.
Valentine and Hodgkinson	...	Practical Chemistry.
Cohen	...	Practical Organic Chemistry.
Caven and Landor	...	Systematic Inorganic Chemistry.
Ostwald	...	Outlines of General Chemistry.
J. Walker	...	Introduction to Physical Chemistry.
F. Mollwo Perkin	...	Practical Methods of Inorganic Chemistry.

N B.—Candidates who take up Chemistry at the B.A. or B Sc. Examination are recommended to refer to Saxelby's Practical Mathematics.

BOTANY.

Pass Course.

Vines, S. H.	...	An Elementary Text-book of Botany (London, 1905).
Scott, D. H.	...	Structural Botany, 2 Vols. (London, 1904-06.)
Darwin, F., and Acton, G. H.	...	Practical Physiology of Plants (Cambridge, latest edition).
Prain, D.	...	Bengal Plants (Calcutta, 1903),
		or
Roxburgh	...	Flora Indica, edited by C. B. Clarke (Calcutta, 1874).
Strasburger and Hillhouse	...	Practical Botany (latest edition).

Honours Course.

(In addition to the text-books for the Pass Course.)

Strasburger, E.	...	Text-book of Botany, translated by Porter, revised by Lang (Third Edition, London).
Reynolds Green, J.	...	Vegetable Physiology (London, 1900).
Schimper, A. F. W.	...	Geography of Plants (Oxford, 1903).
Stape	...	Fossil Botany.
Bower	...	Practical Botany, 1902.

ZOOLOGY.

Pass Course.

Boas ...	...	Text-book of Zoology.
Shipley and MacBride ...		Zoology.
Oskar Hertwig ... and H. J. Campbell ...		The Cell.
R. E. Lloyd	...	An Introduction to Biology for Students in India.
P. J. Parker and W. N Parker ...	...	An Elementary Course of Practical Zoology.
Foster and Balfour	...	The Elements of Embryology (edited by Sedgwick and W. Heape).
Wallace ...	...	Darwinism.
A. D. Imms ...	...	A Laboratory Sketch-book of Zoology for Indian Students.

Honours Course.

(In addition to the books prescribed for the Pass Course.)

Miall and Hammond	...	The Structure and Life-History of the Harlequin Fly.
Miall and Denny	...	The Cockroach.

PHYSIOLOGY.

Pass Course.

Halliburton	...	Hand-book of Physiology.

Practical.

Schafer ...	...	Essentials of Histology
		and either
Milroy ...	...	Practical Physiological Chemistry
		or
Halliburton...	...	Essentials of Chemical Physiology
		and
Brodie ...	...	Essentials of Experimental Physiology
		or
Beddard, Edkins, Hill, Pembrey and Macleod		Practical Physiology.

Honours Course.

Starling ...	...	Principles of Human Physiology.

Practical.

The same as for the pass course.

SYLLABUS IN EXPERIMENTAL PHYSIOLOGY.

Pass Course.

The induction coil ; single shocks ; short circuiting key ; effect of single shocks on the tongue ; break-shock is stronger than the make-shock. Helmholtz's Modification ; Neef's Hammer.

Pithing a frog; nerve-muscle preparation. Mechanical, chemical, thermal and electrical stimulation of muscle and nerve.

The Graphic method : Simple lever; crank lever (myograph); moist chamber, minimal and maximal excitation with single induction shocks (make and break). Stimulation by constant current: contraction of muscle only at make and break.

The muscle curve:—Single contraction of a frog's muscle: the latent period, the period of contraction and the period of relaxation. Time-tracing by tuning-fork. Method of after-loading. The influence of temperature and of load on muscular contraction. The work performed by a muscle during a twitch.
Elasticity and extensibility of muscle.
Summation of muscular contraction: tetanus.
Fatigue of muscle.
Thickening of a muscle on contraction.
Bernard's curare experiment.
Stimulation of a motor nerve; unequal excitability (greater nearer the centre of a motor nerve); excitability of flexor and extensor nerves.
Velocity of nerve-impulse (myographic method).
Electro-Physiology:—Galvani's experiment of contraction with metals; Galvani's experiment of contraction without metals.
The Frog's heart:—Beating of the heart; effect of heat and cold (heart *in situ*); section of the heart; effect of heat and cold on excised heart.
Stannius' experiment.
Graphic record of the beat of the heart (suspension method and also direct registration with heart-lever).
Pulse—Sphygmographic tracing.
Blood-pressure in man: Sphygmometer and Sphygmomanometer.
Reflex action (simple experiments on a pithed frog).
Vision:—Accommodation; Scheiner's experiment; near and far point.
Purkinge-Sanson's images: Phakoscope; Blind spot; yellow spot; Colour vision; Complementary colours.

HONOURS COURSE.

Additional Experiments—

The Induction Coil—Break extra-current of Faraday.
The Rheonome: Effect of sudden variation of current.
Isotonic and Isometric contraction.
Influence of veratrine on muscular contraction.
Indefatigability ot nerve.
Excitation of muscle by constant current: Polar excitation of a muscle.
Electrotonus. Electrotonic changes in excitability and conductivity of a nerve.
Kuhne's experiment of contraction without metals.
Examination of currents in muscle, nerve and heart by means of the reflecting galvanometer.
Frog's heart—Minimal stimulus causes maximal contraction. "Staircase effect." Single contraction of the ventricle. Tetanisation. Refractory period. Stimulation of the vagus. Action of drugs (Muscarin and Atropin) on the heart.
Voice and Speech: Laryngoscope.
Vision: Ophthalmoscope; Perimeter.

GEOLOGY.

No text-books are prescribed or recommended. The subject is to be studied with the help of the Syllabus prescribed in the Regulations.

EXPERIMENTAL PSYCHOLOGY.

The subject is to be studied as defined by the Syllabus. Students are recommended to use one or more of the following books or select portions thereof, with special reference to the course laid down in the Syllabus:—

Pass Course.

I.—General Psychology—

Hoffding	...	Outlines of Psychology.
Wundt	...	Human and Animal Psychology.
William James	...	Text-book of Psychology.
J. Dunlop Leckley	...	The Nervous System (Longman & Co.).

Preparatory Reading—Students are advised to read Croom Robertson's Elements of Psychology before joining the regular class.

II.—Experimental Psychology—

Titchener ...	...	Text-book of Psychology.
Külpe ...	...	Outlines of Psychology.
Scripture ...	...	New Psychology.

Laboratory Course—Titchener's Experimental Psychology, Vol. I, Part I. and Vol. II, Part I.

Honours Course.

I.—General Psychology—Same as in the Pass Course.

II.—Physiological and Comparative Psychology.

Wundt ...	...	Outlines of Physiological Psychology (Vol. I).
Ladd ...	...	Elements of Physiological Psychology.
Romanes ...	...	Mental Evolution in Man.
Romanes ...	...	Mental Evolution in Animals.
Lloyd Morgan	...	Comparative Psychology.
Herbert Spencer	...	Principles of Psychology.
M. Greenwood (Jr.)	...	Physiology of the Sense Organs.

III.—Experimental Psychology—

In addition to the books recommended for the Pass Course, the following:—

Ziehen	...	Introduction to Physiological Psychology.
Ladd	...	Outlines of Physiological Psychology. (Latest edition.)

N.B.—No text-books are recommended for the guidance of teachers.

P. BRÜHL,
Offg. Registrar.

SENATE HOUSE, *the 13th December 1913.*

M.A. AND M.SC. EXAMINATIONS, 1916.

MATHEMATICS.

NOTE.—It is to be understood that, in the following list of text-books, wherever a book is recommended for a subject, students are expected to read those parts of the book only which deal with that particular subject :—

Pure Mathematics.

1. Higher Algebra—
   - Chrystal ... ... Algebra, Part II, Chapters 23—28, 32—34.
   - C. Smith ... ... A Treatise on Algebra.
2. Higher Plane Trigonometry—
   - Hobson ... ... Plane Trigonometry.
3. Spherical Trigonometry—
   - Casey ... ... Spherical Trigonometry.
   - Todhunter ... ... Spherical Trigonometry (Ed. Leathem).
4. Theory of Equations and Algebra of Quantics—
   - Barnside and Panton ... Theory of Equations.
   - Grace and Young ... Algebra of Invariants.
   - Elliott ... ... Introduction to the Algebra of Quantics.
5. Plane Analytical Geometry, including Higher Plane Curves—
   - Salmon ... ... Conic Sections.
   - Salmon ... ... Higher Plane Curves.
   - Basset ... ... Treatise on Cubics and Quartics.
6. Geometry of Surfaces—
   - Salmon ... ... Geometry of Three Dimensions.
   - Frost ... ... Solid Geometry.
7. Differential Calculus—
   - Edwards ... ... Differential Calculus.
   - Osgood ... ... Differential and Integral Calculus.
8. Integral Calculus—
   - Williamson ... Integral Calculus.
   - Osgood ... ... Differential and Integral Calculus.
9. Differential Equations—
   - Forsyth ... ... Differential Equations.
10. Calculus of Variations—
    - Bolza ... ... Lectures on the Calculus of Variations.
    - Hancock ... ... Calculus of Variations.
11. (*a*) Theory of Functions—
    - Harkness and Morley } Introduction to the Theory of Analytic Functions, *or* the corresponding portions of—
    - Forsyth ... ... Theory of Functions, 2nd edition.

    (*b*) Theory of Groups—
    - Hilton ... ... Finite Groups.
    - Campbell ... ... Theory of Continuous Groups.

    (*c*) Finite Differences and Calculus of Functions.
    - Boole ... ... Finite Differences.
    - Carmichael ... Calculus of Operations.
    - Herschel ... Examples of Calculus of Finite Differences.
    - Babbage ... ... Examples of Functional Equations.

(*d*) Vector Analysis and Quaternions—

Joly	...	Quaternions.
Tait	...	Quaternions.
Gibbs and Wilson	...	Vector Analysis.
Gibbs	...	Scientific Papers, Vol. II, pp. 17—90.

(*e*) Projective Geometry—

Cremona	...	Projective Geometry.
Scott	...	Modern Analytical Geometry.
Reye	...	Geometry of Position. T. R. Holgate.
Whitehead	...	Axioms of Projective Geometry (Cambridge Tracts No. 4).
Whitehead	...	Axioms of Descriptive Geometry (Cambridge Tracts No. 5).
Veblen and Young	...	Projective Geometry.
Bonola	...	Non-Euclidean Geometry.

(*f*) Theory of Numbers—

Reid	...	Theory of Numbers.
Matthews	...	Theory of Numbers.
Smith	...	Reports on the Theory of Numbers. (Collected papers, Vol. I, pp. 38—364.)

Mixed Mathematics.

1. Advanced Statics, including Theory of Potential—

Minchin	...	Statics.
Routh	...	Statics.

2. Dynamics of a Particle—

Routh	...	Dynamics of a Particle.

3. Rigid Dynamics—

Routh	...	Elementary Rigid Dynamics.

4. Hydrostatics, including Capillarity—

Besant and Ramsay	...	Hydrodynamics, Part I (Hydrostatics).

5. Hydrodynamics—

Ramsay	...	Hydrodynamics.
Lamp	...	Hydrodynamics.

6. Spherical Astronomy—

Ball	...	Spherical Astronomy.

7. (*a*) Theory of Elasticity—

Love	...	Theory of Elasticity, 2nd edition.

Candidates are also recommended to refer to—

Todhunter and Pearson. History of Theory of Elasticity.

(*b*) Advanced Dynamics—

Whittaker	...	Analytical Dynamics.
A. C. Webster	...	Dynamics.
Routh	...	Advanced Rigid Dynamics.
Hertz	...	Principles of Mechanics.

(*c*) Higher Parts of Spherical Astronomy.

Chauvenet	...	Spherical Astronomy.
Newcomb	...	Spherical Astronomy.

(*d*) Lunar and Planetary Theories—

Adams	...	... Lectures on Lunar Theory.
Airy	...	... Mathematical Tracts.
Brown	...	... Lunar Theory.
Cheyne	...	... Planetary Theory.
Moulton	...	... Celestial Mechanics.

(*e*) Figure of the Planets—

Todhunter	...	History of the Theory of Attraction and the figure of the Earth.
Thomson and Tait	...	Natural Philosophy.
Airy	...	... Mathematical Tracts.
Airy	...	... Figure of the Earth. (Enc. Metr.)
Clark and Radau	...	Figure of the Earth. (Enc. Britt.)
Pratt	...	... Figure of the Earth.

(*f*) Theory of Tides—

Basset	...	... Hydrodynamics.
Darwin	...	... Tides and Kindred Phenomena. (Murray.)
Darwin	...	... Tides. (Enc. Britt.)
Darwin	...	... Scientific Papers.
Airy	...	... Tides and Waves. (Enc. Metr.)

PHYSICS.

No text-books are prescribed or recommended.

The students are required to consult their Professors as to a suitable course of reading, which should include the study of original papers.

CHEMISTRY.

(In addition to the books recommended for the B.A. and B.Sc. Pass and Honours Courses.)

(*a*) PHYSICAL CHEMISTRY.

Ostwald Walker	...	Physico-Chemical Measurements.
Nernst (trans. by Lehfeldt).		Theoretical Chemistry, 4th edition.
Mellor	...	... Chemical Dynamics and Reactions.
Findlay	...	... The Phase Rule.
Lehfeldt	...	... Electro-Chemistry.
Van t'Hoff	...	... Lectures on Theoretical and Physical Chemistry.
Jeans	...	... Dynamical Theory of Gases.
Travers	...	... Study of Gases.
Rutherford	...	... Radio-Activity.
Thomsen	...	... Thermo-Chemistry.
Ostwald	...	... Principles of Chemistry.
E. C. Baly	...	... Spectroscopy.
S. Young	...	... Stoichiometry.

(*b*) INORGANIC CHEMISTRY.

Biltz	...	... Inorganic Preparations.
Myer	...	... History of Chemistry.
Fresenius	...	... Qualitative Analysis and Quantitative Analysis.
Sutton	...	... Volumetric Analysis.
Hempel	...	... Gas Analysis.
Treadwell and Hall	...	Analytical Chemistry, Vols. I and II.
Roscoe and Schorlemmer		Treatise on Chemistry, Vols. I and II.
F. M. Perkin	...	Practical Methods in Inorganic Chemistry.
Werner	...	... New Ideas in Inorganic Chemistry.

(c) ORGANIC CHEMISTRY.

Emil Fischer	...	Organic Preparations.
Richter	...	Organische Chemie (9th edition).
Gattermann	...	Practical Organic Chemistry.
J. B. Cohen	...	Advanced Organic Chemistry.
Sudborough	...	Practical Organic Chemistry.

Candidates for the M.A. or M.Sc. Examination are required to consult original papers in the Chemical Society's Journals and other Scientific periodicals, and also to consult the Annual Reports issued by the Chemical Society on the "Progress of Chemistry," in connection with the especial subject taken up by them.

GEOLOGY.

No text-books are prescribed or recommended. The subject is to be studied in accordance with the syllabus prescribed in the Regulations.

PHYSIOLOGY.

(No text-books are prescribed.)

In section 7, Chapter XXXVII of the Regulations, in first paragraph of the syllabus in Physiology, for the M.Sc. Examination the expression "a particular branch" be interpreted to mean one of the following branches :—

1. Circulation and Respiration.
2. Alimentation and Metabolism.
3. Physiology of the Central Nervous System and the Organs of Sense.
4. Physiology of the Nervous System and the Muscular System.
5. Histology and Reproduction.

The four theoretical papers in Physiology be distributed so as to cover the following subjects :—

Paper I.—Circulation, Respiration, Alimentation, Metabolism and Reproduction (compulsory to all candidates).

Paper II.—Nervous System and Muscular System. (Candidates offering a piece of research work falling under the head of "Organs of Sense" will be exempted from this paper.)

Paper III.—Organs of Sense. (Candidates offering a piece of research work falling under any of the following heads—Circulation, Respiration, Alimentation, Metabolism, Reproduction, Nervous System, Muscular System and Histology—will be exempted from this paper.

Paper IV.—The branch of Physiology professed by the candidate for special study.

The Practical Examination will include—

Paper I.—Experimental Physiology. (Candidates offering research work falling under the head of Histology or Chemical Physiology will be exempted from this paper.)

Paper II.—Histology. (Candidates offering research work falling under the head of Chemical Physiology will be exempted from this paper.)

Paper III.—Chemical Physiology.

Paper IV.—Candidates' special subject.

BOTANY.

No text-books are prescribed. The subject is to be read in accordance with the prescribed Syllabus.

ZOOLOGY AND COMPARATIVE ANATOMY.

(No text-books are prescribed.)

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta,
or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

RESOLUTION ON THE ANNUAL PROGRESS REPORT OF THE FOREST ADMINISTRATION IN THE BENGAL PRESIDENCY FOR 1912-13.

REVENUE DEPARTMENT.

FORESTS.

CALCUTTA, THE 22ND DECEMBER 1913.

RESOLUTION—No. 4439M.R.

READ—

The Annual Progress-Report of the Forest Administration in the Bengal Presidency for 1912-13.

Read also—

The corresponding report of the previous year and the Government Resolution thereon.

MR. C. E. MURIEL was in charge of the circle throughout the year, and inspected all divisions and divisional offices except Darjeeling, which had been inspected in June 1912.

2. *Changes in area and in administration.*—No changes were made in the actual areas under the different classes of forest during the year, but owing to the recomputation of the areas in the Sundarbans reserved forest from the most recent maps, a nominal addition of 208 square miles has been made to the area under reserved forest, which is now returned as 4,888 square miles.

The redistribution of the forest staff between Bengal, Bihar and Orissa, and Assam was finally sanctioned by the Government of India in April last. This province has been given a permanent staff of 11 officers of the Imperial Forest Service (excluding the Conservator, supernumeraries and probationers), 7 officers of the Provincial Service, and 446 officers of the Subordinate Service.

3. *Reservation and demarcation.*—No forest settlements were completed during the year. Some progress was made in the important and urgent work of demarcation in the Chittagong and Chittagong Hill Tracts Divisions, but there is still a considerable amount of work to be carried out. The Governor in Council agrees with the Conservator that demarcation is for the present the most important duty of the officers in charge of these divisions, and trusts that next year's report will afford no ground for the suggestion that it is not receiving sufficient attention.

4. *Communications and buildings.*—Steady progress, assisted by the special grant made by the Government of India from the Imperial surplus, was made in the improvement of communications and buildings. The expenditure on communications amounted to Rs. 35,516 against Rs. 25,252 in the previous year, 17 miles of cart road, 43 miles of bridle paths and 14 miles of footpath being constructed. The total expenditure on new buildings and on repairs was Rs. 65,809, as compared with Rs. 50,461 in 1911-12.

5. *Working plans.*—A revised working plan for the reserved forests of the Darjeeling Division was sanctioned during the year. A proposal to disforest the Chakaria Sundarbans reserve in the Chittagong Division, which has been under consideration for some time, has now been finally disposed of. It has been decided, on the advice of the revenue and forest officers concerned, to retain the area as reserved forest. A revised working plan has been sanctioned for a period of eight years, with effect from the 1st July 1913.

6. *Protection.*—The number of forest offences reported during the year was 1,572 against 1,539 in the preceding year. The average for the preceding three years was 1,450. The increase is largely in the number of undetected cases, special efforts having been made in the Buxa Division to obtain a more complete record of forest offences. As a result, attention has been drawn to the localities in which such offences are most numerous, and the measures taken for the protection of these localities have improved forest conservation. His Excellency in Council is glad to see that special attention is being paid to this matter by the Conservator. It is clearly necessary, in order to ensure proper protection, that the record of forest offences, whether detected or undetected, should be as complete as possible.

Another case of counterfeiting a Government hammer for use in the criminal misappropriation of *sundri* timber was discovered. The accused were convicted and sentenced to six months' rigorous imprisonment.

The measures taken to ensure protection from fire were again very successful, only 1,643 acres, consisting mainly of grass lands, having been burnt over, as compared with 2,642 acres last year.

No change was made in the area open to grazing, which includes 4,770 square miles, of which, however, 4,030 square miles consist of the unclassed forests in the Chittagong Hill Tracts. The number of cattle impounded during the year was 2,221, the average for the three previous years being 1,601. The chief increase was in Kurseong and was due to more systematic impounding. The question of the reservation of grazing lands for the milk supply of Darjeeling has been further examined, and in view of the extension of the practice of stall feeding, it has been found possible to reduce the area open to grazing in the Darjeeling Division from 13,000 to 8,000 acres. Orders to this effect have been issued since the close of the year. The Governor in Council is assured that the Forest Department will do all in its power to encourage the use of cut fodder so as to enable a further extension of stall feeding and a further reduction in the area open to grazing to be effected.

The enquiry made into the over-exploitation of dead *sâl* trees from the Buxa forests referred to in last year's report has shown that the mortality in *sâl* trees was largely due to the attacks of a beetle which has not yet been identified by the Forest Zoologist, who has classed it among the Platypidæ. Further investigations into the life-history of the insect are being made, and it is hoped in this way to ascertain how the pest can best be combated. The apprehension that the over-extraction was due to the organized manufacture of dead *sâl* on the part of persons interested in obtaining timber at low rates has fortunately proved to be unfounded, though there is reason to believe that the control exercised over the cutting of dead *sâl* was insufficient to prevent the felling of stag-headed and partly dead trees. Measures have now been taken to exercise stricter control by localising the fellings and marking the trees before sale.

7. *Exploitation.*—A considerable advance has been made during the year towards the exploitation of the Bengal forests by commercial agency. A concession which is expected to have important results, has been granted to Messrs. Burn & Co. for the extraction of timber and bamboo from the forests of the Darjeeling, Tista and Kurseong Divisions. Surveys for the wire ropeways, which it is proposed to erect, have been carried out during the year, but extraction is not due under the agreement until 1914. A further agreement with the same firm for the extraction of timber from certain parts of the Buxa Forest Division was ratified after the close of the year. Negotiations are also in progress for a concession in regard to the extraction of bamboo for paper pulp from the reserved forests in the Chittagong Hill Tracts.

A license has been granted to the Chief Medical Officer of the Assam-Bengal Railway for the collection of *Chaulmugra* (*Taraktogenos Kurzii*) seeds in portions of the forests of the Chittagong and Chittagong Hill Tracts Divisions, but it did not come into force till the 1st July 1913.

Khedda operations were carried out in the Tista and Kurseong Forest Divisions, resulting in the capture of three elephants on which royalty was paid. It is hoped to undertake Khedda work on a larger scale in Jalpaiguri, Buxa and Chittagong during the present season.

8. *Financial results.*—The total revenue during the year increased by Rs. 1,02,209, while the expenditure decreased by Rs. 23,406. The surplus was Rs. 9,05,461, as compared with Rs. 7,79,846 in 1911-12 and Rs. 6,72,656, the average of the past five years. All divisions, except the Chittagong Hill Tracts, have contributed to the increase in revenue, which is mainly due to the realization of large outstandings from the previous year, the arrears of revenue having been reduced from 1¾ lakhs at the beginning of the year to less than half a lakh at its close.

9. The number of persons reported to have been killed by tigers in the Sundarbans during the year was only 70, as compared with 142 in the previous year, and 122, the average number for the last five years. As, however, the decrease in the damage caused by tigers was accompanied by a proportionate decrease in the number killed, there is reason to fear, as the Conservator suggests, that the result was due to fortuitous circumstances rather than to the measures adopted in recent years for the destruction of these pests. The matter will continue to receive careful attention.

10. The thanks of the Governor in Council are due to Mr. Muriel for his capable and efficient management of the department and for his full and complete report, which contains ample evidence of the careful supervision exercised by him over all branches of forest work in this Presidency. His Excellency in Council notices with pleasure the Conservator's appreciation of the good work done by most of the officers of the department during the year.

By order of the Governor in Council,

J. H. KERR,

Secretary to the Government of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

First forecast of the spring oilseed crops of Bengal, 1913-14.

(Note.—On the average of the five years ending 1911-12 the area under linseed in Bengal represents some 6·6 per cent., and that under rape and mustard 22·2 per cent., of the total area under these crops in British India.)

Explanatory.—Three forecasts are issued for the spring oilseed crops. The first forecast deals only with the area sown and the general condition of the crops.

Area sown.—Oilseeds are chiefly grown in the Dacca, Rajshahi and Presidency Divisions. In the other two Divisions the area under the crops is very small. The total area under the crops sown up to now this year (excepting *til* for which separate forecasts are issued) is reported to be 1,549,500 acres against 1,589,600 acres last year.

Character of the season.—The rainfall in September was general throughout the Province. In October, it was generally above the average and proved sufficient for the sowings of the crops which began generally in normal time. The sowings were a little late only in Malda and in parts of Jessore and Jalpaiguri. The rainfall in November generally proved beneficial to the growth of the crops. The season has been on the whole favourable and the present condition of the crops is reported to be fairly good.

D. N. MOOKERJI,

for *Director of Agriculture, Bengal.*

DEPARTMENT OF AGRICULTURE, BENGAL.

Forecast of the Winter Til (Sesamum) Crop of Bengal, 1913-14.

[*Note.—On the average of the five years ending 1911-12 the area under* til *in Bengal represents some 5·7 per cent. of the total area under* til *in British India.*]

Character of the season.—Although the crop was sown during the normal time in almost all the districts the weather was not uniformly favourable at the sowing time as it was unusually rainy. Excessive rainfall during the latter part of September hindered the growth of the crop and also damaged it to some extent in most of the districts. The floods and the deposit of sand left by the flood-water had an injurious effect on the crop in some parts of the Burdwan Division. The weather condition of Dacca, Mymensingh and Pabna, the most important *tal*-growing districts of Eastern Bengal, was however favourable, and a good outturn has been reported in these places.

Acreage.—The total area cultivated with the crop as estimated by the District Officers is 55,800 acres this year against 64,700 acres last year. The decrease occurred chiefly in Tippera, Nadia, Malda and Rangpur owing to the excessive rainfall and in Midnapore owing to floods.

Outturn.—According to the estimates of the District Officers, the outturn of the crop for the province works out to 80 per cent. against 86 per cent. last year. Taking the normal yield per acre to be 4¼ maunds, the gross yield for the province is estimated at 7,000 tons against 10,400 tons last year.

24-Parganas ...	300*	300	300	83	100	August. Late... ...	November. Normal ...	The weather condition was favourable for the cultivation and growth of the crop.
Nadia ...	5,800	2,600	900	67	50	August. Normal ...	Middle of November. Normal.	The decrease in area sown this year as compared with last year is due to excessive rainfall at the time of sowing. Extensive damage was done to the crop by heavy rain; hence the outturn is much below the normal.
Murshidabad ...	4,100	1,100	1,300	83	83	July and August ...	November and December. Normal.	Increase in area this year is due to extension of cultivation of this crop in the Lalbagh subdivision of the district. The character of the weather was not favourable at the time of sowing. Excessive rainfall at the beginning and want of rain at the latter part of October did some damage to the crop. Hence the outturn has fallen below the normal.
Jessore ...	17,400	1,500	1,500	83	67	August. Normal ...	Latter part of November. Normal.	The weather was unfavourable at the time of sowing owing to heavy rain which retarded the growth of the crop. Incessant rainfall in September damaged the crop to some extent. Hence the decrease in the outturn.
Khulna ...	2,800	1,800	1,800	100	100	Latter part of August. Normal.	Middle of December. Normal.	The weather was favourable for the cultivation and growth of the crop.
Burdwan ...	500	200	300	67	67	August. Normal ...	December. Normal ...	The weather at the time of sowing was favourable and a larger area than in the previous year was sown. In Asansol subdivision heavy rain later in the season damaged about one-third of the crop. This accounts for the falling off of the outturn.
Birbhum ...	500	500	500	83	100	August. Normal ...	Latter part of November. Normal.	The weather was favourable for the cultivation and growth of the crop. The outturn is normal.
Bankura ...	3,300	2,900	2,900	63	83	20th July. Normal ...	Not yet commenced ...	The weather was fairly favourable. The outturn is expected to be somewhat below the normal.
Midnapore ...	20,600	8,100	7,000	83	50	Latter part of June. Normal.	End of September. Normal.	The decrease in area this year is due to floods. Excessive rainfall hindered the cultivation and growth of the crop and also damaged it to the extent of 75 per cent. in the subdivisions of Contai, Tamluk and Ghatal and other lowlying tracts.
Hooghly ...	1,000	700	600	83	83	Middle of September. Normal.	End of November. Normal.	The decrease in area as compared with that of the last year is due to early heavy rains in certain parts of the district. The weather at the time of sowing was favourable, but the outturn is below the normal owing to the deposit of sand left by the floods in certain parts of the district.
Howrah ...	300	300	300	83	67	1st week of November	Not yet commenced ...	The weather has been favourable since the time of sowing. A fairly good outturn is expected.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 22nd December 1913.

Summary.—During the week under review scattered showers of rain fell in some of the districts of the Rajshahi and Dacca Divisions. Its effect on all *rabi* crops except mustard is good. Transplanting of summer rice and harvesting of winter rice are in progress. The outturn of winter rice is reported to be fairly good. The prospects of *rabi* crops are hopeful. Fodder is insufficient in parts of Midnapore and Hooghly. Cattle-disease is reported from nine districts. The average price of common rice has fallen by about 3·3 per cent. as compared with that of the previous week. Agricultural loans continue to be issued in Midnapore.

3. Government reserves to itself the right to alter the quantity and class of opium to be offered for sale in each month. No reduction in the quantities to be sold, however, will be made without three months' previous notice.

4. The following are the conditions of sale. Government reserves to itself the right of altering all or any of these conditions after giving three months' previous notice, and power is reserved to vary the upset price referred to in condition (ii) at any time without such previous notice :—

(i) The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

(ii) The opium will be ordinarily offered for sale at an upset price of Rs. 1,200 per chest of uncertified opium and will be sold to the highest bidder above that price, except under the circumstances for which provision is made by clause (xiii) of these conditions of sale. The bids must advance by Rs. 5 at a time.

(iii) The sale shall commence at the hour of 11 A.M. of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of Government, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Government may dispose of the lots which remain on hand at a future sale.

(iv) Each lot shall contain five chests, excepting one lot at the December sale, which will consist of four chests of Patna opium and one chest of Benares opium.

(v) A promissory note for a sum, calculated according to the scale noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such promissory notes shall be redeemed on the part of the purchasers at this office by Bank of Bengal receipts, or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as Government shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

DEPOSIT.

When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.

On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest

On bids of Rs 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.

And so on, Rs. 100 being added to the deposit for every bid additional to the extent of Rs. 400.

(vi) The said promissory notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

(vii) The promissory notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

(viii) No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause (v) on the fifth day following the day of sale, will be afterwards accepted: Provided always that money so subsequently tendered may be taken in payment of the said promissory note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. (v) and No. (vi).

(ix) The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and, in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as Government shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages

that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

(x) Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

(xi) No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

(xii) The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a promissory note would otherwise be taken under the fifth of these conditions.

(xiii) With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bonâ fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 1,200 specified in the second of these conditions.

(xiv) The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether fifteen lots, provided always that there remain a sufficient number of lots of the opium to complete the said fifteen.

(xv) In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

(5) The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the office of the Government of Bengal:—

No. 1—Certificate of the opium advertised for sale.
No. 2—Report of the examination of such opium.

(6) The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the office of the Government of Bengal.

(7) Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the office of the Government of Bengal. But, in accordance with established usage, under no circumstances will the Government entertain or recognize

any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

IRRIGATION DEPARTMENT.

The 29th December 1913.

No. 12.—Notification.—In exercise of the power conferred by section 4 of the Bengal Survey Act, 1875 (Bengal Act V of 1875), read with section 22 of the Bengal General Clauses Act, 1899 (Bengal Act I of 1899), and in supersession of the notifications and portion of a notification noted in the margin, the Governor in Council is pleased to appoint Babu Jatindra Nath Gupta (Deputy Collector in place of Babu Probodh Chandra Chatterji) to be a Deputy Collector—

1. Notification No 9, dated the 12th August 1912.
2. Notification No. 8, dated the 8th February 1913.
3. Paragraph II of Notification No. 8, dated the 28th July 1913.
4. Notification No. 10, dated the 27th September 1913

(*a*) for the purpose of carrying out the survey ordered to be made in the first paragraph of notification No. 7, dated the 18th June 1912, as amended by subsequent notifications, and for all purposes of the said Bengal Survey Act, 1875, in relation thereto, and

(*b*) for the purpose of causing permanent boundary marks to be erected under section 15 of the said Act—

(*i*) on that portion of the Government lands, known as the Tolly's Nala surplus land, between the Hastings bridge and the Tollyganj bridge, which has been surveyed under the Calcutta Survey Act, 1887 (Bengal Act I of 1887), as directed by notification No. 459M., dated the 31st January 1903, and under the said Bengal Survey Act, 1875 (Bengal Act V of 1875), as directed by notification No. 1518T.R., dated the 11th July 1913, and

(*ii*) on that portion of the Government lands, known as the Tolly's Nala surplus land, between the Tollyganj bridge and the Russa toll station, which is being surveyed under the said Bengal Survey Act, 1875 (Bengal Act V of 1875), as directed by notifications Nos. 121T.M. and 122T.M., dated the 29th April 1912.

A. P. SARKAR,
Offg. Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

The 30th December 1913.

No. 172 Marine.—In exercise of the powers conferred by section 36 of the Indian Steam-ships Act, VII of 1884, and in supersession of the rules sanctioned under the Notification of this Department No. 118Marine, dated the 21st December 1909, the Governor in Council is pleased, with the previous sanction of the Governor-General in Council, to make the following rules to regulate the granting of certificates of competency to Engineers of sea-going steam-ships.

H. H GREEN,
Offg. Secy. to the Govt. of Bengal.

CHAPTER I.

GENERAL RULES.

1. *Certificates of competency granted to persons who pass requisite examinations.*—Certificates of competency will be granted to those persons who pass the requisite examinations and otherwise comply with the requisite conditions. For this purpose Examiners have been appointed and arrangements have been made for holding the examinations whenever necessary at the port of Calcutta.

2. *How to apply.*—Candidates for examination must fill up a form of application (form Exn. 3) at the Port Office. The form properly filled in, together with the candidate's certificate of apprenticeship testimonials and discharges, must be lodged with the Port Officer not later than the day before the day of examination. As discharges and testimonials may have to be verified before the candidate can be examined, it is desirable that they should be handed in, together with the form Exn. 3, as many days as possible before the date of the examination which the candidate desires to attend. In the absence of the necessary verification the candidates cannot be examined.

In all cases in which certificates of dischage in the home or other trade which have not been officially issued at a Mercantile Marine Office are produced as evidence of any part of a candidate's qualifying service, they should be submitted to the Port Officer for verification.

3. *Gaps in service.*—The Examiner should be particularly careful to ascertain that there are no gaps in the candidate's service which are not properly accounted for before he is allowed up for examination.

4. *Calculation of service.*—The candidate's services as shown on his discharges should be reckoned by the calendar month, *i.e.*, the time included between any given day in any month and the preceding day of the following month, both inclusive. The number of complete months from the commencement of the period, ascertained in this way, should be computed, after which the number of odd days should be counted. The day on which the agreement commences as well as that on which it terminates should both be included and all odd days should be added together and reckoned at 30 to the month.

5. *Service must be verified.*—Service which cannot be verified by proper entries in the articles of agreement of the ships in which the candidates have served cannot be counted.

6. *Application in special cases.*—In cases where the services of a candidate require verification, or where he is in doubt whether his service complies with the regulations and wishes to submit his case for special consideration, all certificates, discharges and testimonials, together with the form of application,* properly filled in, should be submitted to the Port Officer, who will either deal with the case or transmit it to Government for decision.

* Form Exn. 3, which can be obtained at the Port Office.

7. *Inquiries.*—All other inquiries regarding examinations should be made and dealt with in the same way. The point on which information is sought should be clearly stated, and certificates, discharges, testimonials, &c., should be forwarded when they are material to the inquiry.

8. *Age.*—Should any doubt exist as to the age of a candidate, he will be required to produce a certificate of birth.

9. *Fraud and misrepresentation.*—It is provided by section 104 of the Merchant Shipping Act, 1894, that any person who makes, assists in making, or procures to be made, any false representation for the purpose of procuring either for himself or for any other person a certificate of competency, shall in respect of each offence be guilty of a misdemeanour, which is punishable, on summary conviction, with imprisonment for a term not exceeding six months, with or without hard labour, or with a fine not exceeding one hundred pounds.

10. *Testimonials—shore service.*—All candidates will be required to produce, in addition to the official discharge certificates, testimonials as to their workshop service and as to their service at sea. The testimonials as to workshop service must be signed by the employer, and must testify to the candidate's conduct and ability, and state what kind of work he was engaged on (*e.g.*, fitting, erecting, turning, machine work, &c.), and for how long (*see* paragraph 31).

11. *Testimonials—sea service.*—Testimonials as to service at sea must testify to the applicant's sobriety, experience, ability and general good conduct for at least the last twelve months' service at sea preceding the date of application to be examined. They must be signed by the Master and Chief Engineer, or, in the case of testimonials to Chief Engineers, by the Master and Superintending Engineer, and must clearly state whether the applicant was on regular watch and in regular charge of a watch on the main engines or boilers. It is desirable that testimonials of candidates should be endorsed by the Superintending Engineer. No time spent in clerical work will be allowed to count.

12. *Further as to testimonials.*—In cases where a testimonial from the Chief Engineer, or from the Master, is for any sufficient reason not obtainable, one may be submitted from the Superintending Engineer in place of that of the Chief Engineer, and from the Marine Superintendent in place of that of the Master, or from the Managing Owner or Secretary or Chairman of a large Company in place of either; but in every such instance the testimonials must declare that the facts stated are in accordance with the reports made by the Chief Engineer or the Master, as the case may be, or else that the facts are within the writer's personal knowledge.

13. *Penalty for misconduct.*—Candidates who have neglected to join their vessels after having signed articles, or who have deserted their vessels after having joined, or who have been found guilty of gross misconduct on board, will be required to produce satisfactory proofs of two years' subsequent service and good conduct at sea, unless the Government, after having investigated the matter, should see fit to reduce the time.

14. *Physical defects.*—When a candidate is observed to be hard of hearing, or is labouring under any other obvious physical defect, the signatories of his testimonials are required to mention that defect specifically, and to state whether it in any way interfered with the efficiency of the candidate as an Engineer on watch. When these modified testimonials are such as to completely satisfy the Examiner that the defect is not such as to interfere with the efficient discharge of the applicant's duties as Engineer, the examination is proceeded with; otherwise the case is referred to the Government. Candidates afflicted with nervous impediment in speech may write their answers to *viva voce* questions.

15. *Foreign service.*—The testimonials of service of Foreign or British engineers serving in foreign vessels, which cannot be verified by the Port Officer, must be confirmed either by the Consul of the country to which the ship in which the candidate served belonged, or by some other recognized official authority of that country; or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case must be decided on its own merits; and if the sufficiency of the proofs given appears to be at all doubtful, the point must be referred to the Government.

16. *Foreign Engineers must know English.*—Foreign Engineers must prove to the satisfaction of the Examiners that they can speak and write the English language sufficiently well to perform the duties required of them

on board a British vessel. In every case before failing a candidate for insufficient knowledge of the English language the Examiner should refer the matter to the Port Officer.

17. *Issue of certificate.*—If the candidate passes he will receive a form (form Exn. 16) authorising the Port Officer to whom it is addressed to issue the certificate. The candidate's testimonials and other papers will be returned to him when the examination is finished. It is therefore important that the port at which the certificate is to be issued should be the same on both the form Exn. 16 and the form of application, Exn. 3. If circumstances should make any alteration necessary, the Examiner should see that it is made in both forms; otherwise delay in the issue of the certificate may be caused.

18. *Service found to be insufficient.*—If after a candidate has passed the examination it is discovered on further investigation that his services are insufficient to entitle him to receive a certificate of the grade for which he has passed, the certificate will not be granted to him; but if the Port Officer is satisfied that the error in the calculation of the candidate's services did not occur through any fault or wilful misrepresentation on his part, he may either have the fee returned to him or have it placed to his credit. Should his services entitle him to a certificate of a lower grade it may be granted to him, and the difference, if any, between the fee paid by him for the superior certificate and the fee payable for the inferior certificate will be returned to him or placed to his credit. The superior certificate will not be granted until the candidate has performed the amount of service in which he was deficient, and has been re-examined in all the subjects, unless the Government see fit to dispense with the re-examination.

19. *Failure in examination.*—If the candidate fails in practical knowledge he may not present himself for re-examination until he can produce proofs of three months' further service at sea as Engineer on watch on the main engines or boilers of a foreign-going steamer, or its equivalent in the home trade (four and-a-half months) subsequent to the date of failure. If he fails in Arithmetic, elementary questions, or drawing only, he may come up again at any time, but in all cases of failure any re-examination must begin entirely afresh.

20. *Fee must be paid.*—Candidates for examination in making their application on the form Exn. 3 will be required to pay the examination fee before any step is taken towards inquiring into their services or testing their qualifications, &c. If the candidate is found not to be qualified, the fee will either be returned to him or placed to his credit until he is qualified.

21. *Payment of fees, and penalty for offering gratuity.*—The fee for examination must be paid to the Port Officer. If a candidate offers a gratuity to any servant of the department, he will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be examined for twelve months, either at the port where the offence was committed or at any other port.

22. *Fees not returned on failure.*—If a candidate fails in his examination, no part of the fee he has paid will be returned to him.

23. *Table of fees.*—The fees are as follows:—

	Rs.
Second-class Engineer's certificate	15
First-class Engineer's certificate	30
First-class Engineer's certificate, if the candidate holds a Second-class Certificate of Competency granted by the Board of Trade or by the Government of a British Possession under the Merchant Shipping Act	15

CHAPTER II.

QUALIFICATIONS REQUIRED FOR THE VARIOUS GRADES.

Ordinary Certificates.

24. *Value of ordinary certificates.*—Ordinary certificates will entitle the holders to go to sea in the grade certified as Engineers of any vessel in the British Mercantile Marine.

25. *Second-class Engineer.*—A candidate for a Second-class Engineer's certificate must not be less than 21 years of age;

(*a*) He must have served as an apprentice Engineer for four years in Europe or five years in India at least, and prove that during the period of his apprenticeship he has been employed in the manner set forth in paragraph 31.

Journeyman's time will be considered as equivalent to apprenticeship.

Every applicant must produce testimonials of ability as an engineer workman to the satisfaction of the Port Officer.

If the candidate has served as an Apprentice Engineer or as journeyman, under the conditions above prescribed, for less than four years in Europe or five years in India, he will be required to make up the deficiency or to complete the equivalent of four years European apprenticeship by service as Engineer at sea on regular watch on the main engines or boilers (1) of a foreign-going steamer of not less than 66 nominal horse-power, or (2) of a home-trade steamer of not less than 66 nominal horse-power, such service to be counted as equivalent in the case of (1) to two-thirds, and in the case of (2) to four-ninths, of service as Apprentice Engineer or as journeyman.

If the candidate has not served at all as Apprentice Engineer or as journeyman, he will be required to have served at sea, in lieu thereof, as Engineer on regular watch on the main engines or boilers, six years in a foreign-going steamer of not less than 66 nominal horse-power, or nine years in a home-trade steamer of not less than 66 nominal horse-power.

(*b*) (i) In addition to the apprenticeship as above described, or the alternative sea service, the applicant must have served one year at sea as Engineer on regular watch on the main engines or boilers of a foreign-going steamer of not less than 66 nominal horse-power; or eighteen months in a home-trade steamer of not less than 66 nominal horse-power.

(ii) *On and after January 1st, 1915, the applicant will be required, in addition to the apprenticeship above described or the alternative sea service, to have served eighteen months at sea as Engineer on regular watch on the main engines or boilers of a foreign-going steamer of not less than 66 nominal horse-power; or twenty-seven months in a home-trade steamer of not less than 66 nominal horse-power.*

(*c*) He must be able to give a satisfactory description of boilers, and the methods of staying them, together with the use and management of the different valves, cocks, pipes, and connections.

(*d*) He must understand how to correct defects from accident, decay, etc., and the means of repairing such defects.

(*e*) He must understand the use of the water gauge, pressure gauge, barometer, thermometer, and salinometer, and the principles on which they are constructed.

(*f*) He must be able to state the causes, effects and usual remedies for incrustation and corrosion.

(*g*) He must be able to explain the methods of testing and altering the setting of the slide valves, and method of testing the fairness of shafts and adjusting them.

(*h*) He must be able to calculate the suitable working pressure for a steam boiler of given dimensions, and the stress per square inch on crank and tunnel shafts when the necessary data are furnished.

(*i*) He must understand the construction of steering engines, evaporators, feed filters, and feed heaters.

(*j*) He must understand the construction of centrifugal, bucket, and plunger, pumps, and the principle on which they act.

(*k*) He must be able to state how a temporary or permanent repair could be effected in case of derangement of a part of the machinery, or total breakdown.

(*l*) He must write a legible hand, and have a good knowledge of arithmetic up to and including vulgar and decimal fractions and square root. He must also understand the application of these rules to questions about safety valves, coal consumption, consumption of stores, capacities of tanks, bunkers, etc.

(*m*) He must be able to pass a creditable examination as to the various constructions of paddle and screw engines in general use; as to the details of the different working parts, external and internal, and the use of each part.

(*n*) He must possess a creditable knowledge of the prominent facts relating to combustion, heat and steam.

26. *First-class Engineer.*—A candidate for a First-class Engineer's certificate must be not less than 22 years of age

In addition to the qualifications required for a Second-class Engineer,

(*a*) (i) He must—

(1) have served at sea for 12 months, with a Second-class Certificate of competency or service, on regular watch on the main engines or boilers of a foreign-going steamship of not less than 99 nominal horse-power, as senior Engineer in charge of the whole watch; or

(2) have served at sea for 18 months, with a Second-class Certificate of competency or service, as First Engineer of a home-trade steamer of not less than 99 nominal horse-power; or two years with a Second-class Certificate of competency or service as Second Engineer of a home-trade steamer of not less than 99 nominal horse-nower; or

(3) have served 2½ years with a Second-class Certificate of competency or service as Third Engineer of a home-trade steamer of not less than 99 nominal horse-power, if, during the whole of that period, he has been the senior Engineer in charge of the whole of a watch on the main engines and boilers; or

(4) possess, or be entitled to, a First-class Certificate of service.

(ii) *On and after January 1st, 1915, the candidate will be required, in addition to the qualifications required for a Second-class Engineer—*

(1) *to have served at sea for 18 months, with a Second-class Certificate of competency or service, on regular watch on the main engines or boilers of a foreign-going steamship of not less than 99 nominal horse-power, as senior Engineer in charge of the whole watch; or,*

(2) *to have served at sea for 27 months with a Second-class Certificate of competency or service as First Engineer of a home-trade steamer of not less than 99 nominal horse-power; or 3 years with a Second-class Certificate of competency or service as Second Engineer of a home-trade steamer of not less than 99 nominal horse-power; or*

(3) *to have served 3 years 9 months with a Second-class Certificate of competency or service as Third Engineer of a home-trade steamer of not less than 99 nominal horse-power, if during the entire period he has been the senior Engineer in charge of the whole of a watch on the main engines and boilers; or*

(4) *to possess, or be entitled to, a First-class Certificate of service.*

The service described in paragraphs 42, 43, 44 and 45 of the regulations may, as heretofore, be accepted as qualifying for examination in accordance with the conditions specified in those paragraphs.

(*b*) He will be required to make an intelligible hand sketch, or a working drawing of some one or more of the principal parts of a steam-engine, and to mark in, without a copy, all the necessary dimensions in figures, so that the sketch or drawing could be worked from.*

(*c*) He must be able to take off and calculate indicator diagrams.

(*d*) He must be able to calculate safety-valve pressures and the strength of the boiler shell, stays, and rivetting.

* *See* Appendix C.

(*e*) He must be able to state the general proportions borne by the principal parts of the machinery to each other, and to calculate the direct stress, the torsional stress, and the bending stress in round bars, and the direct stress and the bending stress in rectangular bars with given loads.

(*f*) He must be able to explain the method of testing and altering the setting of the slide valves, and to sketch about what difference any alteration in the slide valve will make in the indicator diagram, and also the method of testing the fairness of shafts and of adjusting them.

(*g*) He must be conversant with surface condensation, superheating and the working of steam expansively.

(*h*) His knowledge of arithmetic must include the mensuration of superficies and solids and the extraction of the square and cube roots, and the application of these rules to questions relating to the power, duty and economy of engines and boilers, and to the stresses in rods, shafts, and levers of the engine. He should also be able to calculate the effect of the application of the lever, pulley, inclined plane, and other mechanical powers.

(*i*) He must understand the construction of, and be able to maintain in working condition the auxiliary machinery which is placed under his charge, viz., refrigerating machinery, electric light engines and dynamos, electric motors fitted to ships' boats, hydraulic machinery, and the various descriptions of steering engines, &c.

27. *First-class Certificates without second.*—The Government may see fit to allow an applicant who, in consequence of service abroad, has had no opportunity to obtain a Second-class Certificate, to be examined for a First-class Certificate, although he does not possess a certificate of the lower grade, provided he is able to satisfy them as to the satisfactory character of his services, but these should be ample both as regards length and experience.

If any candidate, who has not got a Second-class Certificate of competency, fails to pass the examination for the First-class Certificate, but passes that for the lower grade, he may be given a Second-class Certificate of competency, but no part of the fee will be returned. A candidate who has been permitted to be examined for a First-class Certificate without first obtaining a Second-class Certificate of competency or a Certificate of Service, and who fails in his examination in practical knowledge, may not be re-examined for a certificate of the higher grade until he has served 3 months as watch-keeper with a Second-class Engineer's Certificate of Competency or Service as required by the Regulations. If the candidate fails in practical knowledge, both for the lower as well as for the higher grade of Certificate, he may be re-examined for a Second-class Certificate only, subject to the usual regulations relating to failure.

28. *On and after January 1st, 1915, a candidate for either a Second-class or a First-class certificate, who within two years from the date of application to be examined has attended an approved course comprising general mathematical and scientific instruction at a technical school recognised by the Government as suitable for the training of* Marine *Engineers, will be allowed to count time so spent as equivalent to sea service in the ratio of three months at the technical school to two months at sea. Time so spent cannot be accepted as equivalent to more than one-sixth of the total sea-service required for either Certificate, but a candidate who has been allowed to count such time on examination for a second-class Certificate will not be debarred from counting similar subsequent time on examination for a First-class Certificate.*

In every case in which an allowance is made for time spent at a Marine Technical School, the candidate will be required to produce the Principal's Certificate for continuous and regular attendance at all the approved classes and for satisfactory progress.

Certificates for Engineers of Home-trade ships propelled by oil engines.

29. *Oil engine certificates.*—Candidates may be examined for second-class Certificates of competency as Engineers of vessels propelled by oil engines.

These certificates will entitle the holders to go to sea as Second-class Engineers of home-trade ships propelled by oil engines, but will not entitle them to go to sea as Second-class Engineers of Foreign-going or home-trade steamships.

30. *Second-class Engineer (Oil Engines).*—A candidate for a Second-class Oil Engine Certificate must be at least 21 years of age.

(*a*) He must prove —

(1) Four years' experience at the making or repairing of machinery, of which at least six months must be at the making or repairing of oil engines, or

(2) Three and a half years' experience in charge of engines and boilers at sea or an equivalent suitable experience on shore,

and, in addition to either (1) or (2)—

(3) Six months' experience with oil engines at sea.

NOTE.—Alternative service to the above may be considered, but it is essential that the candidate should have experience with oil engines, and have spent at least six months at sea in the engine-room of a sea-going vessel.

(*b*) He must write a legible hand, and have a good knowledge of arithmetic up to and including vulgar and decimal fractions and square root. He must also understand the application of these and other rules to problems relating to spring and lever-loaded relief valves, and be able to solve questions about the relative speeds of a vessel at different revolutions, the capacity of oil tanks, &c.

(*c*) He must be able to give a clear explanation of the principle on which an oil engine works, and to shew by means of illustrative sketches and otherwise that he undertands the construction of those in general use.

(*d*) He must be able to describe the chief causes which may make the engine difficult to start, and to explain how he would proceed to remedy any defects.

(*e*) He must be able to show that he understands the mechanism of the starting and reversing arrangement, and is competent to deal with defects which may lead to failure in the prompt handling or reversing of the engine.

(*f*) He must have sufficient mechanical ability to be able to overhaul the engine, to adjust the working parts, and to put the engine together again in good working condition.

(*g*) He must be able to give satisfactory answers to the elementary questions numbered 305 to 310 inclusive in Appendix B (p. 25).

(*h*) He must be able to prove (by actual trial if practicable) that he is competent to manipulate an oil engine when under way by starting, running the engine, stopping, reversing or slowing down.

(*i*) He must understand what is meant by the flash point, and have a knowledge of the explosive properties of the oil generally used in oil engines when exposed in the open air, and the danger of exposing any vapour from the oil to a light or of allowing any leak from the oil tanks, particularly into the vessel's bilges.

(*j*) He must understand the action of wire gauze diaphragms when placed in pipes and connections to oil tanks, etc., for the purpose of preventing the explosion or ignition of oil vapour therein.

(*k*) He must be able to take the necessary precautions to guard against the escape of inflammable vapour from the vaporiser when the engines are stopped.

(*l*) He must be able to explain the principle and construction of a dynamo and the construction and arrangement of primary and secondary batteries and induction coils, so far as is necessary for the efficient management of an oil engine.

31. *Workshop service.*—Workshop service must have been performed in works where steam-engines, boilers, etc., are made or repaired, but no time served before the age of 15 will be counted.

Not less than two years in Europe or three years in India of the apprentice time must have been spent at fitting, erecting, or repairing engines and machinery either in the works or outside. The remaining two years may be made up of time spent in engine works at fitting, erecting, or repairing engines and machines or at one of the other branches of the

trade given below, or at an approved technical day school (*see* Appendix J), the time so spent to count as follows :—

Fitting, erecting, repairing, or turning.	Full time.
Working in drawing office ...	Full time up to one year, and beyond one year one-half time.
Pattern-making	One-half time with a maximum allowance of one year.
Planing, slotting, shaping, and milling.	One-third time.
Boiler-making or repairing ...	One-half time.
Smith work	One-half time with a maximum allowance of one year.
Coppersmith work	One-third time with a maximum allowance of six months.

In the event of the apprentice time being extended to five years in Europe or six years in India, or more, four years at turning followed by one year in Europe or two years in India at fitting or erecting may be accepted as qualifying.

32. *Workshop service other than the above.*—When the workshop service has been performed in a place where engines are made but not in the manner specified in paragraph 31, the case must be referred to the Government with a report upon the service performed. If the service be such as is useful training for an Engineer, the Government may accept the service; but in every such case the applicant must prove additional engine-room or marine engine workshop service as required in the succeeding paragraph.

33. *Workshop service where engines are not made.*—When the workshop service has been performed in a place where steam-engines are not made or repaired, and the class of work done is similar to that required in engine making, the service may be accepted with an additional year of qualifying service; that is, four years in Europe or five years in India of workshop service and either two years at sea on regular watch, or one year at engine fitting in a suitable marine engine workshop and one year at sea in the engine-room. The approval of the Port Officer must be obtained in every such case before the candidate is examined.

34. *Technical Schools.*—Time spent after the age of 15 at a technical day school (recognised by the Government as suitable) where there is an engineering laboratory, may be taken into account and accepted as equivalent to artisan service, usually at the ratio of three years in the technical school to two in artisan service, provided that the applicant has taken the full engineering course and can produce the Principal's certificate for regular attendance at all the approved classes and for satisfactory progress; and provided also that the remaining portion of the time has been spent in works where steam-engines, boilers, etc., are made or repaired, in accordance with the scale of values indicated above.

For list of approved technical schools and time allowed for attendance at each, *see* Appendix J.

35. *Sea-service.*—The sea-service required by these regulations is, unless otherwise stated, service performed in foreign-going ships of at least the nominal horse-power specified for the respective grades of Certificate. The nominal horse-power, as given on the vessel's Certificate of Registry, may in all cases be accepted by the Examiners.

36. *Qualifying service defined.*—In the case of candidates for First-class Certificates qualifying service means, as a rule, service on regular watch on the main engines or boilers as senior Engineer in charge of the whole watch. When, however, three or four Engineers are on watch at the same time the service of the two seniors may be allowed to count, and when not less than six Engineers are on watch together that of the three seniors, provided a certificate from the Superintending Engineer is produced stating the number of Engineers on watch, the rank held by the applicant and that he was in full charge of a watch on a definite section of the main engines or boilers. During the whole of the period claimed, candidates must have been in possession of Second-class Certificates.

In the case of candidates for Second-class Certificates qualifying service means service as Engineer on regular watch on the main engines or boilers. In no case will time spent in clerical work be allowed to count.

37. *Further as to Qualifying Service.*—Only such service as gives the experience required to make a man thoroughly competent as a sea-going Engineer is accepted as qualifying service. Even for a Second-class Certificate the candidate must prove to the satisfaction of the Examiner that he is qualified by experience and knowledge to act as Chief Engineer in an under-powered steamer of 99 nominal horse-power on a voyage, say, from India to Egypt, taking full responsibility for engines and boilers.

38. *Foreign Engineers.*—Foreign Engineers cannot be examined for a First-class Certificate unless they have performed the sea-service stated in paragraph 26 with the requisite British Certificate. The service may have been performed in foreign vessels if the candidate can produce satisfactory testimonials as to conduct and character, and is able to prove that the service has been in the required capacities, and that during the period of service he has held a British Certificate of Competency of the rank required by the Regulations (*see* paragraph 15).

39. *Names on Articles.*—In all cases the candidates' names must have been duly entered on the ship's Articles as Engineers in their proper ratings.

40. *Regular Watch.*—Being on regular watch means being on watch for at least eight hours a day.

41. *Home-trade Service.*—Service in the home or coasting trade is regarded as being equivalent to two-thirds of the same period of time served in the foreign trade except where other allowances are specified [*see* paragraphs 26 (*a*) (2) and (3), 42, 44 and 45]. Also except in the case of Indian coasting voyages extending beyond a distance of 500 miles from the port of departure in steamships commanded by masters holding foreign-going certificates, when such service will count as foreign-voyages, and will be reckoned as full time; but the time spent in the port of departure or Home Port will not be allowed to count. In all cases the length of service is deemed to commence on the date of sailing from the port of departure or Home Port and to end on the date of arrival at the Home Port. Such service must be vouched for in the form laid down in Appendix K.

42. *Lake or River Service.*—Service as watch-keeper on a lake or river steamer of not less than 66 nominal horse-power may be accepted under the following conditions:—

(*a*) the service will only count half as much as sea service, *i.e.*, every two months of lake or river service is only equivalent to one month's foreign-going sea service;

(*b*) candidates for Second-class Certificates must prove, in addition to the lake or river service, at least three months' qualifying service at sea in a foreign-going steamship of not less than 66 nominal horse-power, or four and-a-half months' similar service in the home-trade;

(*c*) candidates for First-class Certificates must prove, in addition to lake or river service in vessels of not less than 99 nominal horse-power, at least six months' qualifying service at sea, with a Second-class Engineer's Certificate, in foreign-going vessels of not less than 99 nominal horse-power or nine months' similar service in the home-trade.

43. *Service in Auxiliary Screw Steamships.*—Service performed on board auxiliary screw whalers and other vessels with auxiliary steam-power of not less than 66 nominal horse-power in the capacity of Engineer may be allowed to count towards qualifying candidates for examination for Second-class Engineers' Certificates of Competency to the extent of one-half the time the vessel is actually at sea. If the candidate is able to prove a larger amount of time under steam, he will be allowed to count the whole of such extended time.

44. *Service in dredgers, fishing-boats, Tug-boats, or Pilot-vessels.*—Service in sea-going steam dredgers, fishing-boats, or tug-boats, and in sea-going pilot-vessels when on their station or when going to or returning from the same, may be accepted under the following conditions:—Two months of such service is only equivalent to one month's qualifying service in a foreign-going steamer. Candidates for Second-class Certificates may perform all their sea service in sea-going steam dredgers, fishing-boats, tug-boats, or pilot-vessels, but they must have been on regular watch on the main engines or boilers and the vessels must not be less than 66 nominal horse-power. Candidates for First-class Certificates must while in possession of a Second-class Certificate have served in vessels of at least 99 nominal

horse-power, and have been in charge of a watch on the main engines or boilers. They must, in addition, have served in a qualifying capacity for at least six months in a foreign-going cargo or passenger steamship, or nine months in a home-trade cargo or passenger steamship. This rule will not apply to service on the steam pilot-vessels at the Sandheads. Service on the regular watch on board such vessels for the period the vessels are on the station, or when going to, or returning from the same, shall be accepted as equivalent to two-thirds of the time performed in foreign-going trading vessels, as in the case of steam yachts.

45. *Service in yachts.*—Service performed in steam yachts, either within or beyond home-trade limits, may be accepted as equivalent to two-thirds of the time performed in foreign-going trading vessels, provided that the candidate's name is entered on the vessel's articles, and that he can prove to the satisfaction of the Examiner, that the time claimed was actually served at sea.

Candidates for Second-class Certificates may perform all their service in yachts, but the candidate must have been on regular watch on the main engines or boilers and the vessel must be of not less than 66 nominal horse-power.

Candidates for First-class Certificates must have served on vessels of not less than 99 nominal horse-power, and must have been in regular charge of the main engines or boilers. In addition they must have served for at least three months in a qualifying capacity on board a foreign-going cargo or passenger steamship. This additional service will, however, not be required in the case of a candidate who has served for 18 months as First Engineer, or for two years as second Engineer, of a steam yacht of the requisite power.

46. *Certificates of Service.*—An officer who has attained the rank of Engineer Lieutenant or Engineer Sub-Lieutenant in His Majesty's Navy or the rank of Engineer or Assistant Engineer in the Indian Marine Service, is entitled without examination, if an Engineer Lieutenant or Engineer, to a Certificate of Service as First-class Engineer, and if an Engineer Sub-Lieutenant or Assistant Engineer, to a Certificate of Service as Second-class Engineer. These officers may be examined for a Certificate of Competency on the same conditions as Engineers of the Mercantile Marine.

An officer who has attained the rank of Chief Artificer Engineer in His Majesty's Navy is also entitled without examination to a Certificate of Service as Second-class Engineer.

47. *Examination of Engine-room Artificers.*—Artificer Engineers, Chief Engine-room Artificers, Engine-room Artificers, and Mechanicians in the Royal Navy may be examined for Certificates of Competency on the same conditions as Engineers of the Mercantile Marine.

48. *Application by Naval Officers.*—The Lords Commissioners of the Admiralty have directed that applications from officers of the Navy for Certificates of Service or for permission to be examined for Certificates of Competency must, in the case of officers on the active list, be made through the Commanding Officer to the Secretary to the Admiralty, and in the case of officers who are on half-pay or who have retired, direct to the Secretary to the Admiralty, who in either case will forward the applications to the Port Officer.

49. *Masters' and Mates' Examination in steam.*—Particulars of the examination of Masters and Mates in steam will be found in Appendix F, pages 35-37.

50. *Certificates.*—The term "Certificate" in these regulations means a Certificate issued by the Board of Trade, or by a British Possession under Order in Council in accordance with section 102 of the Merchant Shipping Act, 1894. A list of the Colonial Certificates issued under Order in Council is given in Appendix G, and the holder of a Certificate so issued must not be examined in the United Kingdom for a Certificate of the grade already held.

51. *Colonial Local Certificates.*—The holder of a Colonial Certificate of Competency not granted under the Merchant Shipping Act, or of a Certificate of Competency granted after examination on board one of His Majesty's ships, who wishes to be examined for a Government of Bengal Certificate of the same grade, must prove that he has performed the amount of service required by these regulations for that grade, and complied with the conditions laid down as to testimonials. No fee will be demanded for the first attempt, but if the candidate fails the usual fee will be demanded on any subsequent attempt.

All Colonial Certificates for marine purposes, whether local or issued under Order in Council, must be given up before a further Certificate is issued by the Government of Bengal.

CHAPTER III.

CONDUCT OF THE EXAMINATIONS.

52. *Commencement and duration of examinations.*—The examinations will, as a rule, commence at 10 A.M., and will be continued from day to day until all the candidates whose names appear upon the Port Officer's list on the day of examination are examined.

53. *Candidates to be punctual.*—Candidates are required to appear at the examination room punctually at the time appointed.

54. *Tables to be cleared.*—Before commencing the examination, the tables and desks must be cleared of all scraps of paper or books that are not used in the examination, and care should be taken that the candidates while in the examination room do not have in their possession any book or paper.

55. *Strangers not admitted.*—No person will be allowed in the rooms during the examinations other than those whose duties require them to be present.

No instructors will be allowed on the premises.

56. *Face sheet and blotting paper.*—At the commencement of the examination a face sheet should be given to each of the candidates and they should be instructed to read the rules contained therein. A sheet of blotting paper will be issued to each candidate with the first examination paper, and it must be returned to the Examiner when the last paper is completed each day. The Examiner will be careful to see that the blotting paper has not been used by the candidate in solving his problems, or for conveying information to other candidates.

57. *All work to be shown.*—No candidate will be allowed to work out his problems on a slate or on waste paper, or to write on the blotting paper supplied for his use in the examination. Violation of this rule will subject the candidate to all the penalties of failure.

All worked papers must be signed and dated and the name of the port of examination inserted by the candidate.

Additional sheets of paper will be supplied by the Examiner if required, but they must be attached to, and form part of, examination papers.

58. *Books and papers strictly forbidden.*—All books necessary for the use of candidates under examination will be provided by the Government, and candidates are prohibited from bringing into the examination room books or papers of any kind whatever. The slightest infringement of this regulation will subject the offender to all the penalties of failure, and he will not be allowed to present himself for re-examination for a period of three months.

59. *Drawing instruments.*—Candidates for First-class Certificates have to pass an examination in rough working drawing, which may, in the candidate's option, be either hand sketches clearly dimensioned and complete in the necessary views and sections, or drawings to a scale. Drawing boards and T squares will be provided by the Government, but the applicants will have to bring with them any drawing instruments they may require.

60. *Candidates' places.*—Candidates should be so placed as to prevent one copying from another, and no communication whatever between the candidates should be allowed.

61. *Penalty for copying, &c.*—In the event of any candidate being discovered referring to any book or paper, or copying from another, or affording any assistance or giving information to another or communicating in any way with another, during the time of examination, or copying any part of the problems for the purpose of taking them out of the examination rooms, he will subject himself to all the penalties of failure, and will not be allowed to be again examined for a period of six months.

62. *Leaving room or building.*—No candidate may leave the examination room without permission and without giving up the paper on which he is engaged. Under no circumstances will the same paper be returned to him, but the Examiner may substitute other data, or another question.

63. *Injury to books.*—If a candidate defaces, blots, writes in, or otherwise injures any book or form belonging to the Government, his papers will be retained until he has replaced the damaged book or document. He will not be allowed to remove the damaged book or document, and will be subjected to all the penalties of failure.

64. *Silence.*—Perfect silence is to be preserved in the examination room.

65. *Penalty for breach of rules.*—Any candidate violating any of the regulations, or being guilty of insolence to the examiner, or of disorderly or improper conduct in or about the room, will render himself liable to the postponement of his examination, or, in the event of his having passed, to the detention of his certificate for such period as the Government may direct.

66. *Order of examinations.*—The examination of candidates for Second-class Certificates consists of three parts: arithmetic, elementary questions, and *viva voce*; and that of candidates for First-class Certificates of four parts; arithmetic, drawing, elementary questions, and *viva voce* (*see* paragraphs 25 and 26).

67. *Examination papers.*—One sheet only at a time should be given to the candidate and not more than two hours should be allowed for any one sheet.

68 *Arithmetic.*—When the number of marks obtained in arithmetic amounts to 28, that is, two-thirds of the maximum, the candidate passes in arithmetic.

If the marks obtained amount to 21, but not to 28, and if the applicant has had long experience, his testimonials and service should be taken into account, and his examination continued, if deemed advisable by the Examiner, and he may be passed or failed, having due regard to his practical knowledge, and to whether he is being examined for second class or first class.

69. *Elementary questions.*—All Engineer applicants presenting themselves for examination will be required to give written answers to ten questions selected from elementary questions shown in Appendix B, pages 14-25. These questions are intended to furnish a record to some extent of the candidate's knowledge at the time of his examination and also to induce the candidates to pay more attention to their handwriting and spelling.

Examiners will require all candidates to fill up a form Exmn. 15*b*, and they will forward it to the Port Officer with the report of the examination.

The elementary questions will, as a rule, be given on the second day of the examination to candidates for second class, and on either the second or third day to candidates for first class, but candidates who have time after working the arithmetical papers on the first day or the drawing on the the second day may be allowed to go on with the elementary questions.

The questions for both classes of Engineers will be taken from the same series of elementary questions; and candidates for First-class Certificates are expected to show their superiority by giving answers more complete than those of the other candidates.

70. *Viva voce.*—Having regard to the fact that when the verbal examination is held, the candidate has already passed in arithmetic, and, if a first-class candidate, in drawing, and has also written answers to the elementary questions, the Examiners should deal with practical, rather than theoretical, questions in this division of the examination; and no candidate should be failed in the verbal examination without having been well cross-questioned on the points for which failure takes place. Candidates may, however, be failed in the written elementary paper without being examined *viva voce*. In cases where the Examiner approves of the elementary paper, but fails the candidate for lack of either practical or elementary knowledge, a written account of the points on which he failed must be forwarded to the Port Officer with the elementary papers and the Report Exn. 15.

The elementary questions to be answered on Form Exn. 15*b* are good starting points in *viva voce* examinations. With the candidate's written answers before the Examiner, the same question can be put in a way requiring the answer in another form. Each question may be developed into several according to the circumstances of the case, *e.g.*:—

1. What is made of? Of what parts does it consist?
2. What is its use?
3. What attention does it require at sea?
4. What attention does it require in port?

5. When it becomes defective, what is it that principally goes wrong with it?

6. How is it repaired?

7. What alteration may prevent a recurrence of the defect?

It is considered of great importance that Engineers presenting themselves for examination should have an extensive knowledge of the particulars of actual casualties which have occurred at sea, and be able to state how these might have been prevented and how remedied. Sometimes an Engineer presents himself who has had no personal experience of any defects, and who can tell nothing about casualties to machinery which have occurred in the experience of others: such candidates should be closely questioned as to their knowledge of boiler and engine construction and the repairs of same.

The management of engines and boilers at sea, the duties of the Engineer on watch, the work to be done to the engines, boilers and auxiliary machinery in port, and the periodical examinations of the working parts, should form part of the *viva voce* examination.

71. *Reports of examinations.*—Reports of examinations on the form Exn. 15, together with the examination papers, forms Exn. 37 and face sheets, should be forwarded to the Port Officer immediately the examinations are completed, together with the candidate's application to be examined (form Exn. 3) duly filled up, and his previous certificate, if any.

APPENDIX A.

Form to be filled up by all candidates at the examination.

Form Exn. 15-15*b*.

Port	Class for which examined
Date	Candidate's name.

A. Where and how long did you serve in works at the making or repairing of engines and boilers?

B. How long and in what capacity did you serve in works on shore other than at the making or repairing of engines and boilers?

C. How long have you served in the engine-room at sea and in what capacities?

D. With what descriptions of engines have you served at sea? What sizes were the engines?

E. With what descriptions of boilers have you served at sea?

F. What engine defects or defects to auxiliary machinery have come under your notice, what caused these defects, and how were they remedied? Give the names of the steamers for verification.

G. What boiler defects have come under your notice, what caused these defects, and how were they remedied? Give the names of the steamers for verification.

APPENDIX B.

ELEMENTARY QUESTIONS.

1. What parts of an engine are generally made of wrought-iron?
2. What parts of an engine are generally made of cast-iron?
3. For what parts of an engine is steel sometimes used?
4. What parts of an engine are generally made of brass or gun metal?
5. Where is "white metal" sometimes used? On account of what property possessed by it is it adopted? What objection is there to its more general use?
6. For what parts is Muntz metal sometimes used? Is it malleable? For what properties is it valued?
7. What difference is there in the composition of cast-iron, of wrought-iron and of steel?
8. How can cast-iron, wrought-iron, and steel be distinguished from each other?
9. What are the different properties of cast-iron, of wrought-iron and of steel?
10. What is meant by the terms "breaking stress," proof stress," "safe working stress"?
11. What is the cohesive strength, or breaking stress, of good ordinary wrought-iron?
12. Tempering steel; how is it done, and in what order do the colours come?
13. What is case-hardening?
14. Which of the common metals or alloys can be forged, and which of them are brittle or "short"?
15. What is meant by "welding"? Which of the common metals can be welded?
16. The expansion of metals by heat; give examples of this in the engine and in the boiler.
17. In the construction of steel cylindrical marine boilers, for what parts have the plates to be worked hot? What precautionary treatment of these plates is afterwards necessary?

18. In what parts of cylindrical marine boilers is the strongest rivetting employed? In which of the shell seams is it most necessary?

19. What is "caulking," and how are seams prepared for caulking?

20. Describe the different ways of fastening the ends of the main stays of a boiler. What are the merits of, or objections to, the different plans?

21. What stress per square inch is allowed on boiler stays?

22. Describe a rivetted stay, and state where such stays are commonly used.

23. Where are thin plates to be looked for in a boiler as it wears, and how is the thinness to be detected?

24. How are boiler tubes fixed? What are "stay tubes," and how are they secured?

25. Where is it generally that boiler tubes leak? How is this defect repaired? What are the causes of this leaking?

26. What are the causes of cracked tube plates? Where are the cracks situated? How are they repaired?

27. What is the difference between a "dry uptake" and a "wet uptake"? Which requires more repair? Why? Where have you seen a wet uptake?

28. What is a superheater? What is its construction? What valves are on it? There is somtimes a gauge glass on it. What is that for? Are superheaters now in general use?

29. What parts of a marine multitubular boiler are first injured by shortness of water?

30. Where are angle irons sometimes used in the construction of a boiler, and where are flanged plates used?

31. Priming; to what causes is it attributed? What means are applied to prevent it? What evils may be produced by it?

32. Funnel draught; what makes it? What checks it?

33. Flame is sometimes seen at the top of the funnel; what causes this appearance? Is it beneficial or is it detrimental? Why so?

34. A blast pipe; what is its construction? Where is it placed? For what is it used?

35. How many bottom blow-off cocks are generally fitted to each boiler, and why are they so fitted?

36. Blow-off cocks are sometimes fitted with a spanner guard; for what purpose is this? Describe how the guard is formed.

37. Water-gauge test-cocks; where are they placed? At what heights? Must the cocks themselves be at those heights? What provision is made for cleaning these cocks should they ever become choked? When there are no test-cocks, how is the height of the water ascertained?

38. What is a dead-weight safety valve? Of what are the rubbing surfaces formed? How is a lock-up valve arranged to admit of lifting it or of turning it round, and to prevent adding to the weight?

39. About what area of safety valve is now required by the Board of Trade? What is the effect of suddenly opening a safety valve when steam is up? To about what extent do safety valves rise when blowing off without being eased by hand?

40. Spring-loaded safety valves; what advantages have they that are not possessed by dead-weight valves? What are the disadvantages, if any, as compared with dead-weight valves?

41. Of what pieces does a glass water gauge mounting consist? How does it act? Where is it placed? At what height? Is it liable to derangement? How is its working tested?

42. Glass water gauges have sometimes pipe connections top and bottom; what is the object of this arrangement? Should there be cocks at the extremities of these pipes? Why? Or why not?

43. Describe a Bourdon steam gauge. Some gauges have an inverted syphon pipe below them; what is its use?

44. Why is a small cock sometimes put on the pipe leading to a steam gauge? Where should it be placed, and what error might be made by omitting to use it?

45. Do steam gauges indicate the total pressure of the steam or only a portion of that pressure? What is the pressure measured from?

46. What is meant by the salting of the boiler? How is this prevented? What is the density of ordinary sea water? How is the density ascertained? What is the difference between the formation of scale and the salting of the boiler? What is the maximum density at which boilers should be worked

at sea? In the event of condenser tubes leaking what is the minimum density at which boilers should be worked? Give your reasons.

47. Scum cocks and pipes; how are they arranged? Where are they placed? At what height in the boiler? When are they used? When must they be shut? Neglect of these cocks leads to what dangers?

48. Of what does scale consist? Where is it most objectionable? How is it removed? How is its formation prevented? What evil effects are produced by it?

49. What is a salinometer? Of what does it consist? How does it act? How it is graduated? Can it be used at any temperature indiscriminately?

50. What harm may be done through the check valve of one of a set of boilers being defective while under way? How would you work to avoid this harm?

51. How is the leak from a split tube stopped in a boiler at sea Describe the operation.

52. What is the use of dampers? Where are they fitted? When should they be used?

53. When there are no dampers fitted, what is used instead? What evil to the boiler is sometimes attributed to this? When the heating surfaces are clean does this occur?

54. Describe the piston of a steam cylinder; with its different rings and their uses. There are generally round pieces let in flush on one side of a piston; what are they? How are these pieces fixed?

55. Cylinder drain cocks; what is their use? There is sometimes a a valve upon each cock; what purpose does it serve?

56. Cylinder escape valves; of what do they consist? How protected? How regulated? When are they most needed? To what danger do they expose the engineer? What precaution is sometimes used to obviate this danger?

57. What is a compound engine? What different kinds are there for screw steamers, in respect to the number and arrangement of their cranks and cylinders? What is a triple expansion engine?

58. What is link motion? What are some of its advantages? In modern engines for the screw propeller when there is no link motion, what takes its place?

59. What is a separate expansion valve? Why is it not fitted to all engines? What effect has an expansion valve upon the starting and upon the reversing of the engine?

60. What arrangement is applied to reduce the friction of a slide valve? To what is the friction due?

61. Describe a loose eccentric; how does it act? In what engines are the loose eccentrics still employed?

62. What is the travel of the eccentric rod? How it is measured on the eccentric? What is the travel of the slide valve when the link motion is in mid gear, and the engine still moving?

63. What are "double beat valves"? What objections are there to their use?

64. What is a circulating pump? Is it always worked by the main engine? Give an example from your last steamer of the three water temperatures generally noted by careful engineers.

65. An air valve is sometimes fitted to a circulating reciprocating pump; what purpose does it serve?

66. What is the difference between a bucket air-pump, a piston air-pump, and a plunger air-pump?

67. Are double-acting air-pumps made with plungers, with pistons, or with buckets? Describe the construction and action of circulating-pumps.

68. What is an air-pump trunk? When is it necessary? How is it attached to the bucket? Centrifugal pumps: describe their construction and mode of working.

69. What class of air-pump requires both foot and delivery valves, and in what other class can either of these valves be in some cases dispensed with?

70. What are marine governors? What is their general construction? How do they act?

71. With a surface condenser and a single acting air-pump what is the effect of a leaky foot valve, and what is the effect of a leaky bucket when there is also a foot valve?

72. Where is the air-pump pet cock or valve placed? How does it act? What is its object? Does it in every case reduce the effective capacity of the pump? Is it equally applicable to double-acting pumps?

73. At what temperature is the hot well worked? What is the effect of higher temperatures? What is the effect of lower temperatures? What limits the lowness of temperature? Has a very low temperature any disadvantages?

74. Bilge injection with jet condensers; what are the fittings required? When is it used? What precautions are necessary in using it?

75. When surface condensers are used, what takes the place of the bilge injection? To what is the connection made? How is its valve formed? Why is this necessary?

76. What are the practical guides to the proper amount of opening of the inlet valve for the circulating pump?

77. Feed-pump pet cock or valve; where is it placed? What is its use? How does it act? Is it always a necessary fitting?

78. What are some of the ways of fastening the ends of surface condenser tubes? About what size and about what thickness are condenser tubes? What parts of a surface condenser are made of brass?

79. What is a blow-through valve or cock? To what is it attached? There is sometimes a valve which, when opened, admits steam from the slide valve casing to the exhaust port; what is its use? To which cylinder is it fitted?

80. What are shifting valves? Why are they generally omitted now?

81. What connexions are generally fitted to the donkey pump, and to what services can it be applied?

82. When the engines are stopped in harbour with steam up, what are to be shut and what are to be opened?

83. How is an engine heated up before starting? What precautionary examinations are made before starting?

84. What is an interceptor or catch-water? Where is it fixed, what is its construction, how does it act, and what attention does it require?

85. Describe an air-pump bucket with its valve or valves and its packing. Of what are the valves generally made?

86. Of what materials are air-pump rods made? Why?

87. What is the racing of the engine? When does it occur? What danger attaches to it? What is done to prevent it?

88. When under way, when the air-pump bucket is at the top of its stroke, at what height is the water in the condenser?

89. What is meant by the "pitch" of a screw propeller? How is it measured?

90. Explain the difference between a "right hand" and a "left hand" propeller, and state how each of them revolves.

91. What is the slip of a screw propeller? How is its amount expressed in figures?

92. Which of the valves about engines and boilers have to be worked by hand, which of them are self-acting, and which are worked by the motion of the engine.

93. Why is soda sometimes put into a boiler, and how is it put in when under way? What is the kind of soda used?

94. Tallow cups for cylinders were sometimes made with two small cocks, or with only one small cock, or with one large hollow plug cock or with one small cock and a valve; which of these is suitable for a high-pressure cylinder, and which for the cylinder of a condensing engine? Describe how the cup with only one small cock is used. What is now generally used instead of these? How has this change come about?

95. Does a cylinder escape valve, self-acting, allow all the water to escape? If not, how much is left in the cylinder?

96. What is a "Steam Lubricator" (sometimes called an Impermeator)? Explain its action. To what part of the engine is it connected? Will throwing cold water over it make it work faster or slower? Describe the one used in your last steamer.

97. A common paddle wheel; of what is the centre made? Of what are the arms formed? What is the form of the bolts which attach the floats to the arms? How are the arms attached to the centres?

98. Why have some paddle wheels one or more cast-iron floats in each wheel? With what engines are these most required? At what part of the circumference are they placed?

99. Why are paddle wheel floats sometimes made of different breadths in the same wheel? With what description of engine is this most needed? Where are the broad floats placed and where are the narrow floats placed in the circumference of the wheel?

100. What difference is there between a radial paddle wheel and one with feathering floats? What is the object of feathering floats? Are all the eccentric rods attached in the same way, and are they all of the same form?

101. Whereabout is the centre of the eccentric of a paddle wheel with feathering floats placed? In that case are the feathering levers on the striking face or on the back of the float? When the paddle shaft has an outer bearing how is the eccentric made?

102. Of what materials are the working surfaces of a paddle wheel with feathering floats? How are they lubricated?

103. What is a "Disconnecting Paddle Engine"? At what place is the disconnecting effected? How is it accomplished? In which of the cranks of a disconnecting engine are the crank pins fixed?

104. Is link motion valve-gear or the loose eccentric generally used for disconnecting paddle engines? For what steamers are disconnecting paddle engines frequently employed?

105. What are expansion joints? Where are they necessary? What attention do they require? Of what should the working surfaces be made?

106. What omission in the construction of expansion joints may lead to a serious accident when steam is first applied? How is this prevented in the construction of a steam trunnion pipe for an oscillating engine?

107. Describe an oil cup with a syphon worsted? How is the worsted arranged? How is it cleaned? How far down the tube does it extend?

108. Describe a thrust bearing; which of the surfaces wears? Why is there sometimes a number of oil tubes or one thrust bearing?

109. What parts of a screw shaft are generally covered with brass? Why is this necessary? About what thickness is the brass?

110. What is the stern tube or screw shaft pipe? Why is a pipe of such a length required? Of what is it made? How is it fixed at each end?

111. What is a *lignum vitæ* bearing? How is the wood fitted? Where is such a bearing generally used?

112. How is a screw propeller fixed on the shaft? What means are used to prevent its getting loose at sea?

113. Where are sluice valves placed? What large sluice valve is there in almost all screw steamers? From what position should this valve be worked? Why so? What attention should it receive?

114. With a condensing engine what valves or cocks are on the skin of the ship in the engine room and in the stokehold?

115. What are the necessary fittings of a marine boiler?

116. With a surface condensing engine what cocks or valves are opened some time before the engine is started so as to be ready for starting whenever the order is given?

117. What is a steam jacket? What cocks are on it? In what engines are jackets most generally used? Do they require to be felted?

118. What parts of an engine or its fittings should be felted or otherwise protected from radiation?

119. What are the small cylinders sometimes fitted on the slide valve casing cover of vertical engines? Explain their action. To what are they connected by a pipe? Why?

120. Name the principal pipes in connection with the engines and boilers of a steamer, and state to what the ends of these pipes are connected?

121. Through what cocks or valves, pipes and chambers does the water pass on its way from the sea inlet rose plate to the water space of the boiler, with a jet condenser?

122. Through what cocks or valves, pipes and chambers does the circulating water of a surface condenser pass?

123. Through what cocks or valves, pipes and chambers does the steam pass from the boiler until it is in the form of water in the hot well?

124. Name the pieces of the engine through which the pressure of the steam is transmitted from the piston to the screw propeller. Name them in the order in which they act.

125. What is an air vessel? How does it act? At what parts of an engine or of its fittings are air vessels generally applied?

126. What is the construction of a mudbox? Where should mudboxes be placed? Why are they necessary? How should the space be divided by the rose plate, and why?

127. What is a trunk engine? Why has it fallen into disuse?

128. What is an oscillating engine? For what steamers are oscillating engines generally adopted? Why? How is the steam conveyed to and from the slide valve casing?

129. Of what parts does the valve motion gear of an oscillating engine consist?

130. For what have geared engines sometimes been used? Of what were the cogs or the large wheel made?

131. At what part of a screw steamer is the pressure that propels it applied to the hull?

132. At what part of a paddle steamer is the pressure that propels it applied to the hull?

133. About how much fuel per indicated horse-power per hour is required by modern steam engines, common compound, and triple expansion?

134. What is the explanation of the economy of the surface condenser?

135. What is the construction of a surface condenser? Of what are its tubes made? How are they fixed? How are they kept tight? What is done with a split tube?

136. Where do surface condensers foul? How are they cleaned?

137. What non-conducting substances are employed to prevent radiation, and how are they applied?

138. In the construction of smoke-box doors and of dry up-takes, what provision is made to lessen the amount of radiation?

139. How can the formation of black smoke be prevented? Describe smoke preventing apparatus.

140. What is meant by "circulation" in a boiler, and what are the results of defective circulation?

141. What means are sometimes adopted to improve the circulation in a boiler?

142. By what arrangement is the circulation promoted in a "hay-stack" boiler?

143. Describe a ship's side air-pump discharge valve. In what respects does it sometimes differ from a common stop valve, and what attention does it require?

144. What is the construction of a feed escape valve, to what is its discharge connected, and how is its loading regulated? Where should the escaping water flow?

145. When there is no feed escape valve what is the arrangement of the feed valves or cocks?

146. What is the measure of a horse-power? How is indicated horse-power ascertained?

147. Has "nominal horse-power" a fixed meaning? What is the use of this expression? What is generally taken as the measure of one horse-power nominal?

148. What is "back pressure" in a cylinder? About how much is it in each of the cylinders in your last steamer? Is excessive cushioning ever a trouble under certain conditions in modern engines? Say when and why and in which cylinder this occurs.

149. What is meant by "speed of piston"? About how much is the speed of piston in modern marine engines?

150. What is "atmospheric pressure"? What is its average amount? What instrument tells this amount?

151. What is "gross pressure" or "absolute pressure"? What pressure is it that is shown by the steam gauge?

152. What is meant by "cutting off" steam? How is it done? What part of the valve regulates the cut off?

153. What is a piston slide valve? Describe its construction. Why are they frequently employed in place of the common slide valve? Have they any disadvantages compared with a common slide valve? If so, name them.

154. What fixes the time of closing the exhaust? After the exhaust is closed and before the port opens for steam, what becomes of the steam that is in the cylinder?

155. What is the "lead" of the valve? What is its object? About that amount is it?

156. What is the "cover" or "lap" of the valve? What is its object? About what proportion of the stroke of the valve is it made?

157. What is the "exhaust cover" of a slide valve? What is its effect upon cushioning and upon exhaust?

158. What is "minus cover" or "minus lap" on the exhaust? What is its effect upon the exhaust and upon cushioning?

159. What is "cushioning" or "compression" in a steam cylinder? How is it affected by the amount of cover or of minus cover there may be upon the exhaust? How is it affected by the exhaust pressure?

160. What is "mean effective pressure"? How is its amount ascertained?

161. What is a dial vacuum gauge? What is its construction? For what is it used? About what amount should it show when the engine is working all right? What effect have the variations it indicates on the performance of the engine?

162. Does the vacuum gauge enable you to tell what pressure there is in the condenser, or must you have recourse also to the barometer to arrive at that? How would you ascertain the actual amount of back pressure there is in the condenser?

163. What is a barometer? What is its construction? Is a barometer sometimes used instead of a vacuum gauge? In what respect does the weather barometer differ from the vacuum gauge barometer?

164. The common vacuum gauge and the common steam gauge, in which of them are the graduations marked from atmospheric pressure? Does either of them tell what is the true actual pressure in the boiler or in the condenser?

165. Do steam and vacuum gauges vary with the variations of the weather barometer? When the weather barometer varies from 29 to 31 how much will the vacuum gauge vary and how will that affect the working of the engine? Why?

166. Vacuum is generally stated as so many inches. What is meant by, say, 20 inches vacuum? What does that tell us about the absolute pressure of the vapour then in the condenser?

167. From what depth will a pump draw water? Is there any limit? Why?

168. What is vacuum? Can vacuum move a piston? When the temperature of the water in the condenser is 212° Fahrenheit, what is the greatest degree of vacuum there can then be in the condenser?

169. What is a thermometer? What is its constuction? What is the property of matter that is the principle of its construction? What temperatures are regularly noted by careful Engineers?

170. What is the temperature of (1) melting ice, (2) boiling water, (3) steam about 60 lbs. pressure by the steam gauge, (4) steam about 100 lbs., (5) steam about 150 lbs., (6) smoke in the funnel, (7) water in the hot well?

171. What is meant by the "conduction" of heat? Give examples of it in the boiler and in the engine.

172. What is meant by the "convection" of heat? Give examples of it in the boiler and in the engine.

173. What is meant by "radiation" of heat? Give examples of it in the boiler and in the engine.

174. Which is convection, which is radiation, and which is conduction in the following cases:—(1) Heat from the glowing fuel to the furnace crown? (2) Heat passing from one side of the furnace crown plate to the other? (3) Heat passing from the steam pipes in the engine room? The heat of evaporation?

175. What are the effective heating surfaces of a marine boiler?

176. What parts of a marine engine are exposed to danger when the temperature is below freezing point?

177. What precautions are necessary in cold climates when the temperature is below freezing point?

178. State as many ways as you can by which a boiler might not get its full feed. A boiler, or one of a set of boilers, gets short of water although the feed valve is open its proper amount; to what causes might this be due?

179. Of what are furnace bars generally made? About what thickness are they at the top? About what space is between them? Are the bars put further apart for Newcastle than for Welsh coal?

180. Which burns faster, Newcastle coal or Welsh coal? Which is the flaming coal. Which makes more smoke?

181. About how many tons of steam coal will be burnt per day in four furnaces, each 3′ 0″ wide, and of about the usual length? On what grounds do you say so?

182. About how many tons of steam coal will be burnt per day with good triple expansion engines to drive an ordinary steamer of 40 ft. beam 10 knots an hour by steam alone? On what grounds do you say so? What percentage more coal would be required to propel the same steamer one knot faster?

183. About how many tons of steam coal will be burnt per day with a good triple expansion engine, surface condensers, the low pressure cylinder 60 inches diameter, doing average work? On what grounds do you say so?

184. A pair of inverted cylinder direct acting engines, there is a liner half an inch thick between the ahead eccentric rod and the eccentric strap, in overhauling the engine this place is lost and forgotten; what difference will its omission make in the working of the engine, on the admission, on the cut off, and on the exhaust of the steam? Which will take place earlier and which later, distinguishing between the up stroke and the down stroke?

185. In a pair of inverted cylinder direct acting engines driving a right-hand screw, on which of the crosshead guide bars is the pressure greatest in the up stroke, and on which in the down stroke?

186. A screw propeller is getting loose, it has a little play on the shaft, sideways on the key or feather; how will this show in the engine room?

187. How would you prove whether the centre line of the trunnions of an oscilating cylinder be fair with the centre line of the main shaft?

188. How can the fairness of a line of screw shafting be tested without lifting the shafts?

189. Where are steel forgings generally used in marine engines?

190. What is the composition of nickel-steel? Where is it sometimes used in engines and boilers?

191. How is forced draught generated on board ship and supplied to boiler-furnaces? Is the air heated before delivery? If so, how?

192. What is "induced" draughts? Compare the merits of "forced" and of "induced" draught.

193. How is the intensity of forced or induced draught measured? What is the usual pressure employed in the mercantile marine?

194. An explosive gas is liberated from bunker coals. Usually in well ventilated bunkers this gas escapes into the atmosphere without doing harm. In ill-ventilated bunkers the gas after mixing with a certain proportion of common air has been known to explode when a naked light has been brought into contact with it. What is the composition of the gas? Where is it found, in bunkers, 'tween decks, pockets and coal shoots? How may it be got rid of as soon as it evolves from the coal? How many cubic feet of air to one of the gas forms a violent explosive mixture?

195. A lighted lamp or candle has sometimes been lowered into an apparently empty paraffin tank and produced an explosion resulting in injury to the person holding the light. What did the tank probably contain, and what produced the explosion?

196. In vessels carrying coal cargoes it has been observed that, generally speaking, the gas which escapes from the body of the coal is found more abundantly at the forward end of the hold than at the after end Why should this be so?

197. In recently opened ballast tanks, double-bottoms and boilers, a light lowered into either has sometimes been extinguished. What would, in all probability, cause this?

198. In double-bottom steamers where does the bilge water lie, and where are the roses of the bilge pipes fitted?

199. What is the advantage of a large rose over a small one?

200. Why, especially in vessels carrying cargoes liable to shift, should engine bilge suctions be fitted to both wings of the bilge?

201. In a heavily listed vessel, why is it difficult to keep steam?

202. If the engine bilge pumps get choked and water accumulates in the stokehold bilges, what effect does the water have upon the bilge boards and stokehold plates, when the ship is rolling violently?

203. In a triple-expansion engine, what spare gear do you consider necessary in the case of a foreign-going ship? Also what stores would you provide for a voyage to New Zealand?

204. What means are sometimes provided for temporarily coupling together the broken parts of, say, a tunnel-shaft? Describe the fitting.

205. Does the pressure on the thrust-collars vary with the horse-power or with the speed of the ship, or how?

206. If the holding-down bolts of a thrust-bearing should become slack, what effect would it have upon the working of the engines?

207. In an engine with three cranks, which of the three is subject to the greatest torsional stress (1) in going ahead, (2) in going astern?

208. Is it usual to make the crank shaft of a triple or quadruple expansion engine in one piece? And is the diameter of the shaft uniform from end to end? Give your reasons for the practice which obtains.

209. In a "built" crank shaft how are the webs rigidly secured to the pins and to the body of shaft?

210. There are various descriptions of donkey engines in use on board ship for pumping purposes. Some pumps are fitted with escape-valves, some or not. Why should this be?

211. Explain the function of an air vessel fitted to a feed pump. Make rough hand sketches of (1) a satisfactory vessel, (2) an unsatisfactory vessel, where, say, the air spring has been destroyed by carelessness, or has never been properly provided.

212. Should cocks or escape valves be fitted to air-vessels? Why, or why not?

213. Where, by preference, should the escape valve of a feed pump be placed? Why?

214. Scum cocks are sometimes fitted to boiler-shells at a height convenient for Engineers to manipulate when standing in the stokehold; the scum pipes in such cases are led upward, inside the boiler, to a little above the combustion chamber tops. What danger may arise from this arrangement?

215. Cocks for testing the water level of boilers are sometimes fitted within reach of the engineer who is standing in the stokehold. These may have internal pipes leading upward and terminating at various levels. Under what circumstances may these become misleading?

216. Why should the pipe which leads from the bottom of the water-gauge column to the bottom of the boiler-front, or back, be covered with non-conducting material? Why also should it never have lengthy horizontal bends?

217. In your own experience, how frequently is this pipe removed and cleared?

218. Why, even with the best of water-gauges, is it advisable occasionally to use the drain-cock?

219. Steam loops have sometimes been inadvertently made in the length of piping leading from the top of the water-gauge column to the top of the boiler. Roughly sketch such a loop and explain the danger arising from its existence.

220. Describe your method of thoroughly testing the water-gauge system to satisfy yourself that all the cocks and pipes are clear. Your answer can be written on a supplementary sheet of foolscap, which the Examiner will hand you. Hand sketches, mere lines indicating pipes, and circles indicating cocks, should be made. Identify the cocks and pipes by letters or numerals.

221. Describe the construction of a water-tube boiler, mentioning the type selected.

222. In a water-tube boiler how is an economiser fitted, and what is its duty?

223. How is the water-gauge fitted in a water-tube boiler? Are glass-gauges used?

224. The pressure of the steam in water-tube boilers is sometimes greater than at the engines. Why is this, and what percentage above the engine pressure does it amount to? How is this difference of pressure maintained?

225. Describe any automatic method of feeding water-tube boilers. Of what material are the tubes made?

226. Describe the construction of any steam turbine you are acquainted with, which is used on board ship. How is the expansion of steam effected? How many propeller shafts are employed, and how many propellers?

227. Is the same power in a steam turbine available to go astern as to go ahead?

228. Of what material are the propellers made in a steam turbine?

229. How many pounds of coal per indicated horse-power per hour are burnt with turbine engines? Name the type of boiler in use.

230. Describe one of the several classes of refrigerating machinery in use on board ship. Several types exist, one being more economical than the rest. Which is it?

231. Describe the defects to which the selected type is subject. How are the defects overcome?

232. How frequently are the parts opened out for examination? Name the parts.

233. How frequently are the condensers of refrigerating plants opened for examination? How frequently are the coils tested by hydraulic pressure? On which side of the coil is corrosion most commonly found? Why should this be so?

234. Where ammonia is used in refrigerating machinery, should the machinery by preference be isolated? Why? In reply give what information you possess bearing on the matter, naming the ships for purposes of identification.

235. Explain how the ammonia is removed from the tubes in which it is supplied, and how passed into the refrigerating machine.

236. What objection is there to the presence of water in the ammonia?

237. Describe the ammonia process of refrigeration.

238. Of what material are the parts made which are in contact with the ammonia?

239. Are escape valves fitted to the compressors of ammonia machines?

240. What is the maximum pressure found in the compressors of ammonia machines?

241. What kind of pressure and other gauges are used in ammonia machines?

242. Explain how carbonic acid is removed from the tubes in which it is supplied, and how passed into the refrigerating machines.

243. What objection is there to the presence of water in the carbonic acid?

244. Describe the carbonic acid process of refrigeration.

245. Of what material are the parts made which are in contact with the carbonic acid?

246. Are escape valves fitted to the compressors of carbonic acid machines?

247. What is the maximum pressure found in the compressors of carbonic acid machines?

248. What kind of pressure and other gauges are used in carbonic acid machines?

249. In which type of machine is brine used? What is its density? Where does it circulate?

250. Are fans for circulating air used in any of the refrigerating processes? If so, why are they necessary?

251. What means are in some cases employed for ascertaining the temperatures of refrigerating chambers without entering them?

252. What effect may the swabbing of the compressor piston rods have upon the working of refrigerating machinery?

253. What is a rectifier? Explain its use.

254. Describe the cold-air process of refrigeration.

255. Of what material are the air suction and delivery valves of a cold-air machine made? How are the valves kept on their seats?

256. How many compressors are there to a cold-air machine?

257. What is the duty of the expansion cylinder of a cold-air machine?

258. What objection is there to the presence of moisture in the air passed through the cold-air machine?

259. How is water to some extent removed from the air? What is the minimum temperature of the air?

260. What is the maximum pressure found in the compressors of cold-air machines?

261. What kind of pressure and other gauges are used in cold-air machines?

262. In refrigerating engines generally, where is the exhaust steam led?

263. Cold-air chambers on board ship are insulated. How and why?

264. Is it prudent to allow the wires of an electric circuit to pass through the insulation? Explain fully.

265. Describe the construction of a feed water-heater and give the name of its manufacturer.

266. To about what temperature is the feed water raised by passing through a feed-heater?

267. What fittings are usually placed on a feed-heater? Why are they necessary?

268. Describe any well-known ash-ejector.

269. Describe any well-known independent feed pumps.

270. Are independent feed pumps automatic in their action? Explain the action.

271. What advantage, if any, have independent feed pumps over feed pumps worked by the main engines?

272. Describe the construction of a feed-filter, enumerating its valves and cocks.

273. How can the filter be cleaned? What ingredients are generally removed when cleaning takes place?

274. What is the intercepting material in a filter made of? How is it fitted?

275. Describe an evaporator, and mention the type.

276. What fittings are necessary with evaporators?

277. How is the brine got rid of in an evaporator?

278. How may the evaporator coils be cleaned?

279. What is a dynamo? Describe its various parts. For what is it used?

280. In what respect does an electric motor differ from a dynamo? Where are electric motors sometimes used on board ship?

281. Describe a system of electric lighting employed on board ship.

282. How is the position of a fault in the electric circuit discovered?

283. What is "sparking," and may it under some circumstances (naming them) be a danger?

284. What is "short-circuiting," and to what evil may it give rise?

285. What means are employed to prevent any part of the circuit becoming overheated?

286. Describe the features of an arc-lamp.

287. Describe the construction of a glow-lamp.

288. What is the usual candle-power of the small glow-lamps in general use on board ship?

289. Define the following terms:—Ampère, volt, ohm, watt. What is the measure of an electrical horse-power?

290. Explain the uses of switches, brushes, commutators, cut-outs, field-magnets, armatures and resistance-coils.

291. Why is it desirable to fit a dynamo in a cool place on board ship?

292. What undesirable effect will ultimately occur to an electric wire, whose sectional area is constantly diminishing, say, through corrosion?

293. What danger might arise from leading electric wires through coal bunkers?

294. Is it better to lead electric wires above or below side-scuttles? Why?

295. What instruments are used on board ship to ascertain the strength of an electric current?

296. Many ocean-going steamers are fitted with hydraulic cranes, etc. Where do they obtain their power? How is the hydraulic pressure kept at a relatively constant amount?

297. Is any difficulty experienced in working hydraulic cranes in frosty weather? If so, why?

298. Describe any steam steering gear you are acquainted with.

299. When the helm is put hard over and the ship is going full speed ahead, what prevents the rudder returning to the amidship position.

300. In the case of a steam-ship under way does the officer or man manipulating the steam steering wheel overcome any resistance exerted by the rudder?

301. Explain clearly what is being done by a helmsman manipulating the wheel of a steam steering engine.

302. Is there any difference between the amount of horse-power required to put a helm hard over, in a given time, when the vessel is going full speed ahead, and when she is going full speed astern? This question refers to the case of a steamer fitted with one rudder only, and demands a more complete answer than merely "yes" or "no."

303. What precautions should be taken before removing a manhole-door of a steam boiler? In the absence of such precautions what casualties might occur.

304. Describe the chief features of the engine-governor fitted to a steamer you have served in. Describe its action, give the maker's name and name of ship.

NOTE.—The following six questions refer to oil-motors fitted to launches which carry passengers :—

305. Name the principal parts of an oil-motor, and briefly state their functions. Give the name of the makers of the motor.

306. What kind of oil is usually employed in oil-motors? What is its flash-point? What is its specific gravity? What is its calorific power? What precautions are taken in its storage to guard the public against the casualty by fire or explosion?

307. How many cylinders are generally used in oil-motors? What kind of pistons are fitted? How frequently (measured in revolutions) is explosion per cylinder effected? How is explosion in the cylinder carried out?

308. Describe how an oil-motor is started. If starting proves difficult, where would you chiefly look for defects? How is piston speed modified? How is the speed of vessel varied? How is reversing effected?

309. Before examining an oil-motor with a naked light, what steps should be taken for safety's sake?

310. How frequently should an oil-motor working 12 hours a day be opened up for examination, cleaned, and its parts re-adjusted? What difficulty arises when the internal parts become foul with carbonized oil?

NOTE.—Questions should be read in the light of their context. Thus the "sparking" referred to in question 283 relates to the sparking in an electric lighting circuit on board ship. (*See* question 281.)

APPENDIX C.

EXAMINATION IN ROUGH WORKING DRAWING FOR A FIRST-CLASS ENGINEER'S CERTIFICATE OF COMPETENCY (Form Exn. 17).

1. The regulations in regard to the qualifications of a candidate for a First-class Engineer's Certificate of Competency specify that—

> "He will be required to make an intelligible hand sketch, or a working drawing of some one or more of the principal parts of a steam engine, and to mark in, without a copy, all the necessary dimensions in figures, so that the sketch or drawing could be worked from."
>
> "He must be able to state the general proportions borne by the principal parts of the machinery to each other."

2. In accordance with these clauses, a candidate for a First-class Certificate is required to make a rough working drawing of the parts specified as on page 51. An Engineer who has been some years in charge of marine engines and boilers ought to have familiarly in his mind the general construction of at least one set of engines and boilers, say that set he was last with. Fine drawing is not expected, and in the proportions of the parts a wide margin will be allowed; absurd dimensions will entail failure in practical knowledge.

3. The drawing must, however, be practically a working drawing, giving a sufficient number of views to show the parts fully—sections, plans or elevations, just as the candidate would require to be supplied to him if he had to make the parts represented to the design of another person.

4. A clear hand sketch showing the construction completely, and fully dimensioned, will be accepted if the candidate prefers this alternative.

5. A portion only of the parts specified may be accepted in place of the whole, if that portion is sufficient to show that the candidate has a good practical idea of the construction of the parts, and a fair notion of their general proportions or dimensions.

6. Candidates are cautioned not to put on paper what they have not fully considered, and deliberately intend to be understood, as evidence of what they know about the construction of any part required.

7. The statements given in by a candidate may be in themselves, apparently, of little importance; but, as sample material from which the extent of the candidate's knowledge of engines and boilers is to be inferred, every detail which is glaringly inconsistent with a sound knowledge of the use of the part, or in which an essential consideration has evidently been overlooked, is an important element in the description which the candidate is giving of his own qualifications.

8. The candidate is advised not to begin more than he can clearly finish in the time allowed. An important object in this part of the examination is to ascertain whether the candidate can be trusted to mark all necessary dimensions upon a sketch or a drawing. The test of this is, practically, the making of the part from the sketch without having to supply additional dimensions, and without measuring the drawing. To prove this ability the candidate must fully dimension the parts shown in his sketch or drawing, notwithstanding that the parts may be correctly drawn to scale. A drawing is fully dimensioned when no part of it is left to the option of the party who is to work to the drawing.

9. To prevent misunderstanding, however, when the candidate has been led into showing more of the details than he has time fully to finish, he should name, in the statement on the other side, the particular parts which he has not fully dimensioned.

10. All dimensions should have lines and darts, to indicate distinctly the points between which the dimensions are given.

11. Beware of writing cross dimensions upon centre lines, or upon longitudinal dimension lines. This is not an order but a recommendation.

12. The candidate is not expected to design anything; he has merely to sketch or draw something with which he has expected to be already familiar. At the same time he should call attention to any defect in the design of the article or apparatus. Omission to do so will imply want of practical knowledge.

13. Pencil in noting after half-past 3; all the dimensions, the figures, and the drafts must be inked in; employ the remaining time in examining the drawing and in inking in any figure which may have been before overlooked, and in checking the dimensions.

14. Make sure that you will have sufficient room on the drawing sheet to show all the necessary views. You can have another sheet of drawing paper if necessary. All the paper used must be forwarded with the drawing.

SUBJECT FOR EXAMINATION IN ROUGH WORKING DRAWING.

(Form Exn. 17a.)

(Specimen.)

Read the foregoing general instructions.

A common slide valve with its spindle. Show also an outline section of the parts at the cylinder face. Show the provision for connecting the slide valve to the spindle.

The candidate is requested to fill up the following, and to attach this paper to his drawing.

STATEMENT BY THE CANDIDATE.

The accompanying drawing, made by me this day, without referring to any document, and without the assistance of any person, is intended by me to be sufficient for the new construction of the parts above described to fit the places of similar parts which are to be removed. The construction is

APPENDIX D.

READING THE WATER-GAUGES.

Notwithstanding that the reading of the water-gauge is made a special feature in the examination of Engineers, many boiler casualties result from the Engineer of the watch either not understanding the construction of the water-gauge fittings or not satisfying himself by actual trial that the cocks, pipes, etc., are clear.

In one case, two furnace crowns came down in a steamer that was just starting on a voyage. The Engineers were satisfied that there was plenty of water in the boiler because the water-gauge showed full glass, and they called the attention of a Board of Trade Surveyor to this fact as being conclusive evidence that the casualty could not have resulted from shortness of water. On examination of the fittings, however, it was found that the cock between the boiler and the steam pipe leading to the gauge was shut, having been carelessly left in that position on the previous day when the mountings were overhauled for survey. Directly the cock was opened the water disappeared from the gauge glass, and the Second Engineer admitted that he had blown down the boiler in order to lower the water level, as the glass was full.

Many steamers have had their furnaces brought down at sea in a similar manner to the above through what the Engineers of the watch have called "false water in the glass," and which on examination has been found to result from the top communication being choked.

These casualties resulted from what, to say the least, was bad management, not false water.

Unless a candidate under examination is able to prove that he understands how to verify the indications of the water-gauge, he should not be passed in practical knowledge and, as failure in practical knowledge involves the candidate going to sea for another three months before being eligible for re-examination, the Examiner should explain to such candidate his error, after failing him, in order to prevent further casualties resulting from his want of knowledge on this subject.

The sketches, Figures 1, 2, 3, 4 and 5, Plate I, represent the usual methods of attaching water-gauge mountings to marine boilers. The important features in each gauge and the method of verifying its indications are dealt with separately in the following remarks :—

REFERRING TO FIGURE 1 ONLY.

In this case the water-gauge cocks are attached direct to the boiler, and the accuracy of the gauge when the boiler is under steam can be tested as follows :—

First.—Let B remain open, then close cock D and open cock E, and if steam issues it proves that cock B and the passage through the top fitting and gauge glass are clear. If no steam or water issues, either cock B or the passage through the top fitting and gauge glass is choked and the gauge cannot act properly until the obstruction is removed.

Second.—Close cock B and open D and E, and if water issues, cock D is clear. If no water or steam issues, either cock D or the passage from the boiler through the lower fitting is choked and must be cleared before the gauge can act properly.

REFERRING TO FIGURE 2 ONLY.

In this case the gauge cocks are attached to a bent pipe of comparatively large diameter (at least 3 inches in the bore), the upper end of which communicates with the steam space, and the lower end with the water space of the boiler. Owing to the bore of the pipe being large it is not liable to become choked or stopped under the ordinary conditions of working. The water-gauge is, therefore, in practically the same condition as if it were attached direct to the boiler, as in Figure I. This gauge, when at work, is tested in precisely the same manner as the one shown in Figure 1.

Screw plugs are inserted at P.P. and Q.Q., by the removal of which the apertures in the pipe can be cleared, if necessary, by the insertion of a wire or rod when steam is down.

REFERRING TO FIGURE 3 ONLY.

In this gauge there is an open communication from A to C through the column Y, and in order to "blow through the *glass*" it is only necessary to shut cocks D and B alternately keeping E open. But to "blow through the *water-gauge*," including the pipes H and I, it is necessary, after blowing through the glass as described above, to shut A and C alternately, at the same time keeping B, D and E open for such time as will ensure the complete discharge of the contents of the gauge and its connections. When B, D and C are clear and A choked the steam lodging in the glass and in the pipe I leading from column Y to A becomes condensed and the water flowing through C to take its place rises in column Y and in the glass to a level above that of the water in the boiler. In other words, the gauge shows a false level. If now E be opened and water is blown out, then on E being again closed the water in the gauge will rise higher than before and be still further misleading. On the other hand, when B, D and A are clear and C choked, the water, if any, in the glass is trapped and no longer rises and falls with the water in the boiler or with the motion of the vessel; it, however, slowly rises in the glass owing to the condensation of the steam in the upper part of the gauge until such time as E is opened when the whole of the water in the glass is blown out, and on E being closed the glass does not show any water notwithstanding that the water in the boiler may be at the proper level. When the test cocks T T T are attached to column Y, as shown in Figure 3, they cease to be reliable when either

cock A or C or the pipe in connection therewith is choked, or nearly choked.

REFERRING TO FIGURE 4 ONLY.

Sometimes the water-gauge fittings are arranged as shown in Figures 4 and 5, with no passage up the column, the central portion (N) of the column being simply a pillar or connecting piece of any convenient section between the upper and lower portions to which the cocks B and D are attached.

By this arrangement double communications are obviated and there is no need for what is known as "double shut off" in testing the accuracy of the gauge. When, however, the gauges are constructed in this manner the cocks B and D are unreliable as test cocks in the event of there being no glass in the gauge. This feature should be carefully noted. Moreover, when in working condition the reduction of pressure in the glass which arises when E is opened causes the water in pipe H to rise above its normal level. This objectionable feature should also be noted.

REFERRING TO FIGURE 5 ONLY.

Sometimes there is a bend, L, in the steam pipe, I, leading from cock A to cock B. This has occasionally escaped observation when new boilers have been fitted on board ship. In most cases this bend arises from the pipe being led in an abnormal direction to escape other pipes, beams or fittings near the smoke box. With such a bend the condensed steam collects in the pipe and falls to the bottom of the bend, and in time it completely fills the pipe from J to K. The steam from K down to the level of the water in the glass is thereby trapped and, as condensation proceeds, leads to a reduction of pressure in the pipe below that of the boiler and an equivalent rise of the water in the bend and also in the gauge glass. When the vessel is quiescent the water in the gauge glass increases in height until cock E is opened or until the pressure in the boiler is so much in excess of that in the lower part of pipe I, as to cause the water in the bend to be blown into the gauge glass. In either case instantaneous change to water level in the glass ensues.

In the ordinary course of working the phenomenon described above is more or less modified by the presence of air in the upper part of the gauge and by the rise and fall of the water in the boiler and gauge glass arising from the rolling or pitching motions of the vessel.

OTHER SPECIAL POINTS TO BE NOTED.

When the cocks A and C are omitted, as in Figure 2, it is owing to the bore of the stand pipe being sufficiently large to enable it to be regarded as part of the boiler. Such pipes require, however, to be examined and cleared at intervals by passing a rod through the holes provided for the purpose at P.P. and Q.Q.

Cocks at A and C are not necessary for the testing of gauges arranged as shown in Figures 4 and 5. Examiners ought, however, to make sure that candidates are aware of the impossibility of testing the reliability of the indications of water-gauges arranged as in Figure 3 when the cocks A and C are absent and of the effect which the choking of cock A or C, or pipe H or I has on the indications of the test cocks T. T. T. attached to column Y.

Probably more than half the steamers afloat are fitted with water-gauges as shown in Figures 3 and 4, and it is therefore specially important that engineer candidates should thoroughly understand their construction, the principle on which they act, and the steps which must be taken to keep them in an efficient condition.

When fitting a gauge glass into its place it is specially important that it should not be placed so high as to prevent a clearing rod being inserted at G, Figures 1, 2, 3, 4 and 5. This defect, especially if it occurs in a water-gauge attached to a boiler subject to priming, permits a rapid accumulation of scum around the top of the glass and results in the choking of the orifice leading from cock B to the gauge glass in each of the figures.

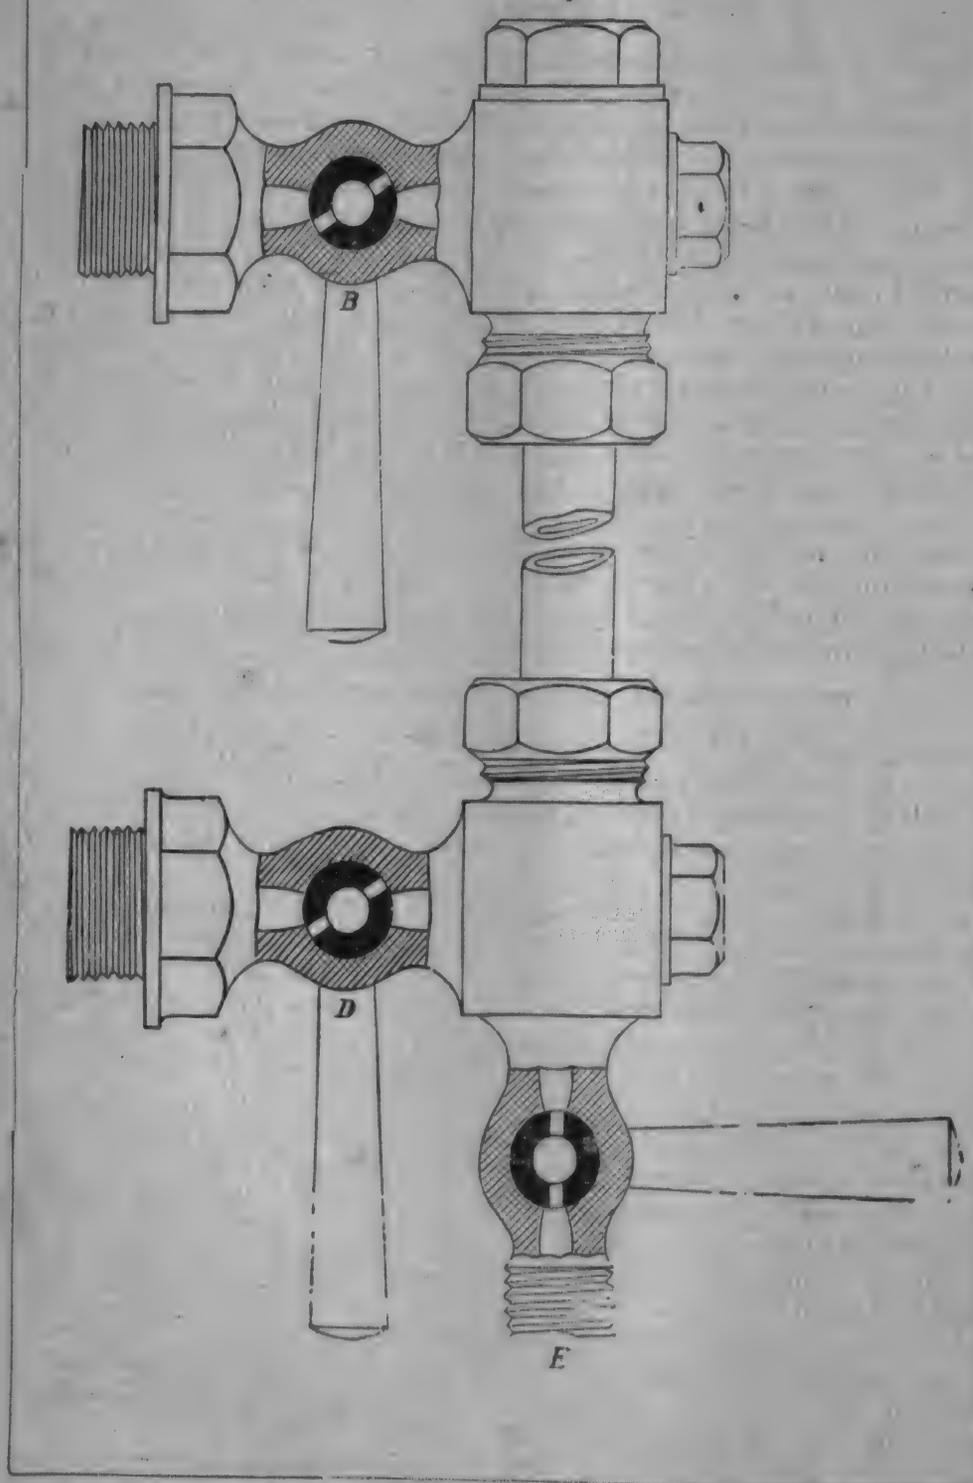
When a gauge glass is too short or is placed either too high or too low in the fittings, it is also liable to become choked by the packing material being forced over its ends by the glands whilst being screwed up.

The use of unsuitable or insecure internal pipes in connection either with the ordinary glass gauge cocks of the description shown in Figure 1, or with test cocks which are jointed to the boiler itself should also be carefully guarded against.

Boiler casualties have resulted from the cocks B and D having the parts wrongly placed as shown in Figure 6, Plate II. In one case of that kind

To face page 30. **Plate 2.**

Fig 6.



which forms the subject of Report No. 208 under the Boiler Explosions Acts, the Engineer in testing the water-gauge omitted to see that the passages in the cocks B and D were clear *when the handles were in their proper working position*. This defect could easily have been discovered if proper attention had been paid to the condition of the cocks. A defect of this nature may be due to faulty construction originally, or to the handle of the cock having been overstrained, and the neck twisted. Whether the passages in the plugs are fair and clear can, however, be verified in a few minutes. As an illustration, the water cock D, Figure 6, Plate II, can be verified by blowing through E with B shut and then moving the handle of D to one side until it is just closed, and then to the other side until it is again just closed; the proper working position of the handle is about equally distant from each of the above positions. The other cocks can be verified in the same manner.

Another serious casualty occurred through the handle of the cock A, Figure 3, having been twisted from its original position relatively to the orifice of the cock, resulting in the cock being shut when apparently open.

When a water-gauge, that is clear in all its parts, has been thoroughly blown through, the water in the glass rises above the level at which it formerly stood, immediately the drain cock E is closed, but if left undisturbed for a time it gradually falls to its former position. The amount of rise which occurs on these occasions depends chiefly on the temperature of the contents of the boiler and on the length of the pipes by which column Y is connected top and bottom to the boiler, but in cases where the gauge is of the description illustrated in Figures 3, 4 and 5, it amounts in high pressure boilers to about 4 inches, while the time occupied by the water in returning to its former level ranges from 30 to 40 minutes. The cause of this rise is twofold, namely, (*a*) the displacement of the comparatively cold water in pipe H by hotter, and proportionately lighter water from the boiler, and (*b*) a slight condensation of the steam and a corresponding fractional reduction of pressure in pipe I. The cause of the gradual subsidence of the water in the glass to its former level is also of a dual character, namely, (*a*) the cooling of the water in pipe H, and (*b*) the diminution in the condensation of steam in pipe I owing to the collection therein of air released from the steam condensed.

These results will, however, be somewhat modified if the water in the boiler is of higher density than in pipe H, and this will nearly always be the case owing to the condensation of the steam in the glass and upper fittings of the water-gauge, causing the water in the lower part to be fresher than that in the boiler.

The Examiner should impress upon candidates the necessity for periodically blowing through the water-gauge on each boiler (no matter what the form may be) in a systematic and thorough manner, and, in cases where a boiler is fitted with two water-gauges, of keeping both in constant use; finally, he should further impress upon them the necessity for keeping the water-gauges well lighted, clean, and in all respects efficient.

APPENDIX E.

DANGERS ATTENDING THE EXISTENCE OF A VACUUM IN BOILERS.

The attention of Examiners of Engineers is called to the following report relating to a fatal accident to an Engineer on board a British ship, and they are requested to see that all candidates for Engineers' certificates realise the danger of removing a manhole door without taking the necessary precautions:—

Board of Trade Surveyors' Office,

79, Mark Lane,

London, E. C.,

December 1st, 1898.

SIR,

WE beg to report that in accordance with your instructions we visited the S.S. "Elderslie," O. N. 89929, and enquired into the cause of the death, at Smyrna, of Ernest Marshall, Third Engineer of that steamer, on the 15th October 1898.

The "Elderslie" is a screw steamer, built in 1884, of 2,761 tons gross and 1,801 tons net register. The engines are compound, direct-acting, and there are two double-ended boilers of the usual marine-type, each boiler having six furnaces, three at each end, W. P. 90 lbs. Mr. E. Marshall, the Third Engineer, was found dead in one of the boilers under circumstances which are not readily understood.

The Chief Engineer, Mr. Bishop, repeated to us a statement which he had previously made, and he was corroborated, so far as his personal knowledge went, by the Second Engineer, and also by a Greek fireman, Spiloni, and the other firemen in the engine-room and stokehold at the time. It is clear that on the vessel's arrival at Smyrna on the 14th October, after the fires had died out, the boilers were blown down between 5 and 6 P.M., and, by the instructions of the Chief Engineer, the Third Engineer proceeded at 7 A.M. on the following morning to take the manhole doors off. (The manholes are 16¼ inches by 12¼ inches, and are in the end plate at the after end of the boiler.) He was assisted by Spiloni, who was usually detailed to work with him, and who says that one nut and one dog or cross-bar had been taken off the door, and the other nut started, when the Third Engineer sent him to prepare to take the door off the manhole of the other boiler. Spiloni left the Third Engineer, went down a ladder into the stokehold, across the stokehold, up another ladder to the starboard boiler, and immediately afterwards, hearing a loud report, went back to the port boiler where he had left the Third Engineer, and saw nothing but that the door was off and not in sight. What happened in the interval between this fireman leaving the Third Engineer and his return in a few minutes can only be reasoned out from the conditions and circumstances of the case as there is nothing definitely known.

The Engineers and Engineers' crew were at this time engaged as follows:—

Chief Engineer on deck.

Second Engineer in engine-room at H.P. cylinder; one fireman with Second Engineer; one fireman with Third Engineer; four firemen cleaning engines, and two trimmers cleaning tubes in boilers.

The Second Engineer in the engine-room heard the report—he says about 7-15 A.M.—and describes it as being like the sound caused by coal falling in the bunkers. The Chief Engineer knew nothing until informed that the Third was missing. Spiloni and others had been looking about and inquiring for him. The Chief joined in the search and finally went to the manhole, when he noticed that the door was off, and not to be seen. He states that the boiler was so hot inside that he could not keep his hand in, and that on trying to put his head in the manhole he found it impossible to do so. Hot vapour was coming out of the manhole. His first thought was that the Third Engineer had allowed the door to drop into the boiler, and, attempting to get it out, had gone into the boiler, and been overcome by the heat. He tried to look in with lamps, etc., but could not see anything. He then got the bottom doors off, first the after bottom door and then the forward one. He could not see anything through the after door, but on looking in the forward bottom door he saw blood on the sides of the furnaces—that is, he explains there was some fresh blood as if running down on the side of the centre and wing furnace near to the forward end of the boiler. This was at 7-45 A.M. The boiler was allowed to cool down and in about four hours the body of the Third Engineer was got out. It was found lying on two of the longitudinal stays close to the forward end plate and opposite the manhole. The door was found on the top of the tubes almost underneath the body, and one of the dogs beside it—both of the studs in the door were bent and a small piece of rope was fastened to one of the studs. A spanner was found on the top of the combustion box girders—that is half-way between the manhole and the position of the body, and a lamp, hammer and chisel and broom-head or brush were found in the bottom of the boiler. When the body was got out it was found that the skull was factured, and that the skin, where exposed, peeled off when rubbed. A surgeon certified that the skull was fractured, but does not appear to have examined the whole body, contenting himself with seeing sufficient cause for the man's death. The Master, however, says that the arms and the shoulders looked to him as if seriously injured or broken, and that there was a deep mark on the forehead and the clothing torn in places.

The foregoing statement contains the important points of the case so far as we can gather them. We both have entered the boiler, examined the manhole and door, had the exact position where the body was found pointed out, and also that of the door, etc., and spanner. The whole story appears straightforward and is easily realised, but the causes which brought the body of the Third Engineer to the position where it was found are not so readily explained. Accepting the statements of the Master, Engineers and firemen (and we have no reason for doubting them), it is clear that the Third Engineer either (1) got into the boiler of his own accord, (2) was put in by others, or (3) met his death accidently by causes unforeseen and unnoticed, and which no one contributed to, except himself, and that unknowingly. The first two causes must, it appears to us, be dismissed—the position of the body and the statement as to the high temperature of the boiler and other reasons rendering them absolutely inadmissible; and after considering the whole circumstances of the case, we are of opinion that the death of the Third Engineer was brought about in the following manner:—

The boilers were blown down and left, neither safety valves nor cocks were opened (the Chief Engineer says he gave instructions to open the gauge cocks, but found them shut), so that when the steam condensed there would be a vacuum in the boilers. The manhole is in the after end plate; there is a small platform almost in a line with the door. The deceased took off both the nuts without starting the door, one dog was taken off, the other turned partly round, a piece of small rope (which the Second Engineer says was very weak stuff) was fastened to one of the studs of the door and to the gauge glass stand. He then stooped down in almost a lying position, probably holding the door by one of the studs, or by the rope, with one hand, and perhaps tapping it with the spanner in the other hand, when the door started, was suddenly driven inwards by the pressure of the atmosphere with great force, the rope broke, and the deceased, involuntarily tightening his grip on the stud or rope, was drawn into the boiler—the inrush of air assisting this movement, as his body became near to or partly filled the hole—and he was propelled with such violence as to fracture his skull on the other end of the boiler, or it may be by striking the plate at the manhole as his head was entering it.

This explanation, which from its singularity may at first appear somewhat doubtful, is the only one which we think fits all the known facts of the case, such as: the short interval which elapsed between the time when the fireman Spiloni left the Third Engineer and his return to the manhole; the short time from starting work at 7 A.M. until the report was heard 15 minutes later; the sudden disappearance of the Third Engineer; the condition and position of the body when found, the position of the door, spanner, etc.; and also the high temperature of the boiler.

It certainly appears extraordinary that a man could be drawn into a boiler through a manhole with such force as to fracture his skull on the end plate, 16 feet from the hole, and in a direct line with it, but the stays would form a sort of guide to keep the door and body travelling in a horizontal and direct line, and it may be added that the deceased was not a big man. He is said to have been about 10 stone in weight and 5 feet 5 inches high. It can be seen by examination of the small platform at the manhole that the occurrence is at least quite possible. At any rate, unless the whole story is disbelieved, a manhole door weighing 85 lbs. was found along with the body of the Third Engineer, close to the end plate furthest from the manhole, and had been in that position for some hours and from a time when the condition of the boiler was such that no one would have entered it, or could have lived therein.

We wish to add that, although death under the above circumstances is probably unprecedented, the violent inrush of a manhole door due to vacuum in the boiler has been frequently experienced. A case somewhat analogous occurred in one of the steamers of the———Line, which hearing about, we inquired as to the facts from the Superintendent who kindly sent a letter describing the case, a copy of which is given below.*

We have inquired in reference to the circumstances of this case of the Master, First and Second Engineers, Spiloni, and the other men. The firemen are Greeks and understand very little English. The present Third Engineer, who is a native of Smyrna, and can speak English and Greek, acted as interpreter.

The area of the manhole, 16¼ inches by 12¼ inches, is about 156 square inches, and assuming a temperature of about 180 degrees in the boiler, there might exist an external pressure of 7 lbs. per square inch, which, if suddenly

applied, would exert a force of 1,092 lbs.—at any rate sufficient force would be exerted to set up a high velocity on the door when suddenly relieved.

* *Copy of letter above referred to.*

Referring to our conversation this morning, relative to the death of an Engineer in a boiler on board a British steamer at Smyrna, it affords me some pleasure to give you the details of an almost similar occurrence on board one of the steamers of the——Line some few years ago They are as follows:—

The vessel arrived on a Saturday evening, and it being necessary to get the men in the boiler at the earliest possible moment for cleaning purposes, one of the junior Engineers was ordered to the ship on Sunday morning. His instructions were to pump the remaining water out of the boiler, and he did this without admitting air. So far as we were able to gather at the time, it seems that the Engineer, together with a Chinese fireman, went to take off the lower manhole door. This door was some few inches above the stokehole floor, and, as is the usual practice of Chinamen, the fireman assumed the "squatting" attitude. He was left to himself to remove the nuts and dogs of the door, and when he had done so, he started the door, and was instantaneously drawn in towards the boiler, his stomach practically closing the aperture, and the door swinging to the back of the boiler with a loud report.

Hearing the fireman's cries, the Engineer opened the gauge cocks in order to admit air to the boiler, whilst the fireman in the meantime suffered great agony, being pinned in this position until the vacuum was destroyed.

When the matter was reported to me the next morning, I saw the fireman, who complained of internal injuries. These, however, do not appear to have been of a severe nature, as the man was able to resume his work in a few days.

APPENDIX F.

EXAMINATION OF MASTERS AND MATES IN STEAM.

These examinations are provided for the purpose of giving Masters and Mates who are possessed of Certificates of Competency an opportunity of undergoing a voluntary examination as to their practical knowledge of the use and working of the steam engine. The Examiners are appointed by Government.

The examination is open to any person who holds a certificate of any grade in the Foreign or Home trade or as Master of his own pleasure yacht. Candidates should fill up the form of application, Form Exn. 2, at the Port Office, pay the fee of Rs. 15, and deposit their certificates and testimonials with the Port Officer, who will inform the applicant when and where to attend to be examined. If the candidate fails to pass his certificate will be at once returned to him.

If he passes, the report (Exn. 15) will be sent to the Port Officer, and the certificate, together with the Form Exn. 2, will be sent to Government. The words "Certified to have passed in steam," with the date and place of examination, will then be entered on the certificate and its counterpart, and the certificate will be sent to the Superintendent of the Mercantile Marine Office of the port named in the Form Exn. 2, and be delivered to the candidate in the usual manner.

If a candidate fails he may not present himself for re-examination until the expiration of three months from the date of failure.

The examination is for the most part *viva voce* and extends to a general knowledge of the practical use and working of the steam engine, and of the various valves, fittings and pieces of machinery connected with it, and of the way in which electric lighting is carried out on board ship. Theoretical questions on calculations of horse-power or areas of cylinders and valves, or any of the more difficult questions relating to steam-engines and boilers, will not be asked.

Examiners are to satisfy themselves that the candidates know the names and understand the uses of the various parts of engines and boilers, and their connecting pipes, valves, cocks, etc. Practical knowledge, as distinguished

from theories and abstruse calculations, is to be the test of the candidate's fitness to have his certificate endorsed.

The Examiner should arrange to conduct part of the examination in the engine-room of a steamship, unless from circumstances he finds it impossible to do so; but in the event of the candidate passing, the Examiner should state in writing what circumstances prevented a visit to an engine-room. If an opportunity offer, the candidate should be permitted, under the guidance of the Examiner, to start and stop the engine of some vessel which may have her steam up.

The Examiner, in sending in his report of the examination, should state where the examination has been held.

Candidates will be required to give written answers to sixteen out of twenty questions taken from the elementary questions printed in Appendix B. These questions will be altered from time to time without notice. The twenty questions are not to be difficult, theoretical, or book questions, but are to be such as any man of ordinary capacity, who has any practical knowledge of the use and working of the steam engine, ought to answer.

These questions with the candidates' answers should be sent to the Port Officer with the reports after each examination.

If a candidate refers to any book or paper or memorandum, or obtains information from another candidate or any other person during the examination, he will be treated as having failed, will forfeit his fee, and will not be allowed to be re-examined for a period of three months.

The Examiners will report, in the case of failure, the nature of the question or questions that decided the failure, or the point in the management of the engine in which the candidate was deficient.

There is nothing in the regulations requiring that applicants for the voluntary examination shall have served on board steamships. All that is required is that they shall have a practical knowledge of the use and working of the steam engine. Examiners will not fail to appreciate the fact that practical knowledge is best gained in the engine-room; and the examination of an officer who does not produce official evidence of service in steamships, and of experience of engines, must necessarily be more searching than in the case of one who produces evidence of such service and experience.

Examiners will require all candidates to fill up a Form Exn. 15*b*, and they will forward it to the Port Officer with the report of the examination.

Masters and Mates may cancel questions A, B and C, but they should fill up the form for questions D, E, F and G as evidence of their practical knowledge.

A candidate for this examination is required to have a thorough grasp of the construction of the steam engine and boiler to enable him, in the first place, to understand the nature and importance of any defect which may be reported to him by the Chief Engineer, and so that he may work in harmony with him in affording time and facilities for disconnexions, inspections, adjustments and repairs;

to have a looking-on knowledge of what the principal repairs are about engines and boilers and pipes, and how these repairs are accomplished;

to be able to form an independent opinion as to a breakdown, and the consequent propriety or impropriety of proceeding under steam with temporarily repaired or defective machinery;

to understand how to estimate approximately the reduction of fuel required for reduced speed, and consequently to sanction such reduction of speed as may seem to him to be warranted by the report of the Chief Engineer, and to satisfy himself before leaving port that there is sufficient coal for the voyage;

to have an intelligent grasp of the general run of pipes and connexions in the engine-room, the marking of cocks, the opening and closing of cocks and valves, how mistakes of importance may be made in the confusion of an accident, and how best to guard against such mistakes;

to be capable of being left in charge of the feeding of a set of boilers, to understand the working of the water-gauge, and to be able to guard against being misled by false indications of the gauge glass;

to understand about blowing down and surfacing, the reasons for doing so, and the danger which may result from the neglect of these under certain circumstances.

A Master or Mate presenting himself for examination in steam must be understood to have made up for his want of practical experience by reading up about the steam engine. He ought, therefore, to show that he has given his mind to intelligently understanding the *rationale* of the action of the

steam engine. Under this head he should, therefore, be able to state approximately the quantity of heat required in the formation of steam, the remarkable relation of "latent" heat to "sensible" heat, how much steam can be raised by the combustion of one pound of coal, what horse-power measure is, what indicated horse-power is, what is the action of the slide valve, the course of the steam through the engine, and the advantage of working expansively, and how the expansive action is shown by the indicator diagram. To know the uses of the various parts of the engines and dynamos used for electric lighting, and how they and the cables are fitted in the hull; how wires are jointed, insulated, and cased; why it is desirable that they should be led along places which are dry and accessible; what is "short circuiting," and what are the causes which produce it; what is its danger in coal bunkers and petroleum carrying steamers; what are the uses of switches and cut-outs, and why is it so important to prevent short-circuiting taking place.

The candidate has to answer in writing 16 out of 20 questions selected from the Elementary Questions (*see* Appendix B).

Selections for this examination are given on the alphabetic sheet for "Steam." Generally, these answers are given by candidates as learned by rote from a book; the candidate should therefore be asked such *viva voce* questions as will necessitate his giving his answers in different words, so as to discover whether he has the root of the matter in him.

The principal part of the *viva voce* is the examination on board a steamer, preferably one with which he is unacquainted. He is told to look about and try to find out the run of the machinery without the assistance of anyone; the Examiner to be in the engine room to see that this independent examination is properly carried out. When the candidate reports that he thinks he knows the whole arrangement of the machinery, the Examiner will then question him on the uses of the parts, get him to point out the different cylinders, pumps, valves, condenser, etc.; also the dynamo, its field-magnets, armature, commutators, brushes, cables, etc. He must show that he understands the run of the pipes in the bilges, not necessarily that he has gone over every one of them, but he ought to be directed to trace, at least, one important range of pipes, and to thoroughly satisfy the Examiner that he could be safely trusted to manipulate the valves or cocks in connexion therewith. It will not often be practicable for the candidate to be asked to actually work engines under steam, but he must satisfy the Examiner that he knows how to do so, and that he is aware what precautions have to be taken in regard to water in the cylinder, etc. It is most important that a candidate should show that, in the event of an accident depriving him of the assistance of Engineers, he knows what to do to safely take his vessel to an anchorage, or to stop the engines and proceed under sail alone.

The examination of a Mate in steam is the same as that of a Master. The knowledge required has no reference to the Mate's position. A Mate may be examined, but such examination implies that the Mate will one day be a Master, when the possession of the knowledge will be an advantage to him in the discharge of his duties as Master.

LIST OF COLONIAL CERTIFICATES ISSUED UNDER ORDER IN COUNCIL, which are of the same force as those granted by the BOARD OF TRADE.

* *Handbill 300.*—The Board of Trade have decided to accept time spent by candidates for certificates of competency as Engineer in attending evening classes in Engineering at approved Technical Schools in lieu of a portion of the period of workshop service required by the Board's Regulations for the Examination of Engineers. Such time will be allowed to count under the following conditions:—

1. Each candidate claiming an allowance for time spent in attending evening classes at a Technical School must produce a certificate signed by the Principal of the School to the effect that he has attended regularly at a definite class or classes which should be specified, and has made satisfactory progress. This certificate must also state the total number of hours spent by the candidate in attending each class.

2. Time spent by the candidate in attending such classes as have a direct bearing on the training of a Marine Engineer will be reckoned at the rate of five hours to one day. The total number of days so obtained will then be accepted in lieu of a certain fraction of the same period of workshop service. This fraction will be fixed for each school at the time of approval, and will generally be two-thirds.

3. A candidate who has attended a Technical School in the evening while being employed as an apprentice or journeyman Engineer during the day must, in order that the School time may be accepted, produce satisfactory proof that he has spent the full working day in the works at which he is employed before attending the School. Such proof will usually take the form of a statement in the testimonial as to workshop service given by the employer.

4. Allowance will only be given for classes attended after the candidate has reached the age of 15.

Applications for the approval of the evening classes of Technical Schools desiring recognition (including those whose day classes are already approved) should be made to the Assistant Secretary, Marine Department, Board of Trade.

† Afternoon classes also count in the same proportion.

‡ Time spent by students of the Electrical Engineering Department on work similar to that in the Mechanics Engineering Department to count as equivalent.

(III) Marine Technical Schools.

When nothing is stated to the contrary, time spent at a Technical School recognised as suitable for the training of Marine Engineers will, subject to the provisions laid down in paragraph 28* of the Regulations, be allowed to count as sea service in the ratio of three months at the Technical School to two months at sea, time so spent not to be accepted as equivalent to more than one-sixth of the total sea service required for a certificate.

Name of School or Institution.

Greenock	...	Watt Memorial School, Greenock.
South Shields	...	The Marine School, South Shields.

* *Paragraph 28.*—On and after January 1st, 1915, a candidate for either a second class or a first class certificate who, within two years from the date of application to be examined, has attended an approved course comprising general mathematical and scientific instruction at a Technical School recognised by the Government as suitable for the training of Marine Engineers, will be allowed to count time so spent as equivalent to sea service in the ratio of three months at the Technical School to two months at sea. Time so spent cannot be accepted as equivalent to more than one-sixth of the total sea service required for either certificate, but a candidate who has been allowed to count such time on examination for a second class certificate will not be debarred from counting similar subsequent time on examination for a first class certificate

In every case in which an allowance is made for time spent at a Marine Technical School, the candidate will be required to produce the Principal's certificate for continuous and regular attendance at all the approved classes and for satisfactory progress.

PART I B.

Orders by the Governor of Bengal in Council.

MUNICIPAL AND LOCAL.

NOTIFICATIONS.

No. 2325M.—The 29th December 1913.—The following draft of by-laws which have been framed by the Commissioners of the Krishnagar Municipality, in the district of Nadia, under section 350 of the Bengal Municipal Act, 1884 (Ben. Act III of 1884), and which the Governor in Council proposes to confirm under section 351 of that Act, is published for the information of persons likely to be affected thereby.

Nadia.

2. The draft will be taken into consideration on the 7th February 1914, and any objection or suggestion received by the undersigned, through the District Magistrate before that date, will be duly considered.

DRAFT BY-LAWS FOR THE KRISHNAGAR MUNICIPALITY.

DEFINITIONS.

Definitions.

1. In these by-laws—

(1) "Carriage" includes also a motor-car; and

(2) "Cattle" means cattle as defined in section 3 of the Cattle-trespass Act, 1871 (I of 1871).

2. In areas in which section 34 of the Police Act, 1861 (V of 1861), is in force, no act which constitutes an offence under that section shall be punishable under by-laws 17, 35 and 45.

PENALTIES.

3. The penalty for the infringement of any of these by-laws shall be—

Fines.

(*a*) a fine not exceeding the sum stated at the foot of the by-law;

(*b*) in the case of a second or subsequent conviction for a similar offence, a fine not exceeding the sum (if any) stated in that behalf at the foot of the by-law; and

(*c*) in the case of a continuing offence, a further fine, not exceeding the sum (if any) stated at the foot of the by-law as the daily fine, which daily fine may be imposed for each day after written notice of the offence from the Commissioners.

REGULATION OF TRAFFIC ON ROADS.

SIBPUR, *the 26th April 1912.*

NOTICE.

HER EXCELLENCY LADY HARDINGE of Penshurst has decided to give, out of the funds which have been collected for a Medical College for Women at Delhi, a certain number of scholarships for lady students who may wish to join that institution, when it is opened.

2. It is proposed to allot 18 scholarships of Rs. 30 a month each, tenable for two years. Four scholarships are allotted for students who are residents of the Presidency of Bengal.

3. The object of the scholarships being to enable ladies to enter the College at Delhi and take up a professional course there, the award will be made on the result of the Matriculation, School Final or School-leaving Certificate examination, the object of this procedure being to enable such students as have already enrolled themselves in colleges or have just completed their school course to pass the Intermediate examination of a University or an examination recognized as equivalent thereto in 1915, and thus to render themselves eligible so far as the examination qualifications are concerned, and to enter the college at Delhi at its opening.

4. Candidates for these scholarships must be statutory natives of India. They must also guarantee that they will study, for two years in a college affiliated to the local University, the course leading up to the Intermediate examination, or an examination recognized for this purpose as equivalent thereto, such special subjects as may be prescribed by that University as qualifying for entrance upon a professional course of medical study being included in the course. They must also undertake that on the completion of these two years they will seek admission to the Medical College to be established at Delhi, and continue their studies up to the examinations for the Medical degree for which that College will prepare students. Should the College be not completed by the close of 1915, suitable arrangements will be made for the instruction of the students elsewhere, until the College is ready to receive them.

5. The question of providing scholarships tenable during the period of study in Delhi is under consideration by the Governing Body of the College. It is hoped to make an announcement on this subject within the next six months. The continuance of the scholarships and the award of any further scholarships will be contingent on the progress of the scholars and the receipt by the Local Government of good reports upon them.

6. Scholarships will be awarded to such lady students as the Local Government may, on the results of the examination which closes the secondary school course, regard as most likely to profit by the facilities which the proposed College at Delhi will offer. Applications in the enclosed form, which must be submitted through the head of the College or head of a high school of which the applicant is a student, will be received in the office of the Director of Public Instruction, Bengal, up to the 15th January 1914. The scholarships will run for two years from the date on which each particular scholarship-holder enters on her preliminary course of study. In the case of a lady student who has already entered upon a course of study, the successful completion of which would qualify her for admission to the College, a scholarship may be awarded with retrospective effect from the date on which she entered upon the course or any date subsequent thereto.

W. W. HORNELL,
Director of Public Instruction, Bengal.

1. Name of candidate ... ...

2. Date of birth (the year, and the actual date of the month, if possible, must be stated).

3. Nationality—

   In the case of a pure European candidate the application must be accompanied by a duly authenticated statement to the effect that the applicant is a native of India within the meaning of the Statute, viz., that she was born of parents habitually resident in India and not established there for temporary purposes only.

4. Caste ... ...

5. Name of father or guardian ...
   In the case of European or Anglo-Indian candidates the names of both parents should be given and it should be stated whether they are living or not. In the event of both parents being dead, the name of the guardian must be given and his or her relationship to the applicant must be stated.

6. Place of residence ... ...

7. Education ... ...
   The names of the various schools or colleges at which the applicant has studied should be stated with dates in each case. The public examinations passed should be stated, as also any special distinctions gained.

8. Whether the applicant made any special study of any branch of science.

9. Whether the candidate, or her parent or guardian, in case she is still a minor, is prepared to execute a bond to refund the scholarship money, if she fails to abide by the conditions of award of these scholarships as detailed in paragraph 4 of the rules.

10. Names of relatives of position, and the precise relationship each bears to the candidate.

11. Names of two persons of position to whom reference regarding the candidate can be made.

12. Remarks of the Principal of the College at which the candidate is studying at present / Head of the school at which she last studied.

THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt: and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta,
or
the Superintendent, Government Press, Madras, or
the Superintendent, Government Central Press, Bombay, or
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Delhi, the 12th December 1913.

No. 71.—The Governor General has been pleased, under Rule 23 of the Rules for the conduct of the Legislative Business of the Council of the Governor General, to order the publication in the Gazette of India and in the local gazettes in English of the following Bill, together with the Statement of Objects and Reasons relating thereto, and the Bill and Statement of Objects and Reasons are accordingly hereby published for general information.

No. 13 of 1913.

A Bill further to amend the Negotiable Instruments Act, 1881.

XXVI of 1881. WHEREAS it is expedient further to amend the Negotiable Instruments Act, 1881, so as to remove doubts as to the validity of the making and endorsing of negotiable instruments in certain forms; It is hereby enacted as follows :—

Short title. **1.** This Act may be called the Negotiable Instruments (Amendment) Act, 191 .

XXVI of 1881. Amendment of section 13, Act XXVI of 1881. **2.** In section 13 of the Negotiable Instruments Act, 1881 (hereinafter called the said Act), after the figures "13" insert the figure and signs "(*1*)", and to the same section add the following sub-section, namely :—

"(*2*) A negotiable instrument may be made payable to two or more payees jointly, or it may be made payable in the alternative to one of two, or one or some of several payees."

Amendment of section 16, Act XXVI of 1881. **3.** In section 16 of the said Act, after the figures "16" insert the figure and signs "(*1*)", and to the same section add the following sub-section, namely :—

"(*2*) The provisions of this Act relating to a payee shall apply with the necessary modifications to an indorsee."

STATEMENT OF OBJECTS AND REASONS.

IT has long been the practice in this country to endorse negotiable instruments, particularly Government promissory notes, in such a way as to make them payable to two or more payees jointly, or in the alternative to one or some of several payees. Doubts have arisen as to the legal validity of such endorsements, and the present Bill is designed to place their validity beyond question. The amending Bill will affect all three forms of negotiable instruments, *viz.*, cheques, promissory notes, and bills of exchange, and will result in a close approximation of the Indian to the English law on the subject.

Obituary:

The death of Sir W. A. Dring, K.C.I.E., who was long a member of the Garden, was a great loss to the Committee, who at their meeting on 30th November 1912 resolved that an expression of the regret of the Committee at his sad and untimely death be recorded and a copy sent to Lady Dring with a message of condolence and sympathy.

2. STAFF AND ESTABLISHMENT.

During the absence of Mr. B. Basu on deputation to England, Mr. Surendra Krishna Mittra, Lecturer, Bengal Veterinary College, was placed in charge of the Garden from 1st April to 3rd August 1912. Babu Somadev Ganguli acted as Assistant Superintendent throughout the year and Babu Panchanan Mukherji was appointed to the vacant post of Gate Clerk.

The following is a list of the superior staff of the Garden at the end of 1912-13:—

Superintendent:

Mr. Bijay Krishna Basu, G.B.V.C., C.M.Z.S.

Assistant Superintendent:

Babu Somadev Ganguli.

Store-keeper and Typist:

Babu Jugal Kishore Roy.

Overseer:

Babu Niranjan Mukherji.

Gate Clerk:

Babu Panchanan Mukherji.

The following is a list of the menial staff of the Garden at the end of 1912-13:—

1 Head-keeper.	1 Cook.
20 Keepers.	3 Sweepers.
10 Durwans.	1 Chaprasi.
3 Bhistis.	2 Cartmen.
1 Carpenter.	1 Syce.

1 Scytheman.

Besides these, there were a number of labourers engaged temporarily by the Garden.

3. BUILDINGS.

During the past year the most important improvements comprised the construction of the Rodent House, the remodelling of the Murshidabad House, the conversion of the old Rodent House into a Refreshment pavilion, the construction of the kitchen and the construction of lavatories for ladies and gentlemen, the renewal of the wire-netting of the Sarnomoyi House, the conversion of the Skating Rink into a lawn, the conversion of the old Refreshment pavilion into an Insect House.

(1) *The construction of the Rodent House.*—The rodents were accommodated in small wire cages in a dark and unattractive house and the animals had no outdoor runs. To afford them greater facilities for movement and exercise the present house was built. It is a circular brick-built house very similar to the new Monkey House with a large open-air enclosure and is divided into 16 compartments. A number of trees were planted to afford the animals facilities for indulging in their natural habit of climbing trees.

(2) *The remodelling of the Murshidabad House.*—This is another great improvement effected during the year. The small outer cages were demolished and big open-air aviaries were substituted instead. Advantage was also taken to improve the site by constructing ornamental rocks and rivulets which are fed by pipe-water. Mango, papaya and plantain trees are planted inside, and the Birds of Paradise who are the inmates of the house enjoy themselves in their natural surroundings.

(3) *Refreshment Hall.*—The removal of the rodents to the new Rodent House afforded the Committee the opportunity of improving the site and converting it into a Refreshment Hall. The whole structure was remodelled and a verandah was built on the western side facing the lawn. The floor was laid with white marble and the whole place is greatly improved and converted into an excellent Refreshment Hall. A kitchen was also built and a cooking range provided for, and the increased demands of the public will be served by the new accommodation.

The agreement with Messrs. Wallace having ended on 31st December 1912, Messrs. Peliti were given a contract for the catering at the Garden.

(4) *Lavatories for ladies and gentlemen.*—The arrangement was primitive, and the want of proper lavatory accommodation for the visitors was long keenly felt, but the work could not be taken in hand for want of funds.

The present retiring rooms for ladies and gentlemen have been built on approved lines and meet the requirements of the increasing number of visitors.

(5) *Insect House.*—The old Refreshment pavilion which had been lying vacant on the transfer of the Refreshment room to the new building was thoroughly overhauled and converted into an Insect House. The stone floor was relaid and the partition removed and the woodwork repainted. Show-cases were constructed for exhibiting various kinds of insects.

(6) The large plot of land occupied by the old Skating Rink was unsightly and useless, and the Rink was gradually falling into a state of disrepair and decay. It was

suggested that the site might be utilised for some better purpose. The Rink was accordingly dismantled and the site converted into a lawn.

Among minor works that were undertaken during the year may be mentioned the construction of a new road leading to the Hippo enclosure from the Burdwan House, the renewing of the wire-netting of the outer cages of the Sarnomoyi House and a thorough repair of the inside wire-netting of the same house, the construction of windlasses in the Small Carnivora House, teakwood flooring of the Abdul Ghany House.

As all available funds were spent in original construction, the annual repairs could not be carried out on an extensive scale. Only those houses which needed repairs very badly were attended to.

4. FINANCE.

The financial condition of the Garden is satisfactory. The receipts from visitors steadily increased and amounted to Rs. 50,499 as against Rs. 48,496-11 of the previous year, thus showing an increase of Rs. 2,002-5.

The following is a comparative statement of receipts from visitors:—

Year.	Receipts. Rs. A.
1910-11	42,018 12
1911-12	48,496 11
1912-13	50,499 0

The amounts of income and expenditure are summarised in Appendix A.

5. VISITORS.

The total number of paying visitors to the Garden during the year amounted to 656,402, showing an increase of 27,251.

Comparative table of visitors during the last three years.

Year	Visitors
1910-11	537,122
1911-12	629,151
1912-13	656,402

In addition, a large number of children under four years of age and school children attended by their teachers were admitted free. On the day of the Fancy Fair about 6,000 people entered the Garden. Besides these, 62,222 persons visited the Garden on the free days. A list of free days with the number of visitors is given in Appendix C.

6. DEPUTATION OF THE SUPERINTENDENT TO EUROPE.

In April 1912 the Superintendent of the Garden, Mr. B. Basu, was deputed by the Committee in connection with the transport of the King's collection of Nepal animals to study the management of the Zoological Gardens in England and Europe.

CONCLUSION.

The thanks of the Committee are due to the ladies and gentlemen who have added to the collection of the Garden by their donations, a list of which is given in Appendix D. Thanks are also due to those who kindly offered to present animals to the Garden, but whose offers could not be accepted, either because the particular species of animals was already sufficiently well represented, or owing to the want of accommodation.

The Committee also desire to express their sincere thanks to the Officers Commanding 40th Pathans for allowing their band to play on Sunday evenings without charge.

The thanks of the Committee are also due to many Railway and Steamer Companies for conveying animals belonging to the Garden free of charge and in particular to the East Indian Railway Company, Eastern Bengal State Railway, Bengal-Nagpur Railway Company, Oudh and Rohilkhand Railway, Bengal and North-Western Railway Company, British India Steam Navigation Company, India General Navigation and Railway Companies and Rivers Steam Navigation Company.

The Committee acknowledge with thanks the assistance of Dr. N. Annandale, B.A., D.SC., and of F. H. Gravely, Esq., in organising the Insect House.

E. HAROLD BROWN,
Honorary Secretary.

F. W. DUKE,
President.

SUPERINTENDENT'S REPORT.

I HAVE the honour to submit the following report on the existing condition and the progress of the menagerie of the Garden.

The following comparative table shows how the various collections of animals in the Garden stood during the last four years:—

Year.	Mammals.	Birds.	Reptiles.
1909-10	... 589	1,137	247
1910-11	... 599	1,342	259
1911-12	... 654	1,612	127
1912-13	... 341*	1,188*	150

* The apparent reduction in the number of animals is due to the rabbits, guineapigs, common rats, common doves, common mynas, coels, etc., having been excluded from the list by order of the Committee of Management of the Garden.

ACQUISITIONS.

The collection of animals was enriched by numerous additions to the menagerie: the most important of them are the following:—

No. 9648P., dated Calcutta, the 27th December 1 13.

From—THE HON'BLE MR. J. G. CUMMING, C.I.E., I.C.S., Officiating Chief Secretary to the Government of Bengal.

To—The Honorary Secretary, Zoological Garden, Calcutta.

I AM directed to acknowledge the receipt of the Report of the Honorary Committee for the management of Zoological Garden, Calcutta, for the year 1912-13, forwarded with your letter No. 79, dated the 12th December 1913, and to convey the thanks of the Governor in Council to the Committee for their management of the Garden during the year.

2. The acknowledgments of His Excellency in Council are due to the gentlemen named in Appendix D to the Report who presented the Garden with various animals during the year.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 29th December 1913.

Summary.—During the week under review no rain fell throughout the province except some light showers in parts of Darjeeling and Jalpaiguri. Harvesting of winter rice is continuing briskly and is nearing completion. The outturn is reported to be fairly good. The prospects of *rabi* crops are hopeful. Cattle-disease is reported from three districts only. The average price of common rice has fallen by about 0·42 per cent. as compared with that of the previous week.
